
The Part Timer

At the Wednesday morning session, G. J. A. Reany, vice-president of the Edmonton association, took the place on the programme of R. B. Bennett, K.C., who was unable to attend. His address, on "The Underwriter's Mental Reserve," was enthusiastically received.

At the close of this address the following resolution, which was carried by a standing vote, was passed:—

"This convention of Life Underwriters goes on record as opposed to the employment of the part-time agent in cities or towns of five thousand population or over, and that this question be referred to the executive committee with a view to securing the co-operation of the Life Officers' Association with the above object in view."

The place on the programme assigned to advertising, which was to be discussed by Hon. Sam Latta, Minister of Highways, Regina, was taken by W. J. Young, of Saskatoon. He referred to a plan of advertising which the managers of companies in Saskatoon had carried out, the plan being in the form of whole-page reading articles and display advertisements, no company's name being mentioned, but emphasizing the value and necessity of life insurance.

Western Men Good Risks

"The best risks taken by the insurance companies are in your western provinces, because it is here in particular that one finds a strong, sturdy, clean class of fellows, and that is why the western business is so highly valued by the companies." This tribute to the healthiness and character of the men of the west was paid by Dr. T. F. McMahon, medical referee of the Manufacturers' Life, of Toronto, at the close of an important address bearing on the medical problems incident to insurance risks. Dr. McMahon went on to say that there is no better class of medical examiners than those who are to be found in the four provinces of Manitoba, Saskatchewan, Alberta and British Columbia. He made the interesting statement in the course of an address on "Blood Pressure" that this pressure has not generally been found to be higher among returned men than among other citizens except in certain cases, where continuous long marches and excessive physical strain had caused increased pressure, and thus made these men poorer risks. It was a curious phenomenon among the general public that since the influenza epidemic of last fall a large number of persons examined were found to have abnormally low blood pressure, and in some cases this was considered more serious than high pressure. A combination of high blood pressure with overweight constituted the most serious condition from the standpoint of insurance risks.

Dr. McMahon said that experience had shown that the trained medical man was a poor guesser as to the probable duration of the life of the individual risk, unless he had the close co-operation of the actuary. Only by the assistance of statistical evidence was it possible to arrive at even approximately satisfactory conclusions. He declared that, in so far as the tests of blood pressure and of other similar tests are concerned, "some men are young at 60 and others are old at 40. There is some truth in the saying that a man is as old as his blood vessels. Some families show a remarkable tendency to early hardening of the arteries, and the mortality in such families is decidedly above the average."

Mutual Interest with United States

In an address on the "American Life Underwriter," Jonathan K. Voshell, president of the National Association of Life Underwriters, said:—

"Canada and the United States have long been friends, particularly life insurance friends, and I hope this will continue to be the case, not to-day or to-morrow, or next week, but for all time. I want to try to make you feel that the greetings I bring to you from the other side of the border come from the bottom of our hearts, and that they are deeply sincere. We are already co-operative in many of our undertakings, and I believe we are going to remain so.

"It is difficult to properly define the Life Underwriter of America. Tracing his connection with the nation's biggest business, we find him originally a small factor in its development. In the early years of field activity he was recruited mostly from the profession of the ministry and schoolmaster. Usually, the first was characterized by a tall, gaunt frame, clothed in the long, double-breasted frock coat, with trousers of the 'cloth' to match, well fitting his high top boots, white duck waistcoat, collar and white linen bow tie, with quite often a head-covering of the tall, silk 'beaver' stovepipe hat. This was the type of life insurance agent, for he was only an agent, and not an individual with knowledge of salesmanship, which characterizes the efficient producer of to-day. He sold insurance, what he did sell, because of his belief in the virtues of the deal, and because it presented an opportunity to increase his all too meagre income from his position as a pastor of the church. The school teacher took up agency work for much the same reason, except that he went about it in a more businesslike way. He looked into the future, and he made calculations for a long term of years, and gambled with his life against his expense account. He took the 'long' of success and put it up against the 'short' of failure. I think there has been no more successful men in American underwriting, and surely none more useful in the development of the business than the men of schoolmaster class.

"With the anti-rebate laws in force, assuring a full commission to the writer of life insurance, and contracts guaranteeing a fixed renewal over long periods of years, assuring an income whether the producer of the business lived or died, there came to the fore an entirely new type of agent. He, as did the school teacher, figured the possibilities of large financial returns to the successful man, and went in to win laurels for his prowess as a premium builder, and to establish for himself a position in life second to none. He waded in up to his neck, so to speak; and then came days of competition, big commissions, part-time men, unlawful rebating, 'twisting,' and all the evils incident to a selfish desire to 'do' the other fellow, and to 'do him quick.'

"Then the investigation—the floodgates of scandalmongers, vituperation and slander were let loose, damning the business of life insurance for its waste of the public's money; but not a word was said about the benefiicaries of the squander being participants in the loot. The investigation, with its harsh methods in getting at the facts, and the publicity connected therewith, was condemned on all sides, but it saved the day for life insurance, as all those who then assailed the committee and its work now gladly admit.

"Before this period of life insurance field experiences there were really very few idealistic practices, no altruistic principles. The business was, to a very large extent, a dollars-and-cents proposition.

"The one bright spot on this horizon was the association of men who had, many years before, laid down certain principles which they hoped might prevail, and to those principles the present field now looked to as a way to lead them out of the mire into which the business had sunk, and so they resolutely set about to accomplish their purpose by a co-operation of effort seldom seen before. The old type of agent had seemingly, as if by magic, disappeared. The unethical methods had driven many men out of the life underwriters' associations. Conventions were still held, but the attendance was small. A new order of things had to be set up. New ideals were formed. A re-writing of the old consti-

OUR BUSINESS

"Believing that trust companies created for the administration of trusts should practically last forever the Board of this Corporation have laid down the principle and have acted on it from its inception (in 1882) that we shall exclusively confine ourselves to a trust and agency business."

tution of the National Association of Life Underwriters put the machinery in motion for a code of ethics which meant much for the policyholder and agent alike; and to-day, what do we find? A solid mass of men and women representing the business in the field, whose characters are above reproach, and who, first, last and all the time, see to it that the association shall advance the interests of true life insurance."

Equal Rates for Men and Women

One of the entertaining features of the convention was an address by Nellie L. McClung, of Edmonton, entitled "The Well-Wishers." She said, in part:—

"Insurance is a great democratic movement, founded on the highest principles of brotherhood. It knows no barrier of race, creed or color. It is one of the great forward movements which binds nations closer. The insurance risk need only be willing and healthy—and of the male sex—to enjoy all the protection and privileges. (On reflection, I withdraw one of the conditions—he really does not need to be 'willing.' It makes it easier if he is, but it is not an obligatory condition.)

"But the insurance companies do not want to insure women. They frankly tell you why. To them, womanhood is a sort of disease. It is not a pleasant thought! We know that in the inscrutable wisdom of providence, women are made to bear the burden, pain and danger incident to the propagation of the race. We are all agreed that it is desirable that the race should be perpetuated, and that it is a matter which concerns all humanity instead of half of it. Now that being so, why should not the risk be covered, so far as insurance is concerned, by raising the rate for all to include loss of life from the causes indicated?

"In refusing to give women disability claims, on the alleged grounds, insurance companies are doing an ungracious and unchivalrous thing which no smooth sounding phrase can explain or justify. I leave the thought with you! Let me pass on to speak of other things.

"It is in no flippant way that I address you to-day as 'the great well-wishers.' You are. You want everyone to live long. You want every one to be in good health. Anæmic people, consumptive people, people with any serious disease, are no good to the insurance business. You cannot do business either with the lazy and shiftless ones, who cannot save enough to pay their premiums. Your business depends for success, on the industrious, healthy individual. Therefore, it is in your interests; it is your business to see to it that conditions are made right for the development of industrious and healthy people. The enemies of humanity are your enemies, if you are a real insurance man, loyal to your company, loyal to your job, and loyal to your fellowmen.

"Insurance men are divided into two classes—real ones and dubs. The real ones give their lives to the work; the dubs make a living at it. The real one sees in insurance his way of serving his fellowmen. He sees in it a possibility of educating the young and thoughtless in the ways of thrift, industry and thoughtful provision for the future. He sees that in selling a policy he may increase a man's self-respect, and give him a new vision of his duty to his family, which will make him a kinder husband and a better father. He sees, in insurance, a way of counteracting the deadly gambling spirit which has made its fatal inroads on our industrial life, with its ghastly fruits of ruin, loss and moral degeneration. The real insurance man sees in his work an honest, equable and safe investment, which will bring comfort and self-respect to those who make it.

"The real insurance man sees certain agencies, which prey upon humanity and make men unwilling and unfit for insurance. He sees the liquor traffic and its attendant evils, which destroy a man's earning power and his moral responsibility. The liquor traffic is a hindrance to insurance, as it is to every legitimate enterprise. Against it, the real insurance man is at war. The greed and selfishness of the big interests, which squeeze the life out of our people and make it impossible for the honest worker to make a comfortable living, are the enemies of insurance. The great boom days, when every one had lots of money, was a poor time for insurance, and the sickly gray dawn of the morning after—when nobody had money—was an equally poor time. Your work prospers in the sane and sensible time of steady prosperity. Therefore, it is your business to help to make the times normal, and that can only be brought about by the elimination of social injustice.

"The dub sees nothing, cares nothing for any of these things. He will brazenly tell you he is out for the money. He does not care what sort of policy he sells a man, so long as he gets his commission. His motto is: 'Anything is right, if it will go.' He knows no code of honor regarding other men's prospects. He delights in selling to foreigners, whose imperfect knowledge of the language makes them easy victims of his specious promises. But I am not speaking to dubs. They are not here. Conventions are foolishness to them."

After the address of Mrs. McClung, the following resolution was moved by G. J. A. Reamy, Edmonton, and carried: "That this convention go on record as approving of the suggestion of Mrs. McClung that the life insurance institutions of Canada should so arrange their rates for life insurance as to make no discrimination in the rates charged for the insurance of men and women." On a suggestion of Mr. J. P. Conrod, of Regina, Mr. J. F. Weston, managing director of the Imperial Life, in further supporting the resolution, said: "I was so scared by the presentation of this case and so moved by Mrs. McClung's appeal upon the true spirit of usefulness, that I take a great deal of pleasure in moving such a resolution. I am entirely in sympathy with a scheme of lumping premiums and plans to people generally regardless of sex."

Soldiers' Wills

The printed form of will which was pasted in the active service paybooks of hundreds of thousands of Canadian soldiers during the war, was made out in misleading form and, in consequence, the wills of at least some of the men who were killed on service have proved difficult of interpretation. This circumstance was discussed by Charles Ruby, general manager of the Mutual Life of Canada, in the course of an address on "Our Beneficiary Laws." The fact that judges tend to take a broad view of such will, to consider the matter of intention, has enabled some of the difficulties to be overcome.

Mr. Ruby cited a court decision of peculiar interest, in which the interpretation of a soldier's paybook will was in question. The testator, whose name was Monkman, had before marriage taken out an insurance policy, of which the beneficiaries were his mother, father and brother. When later he filled out the form of will in his paybook he was a married man, and the will stated briefly: "My personal estate I bequeath to my wife." It happens that in the technical sense benefits from an insurance policy are not personal estate of a testator, but on the army form, beneath the place where the will is executed, is a footnote to the effect that "personal estate includes pay, effects, money in bank, insurance policy, in fact everything except real estate." Appearing where it did, the footnote was no part of the will, and no specific reference to the policy was made in the will. Taking a broad view of the soldier's intention, the judge gave a decision to the effect that if personal estate could include an insurance policy, this should go to the testator's wife. Other similar decisions have been made by the courts.

Can a woman who has evoked the law of a foreign state in order to obtain a divorce, subsequently impugn the jurisdiction of that court in order, after her husband's death, to lay claim to benefits from his life insurance policy? According to an important decision of an Ontario court cited by Mr. Ruby, she cannot. In this case a man named William Banks, living in Canada, had insured his life, making the policy payable to his wife. Subsequently, the wife went to Chicago, and there obtained a divorce. Banks died in August, 1917, and by his will left one-third of his insurance benefits to his son, one-third to his brother and one-third to his sister. According to the Canadian law, a man's mother, wife, child and grandchild, are "preferred beneficiaries" under any life insurance policy which he may have

taken out, and while he may make a change of beneficiary within the preferred circle, he may not go outside it without the consent of the person to whom the policy was made out. If his wife had not obtained a divorce, therefore, the bequeathal of one-third of his estate to his son would have been valid, but the other two-thirds must have gone to his wife. With a view to obtaining possession of it, the divorcee sought to establish that the divorce which she had obtained on her own application in Chicago, was not valid in Canada, and that she remained Bank's legal wife until his death. The court ruled that it was not open to her to make the contention that the divorce was not valid. The decision of the court was supported by precedents. These established that so far as any divorce obtained in a foreign country is concerned, it is beyond the jurisdiction of the party who evoked the foreign law subsequently to impugn it.

Another interesting legal decision, in which the removal of an insured person to a foreign country and his making a will there gave rise to some difficulties in determining to whom his insurance benefits should be given, was explained by Mr. Ruby. A man named Baeder, living in Ontario, bought an insurance policy in which his child was named as the beneficiary. He afterwards became domiciled in New York State, and there he died leaving a will which appointed his grandchild beneficiary of the policy. If he had been living in Ontario, the validity of this change could not have been questioned, since it was within the circle of preferred beneficiaries. But under the New York law such a change of beneficiary is not recognized, and so far as the beneficiaries under an insurance policy are concerned, the laws of the country in which the insured person is domiciled at the time of his death, is the law which must be observed. From this it appeared that the child in whose favor the policy had originally been made out should secure the benefits. The court found, however, that under the terms of the will a trust had been created, and this trust under the statutory law of Canada could not be set aside. The grandchild therefore received the benefits.

Report of Secretary-Treasurer

In his report for the year, the secretary-treasurer, J. H. C. Graham, said:—

"In our own sphere the year has been one of great importance and striking developments. Four new associations have been formed—viz., Chatham, Oshawa, Sarnia and Windsor, with Medicine Hat and Lethbridge reorganized; 41 associations are reporting as against 35 last year, 34 of which show an increase in membership, the total paid membership is over 2,200 at this date in comparison to 1,381 at the end of 1918 (which figures also included 27 associate memberships not now allowed under the ruling of the executive committee); the total gain represents approximately a 60 per cent. increase in membership. This we consider to be most favorable in consideration of the disadvantage the associations and the office of the association were laboring under in view of the influenza epidemic, the strike situation and the period of reconstruction following the signing of the armistice, and the patriotic duties it was their pleasure to perform.

"Great credit is due our worthy president, Mr. P. A. Wintemute, for the energy and devotion he has shown in everything pertaining to the organization throughout the year. Especially would we mention the fruits of his tour of the local chapters, which is the crowning achievement, for the locals have evidenced a greater activity and a warmer appreciation of the movement. Special mention should be made of the anti-rebate law fostered by the St. John's Association and passed at the last session of the Newfoundland legislature; the course in life insurance at the University of Manitoba under the auspices of the Winnipeg branch; newspaper advertising by the Saskatoon, Regina and Prince Edward Island Associations; the Insurance Educational Congress of the London Association.

"Other events marking the '13th' year are the recognition by the Dominion government of the association, in placing the general secretary and the president of this organization on the Dominion executive of the Victory Loan of 1918 and also for the new loan to be marketed this fall; the participation of the members of the L.U.A.C. in the Victory loan drive, the Red Shield, the Red Triangle, the Red Cross, the Catholic Army Huts campaigns, etc. Also the office of the association has been enlarged, with increased staff, and the first executive meeting to be held in the 'home' of the association was held there in February of this year.

"With the close of the war we find that approximately 1,650 life insurance men were in the fighting forces of the country, made up of 400 from the head offices and 1,250 from the field force. This number represents a large percentage of the total number of field men in the business. An honor roll has been prepared bearing the majority of these names in such form that it can be preserved for generations. In the repatriation period we are pleased to note that the life insurance companies generally have undertaken courses in life insurance and salesmanship for the purpose of fitting numbers of the men who have seen service for the country to become life insurance salesmen.

"Beside accompanying President Wintemute to Peterborough, Ottawa and Montreal, and visiting the Oshawa Association, it has been my privilege to address the employees of Gurney's foundry on the subject of life insurance.

"For the coming year there are many plans in mind, including sectional congresses; changes for the betterment of the Life Underwriters' News, as outlined in the report submitted by the board of directors of our official organ; the issuance of a membership certificate for framing purposes, etc.

"The foundation of the association has been shown to be well laid and the building is now being raised well above the ground level. This will be to the satisfaction of those who like to watch the developments. The past year has evidenced the erection of a structure which will be a monument to the early fathers of the movement and the present workers of the organization. The specifications for the coming year will add greatly to the grandeur and usefulness of the 'building,' which time will show."

Assist in Promoting Thrift

A resolution regarding the co-operation of the insurance companies with the Y.M.C.A. in the thrift week campaign which that association proposes putting on the third week in January of next year was presented to the meeting by G. E. Archibald, of Sydney, N.S., as follows:—

"This thirteenth annual convention of Domininon Life Underwriters, this day in convention assembled, have resolved that the Life Underwriters' Association of Canada hereby endorse the proposal to put on a national life insurance day programme in Canada in connection with the National Thrift Week Campaign along the same lines as that now being promoted by the Y.M.C.A., both in United States and Canada. That we encourage our local associations throughout the Dominion to take part in this programme and that a copy of this resolution be forwarded to J. Russell Harris, of the Y.M.C.A. National Council of Canada at Toronto."

The resolution passed unanimously by the convention, many of the members expressing their enthusiasm at the prospect of such an undertaking and pledging their support.

The expenditures of the association for the year were $9,411, and receipts were $10,094, so there was a substantial credit balance remaining. Fees from members $4,497, and contributions to the sustaining fund $3,009, make up most of the revenue.

Mr. Hall reported for the finance committee, and, after a full discussion of the association problems, the following motion was carried: "This committee recommends to the convention that the local associations pay a $4 fee for each member of their association, and that this fee include subscriptions to the Life Underwriters' News and special certificate of membership." After considerable discussion the whole report, including this part, was adopted.

Two essays were received in competition for the North American Life cup, but at least three are necessary before an award can be made. The educational committee, in its report, stated that little had been done during the year, owing to unsettled conditions. A course was commenced in the University of Manitoba, however in January, and an

A BOAT TRIP

OF THRILLING INTEREST

THE route is one of wondrous beauty—the boats are floating palaces, providing a new experience in travel de luxe.

Through the kaleidoscopic beauty of the far-famed "Thousand Islands" winds this route of scenic enchantment. Then it traverses the River Rapids of the St. Lawrence—the "shooting" of them is an experience that charms and exhilarates.

Many miles of scenic splendor—so wonderful you'll marvel why anyone ever went across the sea for scenery when this vacation route is so readily accessible, and at so moderate a cost.

CANADA STEAMSHIP LINES, Limited

instructive educational congress was held in London, Ont., in June.

Provincial Legislation

John A. Tory, chairman of the legislative committee, in his report, said: "Shortly after my appointment I outlined a letter to different men in each province, as well as to the vice-president stating that it was our intention to build up the strongest legislative committee possible, and asking for recommendation for the appointment of a man to that committee. I also had consultation with the leaders in several of the provinces, with the result that the following men have been asked to serve on the committee and have accepted: E. R. Machun, for New Brunswick; J. T. Wilson, Halifax, N.S.; M. Monaghan, province of Quebec. D. J. Scott, province of Manitoba; D. A. Ayres, Edmonton, Alta.; Branton S. Brown, manager of the Crown Life Assurance Co., at Vancouver; E. S. Miller, for Saskatchewan; E. R. Brow, Prince Edward Island; Henry Powell, Louisville, Kentucky, representing the American associations.

"My first step after the appointment of the committee was to try and find out what legislation is likely to take place this year, and I find that in the province of Manitoba a new taxation bill is being presented. In the province of Quebec we are still having trouble with reference to municipal taxation. Under date of December 12th a local delegation waited on the premier of Quebec with reference to the Municipalities Act, and that case is still under discussion, being handled by Mr. Monaghan. I also had an interview with Mr. Kilgour, honorary secretary of the Life Officers' Association, with reference to general legislation, and he is dealing with the life officers at the present time, and it may be that we will be called upon to support the life officers in any campaign that they undertake with reference to the question of taxation, as no doubt you all agree with me that the great problem that faces the life insurance companies at the present time is the question of taxation, and the Life Underwriters of Canada can be of great use to the Life Officers' Association in supporting them to the limit in whatever action they may undertake and ask for our co-operation. I have undertaken, on behalf of the Life Underwriters of Canada, to see that the Life Officers are kept posted as to all pending insurance legislation.

"There is a general feeling that there will be very little legislation in any of the provinces outside of the taxation bill this year, and that there will be only one or two slight amendments to the Federal Act at the coming session of parliament, but there is a general feeling that there will be a great deal of legislation during 1920.

"Since my last report to the executive committee, February 7th, very little has taken place with reference to legislation in the different provinces, but you will be glad to know that the committee in each province has watched the legislation with great care. The following letters from the representatives of the committee from each province follow:—

"Prince Edward Island, E. R. Brow—Re life insurance legislation in this province, would say that no legislation has taken place since April, 1907. In April, 1906, an Act respecting life and accident insurance was passed doing away with all previous enactments, and this latter Act was slightly amended in April, 1907. Since then no further enactment has taken place.

"Alberta, D. A. Ayres—Regarding life insurance legislation in Alberta during the past year, I may advise that no legislation whatever was enacted which pertained directly to life insurance. There have been two amendments to the Succession Duties Act during the past year or so which might be indirectly interesting to you. If they are, kindly advise and I will secure you copies of each of these.

"New Brunswick, E. R. Machun—There has been no legislation in New Brunswick during the past year affecting life insurance.

"Quebec, M. Monaghan—I am very happy to state that there was no life insurance legislation, good, bad or indifferent, enacted during the last session of the Quebec parliament, for which heaven be thanked. I watched the matter very attentively, fearing other inroads to those already existing might be added.

"British Columbia, Brenton S. Brown—Your letter of the 2nd inst. to hand, and this was the first intimation I have had from you since my letter to you re parliamentary committee for British Columbia. I am writing the insurance department, Victoria, to get any legislation effecting insurance which has been passed in the last two sessions, and upon receipt of same will forward it to you. I beg to advise that no legislation was passed during the last session of the legislature of this province affecting life insurance.

New Regulations in Saskatchewan

"Saskatchewan, E. S. Miller—Replying to your letter of the 2nd inst., I am enclosing you herewith a copy of Chapter 3 of the Act to Amend the Saskatchewan Insurance Act. Sections 4 and 5 cover the only changes in the way of legislation during the past year. In addition to that there has been a change with regard to the taxation covered by section 6 of chapter 4, the Corporation Taxation Act, 1919, copy of which I am also enclosing you.

"You will notice that Mr. Miller refers to change in Insurance Act in Saskatchewan. I quote the sections referred to: 4. Section 16 as amended by section 1 of chapter 54 of the statutes of 1917 (second session) is amended by adding thereto the following subsections: '(3) No contract of insurance shall be issued or delivered in Saskatchewan by any company licensed under this Act until a copy of the form of such contract has been mailed by prepaid registered letter to the superintendent and duly approved by him. (4) No change or variation in a form so approved shall be effective until filed with the superintendent and duly approved by him.' 5. The first subsection of section 17 is repealed and the following substituted therefor: '17. Every company licensed under this Act shall cause to be printed, stamped or written in plain letters across the face of every policy, interim receipt or other insuring document which falls within section 192 of this Act, the words 'Licensed under the Saskatchewan Insurance Act.' As I stated in my former report I did not expect any new legislation during the session of 1919, but I am quite sure that we can look for much during the coming winter—and our committee must be on guard all the time to protect the interest of our policyholders. I think the time has arrived when we should try and get a uniform license law for all Canada. Also an effort should be made to get a reduced tax rate and other important legislation. I would again recommend that the convention make any suggestion that they would like the committee to deal with."

New Officers

The following is the list of officers elected for the year 1919-20:—

Hon. president, P. A. Wintemute; president, E. S. Miller, Imperial Life, Regina; vice-presidents—J. T. Fahay, Metropolitan Life, Vancouver; C. P. McQueen, Great West Life, Alberta; S. J. Adler, Canada Life, Saskatoon; W. T. Hart, Policy Holders' Mutual Life, Winnipeg; T. J. Patton, Great West Life, Toronto; C. C. Gauvin, Quebec; R. L. Cruickshank, New Brunswick; G. E. Archibald, Nova Scotia; E. R. Brow, Prince Edward Island; J. Mackenzie, Newfoundland; hon. secretary, Geo. L. Goodrow, Dominion Life, Hamilton.

Executive Committee—Belleville, G. F. Cole; Brandon, J. J. Smiley, F. W. Hobson; Brantford, W. B. Burrill; Brockville, H. B. White; Calgary, R. B. Hood, A. McTear, P. G. Leaney; Charlottetown, J. O. Hyndman; Chatham, W .N. Houle; Edmonton, W. L. McBeith, W. W. Hutton, G. J. A. Reany; Guelph, G. Powell Hamilton; Halifax, C. S. Durrant; Hamilton, Chas. L. Boyd, Mr. Coons; Kingston, M. G. Johnston; London, J. J. Callaghan, P. A. Bowen, Israel Taylor; Medicine Hat, P. J. Daly; Montreal, C. A. Butler, Geo. E. Williams, J. D. Young; Moose Jaw, A. W. Irwin, D. L. McCurdy; North Battleford, C. C. Fauset; North Bay, A. H. Kilgour; Oshawa, C. C. Stenhouse; Ottawa, W. J. Phillips, Walter Lamb; Peterboro, C. F. McClellan; Prince Albert, R. E. Williams; Quebec, Antoni Lesage; Regina, D. E. Spencer, L. E. Yingst, A. E. Harwood; Sarnia, H. A. Link; Saskatoon,

Rapid and Efficient Delivery

ABILITY to fill rush orders is often the secret of business success.

Speed — service — reliability — are embodied in the Ford Motor Truck.

It brings the distant suburbs—the adjoining rural districts—to your door.

You may often arrange to haul return loads at a profit.

Satisfies your customers and yourself.

H. S. Potter, W. J. Young; Sault Ste. Marie, C. W. Pearson; Sherbrooke; H. St. C. Clayton; Sydney, Chas. W. Semple; St. Catharines. H. J. McAvoy; St. John, N.B., R. L. Sipprell, G. C. Jordan; St. John, Nfld., C. A. C. Bruce; Stratford, J. B. Hilts; Thunder Bay, T. Ferguson; Toronto, H. Bingeman, O. B. Shortley, H. W. Manning; Vancouver, F. W. Marsh, B. S. Brown, J. A. Birmingham; Victoria, W. Murphy; Windsor, R. J. Henry; Winnipeg, H. B. Andrews, J. H. Baird, I. M. Huestis; Woodstock, Budd Irving.

Thursday afternoon was given over to entertainment, when upwards of 150 motor cars conveyed the delegates to the large and picturesque ranch of P. Burns, about ten miles from Calgary. Here exhibitions of branding calves and roping cattle, and also bucking horses were given, and supper provided in real ranch style. On Friday a presentation and address of appreciation was made to retiring President P. A. Wintemute for his untiring efforts in the interests of the association during the year of a handsome Victrola, which was graciously acknowledged. Mrs. Wintemute was also on hand to share the honor.

The place of convention for 1920 was decided in favor of the city of Quebec. A strong invitation was on the table from the far western city of Victoria, which retired in favor of Quebec. A demonstration in actual canvassing was put on, which proved of great interest. The first prize of $15 was awarded to Chas. Fauset, his subject being Mr. Maher, and the second prize of $10 to Geo. Hutchinson, of the Great West Life, his subject being Mr. Sam Adams.

Gain in Membership

The membership of the different local associations, compared with last year, is as follows:—

Name.	1919.	1918.	Gain.
Winnipeg	182	133	49
Calgary	169	78	91

Indicates decrease. Total gain, 881.

HYDRO-ELECTRIC REVENUE HIGH

According to the interim balance statement and revenue account submitted to the Toronto Board of Control by the Toronto Hydro-Electric System for the half-year ended June 30 last, the income amounted to $1,193,054. The expenditure was made up as follows: Electric current, $327,777.71; expenses of operation, management, repairs, etc., $346,082.09; a total of $675,859.80, leaving $519,195.01 of net income from operations for the period. This has been applied as follows: Interest, $204,295.54; sinking fund, $79,276.17; balance for depreciation and adjustments, $235,623.72.

The total revenue of $1,193,054.81 compares with $1,157,108.44 received during the corresponding period in 1918. The balance for depreciation was $235,623.72, as compared with $154,663.36 in the same half-year of 1918.

MANITOBA FIRE LOSSES IN MAY AND JUNE

According to the provincial fire commissioner's report, which was delayed by strike conditions, the amount of fire loss in Manitoba during the month of May was $159,300, a decrease of $26,978 from that of the previous month. Out of this sum the city of Winnipeg is charged with a fire loss of $115,394, or 72 per cent., of the total loss, the Kelly stonecutting plant fire being responsible for $99,040, or 86 per cent., of the total fire loss for Winnipeg and 63 per cent. of the total fire loss of the province, demonstrating the fallacy of housing high values in wooden buildings. A total of 137 fires were reported during the month. Thirty-four, or 25 per cent., were in dwellings; 29, or 21 per cent., in frame buildings, and 21, or 25 per cent., were grass and rubbish fires. Ten fires of an incendiary nature occurred in Winnipeg during the latter part of May, with a loss of $2,640, mostly in vacant property, and due to strike conditions. Out of 137 fires for the month of May, 17 were reported as from unknown causes, with a loss of $10,503, being 6½ per cent of the total loss of the province. This percentage of unknown fires was reported by fire insurance companies, notably the Mutual Fire Insurance Companies.

Manitoba's fire loss for June amounted to $118,658, a decrease of $40,742 from that of the May loss, the Winnipeg fire loss being $46,813, or about 40 per cent. of the total loss for the province. A total of 135 fires were reported during this month, of which 44, or 33 per cent., were in dwellings; 16, or 12 per cent., in farm buildings. Fires in frame buildings again predominate, 79, or about 60 per cent., of the total occurring in wooden structures, with a loss of $78,832, being 66 per cent. of the total loss of the province. During this month nine incendiary fires occurred in Winnipeg with a loss of $30,102, one fire alone destroying property valued at $28,000. Four boys were apprehended and brought before the Juvenile Court, where they confessed to setting fire to six buildings. Two offences were committed in May and four in June, destroying property to the value of $28,752. In all, 19 incendiary fires occurred during the strike period. Fourteen fires were reported as unknown with a loss of $11,421, or about 10 per cent., of the total loss of the province. In June, 15 lightning fires were reported with a property loss of $25,196, or 22 per cent., of the total loss of the province; and during the storm which occurred on June 14th live stock valued at $2,207 were killed by lightning. Information as to whether the buildings struck by lightning were rodded or unrodded is not available. One point to be impressed is the absence of loss in high value mercantile property, while small stores in the country districts are responsible for a loss of $21,625.

* * *

The statement of the Royal Bank of Canada as of July 31, last, showe that notes in circulation decreased $1,387,303 and deposits increased no less than $7,936,503. Total assets increased $8,137,191. The most interesting item on the assets side is government and municipal loans, which increased $6,974,657. Call loans elsewhere showed withdrawals of $6,093,796. Loans and discounts increased $4,629,101.

ECONOMIC POLICIES

Part of An Address Before the Alberta Industrial Congress at Calgary, Alta., August 11th to 15th

By D. C. Coleman,
Vice-President, Canadian Pacific Railway

THE balance of the world has just narrowly escaped subjugation by one nation of only seventy millions of people. The frightful struggle necessary to thwart the designs of this comparatively small minority was not due to any inherent mental or moral superiority in the German race as compared with others or to its martial qualities, or its admittedly fine military organization, but to the development of industry on scientific lines and to the close association of the best brains of the country in the regions of finance and commerce. If the German had kept his too ready sword in its scabbard and had turned his head away from alluring visions of political power, it is altogether probable that within a few years he would have attained a dominating position in the trade and commerce of the world. When we remember how ruthless and cruel he has proven himself to be, it is fortunate for us that he chose to risk all on an attempted rush through a bloody short-cut to power and throw away the advantages which he had legitimately won by his antlike industry, his genius for stealing the best ideas of other people and applying them to practical purposes, and his primacy in the field of scientific research. In the United States and Canada we complacently thought that having no ruling caste and no military caste, our best talents were devoted to business, and we flattered ourselves that we had a genius for organization; but we were too self-centred, our vision never bridged the seas, and in industry as in politics we trusted to happy bursts of inspiration rather than to hard thinking, or to wearying and consuming research. With the German, business was a study and an obsession, with us it was a game—a game which we played with the utmost spirit and with ambition and necessity holding our coats on the sidelines—but still a game.

Sound Basis Necessary

"Having wrecked the German's dream of world-empire, it would be well for us while the bully is still nursing his bruised and broken head, to reflect on the factors and elements in his national life which made him so formidable, and which indeed carried him to the very threshold of victory. Having found and studied these, we should without subscribing to or adopting his abhorrent principle of an infallible and omnipotent state endeavor to work into the fabric and spirit of our own political and industrial organization some of the passion for successful achievement which made the Germans a nation of workers, united in the resolve that in all branches of activity they should lead the world. This very necessary examination and other similar investigation and the application of the lessons drawn therefrom serve as a justification for this congress, and the consideration of the best way in which to develop our own resources should be influenced very greatly by the experiences of other countries where such development has been attended by conspicuous success.

"That the period of reconstruction through which we are passing is a difficult and trying one, we are all prepared to admit. The experience of the past does not help us in every particular. It has always been hard for mankind to settle down to a rational way of doing things after the convulsions brought about by a great war. At such times the quack with a panacea for all social and economic ills invariably has an innings, for the excited and the overwrought are easily persuaded to try fantastic remedies. And who among us is not just now suffering from the effects of overstrain? Our special danger at this time is the rapidity with which fitful and irregular gusts of passion and prejudice are reflected in legislation and executive action. In former times when governments were less immediately responsive to public clamor, there was time for deliberation and a proper weighing of issues before a decision was taken. This fact is not advanced as an argument against our present more democratic system of government, which marks a great advance on any other system or process which man has devised, but it does indicate a real danger. The voice of the people may be the voice of God, but if so it is the voice of all the people, not that of a strident and clamorous faction, and that voice must express the considered view of the people. The wild ravings of a man in a delirium of pain should not and are not accepted as conveying his settled and normal aspirations and opinions, and in the same way the desires and aspirations of a people cannot always be deduced from the cries of a fraction, temporarily unsettled by the acute pains caused by a sudden change from war to peace, and worked on and exploited by charlatans and adventurers. Under a democratic system of government, such as we have, those in authority are required to keep in step with public opinion, but they should not be forced to compromise with their principles in order that they may conform to every passing current of passion and prejudice, and they should be given time and opportunity to master problems as they arise and thus be in a position to suggest to us a permanent and consistent policy.

Avoid Radical Legislation

"The cry in this country and in other democratic countries seems to be for a government which is continually doing something, and that something must be striking and novel and preferably in the direction of restriction and paternalism. There is a pathetic belief that a profusion of legislation and government interference with normal processes in business and social life and with personal liberty in some way or other leads us along the road to freedom and happiness. Such intervention if the truth be known takes us in an altogether different direction. The opinion may be ventured that many of the difficulties we are now encountering, are the direct result of fussy and unnecessary interference by governments with commercial enterprises and with the normal section of the law of supply and demand. A certain amount of interference was probably necessary during a state of war, and was brought about by the war, but some of it can be attributed to a panicky weakening in the face of clamor for drastic action to remedy some evil which seemed to call for correction. What is needed is free and open competition with proper protection of the public against combinations which are designed to stifle that competition. A government monopoly is not usually the best remedy. We may judge what government monopoly means by the results of government control and operation of railways in the United States. These results have been a greatly increased cost of the transportation which is sold to the public, accompanied by an inconsiderate, discourteous and much inferior service.

"We know that every man who speaks against further experiments in the direction of government control and ownership is at once dubbed a reactionary. But is he a reactionary? No. The reactionary is the man who would place us under the heel of a bureaucracy—the man who favors state socialism. In claiming to be a reformer he is as inconsistent as the Bolshevist agitator who tries to infuriate labor against the so-called tyranny of capital, and then browbeats and stifles the voice of the conservative majority in our trades unions. It is the man who stands for the fullest exercise of the right of the individual to develop and prosper and reap the fruits of his labor and his brains, who is the true liberal, the real supporter of advancement and progress. The whole history of civilization up to the present is the record of the struggle of the individual to secure a fair opportunity to improve his condition. As civilization progressed he refused to allow tribal chiefs and despotic kings and privileged ruling classes to fix the limits to which the ordinary individual could rise. In democratic countries, he has won for himself equality of opportunity—opportunity to improve his condition and to win a proper relative reward for his work, and to secure proper recognition of his character, qualities and abilities. The Bolshevist who prates about a redivision of the wealth of the world, is simply trying to drag man back to a primitive condition, where a few Lenins and Trotzkys will possess arbitrary power, and where the balance of the community will inevitably relapse

into serfdom. It may seem a far cry from government control of industry, to Bolshevism, but state socialism is only a milestone on the road to Bolshevism, and any further step in that direction we are entitled to view with suspicion. Instead of harassing our public men to rush through measures for the fettering of private enterprise and initiative, and reproaching them with indifference and inactivity—if they do not do so, we will secure much more prompt relief from our present economic troubles by relaxing burdensome regulations, and by encouraging private enterprise to resume business on the line of free competition, with the assurance that if the game is played fairly and if wealth assumes its fair share of taxation, there will be no further retrogression in the direction of socialism and bureaucratic control.

"The best economic and social policy for Canada and for the United States is one that will provide for equal opportunity for every man, no matter in what condition born, and which will guarantee him the peaceful enjoyment of the rewards of courage, foresight, prudence, temperance and hard work. It was suggested herein that we could afford to learn from the German some lessons in thrift, pertinacity and the application of scientific methods to industry, but it would be a sad thing if, after crushing the system of politics and government for which he stood, we should embrace his pernicious idea that the state must be supreme, and that the individual can only prosper and develop along rigid preordained lines, and can only enjoy such a measure of comfort and happiness as may be allowed to him by those permanently or temporarily in control of the machinery of the state."

CO-OPERATION IN PRODUCTION AND MARKETING

Practices in Munitions Manufacture May to Some Extent be Applied to Peace Industry—Industrial Groups the Best Means

By A. B. Barker

A RECENT article in Dun's Review on "Stabilizing Commodities" remarks that the war has shaken the old belief that secrecy is essential to success in business, and instances the wonderful results obtained in Canada through the voluntary exchange of data on methods and costs in connection with the manufacture of war material, which in its inception was an absolutely new field for our manufacturers. The record made by Canadians in the production of shells, both as to quality and quantity, is an enviable one, and it was made possible only by the willing co-operation of all in pooling information as to methods. There were many new and difficult problems to be solved, and often, when one factory had trouble, the manager, and perhaps two or three foremen, would visit other plants and discuss the situation with those who, in a sense, were competitors.

The knowledge gained as to the benefits of co-operation will undoubtedly be turned to account when the plants are turned to peace production. Any co-operation must come through associations where discussion can settle the basis of operation. It is hardly to be expected that information as to methods and costs will be as freely given in connection with ordinary trade as in the case of munitions, for in that there was no selling competition as generally understood. There was only one standard, and prices for the output were fixed. There was no limit as to production, so that the only question was that of manufacturing cost. In ordinary trade other elements make the question of co-operation much more complex. Under the competitive conditions obtaining in trade generally, full co-operation of producers is practically only arrived at through outside pressure. The prospect of mutual advantage through concerted action is attractive only up to a certain point, but there is always a certain percentage of members which cannot be relied on to forego a possible advantage, even though by so doing they realize they are jeopardizing the organization. This has been the experience of most voluntary associations. The history of the Fruit Growers' Association, of California, is a well-known example. That organization is working well now, but the members had to be forced into it. Before the present plan was put into operation there had been several failures. The growers were suffering from excessive freight rates and the practices of commission houses, but whenever they attempted to get together some were always tempted to break away. The result was that the industry finally was nearly bankrupt and something drastic had to be done. The present scheme was then adopted, by which the members of the association sold their entire output to a central association, and this body, composed of the same men, worked as a unit. Freight rates were reduced to a reasonable figure by legislative action, the organization being strong enough to bring this about, and a comprehensive scheme for standard grading and marketing the fruit was put into operation. The effect was to put the industry on a profitable basis, and without increasing the cost to the consumer.

In this case the co-operation is concentrated on the selling but to produce the desired results certain definite standards, both as to grades and methods of packing, must be maintained through regular inspection by officials of the organization and this in the case of manufactured goods would be a problem. It might, however, be managed to some extent in the case of goods for export. The Japanese have already moved in this direction and it is understood that in that country fixed standards are to be maintained on articles for export by means of a system of government inspection. In this country more satisfactory results would be obtained by the trade organizations themselves rather than by government action, the Canadian theory being that the less government meddles the better. Such standardization would necessarily mean a closer co-ordination of manufacturing methods to produce an evenness of grade in the output of different plants, and this in turn would bring about much the same exchange of data between manufacturers in the same lines as was the custom in munition work.

One factor in foreign trade which will do much to bring about closer relations, is the question of financing the shipments to Europe. Conditions there are such that these cannot be paid for as in the past and new machinery for financing the trade must be installed. Credits and long credits will be necessary. There is no question of the need of everything which can be produced for a long time to come but the depreciated currency with which the European nations are carrying on business makes it impossible to pay for the goods at the prices ruling here to-day. The arranging of credits to handle this business is too vast for individual effort and can only be effected by thoroughly organized and equipped associations.

SCOTTISH CANADIAN MORTGAGE COMPANY

The annual general meeting of the Scottish Canadian Mortgage Co., Ltd., was held in Edinburgh on July 16th, 1919. Dr. R. McKenzie Johnston, chairman of directors, took the chair. The chairman, in the course of his remarks, said that the general position of the company had improved during the past year, and that there had been an improvement in the capital value of the investments outside of Canada. He also referred to the concentration of the company's interest in Canada in the hands of Messrs. Allan, Killam and McKay, Ltd., Winnipeg, who now act as the sole agents of the company in Canada. The directors' report and accounts were approved, and in terms of the directors' recommendation £2,000 was carried to contingency fund, a dividend of 3 per cent.. less income tax, on the ordinary shares was declared, and the balance of £3,472 remaining at the credit of revenue account was carried forward.

A meeting of the executive of the Saskatchewan Hail Insurance Association was held last week in Regina, Sask., when routine business in connection with the work of the association was discussed.

STEEL INDUSTRIES LOCATE IN ONTARIO

Backed by British and American Capital—British Wood Block Mill Secured by New Brunswick—Large Concerns Secured by Other Municipalities

ANNOUNCEMENT has been made of several new industrial plants in Canada. The R. McDougall Co., of Galt, Ont., is erecting a new storage building, and also making a new two-story addition to the moulding shop. The International Malleable Iron Co. is planning the erection of additions to their plant at Guelph, Ont. The new building is to be a one-story structure extending to the depth of 189 feet, and will be constructed of concrete and brick. The estimated cost will be about $33,000.

Work has commenced on the plant which the International Paper Company intends to erect at Three Rivers, Que., costing approximately $4,000,000. The product will be pulp and all grades of finished paper.

British Capital for New Brunswick

H. Mobbs, Kettering, England, has finally decided upon the location for the proposed plant which will manufacture hardwood last blocks and perhaps furniture as well. The location is at Mullin's Brooks, York County, N.B., on the transcontinental route of the Canadian National Railways. Extensive lumber privileges have been arranged by the new company, with the Nashwaak Pulp and Paper Company, and it is expected that from three to four million feet of maple lumber from the wealth available on the Gibson lands will be manufactured annually in to last blocks. Mr. Mobbs, who is one of the largest manufacturers of last blocks in the world, selected the site for the location of his new mill after investigating various hardwood sections in New Brunswick.

Robbins and Myers, of Springfield, Ohio, world's largest manufacturers of small electric motors and electric fans, will locate their Canadian branch in Brantford, Ont. An offer has been made for ten acres of the water works property while arrangements are being made for the erection of their new building there. The industrial commission has secured 10,000 square feet of the Motor Trucks, Limited, factory, where the Robbins and Myers Company will commence operations immediately.

Two New Steel Industries

Another new industry, a $10,000,000 steel rolling mill, is locating in Toronto. The new plant is to be known as Baldwin's Canadian Steel Corporation, Ltd., and will be on the premises of the British Forgings, Ltd., Ashbridge's Bay. British capitalists, owners of Baldwin's, Ltd., Swansea, Wales, have taken over the plant through the mediation of Mr. E. L. Cousins, city publicity commissioner. A. M. Russel, of Hugh Russel and Sons, Montreal, Canadian representatives of Baldwin's, Ltd., is to be the president of the new company. The British Forgings plant, as it now stands, he states, has an initial capacity of 60,000 tons of steel output per annum. Situated in the eastern harbor terminal of the Toronto Harbor Commission, the plant is 47 acres in extent and has 1,600 feet of docking with water 24 feet deep. The new company also holds option on 18 additional acres to the west and 61 acres to the east. It is stated that the construction of the new rolling mills will be under way some time in September or October next.

Following the announcement of Baldwin's Canadian Steel Corporation, Ltd., comes the announcement of the location at Goderich, Ont., of the Lake Huron Steel Corporation, a $15,000,000 concern with United States capital behind it. A site has been secured at the south end of the town and partly in Goderich township, and comprises 250 acres along the shore of Lake Huron. Surveyors are already at work laying out the site.

Among the men interested in the steel plant and allied industries are: J. J. Mahon, Newark, late chief inspector, Imperial Munitions Board, formerly of the Crucible Steel of America; J. A. Durfee, Pittsburg, late general manager of the British Forgings Company, Toronto; J. C. Jones, Cleveland, president of the Cleveland Steel Co.; Charles R. Talbot, Detroit, vice-president of the National Bank of Commerce, Detroit; Harry S. Hall, Detroit, general manager of the Lewis Hall Iron Co., and president of the Hall Motor Truck Co.; Stuart A. Howard, Detroit, representing New York and Detroit financial houses; Alan Warren, Cleveland, representing New York financial interests; C. F. Megow, St. Paul, president of the Charles Megow Tractor Co., recently of the Ford Motor Co., Detroit; Bert H. McCreath, Toronto.

The company promises to spend more than two million dollars in the next twelve months and an additional six millions in the second year in establishing its plant, which will include six electric furnaces and other special equipment for the manufacture of high-class steel products. The announcement of the company's plans follows a series of conferences of several of the men above mentioned with the Town Council and Board of Trade of Goderich, held within the last few days.

MOTOR UNION HAS GOOD YEAR

The results of this company's working for the year ended December 24th, 1918, proved extremely satisfactory. The premium income amounted to $8,593,841 (@ 486.66), while the balance at credit of the profit and loss account including interests, etc., was $1,196,398.

Interim dividends of 5½ per cent. on the paid-up capital of the preference shares and of 30 per cent. on the ordinary shares have already been paid, and at the annual meeting on August 14th, a further distribution of 20 per cent. on the ordinary shares was approved (making 50 per cent. in all for the year), while an additional distribution was authorized of a bonus of 50 per cent. of the ordinary shares free of tax. Substantial allocations were made to increase the various reserve funds, and the total assets now amount to well over the ten million dollar mark.

WEEKLY BANK CLEARINGS

Conservation of Life Insurance

Life insurance is of supreme value in these uncertain times. Life insurance should not only be jealously guarded and kept in full force, but it should be increased if at all possible. It is a well-known fact that the dollar has greatly diminished in value, so that a given income will not purchase much more than one half the amount that it would have yielded in pre-war days. Not only therefore should we resist every inducement to relinquish our insurance; we should rather increase our protection to the limit of our ability. There is nothing else to be compared with a life insurance policy as a protection for the home. During the policyholder's life it is an asset of ever-increasing value: at death it is the financial anchor of one's dependents. Do not allow your "best friend" to induce you to give up a policy in a sound company. Take a new policy if you can, but never give up the old!

ANOTHER GROUP LIFE CONTRACT

The Continental and Fidelity-Phenix Fire Insurance Companies have arranged with a permanent life insurance company to insure every member of the staff as of August 6th, 1919. Every employee, from the department manager to the office boy, enjoys this benefit, the amount of insurance being graded according to salary and length of service. Insurance is granted up to $2,500, and is entirely without cost to the employee; neither does it in any way interfere with, or take the place of, the sinking fund, which continues as before.

The Canadian employees are being notified by manager W. E. Baldwin of the participation in this new life insurance scheme, inaugurated by president Henry F. Evans.

BANK BRANCH NOTES

Bank of Nova Scotia to Open in England—Many New Branches—Activity in Saskatchewan

The following is a list of branches of Canadian banks recently opened:—

Burns Lake, B.C.	Royal Bank of Canada.
Burritt's Rapids, Ont.	Royal Bank of Canada.
Erickson, Man.	Royal Bank of Canada.
Vancouver, B.C. (25th Avenue).	Royal Bank of Canada.
Lousana, Alta.	Imperial Bank of Canada.
McGregor, Man.	Imperial Bank of Canada.
Williamsford, Ont.	Standard Bank of Canada.
Holland Centre, Ont.	Standard Bank of Canada.
Berwick, N.S.	Union Bank of Canada.

The following sub-agencies have been opened:—

Makinak, Man.	Standard Bank of Canada.
Laurier, Man.	Standard Bank of Canada.
Ebenezer, Sask. (Yorkton) ...	Royal Bank of Canada.
Barnston, Que. (Coaticook) ...	Canadian Bank of Commerce.

The sub-agency of the Canadian Bank of Commerce, Chambly, Que., is now operated as an independent branch under the supervision of Mr. L. P. Bourgoing.

The Bank of Hamilton advises that the branch at Armada, Alta., has been closed.

Mr. G. Petrie has been appointed acting manager of the newly opened branch at Kenogami, Que., of the Union Bank of Canada, and Mr. Peter McLeod has been appointed manager of the new branch at Berwick, N.S.

The following staff changes have been announced by the Union Bank of Canada:—Mr. J. Coulthard, manager, F.E.D., Vancouver, B.C.; Mr. A. F. Fairman, manager, Esterhazy, Sask.; Mr. R. S. Hodgins, manager, Eaton, Que.; Mr. J. F. McLelland, manager, Hamilton, East End, Ont.; Mr. J. W. McHaffie, accountant, Hamilton, Ont..

Activity in banking circles in Saskatchewan is evident by the number of new branches erected and to be erected in the near future. In addition to five new branches of the Union Bank of Canada that are at present under construction in south Saskatchewan, contracts have been let to McLelland Bros., of Winnipeg, for three new branches of the Bank of Toronto, at Vanguard, Woodrow and Chaplin. The Bank of Toronto has let in all thirteen contracts recently for new branches in the west. A new branch of the Royal Bank of Canada is to be built this fall at Cadillac, Messrs. Moore and MacWilliam, of Swift Current, having been awarded the contract recently. The building will be in keeping with the other branches of this bank in the province.

Announcement has been made that the Bank of Nova Scotia is to open a branch in London, England, in the near future. In confirming the announcement the bank stated that it was the intention to open a branch about a year ago, but premises were not available. Offices used for war purposes are now being vacated, however, and the bank hopes to get them soon. In this connection the appointment is announced of Mr. E. C. McLeod, manager of the bank at Kingston, Jamaica, to be manager of the new branch. Mr. McLeod is a Canadian, and has been connected with the bank for the past twenty-one years.

LIFE BUSINESS SHOWS FALLING OFF

While some of the companies have been able in June and July to exceed their figures for the earlier months of the year, most of them have experienced a decrease in business. Death claims, on the other hand. are showing a substantial decrease.

Aldred and Co., Ltd., announces that Mr. S. Ray Marshall, for many years a partner of Kitcat and Aitken, brokers, in London, has joined the staff of the company and becomes a director and vice-president of the company in charge of the London office, which is established at No. 8 King William Street, E.C.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three Per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter payable on and after Tuesday, the second day of September next, to Shareholders of record of 31st July, 1919.

By Order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.
Montreal, 22nd July, 1919.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two per cent. (2%) on the Common Stock of the **Dominion Textile Company, Limited**, has been declared for the quarter ending 30th September, 1919, payable October 1st to shareholders of record September 15th.

By order of the Board.
JAS. H. WEBB, Secretary-Treasurer.
Montreal, 26th August, 1919.

THE IMPERIAL OIL COMPANY, LIMITED

Notice is hereby given that a dividend of $3.00 per share has been declared by the Directors of The Imperial Oil Company, Limited, and that the same will be payable in respect of shares specified in any share warrant of the Company within three days after the coupon serial number thirteen of such share warrant has been presented and delivered at the Royal Bank of Canada, Toronto, Ontario, or at the office of the Imperial Oil Company, Limited, Toronto, Ontario, such presentation and delivery to be made on or after the Second day of September, 1919.

Payment to shareholders of record and fully paid up at the close of business on the 23rd day of August, 1919 (and whose shares are represented by share certificates), will be made on or after the Second day of September, 1919.

The books of the Company for the transfer of shares will be closed from the close of business on the 23rd day of August, 1919, to the close of business on the Second day of September, 1919.

W. T. McKEE, Secretary.

DIVIDEND NOTICE

Dominion Canada 5½% (Aug. 1, 1929) ..	97	97¼

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Brooke Tp., Ont. ..	$ 5,190	6	5-years	Aug. 30
Cochrane, Ont.	5,000	6	20-instal.	Sept. 2
Charlottenburg Tp., Ont.	30,000	5½	20-instal.	Sept. 6
Welland County, Ont.	100,000	5	10-years	Sept. 3
Pipeston R.M., Man.	10,500	..	20-years	Sept. 20
Trail, B.C.	15,500	7	20-years	Sept. 15
Killaloe Station, Ont.	3,000	6	15-years	....

Smith's Falls, Ont.—An issue of $11,514 5½ per cent. 20-instalment waterworks debentures, offered last month without success, have been sold locally at par.

SELLING
MUNICIPAL
BONDS

THE connecting link between the borrowing municipality and the bond buyers of Canada, as well as those in the United States that are specifically interested in Canadian Securities of this class, either as individual or institutional buyers, is

THE MONETARY TIMES
OF CANADA

Bond offerings advertised in *The Monetary Times* are assured of getting before a large and directly interested clientele.

Rates for advertising furnished
upon application.

The Monetary Times
TORONTO WINNIPEG

Welland, Ont.—Tenders will be received till September 3, 1919, for the purchase of $100,000 5 per cent. 10-year debentures. Robert Cooper, county clerk.

Drumheller Municipal Hospital District, Alta.—Messrs. W. Ross Alger and Co., Edmonton, Alta., have been awarded an issue of $50,000 7 per cent. 20-instalment debentures at 106.

Killaloe Station, Ont.—Tenders will be received for the purchase of $3,000 6 per cent. 15-year debentures by M. B. Grace, clerk. The debenture debt is $318, and the last revised assessment, $89,335.

Windsor, Ont.—On September 20, 1919, four by-laws calling for the expenditure of $75,000 for various local improvements, which were defeated recently by ratepayers, will be submitted again for the second time.

Pictou County, N.S.—*The Monetary Times* is informed that the offer of D. A. Cameron for the $100,000 5½ per cent. 20-year asylum debentures, although the highest out of three, was not accepted. All bids were rejected, and later, the county sold $60,000 of the debentures privately at par.

Edmonton, Alta.—According to Mayor Clarke, unless the sale of debentures for telephone extension is made pretty soon, the prospects of completing the new building this year will be remote. When the mayor brought the matter up at the commissioner's meeting, City Comptroller Mitchell explained that it was necessary for the finance committee to lay down a policy as to how these debentures should be sold, whether by private bid or by public advertisement. The mayor thinks that the debentures should be sold in New York.

Saskatchewan.—A final sale of municipal, rural telephone and school securities is being conducted by the Local Government Board on Friday, August 29, preparatory to the markets closing for the Victory loan campaign of 1919. During the campaign no sales of municipals will be held by the board. The offers include a large block of school debentures for the Weyburn city school district, totalling $80,000, repayable in 30 years with interest at 6 per cent. semi-annually. The board is also asking for bids on a $20,000 annuity issue for the village of Simpson and for a number of rural school district flotations totalling a further $51,550.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from July 28 to August 2, 1919:—

Rural Telephone Companies.—For 15-years not exceeding 8 per cent. annuity—Trossacks, $15,800; Lynne Grove, $15,700; Wabash, $2,000; Kenaston, $5,500; Moosbank, $3,800; Gerald, $6,600; Haldimand, $3,300; Muenster, $7,300; Southdale, $11,000; Ifield, $5,400; Hewson, $25,000; Silver Lake, $4,000; Hughton, $6,600; Willsmer, $8,600; Veregin, $19,000; Red Lake, $17,000; Logberg, $7,700; Rock Springs, $6,500; Gottinger, $1,800; Bellevue-Domremy, $9,900; Bruce, $14,100.

School Districts.—*Kelliher, $13,500 20-years not ex. 8 per cent. annuity. Amulet, $3,000 10-years not ex. 8 per cent. instalment. Rocky Mound, $3,500 10-years not ex. 8 per cent. annuity. *Northgate, $1,100 10-years not ex. 8 per cent. annuity. Asquith, $800 20-years not ex. 8 per cent. annuity.

The following is a list of debentures reported sold from July 28 to August 2:—

School Districts.—Kelliher, $13,500, Ellerslie, $10,000, Scotstown, $3,565, Wawota, $12,000, Edgeley, $4,000 Gagenville, $2,800; Great-West Life Assurance Co., Winnipeg, Man. Webb, $10,000, Shellbrook, $1,060, Coal Dale, $700; Harris-Read and Co., Regina, Sask. Lochabar, $2,250, Bapaume, $3,000; Waterman-Waterbury Mfg. Co., Regina, Sask.

Telephones.—Heavylands, $1,850, Viceroy, $35,400, High Bluff, $23,600, Drinkwater, $3,000, Riceton, $2,500; Harris-Read and Co. Regina, Sask. Manna, $18,300, Ituna, $10,800; W. L. McKinnon and Co., Regina, Sask. Rosebank, $1,600; Chas. Taylor, Nottingham. Springwater, $7,700; Goldman and Co., Regina, Sask.

The Canada Standard Loan Company
520 McIntyre Block, Winnipeg

Calgary, Alta.—The following recommendation will be submitted to the council at the next meeting: A $175,000 30-year by-law be prepared and submitted to the Utilities Commission and to the ratepayers of the city. The basis of the negotiations between the city and the Dominion government is that the government loan $120,000 of the above sum to the city at such rate of interest as the government is paying for money at the date of completion of this transaction, and that city debentures be hypothecated as security of the return of such loan; that this $120,000 be used for the erection of a fireproof hospital wing of approximately 100-bed capacity, such hospital wing to be built by the city in conformity with plans and specifications approved by the government and the city.

IMPERIAL BANK TO ERECT NEW OFFICE BUILDING

The Imperial Bank of Canada has purchased from the King Street Realty Co., the building at the north-west corner of King and Yonge Streets, Toronto, with a view of erecting one of the finest bank buildings in the Dominion. The purchase price has not been stated, nor are particulars as to the building itself forthcoming, as the final plans have not been approved, and it is yet to be decided whether the bank will make use of the entire building or lease part of it.

The property when it is completed, will mark a new epoch in the successful history of the Imperial Bank. On March 6, 1875, the bank first opened its doors for business in the Masonic Hall Building, Toronto Street, and soon thereafter purchased and moved into the premises which the bank still occupies at the corner of Leader Lane and Wellington Street East. By the purchase of property adjoining, accommodation was made for the different branches of the bank as business grew, and now that the present premises do not permit of a comfortable further expansion, the new building is about to be erected.

The original capital of the bank was $804,883.54, as compared with $7,000,000 to-day, and a reserve fund of $7,500,000. The deposits as per the first annual statement amounted to $1,576,000, and, according to the last government statement, they now stand at $86,374,487. To-day, the bank has 175 branches throughout Canada.

SOUTH VANCOUVER TAX SALE

The South Vancouver tax sale to be held on Wednesday, September the tenth, will be the last great tax sale in this fine suburban municipality of 30,000 people, hence the last opportunity to obtain lots and acreage adjoining Vancouver City for the paltry amount of the tax arrears.

The last South Vancouver tax sale cleaned up to 1913. This sale will clean up to 1919, and hereafter the Municipal Act makes annual sales compulsory. Therefore, this will be a chance not again to come your way. You have over 6,000 parcels to select from. See Province of September 2nd.

F. J. GILLESPIE,
Commissioner.

NEWS OF MUNICIPAL FINANCE

Edmonton Public Utilities Show Surplus—St. Boniface Tax Rate High—Other Tax Rates Up

Calgary, Alta.—It has been decided by the city to ask the government for the loan of $120,000 for the purpose of construction of a permanent wing to the general hospital.

London, Ont.—The new assessment last completed shows the valuation of land and buildings within the city boundaries to be $44,111,915, an increase of $2,404,228 over last year.

Owen Sound, Ont—The tax rate for 1920 will be 35 mills, according to the decision of the council. This is an increase of two mills over 1919, which is due chiefly to an increased expenditure by the Board of Education.

Fredericton, N.B.—Receipts of taxes under discount at the city treasurer's office this year amounted to $110,351.30. This is looked upon as a favorable showing inasmuch as the tax rate is $2 this year, instead of $2.20 last year.

Harwich Township, Ont.—The council has struck a tax rate of 13 mills, which is 3½ mills lower than the rate last year. The rate was made up of county rate 5 7-10 mills, township rate 5 7-10 mills and general school rate 1 7-10 mills.

York Township, Ont.—The combined tax rate is 13.8 mills, of which 6.8 is for county and 7 mills for the township. The rate is two mills lower than last year. There is an increased assessment of about $800,000, making the total about $25,000,000.

Cobalt, Ont.—An additional two mills have been added to the local tax rate on the revised estimates presented to the town council and the rates for public and separate school supporters will be 38 and 44.3 mills respectively. The general rate is 30 mills.

Regina, Sask.—The total amount of revenue collectible by the city by way of taxation for the current year is $1,637,160.45, according to a statement handed the city council by the city assessor. Of this amount $265,043.65 is for special local improvement purposes.

Etobicoke, Ont.—The council set the tax rate for Etobicoke at 17 7-10 mills, this rate being made up as follows: County rate, 6 8-10 mills; general township school rate, 6 8-10 mills; general township rate, including bridge debentures, 9 mills. The rate is 3 3-10 lower than that of last year.

Toronto, Ont.—The total assessment figures of all the wards of the city to date, with the exception of Ward Three, which is not completed yet, is as follows: Land, $175,991,067; buildings, $184,755,318; business, $27,970,176; income, $16,548,128; total, $404,820,658; exemptions, $63,494,815. The increase in assessment over last year for the same wards is $10,227,166, and the increase in population is 8,480.

Milestone, Sask.—At a meeting of the council recently the assessment amounting to $403,260, was adopted. The new rate of taxation passed on was 10½ mills for municipal purposes, two mills for the public revenue tax on all land values only, and 11½ mills for school purposes. This is the largest tax that Milestone has ever had, and is due in a large measure to the extra needs of carrying on and bettering the school conditions.

London, Ont.—More than 70 per cent. of the total taxes for the year have already been collected. Up to date, $1,175,000 has been paid in this year, and it is expected that $200,000 more will be added to the sum by the end of August. The last day for payment of the second instalment is Monday, August 31st. R. C. Turner, tax collector, states this is a favorable showing as compared with other years, and he anticipates that there will be only a small sum of unpaid taxes at the end of the year.

St. Boniface, Man.—The tax rate has been set at 44.96 mills. The reason for this high rate is because the assessment on property has been lowered $2,000,000. On municipal expenditure the assessment is $12,306,000, the levy is $136,630 and the rate is 12.21 mills. On debentures the assessment is $12,306,000, and the levy is $184,611, at the rate of 11.45 mills. The school expenditures assessment is $13,094,925, the levy is $160,000, at the rate of 12.21 mills. For the Patriotic Fund the assessment is $13,094,925, the levy is $8,250 and the rate is .63 mills. This makes the total levy the sum of $489,491, or a tax of 40 mills on the dollar exclusive of the water rate tax. The tax of water will be 4.96. The tax for last year was 38.42 mills.

Winnipeg, Man.—A surplus of $16,578 was shown by the quarterly report of the water works system, presented at a recent meeting of the civic finance committee. A deficit from the beginning of the year of $9,003 has been written off, leaving a surplus of $7,574. The official figures were given as follows in a statement of water works system income account for three months ended June 30, 1919:—

Total revenue for three months	$183,951
Total expenses for three months	167,578
Surplus for three months	$ 16,578
Deficit at beginning of year	9,003
Surplus as at June 30, 1919	$ 7,574

Moose Jaw, Sask.—The half-yearly collection of taxes was inaugurated in 1918, and it is interesting to compare the collection of taxes up to July 31st this year, compared with 1918. The following table gives the figures for each of these years and from the figures it will be seen that this year the tax collections up to July 31st exceed the tax collections up to July 31st, 1918, by $72,528.75:—

Collections to July 31st,	1918.	1919.
Arrears	$ 59,205.85	$ 56,400.20
Current taxes	294,214.97	369,549.37
Total collections	$353,420.82	$425,949.57
Total tax levy	$760,836.00	$806,186.00

Edmonton, Alta.—In the report of the city's revenue and expenditure account for the six months ended June 30, 1919, it is shown that current taxes collected amounted to $1,085,118, reducing the city's overdraft with the bank to the comparatively small sum of $37,727.70; while on account of tax arrears the sum of $526,054.34 was recovered within the period. The results of the operation of the city's utilities including electric light and power, street railway, telephone and waterworks are particularly deserving of notice, a net surplus for the six months being shown of $71,292.52 after providing for capital and depreciation charges on the combined utilities.

The following is a recapitulation of the net results of each particular utility for the half year:—

	To June 30, 1919.	To June 30, 1918.
Net surpluses:		
Electric light and power ..	$ 72,464.78	$54,628.76
Telephone	26,375.98	16,579.72
Waterworks	17,064.05	14,588.79
	$115,904.81	$85,797.27
Net deficit:		
Street railway	44,612.29	56,127.93
	$ 71,292.52	$29,669.34

ROYAL BANK OFFERING STOCK

The Royal Bank of Canada is calling for tenders up to September 2, 1919, for the small balance of its stock remaining unsold from the issue made January last. Only about 3,430 shares are involved. The stock was issued to shareholders at $150 a share. The stock will rank for dividend from date of payment, and interim receipts will be issued which will be exchanged for regular stock certificates on and after December 1 next. The above has nothing to do with the second issue of $2,000,000 made in April in connection with the arrangement entered into by the bank with the London County, Westminster and Paris Bank, Ltd.

ALBERTA AND SASKATCHEWAN CHARTERED ACCOUNTANTS

The annual meeting of the Institute of Chartered Accountants of Alberta was held in the Board of Trade Rooms, Calgary, on June 28th. The retiring president, C. E. Race, presented a report of the work of the institute for the past year and the financial statement was submitted by the secretary, W. W. Gould.

The examinations this year were held in May, a month later than usual owing to interruption by the epidemic of influenza. There were 25 candidates for the examination, 15 for intermediate and 10 for final. Of these five were successful in the former and five in the latter as follows: Intermediate—Wm. N. Downs, Camrose; F. H. Butler, A. G. Fry, W. J. Johnstone and W. C. Marshall, Edmonton. The successful final candidates were: A. H. Carr, E. T. Gregory, J. W. Watson, Calgary; G. A. Maxwell and P. W. Sterns, Edmonton.

The following are the new officers elected for the year: President, James B. Sutherland; first vice-president, Ed. D. C. Thomson; second vice-president, F. M. Harvey; secretary-treasurer, Cecil E. Race. Councillors—W. W. Gould, F. M. Harvey, M. C. McCannel, C. E. Race, J. B. Sutherland, W. H. A. Thompson, Ed. D. C. Thomson. The newly elected president will be the representative of the institute on the senate of the University of Alberta. Messrs. C. E. Race and J. B. Sutherland were elected delegates to attend the annual convention of the D.A.C.A., to be held in Winnipeg in September.

The 11th annual meeting of the Institute of Chartered Accountants of Saskatchewan was held in Regina on June 7th. One of the features was an address by W. W. Swanson, professor of economics at the University of Saskatchewan, on "The New Industrial Era." The professor dealt with the present industrial unrest, and stated that co-operation had been the means of satisfactorily settling difficulties in the past, and was of the opinion that it would become better understood and more frequently adopted in the future. The financial report presented by the auditors showed the institute to be in a better financial condition than it has been since its formation.

The report of the delegate to the Dominion convention brought forth much criticism regarding the publication of a book of rulings by the finance department on the Income Tax and Business Profits War Tax Acts. Election of Fellows resulted in elevation of Messrs. Wilson, Mowat and Bagshaw. At the last annual meeting a committee was appointed to prepare a report on the "Service Clause." The report was presented, and recommended the following change in the by-laws: "Three years' service in the office of a practising chartered accountant, one year of which must be continuous, with a break of not more than six months. Candidates receiving approved instruction may be granted six months' exemption from the two years' service prior to passing the intermediate examination, a period of two years to elapse between taking the intermediate and final examinations. For the purpose of this section a practising chartered accountant shall be considered as one who maintains an office for the purpose of practising his profession and invites the patronage of the public in a professional capacity." The recommendation was adopted as presented, with a provision added so as no hardship would be experienced by anyone at present preparing for the examinations.

The election of officers resulted as follows: President, C. E. Walker, Regina; vice-president, S. G. Lowthian, Regina; secretary-treasurer, T. Lax, Regina. Council—J. Neilson, Saskatoon; F. J. Wilson, Regina; V. J. Ferguson, Saskatoon; G. C. Rooke, Regina; auditor, T. E. Robinson, Regina; librarian, C. E. Walker, Regina. Representatives on the Dominion Council—G. C. Rooke, Regina; V. J. Ferguson, Saskatoon.

CANADIAN PULP & PAPER ASSOCIATION

Paper is the medium of Banking and Finance

Insist on Canadian-Made Paper

The Best Papers are MADE IN CANADA

You know what a vital part paper plays in your business. It is part of every transaction that is made, and it goes forth as your representative.

QUALITY, then, is imperative, and that alone should cause you to INSIST on a genuine Made-in-Canada paper for your Stationery, Certificates, Ledgers, and Booklets.

Beyond that fact, it is, of course, a prime duty to support Made-in-Canada goods, and if those with whom you do business look for the watermark on your stationery and find you are using foreign-made paper, you lay yourself open to a breach of good faith—with no possible chance to defend yourself.

Use the best paper that can be bought for each purpose. Canadian paper makers maintain the highest standards and their products should be bought in preference to all others.

Dictate a line to a stenographer to-day to send for a copy of the booklet "Some Facts About the Pulp and Paper Industry of Canada."

Nova Scotia Income Tax Act

Provides for Tax on Income of Corporations and Individuals — Both Normal Taxes and Supertaxes — Deductions and Exemptions

At the last session of the Nova Scotia legislature an Act was passed to authorize the levying of an income tax, to go into force by proclamation of the Lieutenant-Governor. It provides for an income tax on both individuals and corporations, a supertax and a surtax. The sections defining these taxes are as follows:—

"3. (1) For the purposes of this Act, 'income' means the annual net profit or gain or gratuity, whether ascertained and capable of computation as being wages, salary, or other fixed amount, or unascertained as being fees or emoluments, or as being profits from a trade or commercial or financial or other business or calling, directly or indirectly received by a person from any office or employment, or from any profession or calling, or from any trade, manufacture or business, as the case may be; and shall include the interest, dividends or profits directly or indirectly received from money at interest upon any security or without security, or from stocks, or from any other investment, and, whether such gains or profits are divided or distributed or not, and also the annual profit or gain from any other source; including the income from but not the value of property acquired by gift, bequest, devise or descent; and including the income from but not the proceeds of life insurance policies paid upon the death of the person insured, or payments made or credited to the insured on life insurance endowment or annuity contracts upon the maturity of the term mentioned in the contract or upon the surrender of the contract; with the following exemptions and deductions:—

"(a) Such reasonable allowance as may be allowed by the treasurer for depreciation, or for any expenditure of a capital nature for renewals, or for the development of a business, and the treasurer when determining the income derived from mining and from oil and gas wells, shall make an allowance for the exhaustion of the mines and wells;

"(b) two hundred dollars for each child under sixteen years of age who is dependent upon the taxpayer for support;

"(c) amounts paid by the taxpayer during the year to the Patriotic and Canadian Red Cross funds, and other patriotic and war funds approved by the treasurer;

"(d) for the purposes of the normal tax the income embraced in a personal return shall be credited with the amount received as dividends upon the stock of any company or other person which is taxable under this Act;

"(e) for the purposes of the tax the income embraced in a personal return shall be credited with the amount received as interest upon bonds, debentures or stock of Nova Scotia issued exempt from provincial taxes, and in the cases of the Lieutenant-Governor, the Judges of the Supreme Court and the Judges of the County Court with the amounts received by them as salary of their offices respectively.

"Provided, however, that in determining the income the personal and living expenses shall not be taken into consideration.

"(2) Where an incorporated company conducts its business, whether under agreement or otherwise in such manner as either directly or indirectly to benefit its shareholders or any of them, or any persons directly or indirectly interested in such company, by selling its product or the goods and commodities in which it deals at less than the fair price which might be obtained therefor, the treasurer may, for the purposes of this Act, determine the amount which shall be deemed to be the income of such company for the year, and in determining such amount the treasurer shall have regard to the fair price which, but for any agreement, arrangement or understanding, might be or could have been obtained for such product, goods and commodities.

"(3) In the case of the income of persons residing or having their head office or principal place of business outside of Nova Scotia, but carrying on business in Nova Scotia, either directly or through or in the name of any other person, the income shall be the net profit or gain arising from the business of such person in Nova Scotia.

"(4) For the purpose of the supertax only, the income of a taxpayer shall include the share to which he would be entitled of the undivided or undistributed gains and profits made by any syndicate, trust, association, corporation or other body, or any partnership, if such gains and profits were divided or distributed, unless the treasurer is of opinion that the accumulation of such undivided and undistributed gains and profits is not made for the purpose of evading the tax, and is not in excess of what is reasonably required for the purposes of the business.

Amount of the Taxes

"4. (1) There shall be assessed, and levied on and paid by every person residing or ordinarily resident in Nova Scotia or employed in Nova Scotia or carrying on any business in Nova Scotia, the following taxes:—

"(a) A tax the amount of which is one-half of one per centum of all income during the preceding year, exceeding one thousand dollars but not exceeding fifteen hundred dollars in the case of unmarried persons and widows or widowers without dependent children, and exceeding two thousand dollars but not exceeding three thousand dollars, in the case of all other persons; one per centum of all income exceeding fifteen hundred dollars in the case of unmarried persons and widows or widowers without dependent children, and exceeding three thousand dollars in the case of all other persons."

In addition there is a supertax according to the following scale:—

½%	on income	from	$ 6,000	to	$ 10,000
1¼%	"	" "	10,000	to	20,000
2 %	"	" "	20,000	to	30,000
2½%	"	" "	30,000	to	50,000
3¾%	"	" "	50,000	to	75,000
5 %	"	" "	75,000	to	100,000
6¼%	"	" "	100,000	to	200,000
7½%	"	" "	200,000	to	400,000
8¾%	"	" "	400,000	to	600,000
10 %	"	" "	600,000	to	800,000
11¼%	"	" "	800,000	to	1,000,000
12½%	"	" over	1,000,000		-

Also the following surtax: "(a) Where the income was in excess of six thousand dollars but did not exceed ten thousand dollars, one and one-quarter per centum of the normal tax and supertax calculated thereon; (b) where the income was in excess of ten thousand dollars but did not exceed one hundred thousand dollars, a supertax the amount of which is two and one-half per centum of the normal tax and supertax calculated thereon; (c) where the income exceeded one hundred thousand dollars but did not exceed two hundred thousand dollars, a supertax the amount of which is three and three-quarters per centum of the normal tax and supertax calculated thereon; (d) where the income exceeded two hundred thousand dollars, a supertax the amount of which is eight and three-quarters per centum of the normal tax and supertax calculated thereon."

Taxation of Companies

Further provisions of this section are:—

"(2) Corporations and joint stock companies, no matter how created or organized, shall pay one and one-half per centum of income exceeding three thousand dollars, but shall not be liable to pay the supertax or surtax; and the treasurer may permit any corporation or joint stock company the fiscal year of which is not the calendar year, to make a return and to have the tax payable by it calculated on its income for the twelve months ending with its last fiscal year preceding the date of assessment.

"(3) Any persons carrying on business in partnership shall be liable for the tax only in their individual capacity.

"(4) A person who, after the first day of May, 1919, has reduced his income by the transfer or assignment of any real or personal, moveable or immovable property, to such person's wife or husband, as the case may be, or to any member of the family of such person, shall, nevertheless, be liable for the tax as if such transfer or assignment had not been made, unless the treasurer is satisfied that such transfer or assignment was not made for the purpose of evading the taxes imposed under this Act or any part thereof.

"(5) Taxpayers shall be entitled to the following deductions from the amounts that would otherwise be payable by them for tax: (a) From the tax payable in any year the amounts payable in such year by the taxpayer for taxes under the provisions of the Supplementary Revenue Act; and (b) from the tax payable in any year the amounts payable in such year by the taxpayer for taxes under the provisions of 'An Act respecting the Taxation of Certain Companies.'

"5. The following shall not be liable to taxation hereunder: (a) Consuls and consuls general who are citizens of the country they represent and who are not engaged in any other business or profession; (b) any religious, charitable, agricultural and educational institutions, boards of trade and chambers of commerce; (c) labor organizations and societies and benevolent and fraternal beneficiary societies and orders; (d) mutual corporations not having a capital represented by shares, no part of the income of which inures to the profit of any member thereof, and life insurance companies except such amount as is credited to shareholders' account; (e) clubs, societies and associations organized and operated solely for social welfare, civic improvement, pleasure, recreation or other non-profitable purposes, no part of the income of which inures to the benefit of any stockholder or member; (f) insurance, mortgage and loan associations operated entirely for the benefit of farmers, as are approved by the treasurer; (g) the military and naval pay of persons who have been on active service overseas during the present war in any of the military or naval forces of his Majesty or any of his Majesty's allies; (h) incorporated companies whose business and assets are carried on and situate entirely outside of Nova Scotia."

Foreign Trade and Exchange

Heavy Canadian Imports from United States Continue—Britain, by Refusing to Incur Further Debts Abroad, Has Cut Down Her Imports—High Rate for New York Funds Likely to Remain for Some Time

THE New York exchange rate, which is of such vital importance first of all to Canadian trade, and secondly to all branches of industry here, is now receiving probably more attention than ever before. The August letter of the Canadian Bank of Commerce devotes a lengthy article to it, reading in part as follows:—

"The steady advance in the premium on New York funds seriously affects those industries which depend upon raw materials obtained from the United States. From that country, during the year ending June last, cotton, iron and steel products to the value of $216,000,000 were imported. Other imports essential to manufacturers, the cost of which will be similarly affected, are valued at a large sum. The inevitable advance in cost to the consumer is one of the causes of the existing social unrest, and this cause would at any rate be partially removed if the demand for New York funds was decreased by lesser imports of luxuries and non-essentials.

"In March, 1918, it was pointed out in a supplement to our letter that the appreciation in the rate for United States funds was at that time accentuated by the operation of several abnormal factors, such as the disorganization of transportation and the consequent check upon exports from Canada, the enormous imports from the United States, and the effect of the credits which Canada had granted to the United Kingdom to assist in procuring war material. The balance of trade with all countries in favor of Canada at the end of December, 1917, was $588,000,000. At the close of March, 1918, it had grown to $623,000,000. For the succeeding year, ending March, 1919, it was $343,000,000. These balances are partly offset by advances from the Imperial treasury for the maintenance of our expeditionary forces abroad, but even after making allowance for these the balance in favor of Canada is very large. In the ordinary course of events, this would have resulted in the exchanges being favorable, but the factors which caused the high premium on New York funds in the early months of 1918 are still in operation, in some respects in a more accentuated form. The credits being furnished to Great Britain are still considerable, and substantially offset that country's debtor balance to us, and in addition we are furnishing credits to other European countries. The remedy then suggested applies with equal force to-day; it is to increase exports to the United States, and to curtail imports from that country. While the war was proceeding Britain obtained credits in the United States for purchases there, and it was hoped that she would also arrange credits there to pay for purchases made by Canada to facilitate the production of war material. Now that the war is over, Britain apparently does not favor the creation of further debt abroad, and therefore it cannot be hoped that part of her debt to Canada will be arranged by her assuming our liabilities in New York. The adjustment of our adverse balance there must apparently await trade developments, in the shaping of which the present adverse rate of exchange is not undesirable.

"In the three years ending June last, Canada imported merchandise from the United States valued at $2,228,000,000 and exported to that country goods to the value of $1,183,000,000, leaving an unfavorable balance of $1,045,000,000. Thus, during the period named, the United States supplied 81 per cent. of our imports from all sources, and the customs returns since June indicate that there is no diminution in our purchases from them. On the other hand, of our total exports to all countries amounting to $4,029,000,000, only 29 per cent., or $1,183,000,000 went to the United States; 51 per cent., or $2,076,000,000 went to the United Kingdom, and 20 per cent. to all other countries. Our imports from the

United Kingdom in the period we are dealing with amounted to only $251,000,000, the balance in our favor being $1,819,000,000, as compared with the unfavorable balance of $1,045,000,000 due to the United States. In Canada the cause of diminished imports from Britain is thoroughly appreciated. We know that her men and her physical resources were mobilized for the defence of freedom more intensively and unselfishly than is as yet fully realized, with the result that her exports, which had been steadily increasing before the war, were curtailed. To facilitate imports of the materials necessary for the prosecution of the war she made free use of external credits, and the credits granted to her by Canada for this purpose were liberal, as already indicated. The purpose of the sacrifice made by Great Britain and her allies is now attained, but there is left to be adjusted an unbalanced and critical state of foreign trade. Canada finds herself already a considerable creditor of Britain, and likely to become a more important one, and ranks as one of the chief debtors of the United States. The adjustment of our trade balance with Britain cannot be expected until conditions in that country have become more settled, or until her factories can again turn out, and her ships move, the goods we need. The cause of a premium or a discount on New York funds, although well understood by those who have to handle foreign exchange transactions daily, remains somewhat of a mystery to the general public. When making purchases in cities across the border of the United States it is found that the Canadian dollar is discounted at rates varying from five to six cents, and sometimes more. The unbalanced state of trade already indicated is the cause of this. The position of the Canadian buyer in the United States, although not a desirable one just now, is, relatively speaking, more advantageous than that of the buyer from any other country, excepting Japan, Spain and Argentina. German money is at a discount of 74%, Italian 39%, Belgian 30½%, French 30%, English 10%, Swiss 7½%, Dutch 6%, Danish 17%, Norwegian 11% and Swedish 7.6%.

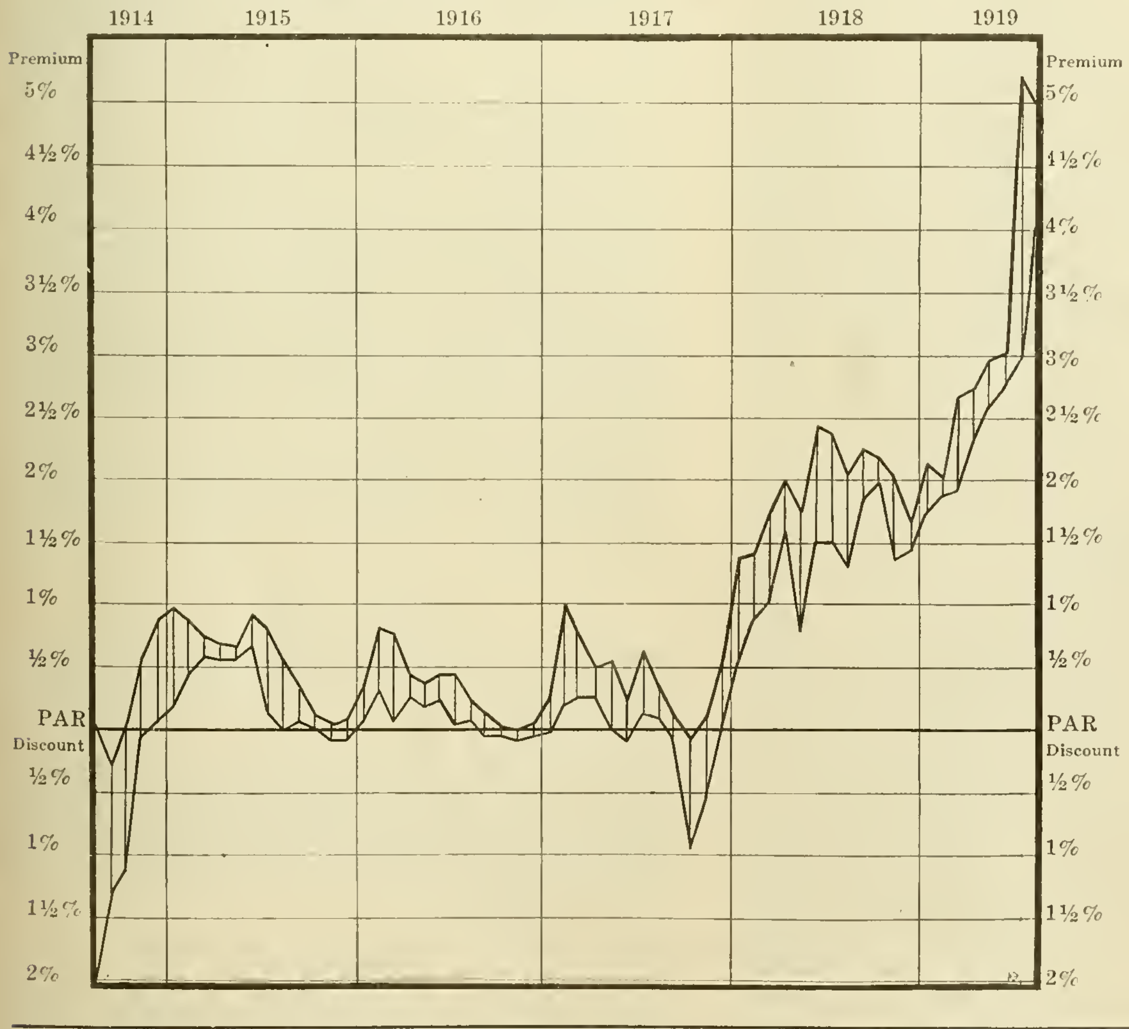
"The following graph shows the range of New York exchange in Canada from August 1st, 1914, to August 15th, 1919, a period which includes the lowest and the highest points that have been recorded in recent years. Since the graph was prepared New York exchange has fallen as low as 3¼ per cent. premium.

"It is of interest to recall that prior to Confederation a high premium on New York funds was not unknown. A minute of the board of the Gore Bank on January 9th, 1838, orders 'that no drafts on New York shall be sold at less than 3 per cent., and only then to persons who keep a regular account at the bank, unless the same is paid in specie, Upper Canada, or Gore Bank notes.' A monetary crisis in Great Britain in 1836 had precipitated the panic of 1837 in the United States, owing to the endeavor to withdraw large amounts of British capital recently invested in that country. During this panic large numbers of the banks in the United States suspended payment and for a short time a similar suspension took place in Canada. The Gore Bank acted as redemption agent in Hamilton for the notes of the Bank of Upper Canada, which explains the allusion to notes of that bank.

"Again, in December, 1838, the cashier of the Gore Bank writes the cashier of the City Bank, Montreal: 'The Bank of Upper Canada sells on New York at 5 per cent. advance, and I am told some of the other banks charge a still higher rate.' Then, as now, the trade of Canada was largely with the United States, and the balances were frequently against us."

New York Exchange August 1st, 1914, to August 15th, 1919

The vertical lines connect the monthly maximum and minimum points.



A London correspondent of the Toronto Globe cables that the Royal Wheat Commission has offered to buy 19,000,000 bushels of Canadian wheat at last year's price, or on the basis of $2.24½ for number 1, Northern, provided that it can be shipped before the close of navigation. This is very close to the Canadian government's guaranteed price of $2.15, and, in view of the fact that large surpluses are available from Australia, South America and the United States, it would appear that little more, if any, can be expected for the Canadian crop.

GOVERNMENT AND MUNICIPAL BONDS

The following quotations of active government bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97	97⅛
United Kingdom 5½% (Nov. 1, 1919) ..	99¾	99¹⁵⁄₁₆

Swedish Govt. 6% (June 15, 1939)	98½	98¾

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Charlottenburg Tp., Ont.	$ 30,000	5½	20-instal.	Sept. 6
Trail, B.C.	15,500	7	20-years	Sept. 15
Penticton, B.C.	75,000	6	20-years	Sept. 15
Pipeston R.M., Man.	10,500	..	20-years	Sept. 20
Vermilion, Alta. ...	20,000	6½	20-instal.	Sept. 22

Minitonas, Man.—Electors have passed a by-law authorizing the issuance of $100,000 highway debentures.

Elmira, Ont.—An issue of $2,500 5½ per cent. 20-instalment sidewalk and culvert debentures has been disposed of locally at par.

Penticton, B.C.—Tenders will be received until September 15, 1919, for the purchase of $75,000 6 per cent. 20-year electric light debentures, dated August 1, 1919. (See notice elsewhere in this issue.)

Fort William, Ont.—An issue of $317,000 school debentures, which was authorized recently, will be placed on the market sometime this fall.

Vermilion, Alta.—Sealed tenders will be received until September 22, 1919, for the purchase of $20,000 20-instalment 6½ per cent. debentures, for the erection of a fire hall and addition to equipment. (See notice elsewhere in this issue.)

Verdun, Que.—The citizens will be invited to vote on the authorization of a loan of $75,000, which, according to the intention of the city council, will be expended on an increase to the municipal electric plant with the object of doing away with the renewal of a contract with the Montreal Light, Heat and Power Co. for electric power.

Chatham, Ont.—The ratepayers of Chatham will be asked to vote on by-laws providing for the extension of the waterworks plant, a proposed scheme for merging the water commission into the public utilities commission, the proposed extension of the parks and playground system, and the proposed scheme for changing the present form of civic government to that of government by city managership.

Burnaby, B.C.—In order to take care of the increasing demands for water service in the municipality, a by-law for the necessary money to carry out the work will likely be submitted to the ratepayers at the next election. This proposal was placed before the meeting of the waterworks committee following a report from the municipal engineer upon an application for an extension of the water service to the Buena Vista district. Reeve Sanderson said that money would have to be raised for this purpose and that it would be necessary to submit a by-law. The municipality had been putting in temporary services, which should not have been laid.

Alberta School Districts.—Four blocks of school bonds for which tenders were called until August 28, have been awarded as follows: Block No. 1, Rurals, 10-years 6½ per cent.—Ideal S.D., $3,000; Pearson S.D., $2,000—$5,000, awarded to Canada Landed and National Inv. Co., Ltd., at 100.51. Block No. 4.—White Mud S.D., $3,500 10-years 6½ per cent., to Canada Landed and National Inv. Co., Ltd., at 100.78. Block No. 7.—Central Valley S.D., $1,800 6½ per cent. 15-years, to W. Ross Alger and Co., at 100.15. Block No. 8.—Kensington S.D., $1,400 6½ per cent. 10-years, to Canada Landed and National Inv. Co., Ltd., at 100.50. There were no offers received for blocks, 2, 6 and 9. Block No. 3 was not awarded because money was not needed, and Block No. 5 was not awarded because the price was too low.

York Township, Ont.—The Canadian Bank of Commerce has purchased two blocks of bonds, viz.: $30,288 6 per cent. 10-instalments, and $18,000 5½ per cent. 20-instalments, at 98.10 for the 5½'s and 101.20 for the 6's. The debentures are issued for public school and local improvement purposes. The following is a list of tenders:—

	5½%	6%
Canadian Bank of Commerce...	98.10	101.20
G. A. Stimson & Co.	97.03	100.03
R. C. Matthews & Co.	96.08	99.80
Housser, Wood & Co.	.....	100.26
Toronto Mortgage Co.	.....	par and int.

ROYAL SECURITIES STAFF CHANGES

The Royal Securities Corporation, Montreal, has announced many additions to the staff, amongst them being many members of the pre-war organization returned from overseas.

Captain T. T. Stoker, M.C., until recently staff captain, 1st Imperial Infantry Brigade, B.E.F., has returned from overseas to take up the joint management of Montreal city sales with Lieut. Harry Newman, 13th Battalion Royal Highlanders. There have been added to the Montreal sales force Major Allan Aitken, recently Brigade Major, 11th Canadian Infantry Brigade, and Lieut. Donald Deeks, who served with the 6th Canadian Field Artillery Brigade.

Lieut. W. A. MacKay, who served in France with the 22nd Battalion, and G. O. Dubuc have become associated with the corporation and will work with Mr. F. X. Saint-Pierre in Province of Quebec territory outside of Montreal.

Mr. Bruce Jamieson, recently with the 35th Battery, Canadian Field Artillery, after a period of training at head office, has taken charge of the Eastern Ontario territory.

In the Maritime Provinces the organization has been considerably increased. Lieut.-Col. H. G. Wood, late 26th Battalion, has joined the staff of Halifax office under Captain W. B. Milner. Fred M. Keator has been appointed representative for the Province of New Brunswick, with headquarters at St. John, N.B.

Lieut.-Col. A. L. Saunders, D.S.O. and bar, M.C., late 8th Battalion, has associated himself with Royal Securities in regard to the development of the corporation's Western Canadian business.

PERSONAL NOTES

MR. R. R. HEPBURN, of Winnipeg, employed at the Winnipeg post office, has resigned to accept a position with Plummer and Company, Ltd., stock brokers, in the capacity of office manager.

MR. F. A. ACLAND, Deputy Minister of Labor, has been appointed without salary, as third member of the Board of Commerce. It is understood that the appointment is temporary and that the government, after conference with Judge Robson and Mr. O'Connor, will, at a later date, make a permanent appointment.

OBITUARY.

MR. ALEXANDER R. HARGRAFT, a leading member of the Winnipeg Grain Exchange, died suddenly last week. He went to Winnipeg from Cobourg, Ont., and joined the Grain Exchange on August 20th, 1901, first as member of the firm of Coffee, Hargraft and Company, later as a partner in the firm of Hargraft and Gooderham, and at the time of his death he was associated with C. E. Allen of the Grain Exchange.

THE NATIONAL INDUSTRIAL CONFERENCE

THE conference which is to be held in Ottawa during the week beginning September 15th, will be a unique event in Canadian history. The summoning of this conference follows upon a proposal contained in the report of the Royal Commission on Industrial Relations. Employers and employees will be equally represented, and the Dominion and provincial governments will also be represented. The number present will be about 150; just who will be requested to attend has not yet been announced, but the Canadian Manufacturers' Association, for instance, has been asked to send representatives as follows: Iron and steel industry, 2; packing, 2; flour milling, 2; shipbuilding, 2; pulp and paper, 2; general manufacturing, 15; extra, 10; total, 35. The Canadian Credit Men's Trust Association will have two delegates, James H. Ashdown having been chosen to represent the west, and Hugh Blain to represent the east.

The proposed agenda for the conference is as follows:—

1. Consideration of the question of the desirability of unifying and co-ordinating the existing labor laws of the Dominion parliament and of the provincial legislatures; (see para. 107 of the R. C. Report), and the consideration of any new labor laws which are deemed necessary.

2. Consideration of: (a) employees' right to organize (see paragraph 59 also recommendations on page 19 of R. C. Report); (b) recognition of labor unions (see paragraph 59, also recommendations on page 19 of R. C. Report); (c) the right of employees to collective bargaining (see paragraph 65, also recommendation on page 19 of R. C. Report).

3. Consideration of: (a) the recommendations of the Royal Commission on Industrial relations in favor of the establishment of a bureau to promote the establishment and development of joint industrial councils (see paragraph 99, also recommendations on page 19 of the R. C. Report). (b) the further recommendations of the Royal Commission on Industrial Relations regarding the establishment of joint plant and industrial councils (see paragraph 85 and 98 and recommendations on page 19 of R. C. Report).

4. Consideration of the recommendation of the Royal Commission respecting hours of labor (see paragraph 52 and recommendations on page 19 of R. C. Report).

5. Consideration of minimum wage laws see paragraph 46 and recommendations on page 19 of R. C. Report.

6. Consideration of the recommendations of the Royal Commission that the findings of the commission be put into effect in all work controlled by the government where the principles of democratic management can be applied (see recommendations on page 19 of R. C. Report).

7. Consideration of resolutions relating to any other features of the Royal Commission Report referred to on page 19 of R. C. Report.

8. Consideration of the labor features of the Treaty of Peace.

9. Consideration of any other proposals which may be introduced bearing on the relations of employers and employees.

THE NEGLECT OF ECONOMIC SCIENCE

AN outstanding aspect of the present movement for changes in the industrial system is the general failure to recognize economic principles which have long since passed the hypothetical stage. Economic science, or political economy as it was formerly called, has had a comparatively short career, especially as compared with physical and biological science, which had developed into a fairly mature condition before the idea of systematically examining industrial life was conceived. However, in spite of numerous fundamental changes in the body of principles which has been built up, economics has arrived at a stage sufficiently mature for practical application. But while physical laws are universally recognized, recent developments illustrate to an amazing degree the ignorance which prevails as to the factors which control prices, and which enter into the production and distribution of wealth. The development of the science, in short, has been too esoteric, whereas the subject matter with which it deals is one of the essential parts of the life of every individual.

By the introduction of compulsory elementary education, all leading nations have sought to instruct the young in such essentials as are considered necessary for citizenship. We have been careful to instill a measure of patriotism towards the flag which affords us protection. But in this competition of nation against nation we have neglected to provide against influences which aim to uproot the very foundations on which the whole structure rests. In guarding political divisions we have overlooked that transverse organization common to all modern countries, and known as the industrial system.

Some knowledge is certain to be gained as a result of the strenuous experience through which all are now passing; institutions such as the Workers' Educational Association have made appreciable contributions. But until economic principles are instilled at an earlier and more impressionable age our whole organization will still be subject to danger from movements inaugurated by irresponsible but adroit agitators who trade upon popular ignorance.

MUNICIPAL BONUSING OF INDUSTRY

THE period since the armistice, bringing many new enterprises to Canada, has also witnessed the revival of that vicious practice of bonusing which had already been overdone before the war. The recent convention of the Union of Canadian Municipalities, if it did not accomplish much, at least went on record as being "against any law allowing any municipal councils to derive municipal funds or credits from their natural ends in subsidizing industries." The provincial governments were also urged to pass the legislation necessary for this purpose.

The London (Ont.) Chamber of Commerce Bulletin gives an illustration showing the extent to which municipalities are now trying to outbid one another. "United States manufacturing concerns," it says, "are at present showing a keen interest in Canadian possibilities for branch industries, both for Dominion trade and that of the British Empire. Their representatives, sent to report on Canadian conditions, visit one city after another, and take back a varied assortment of offers in the way of special inducements, in addition to data concerning shipping, sites, water supply, power rates, etc., etc. The competition among municipalities to secure these industrial prizes is apparently as keen as ever, and some thoughtful people are beginning to ask where it is going to end. Recently those looking after the industrial development of a number of western Ontario cities were advised by a well known U. S. manufacturing house that they might expect consideration for this firm's Canadian branch factory if they could better an offer made by a Canadian city as follows: '10 acres of land on railway siding, one-story, fire-proof building containing 30,000 square feet of floor space, handed to them free of charge, and free water and tax exemption for ten years.' Unless the city competing offers to take care of their pay roll as well, there would not seem much possibility of bettering this offer, and secretaries are beginning to write to one another regarding this and other firms, with warnings against this or that particular form of 'bonusing nuisance' and of 'concerns which are deliberately and flagrantly playing one Ontario centre against another.' The matter will probably be discussed at an early meeting of the Western Ontario United Boards of Trade, which may lead to some change in the present impossible order of things."

The first issue of the "Canadian Export Pioneer," a monthly magazine published in London and Toronto, has just made its appearance. In outlining its objects, it says: "It is our aim to supply a complete record of export trade developments in Canada, and to present, for the information of the oversea merchants, a trustworthy review of goods obtainable from the Dominion; to record the opinion of representative importers on market requirements, and on matters affecting finance, sales organization, buy methods, and the numerous other subjects of real importance to the Canadian shipper." The London office is at Craven House, 113 Kingsway, London,, W.C.2, and the Canadian branch, of which O. C. Pease has charge, is at 41 Victoria Street, Toronto.

PROFITS ON NEW YORK EXCHANGE

Bankers Deal only on a Small Margin—Present High Premium Accrues to Creditors Having Payments Due at Par in New York

By A. B. Barker

IN connection with the high premium on New York exchange, it is often asked, who makes the 4½ or 5 per cent. charged for a New York draft. The banks certainly do not, as their balances in that centre consist only of day-to-day money, and after, at most, a few days' transactions, nothing remains of the original balance. If they have American investments, purchased when exchange was low, and these are sold, realizing New York funds, there would be a profit on the sale of these funds to the extent of the increase in the premium on New York exchange, but the gain in this connection would be strictly limited to the amount so involved.

A bank is not a manufacturer of exchange, but only a dealer in it, and its profit is derived from the volume of the turnover, the gain on any individual transaction being small. Exchange is a commodity, dealt in by banks in the same way that a merchant deals in goods, buying at the market and selling at the market, the difference between the rate at which it is purchased and the selling price being the gross profit. This will be more clearly seen if the published rates are taken as the wholesale and retail prices, the rates "between banks" representing the wholesale and the "counter" rates the retail.

Effects on Commodity Transactions

If a merchant orders American goods at a specified price, f.o.b., New York, and the rate of exchange advances before the payment is due, he will lose, as he must pay more for the goods in Canadian currency, though all the American exporter receives is the stipulated sum in American currency. When the Canadian buyer accepts the goods he incurs a debt in the United States in favor of the American shipper, which may be settled by paying American currency or by transferring to the shipper the right to receive money in the United States, or, in other words, American exchange. This right he must buy from someone, and the price to be paid depends on the supply. When he has to pay an increased premium for this exchange, or right to receive money in New York, it simply means that the price of these rights has advanced, the supply not being equal to the demand. Any profit through such an advance in the rate will be made by the original owner of the exchange. As we have seen, this is not the bank, which is merely a dealer, buying and selling in the ordinary course of business, and at prices constantly fluctuating, almost from hour to hour.

As a commodity, New York or American exchange is subject to the law of supply and demand. In normal times this was balanced by a three-cornered arrangement. We sold heavily to, and borrowed extensively from, Great Britain, buying chiefly from the United States, and selling that country to a moderate amount only. This worked out that we owed the United States, and Great Britain owed us on balance, and, as the United States was indebted to Great Britain in connection with her own trade, we were able to settle our debt to the States by selling sterling exchange in New York, and thus transferring to that country our claims against Great Britain. The war has upset all these arrangements, for the present at least, and we are unable to settle our indebtedness in the American market in the old way. As a consequence, the value of Canadian exchange has fallen in that country, the rate of discount there being the market estimate of the expectation of eventual payment.

The Edmonton Board of Trade held its fifth annual business men's excursion from August 29th to September 3rd. This year the trip was through Peace River, Spirit River and Grande Prairie, Alta.

NOVA SCOTIA MUNICIPALITIES' CONVENTION

Another Objection Registered to Consolidated Railway Act—Provincial Scheme of Old Age Pensions Discussed

THE 1919 annual convention of the Union of Nova Scotia Municipalities was held in Yarmouth, N.S., August 27th to 29th. About 100 delegates were in attendance. The secretary-treasurer, A. Roberts, K.C., in his report, showed finances to be in good condition, and considerable work had been accomplished during the year. The secretary also gave an address on "The Value of the Provincial Union of Municipalities," along lines similar to an address he made before the Canadian Municipalities' Convention in Kingston, August 12th to 14th

The town of Windsor was chosen as the place of meeting for next year, and the nominating committee presented the following officers for 1919-1920:—president, A J. Bannerman, Pictou; first vice-president, A. C. McCormack, Sydney Mines; second vice-president, Parker Archibald, Halifax; secretary-treasurer, Arthur Roberts, K.C., Bridgewater; auditor, W. W. Foster, Halifax; executive: H. .L Dennison, Digby; C. L. Dodge, Kings; Peter Ross, Lunenburg; Warden Hatfield, Arcadia; J. S. Parker, Halifax; A. W. Ready, Windsor; K. R. McLean, Colchester; William Fitzgerald, Sydney; W. H. Rogers, Amherst; H. A. Price, Canso; F. C. Whitman, Annapolis Royal.

Among the resolutions passed were the following:—1. Whereas, that this Union of Municipalities of Nova Scotia protests most emphatically against the recent legislation passed by the parliament of Canada which deprives the municipalities of Canada of the control of their own streets, and roads, that the members of the House of Commons and Senators from Nova Scotia be requested to support the repeal of such legislation and press for the inclusion in every charter granting a public franchise of a provision that the use of streets and roads shall be subject to the consent and control of the municipalities.

2. Resolved, That in the opinion of the Union of Municipalities any town that is unable to raise sufficient funds for school purposes be permitted to increase the poll tax to ten dollars for school purposes only.

3. Resolved, that the Union of Municipalities place on record its emphatic protest against the provision of section five, chapter forty-eight, 1918, an act to amend the Theatre and Cinematograph Act, with the subsequent diminution of the revenues of the town caused thereby, and ask for the repeal of said action.

Deferred Resolutions

The following resolutions, after some discussion, were referred to the executive for the ensuing year:—

Resolved, that in the opinion of the Union of Municipalities of Nova Scotia the time has now arrived when the legislature should enact an old age pension.

Resolved, that rule ten of section five, of the Assessment Act be amended by adding the following:—"That ships owned by any firm or corporation whose head office is situated outside of the province, but which said firm or corporation carries on business within the province, shall be assessed at the place where said firm carries on business within the province.

The report of the committee on appeal was presented by W. W. Ferguson, municipal clerk of Colchester, and chairman of the committee, and adopted as follows:—

"That there should be one general assessor for the municipality, with one assistant in each polling district, the provincial government to appoint a commission to equalize the municipal and town assessment, all exemptions to be done away with and no exemptions whatever be allowed to corporations, the Assessment Act to be amended by striking out section fifteen, rule two, all property held by tenant for one year or upwards shall be assessed to the owners."

The index to *The Monetary Times* for January-June, 1919, is now ready, and subscribers may obtain copies upon request.

OUR TRADE RELATIONS WITH FRANCE

CANADA'S industrial status has been enhanced during recent years, even out of proportion to our war effort. This is especially true in the case of European nations, which were previously inclined to under-estimate this country because it is a colony. Our relations with France are especially friendly at the present time, and advantage of these facts may well be taken by the establishment of permanent trade relations.

Col. C. R. Hill, D.S.O., who has just returned from service with the Canadian forces, is especially optimistic regarding Canadian trade with France. In an interview with *The Monetary Times* a few days ago he said:—

"The French people looked on the work of the Canadian troops in France and Flanders as magnificent. With few exceptions, they think that we had several times more men there than was actually the case. They appreciate but do not yet fully understand why the Canadians put forward such a magnificent effort for such a distant cause. They particularly got to like the Canadian soldier with his cheery manners, ever ready to help in farm or village billet, and they will never forget the fact that rough conduct on a large scale was never known among Canadian troops. The result is a sentimental feeling that should be commercialized to maintain it.

"On the other hand, the French people still look on the English with a degree of aloofness, caused by the insular coldness of English troops as well as English business men. The American forces landed in France with every demonstration of affection from the French people but the actions of so many individuals in the United States Overseas army did much to counteract this good impression long before the American troops were evacuated, following the armistice. The work of the Australians in the firing line was also appreciated by the French but at no time did their troops as a whole make a favorable impression on the average French inhabitant.

"To summarize the results of the war, it is to the Canadians that the French people feel the most gratitude of all the troops that fought on the western front.

"The proportionate cost of living in France has gone up higher as a result of the war than in any other country of the allies. This is caused as much by their enormous sacrifice of French lives as by the devastation of vast areas in northern France. As a great producing country, Canada should do everything possible to help France in her need by exporting what France requires, and in return, Canada should buy anything that France can sell. Canada should lower the tariff on French silks, cashmeres, laces, china, fancy goods, etc., to the lowest possible level.

"Owing to our link in the British Empire, we have a constant intercourse with the British Isles on political, financial and commercial grounds. Owing to our geographical relationship with the United States, we have developed the closest connection with that country. No real attempt has been made to get acquainted with France and yet here is a country of sixty million people who are ready to welcome our trade and sympathy. This will only become established when the respective governments of France and Canada provide the initiative. Canada should invite delegations of French political, army, commercial and financial chiefs to visit Canada, and they may be assured that return invitations will come quickly. Our newspapers should devote more time and space to French news. The Press Association of France and Canada should co-operate to this end.

"Canadian manufacturers and producers should welcome the opportunity to find a new market. They should extend credits to assist in getting a foothold in France. They should study the French taste in advertising matter and presentation of their goods. Even although the domestic market or shipment to the United States and England takes up all their present available output, our manufacturers should get their samples into France and be prepared to fill orders.

Col. Hill has himself established trade connections with France, and will do business under the name of Hill and Company, C.R.P. Building, Toronto, offering an export and import service to Canadian firms.

BORDER CITIES AFTER AMERICAN INDUSTRIES

Montreal Industrial Establishments Expand—Many Other Municipalities Secure Plants

THE *Monetary Times* learns of the extension of many industrial establishments in Montreal. Among them are: National Breweries, Ltd., $450,000 addition to plant; United Shoe Machinery Co., Ltd., $44,000 addition; a large extension will soon be started by the Montreal Locomotive Works at Longue Point.

A number of industrial plants are now, or will be soon, under construction in various municipalities of Canada. At Vancouver, B.C., a group of local business men, beaded by G. Jonah, of the Jonah-Piat Co., have formed a company and will erect a woollen mill.

The Marshall Wells Hardware Co., Winnipeg, Man., have awarded a contract for the erection of a warehouse to cost about $70,000. The warehouse will be located at Rue Des Meurons, St. Boniface, Man.

Announcement has been made by the Goodyear Tire and Rubber Co. of their intention to build a $75,000 block at Regina, Sask., to serve as the western headquarters.

It is contemplated that the Consolidated Iron and Steel Corporation, Ltd., Toronto, recently incorporated, will build a smelter at Brockville, Ont.

After having their plant closed for more than six months, the Dominion Alcohol Company, Wotton, Que., will reopen it. There is a heavy demand for wood alcohol, which is the chief product of the company.

The Lougheed machine shop at Sarnia has been purchased by the Seagrove Company, manufacturers of fire trucks and other motor apparatus. Additions will be made to the plant, and operations under the new company will commence shortly.

British Columbia Helping Industries

A loan of $200,000 is to be made to the Canada Western Cordage Company, Ltd., of New Westminster, B.C., by the province. This amount must be utilized by the company in erecting a cordage factory, the purchase and installation of needed machinery and purchase of raw materials, etc. Another provision is that the members of the company must subscribe 60 per cent. of the capital stock of $100,000.

The Fisher Body Company of Canada, Ltd., with plants at Windsor and Walkerville, Ont., is to erect a second plant at Windsor. It will be for the production of closed automobile bodies exclusively.

The Border Chamber of Commerce has announced the names of three American companies which have definitely decided to locate in the Border cities. They are as follows: Peninsular Machine Company and the Helbing-Wright Chemical Company, Detroit, Mich., and C. E. Stranger, Dundee, Mich. The names of twenty United States industries, considering locating on the border, have been received by the Chamber of Commerce, and every effort is being made to secure them.

COBALT ORE SHIPMENTS

For the past month shipments of ore from Cobalt Station have been nil, owing to strike conditions. The statement issued for the week ending August 29th, 1919, shows that McKinley-Darragh Mining Co. shipped 85,431 pounds of ore from that station. The total shipments since January 1st are 15,415,218 pounds, or 7,707.6 tons.

BANKS UNDER MINIMUM WAGE ACT

According to a statement by Mrs J. H. MacGill, of the British Columbia Minimum Wage Board, steps have been taken to put before the government at Victoria during the coming session the need for legislation to place banks and railway companies under the provisions of the Minimum Wage Act.

FINANCIAL ADVERTISERS' CONVENTION

The 1919 convention of the Financial Advertisers' Association will be held in New Orleans, La., September 21st to 25th. There are several Canadian companies who are members in this organization. One of the papers will be by D. McEachren, secretary of the Huron and Erie Mortgage Company, entitled "Gingering up the Savings Department."

ASSISTANCE TO LIFE INSURANCE AGENTS

A useful chart has been prepared by J. J. Devaney, Citizen's Building, Cleveland, Ohio, setting forth the advantages of life insurance. This chart is prepared in such a form that it can be used in conversation with prospective policyholders and enables them in the course of a few moments perusal to grasp points which could not very well be impressed during a conversation of the same length of time.

MONTREAL TRAMWAYS RAISE FARES

The new tramways tariffs have been announced by the Montreal Tramways Commission. The new fares will be four tickets for twenty-five cents, instead of five tickets for twenty-five cents, or a seven cent cash fare instead of a six cent cash fare as at present; five workingmen's tickets for twenty-five cents instead of six such tickets for that amount, and other rates will remain the same, that is, children's tickets will continue to be seven for twenty-five cents, and the fare after midnight will remain at fifteen cents. The figures of last year's transactions, and the fact that there must be found $12,000,000 for this year, told the story of what the changes would be. Under the present rates the average fare has been 4.8 cents. Under the new tariffs the average fare will be 5.8, it is estimated, so the fare has been raised one cent.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended August 28, 1919, compared with the corresponding week last year:—

	Week ended Aug. 28, '19.	Week ended Aug. 29, '18.		Changes.
Montreal	$104,206,621	$ 91,750,074	+	$12,456,547
Toronto	67,858,506	63,953,331	+	3,905,175
Winnipeg	30,788,144	27,022,570	+	3,765,574
Vancouver	12,501,550	10,613,210	+	1,858,340
Ottawa	8,346,656	5,050,771	+	3,295,885
Calgary	5,826,680	4,674,927	+	1,151,753
Hamilton	5,336,357	5,061,621	+	274,736

FURTHER FEATURES OF THE LIFE UNDERWRITERS' CONVENTION

Insurance for Disabled Soldiers—Investments in the West—Insurance and Our War Debt

THERE are 50,000 Canadians who have been disabled in the war in such a way as to render them ineligible for life insurance as now issued. The preparation of special insurance for these risks, with extra premium rates, has been discussed to some extent, and was taken up at the Life Underwriters' recent convention in Calgary. A resolution was carried calling on the Dominion government and on the Life Officers' Association to take action in this direction. L. M. Bidwell, of the Mutual of Canada, Saskatoon, who moved the resolution, made a strong plea on behalf of disabled returned men. "The subject is one," he said, "that should command the attention of the ablest brains in Canada. There is no man in the Dominion to whom the benefits of life insurance are more necessary, or should be more readily available, than the disabled men. There are men who have lost limbs, have been badly gassed, and in many different ways have suffered disabilities. They need insurance most and cannot get it; the underwriter cannot sell it to them. We have got to devise a means whereby all these difficulties may be overcome. The disabled veterans have been trying to get it on the same basis as men of sound physique. We must put the whole weight of our association behind this movement."

Mr. Bidwell's declaration was strengthened by that of J. W. W. Stewart, managing director for the Monarch Life of Winnipeg, who said that he trusted that the matter would not end with the passing of a resolution, but that everyone would fight to secure the advantages of insurance for the men who were now suffering because they had sacrificed their health.

Mortgage Loans for Life Funds

"People who talk about the province of Alberta and the city of Calgary having over-borrowed don't know what they are talking about," said R. T. Riley, managing director of the Northern Trusts of Winnipeg, who spoke on "Western Canada as a Field for Investment." Mr. Riley said that this province and city would require thousands of dollars for development for every dollar which they had to-day, and that there was no better source of funds for the purposes of their development than the life insurance companies. The investment of funds was a matter second only in importance to the acquiring of business—so important that the government had defined exactly in what kinds of securities investments might be made in order to ensure security. The companies were allowed to invest in government bonds of the Dominion and of foreign countries, provincial bonds, bonds of municipalities, including school debentures, the debentures of companies organized to deal in loans on landed securities; preferred stock in companies which had paid dividends for seven consecutive years, in which the preferred did not amount to more than 50 per cent. of the total stock; common stock in certain companies, such as the C.P.R., which had paid dividends over a long term of years; first mortgages on real estate up to 60 per cent. of the value of the property. These must be approved.

"Since confederation," declared Mr. Riley, "not one insurance company licensed by the Dominion government, doing business in Canada, has defaulted by a single dollar in its engagements to the public. The investment in first mortgages, in so far as the west is concerned, are the most important. The grievance in the early days was that the insurance companies would not invest here. They had not sufficient confidence in the stability of the country, in the willingness of the settlers to stick it."

Mr. Riley quoted from the last available public report, which was for the year ended December 31, 1917, to the effect that the total life insurance premiums paid in the three western provinces in that year were between $3,000,000 and $4,000,000. The total amount invested by the companies was from $25,000,000 to $26,000,000. The total amount of new business written up was $27,000,000 and the total in force at the end of the year was $97,000,000. He also entered a strong protest against any proposal which might be made to abolish the personal covenant in connection with mortgages, and declared if this course were taken the difficulty of obtaining mortgages and their price would increase. Casually, it might look very pleasant for a mortgagee to be able to say, if things went wrong, "Take the property, I don't want anything to do with it." "What I find it necessary to emphasize," said Mr. Riley, "is this, that money is lent to the man and not to the property. We shall get less money and we shall have to pay a higher rate if the personal covenant is abolished. A great many investors will 'shy off.' You are going to bring the business down to the level of the pawnbroking business."

Mrs. Clara Glover Power of the Grest-West Life, Winnipeg, spoke on "Insurance for Women," declaring that this is likely to be of great importance in the future. Numbers of women of from 22 to 24 years of age were called upon to support widowed mothers and their families and in such instances insurance was imperative. Every girl should have a 20-year endowment policy.

J. B. Warniker, of the Mutual Life, Victoria, B.C., described the association as the labor union of the insurance agent. While the underwriters were in business to make money, they must realize their responsibilities to the community and the more culture, refinement, judgment and tact they acquired the more valuable their work would be.

J. W. W. Stewart, managing director of the Monarch Life, devoted much attention to consideration of the issues raised during the Winnipeg strike, which he described as a young revolutionary movement, and he warned his hearers against the possibility of trouble in the future. He laid emphasis on the statement of the minister of finance, that the people of Canada would have to work, and work hard, and in addition, put into practice the teachings of the Golden Rule, if this country were to be saved during the troublous years of reconstruction. "For the remainder of our days," he said, "we shall, in our way, be paying the price of victory and our children and our children's children shall be permitted to take an active part in the great readjustment. The consolidated debt of nations before the war was $40,000,000,000. In five years the figure increased 600 per cent., until to-day the enormous figure of $240,000,000,000 was reached. Respecting Canada, the year before the war our national debt amounted to approximately $350,000,000; this year it will amount to approximately $2,000,000,000—practically an increase of 600 per cent. There is no use worrying about it. It is up to each of us to pitch in, do our bit and play our part toward its liquidation."

MERCHANTS BANK CONFERENCE IN WINNIPEG

A conference of officials of the Merchants Bank of Canada was held in Winnipeg last week, and was attended by the president, six directors and the general manager. Other points in Manitoba were also visited, and similar meetings are being held in other cities of the west.

July Statement Shows Business Recession

Savings Deposits, However, Still Increase—Circulation Has Small Increase—Demand Deposits Down—Increase in Money Placed on Call Outside Canada

	July, 1918.	June, 1919.	July, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$549,068,651	$ 605,927,027	$ 584,176,765	+ 6.4	—3.5
Deposits after notice	992,015,137	1,139,569,570	1,175,092,155	+18.5	+3.3
Current loans in Canada	905,677,233	1,043,712,932	1,014,387,206	+12.0	—2.8
Current loans elsewhere	99,702,919	132,525,550	138,217,957	+39.3	+4.5
Loans to municipalities	56,589,173	52,349,353	54,455,738	— 3.6	+3.8
Call loans in Canada	74,382,762	95,852,728	93,587,497	+25.6	—2.1
Call loans elsewhere	167,112,836	167,236,045	178,098,434	+ 6.6	+6.5
Circulation	198,779,395	222,712,991	223,662,648	+12.6	+ .5

The above are the principal changes in the statement of chartered banks, issued by the finance department, for July compared with the previous month and with July, 1918. The smaller total of loans to municipalities indicates that they are now leaning upon the banks to a lesser extent than was the case last year.

In view of the fact that current loans in Canada have fallen off for some months past, the decline in demand deposits is readily understood. The way in which savings deposits continue to pile up is, however, quite remarkable.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1918—July	$549,068,651	$ 992,015,137
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072
June	605,927,027	1,139,569,570
July	584,176,765	1,175,092,155

The course of the deposits account during the past six years is shown in the following table:—

July.	On demand.	After notice.	Total.
1914	$346,854,051	$ 671,214,125	$1,018,068,176
1915	340,950,215	691,731,719	1,032,681,934
1916	431,958,188	789,363,919	1,221,322,107
1917	450,849,356	929,442,340	1,380,291,696
1918	549,068,651	992,015,137	1,551,083,788
1919	584,176,765	1,175,092,155	1,759,268,920

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—July	$ 905,677,233	$74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136
November	1,082,709,655	85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427
February	1,095,301,791	79,154,121
March	1,117,197,446	87,601,337
April	1,107,986,523	86,091,844
May	1,071,447,686	89,187,032
June	1,043,712,932	95,852,728
July	1,014,387,206	93,587,497

The following table shows the course of the principal loan accounts during recent years:—

July.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 840,198,625	$ 48,013,052	$68,441,816	$125,545,287
1915	758,349,517	41,784,633	71,168,233	117,821,174
1916	740,040,741	62,356,259	87,355,648	176,121,733
1917	829,560,700	90,253,882	71,376,788	151,875,676
1918	905,677,233	99,702,919	74,382,762	167,112,836
1919	1,014,387,206	138,217,957	93,587,497	178,098,434

The following table shows the call loans abroad in July, as compared with previous returns:—

	1916.	1917.	1918.	1919.
	$	$	$	$
January	134,248,552	155,747,476	132,687,066	140,819,656
February	139,138,651	162,344,556	160,239,494	155,983,681
March	141,889,989	161,616,735	167,296,701	160,116,443
April	147,146,443	159,156,054	179,818,531	155,533,666
May	163,400,659	168,692,675	172,259,879	157,176,325
June	182,757,015	159,309,133	170,034,476	167,236,045
July	177,121,733	151,875,676	167,112,836	178,098,434
August	171,380,353	176,610,625	160,544,990	....
September	173,877,586	166,480,004	159,680,810	....
October	189,346,216	151,018,747	157,040,858	....
November	183,250,389	139,832,552	171,035,732	....
December	173,878,134	134,483,432	150,248,322	....

FIRE LOSSES IN MANITOBA

The total number of fires in Manitoba for the month of July numbered 160; 63 or 40 per cent. occurring in Winnipeg. The total loss for the province amounts to $188,023, and of this amount, Winnipeg is responsible for $122,222 or 65 per cent. of the total. The large loss in Winnipeg is due to the fire which destroyed the Hilson Auction Mart, this loss amounting to $108,000 or 90 per cent. of Winnipeg's total loss for the month. Included in this amount is a loss of $7,000 sustained by the Canada Building, caused by the exposing Hilson fire.

Fires in frame buildings are still on the increase, 91 or 57 per cent. of the total number of fires having occurred in buildings of this construction during the month, with a loss of $140,016 or 75 per cent. of the total loss for the province. 70 lightning losses are reported, with a loss of $27,828; included in this amount is a loss of $7,600 to the Woods Manufacturing Company, Limited, building, Winnipeg, which was struck by lightning during storm of July 26th, and 33 lightning losses to livestock, with a loss of $4,407. Spontaneous combustion is responsible for four fires, with a loss of $23,113, or 14 per cent. of the total fire loss of the province. Two fires were responsible for a monetary loss of $133,000, or about 72 per cent. of the total loss of the province.

Alcomdale, Alta (Morinville)..	Royal Bank of Canada.
Whitemouth Man. (Beausejour)	Royal Bank of Canada.

(Continued on page 22)

OUR CHARGES

Our charges for the management of an estate are no more and often less than those of a private executor. They are fixed by the Surrogate Court Judge when he audits the estate accounts. The amount which he allows, as the Order of the Court reads, is "a fair and reasonable allowance for our care, pains, trouble, and time and personal disbursements expended in and about the administering, arranging and settling the affairs of the said estate."

THE
TORONTO GENERAL TRUSTS CORPORATION
Head Office - TORONTO
Branches—Ottawa, Winnipeg, Saskatoon, Vancouver

Canadian Financiers Trust Company

Head Office - Vancouver, B.C.

TRUSTEE EXECUTOR ASSIGNEE

Agents for investment in all classes of Securities.
Business Agent for the R. C. Archdiocese of Vancouver.
Fiscal Agent for B. C. Municipalities.

Inquiries Invited

General Manager Lieut.-Col. G. H. DORRELL

The Old Way and the New

The Old Way was to appoint a friend Executor. The New Way is to appoint a Trust Company. Its financial responsibility, permanent organization and experienced officials make it a much preferable appointment. We suggest as your choice,

Chartered Trust and Executor Company
46 KING STREET WEST, TORONTO

Hon. W. A. CHARLTON, President
JOHN J. GIBSON, Managing Directo

5% Absolute Security

OVER 200 Corporations, Societies, Trustees and Individuals have found our Debentures an attractive investment. Terms one to five years.

The Empire Loan Company
WINNIPEG, Man.

"....and I thank you for so carefully carrying out my instructions which I appreciate very much."

—Extract from a letter from a gentleman who placed important business interests in our hands before leaving for Florida for the winter.

Union Trust Company
Limited
Henry F. Gooderham, President.
Head Office: Cor. Bay and Richmond Sts., Toronto.
Winnipeg. London, Eng.
153

Canadian Guaranty Trust Company
HEAD OFFICE, BRANDON, Man.

Board of Directors:
ALEX. C. FRASER, President.
LT.-COL. A. L. YOUNG, Vice-President.
JOHN R. LITTLE, Managing Director.
WILLIAM FERGUSON, H. L. ADOLPH, JOHN A. McDONALD, HON. W. M. MARTIN, M.P.P., ALEX. A. CAMERON, ALEX. ROSE, E. O. CHAPPELL, J. S. MAXWELL, G. S. MUNRO, F. N. DARKE, D. A. REESOR.

Acts as Executor, Administrator, Trustee, Liquidator, Guardian, and in any other fiduciary capacity

Branch Office—Swift Current, Saskatchewan

Be sure your WILL is made, naming a Strong TRUST COMPANY as your

EXECUTOR

Ask for Booklet: "The Corporate Executor."

CAPITAL, ISSUED AND SUBSCRIBED ...$1,171,700.00
PAID-UP CAPITAL AND RESERVE 860,225.00

The Imperial Canadian Trust Co.
Executor, Administrator, Assignee, Trustee, Etc.

Of the deposit in Central Gold Reserves $10,500,000 is in gold coin; the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

BANK BRANCH NOTES

(Continued from page 20)

Mr. Wm. Milroy has been appointed acting manager of the branch of the Bank of Hamilton at Altona, Man., and Mr. G. A. Hurst, manager at Decker, Man.

The following appointments have been announced by the Canadian Bank of Commerce in connection with the opening of new branches: Mr A. H. Burland, manager at Birch Cliff, Ont.; Mr. A. T. Croft, manager at Dartmouth, N.S.; Mr. Allan McKenzie, manager at High Prairie, Alta.; Mr. T. C. McGill, manager at Toronto, Ont. (Yonge and Delisle).

LIFE INSURANCE COMPANY CONVENTIONS

The $200,000 field club of the Mutual Life Insurance Company of New York held a convention last week in Quebec city. This was the first time that it has met in Canada, and about 300 delegates were present. A convention of the $100,000 club of the Great-West Life Insurance Company was also held this week at the Royal Muskoka Hotel. The evenings were occupied with business sessions, while the delegates were for the most part free during the day. A large number of the company's representatives from all parts of Canada were present.

Discrimination

When an experienced manager is required in your business do you trust to chance or to your sound business judgment?

In selecting an executor for your estate the utmost discrimination is necessary, because your selection is vitally important to those who are closer to your heart than is your business.

"The executor for your Estate" is

The Canadian Income War Tax Act

Digest of Legislation with Amendments up to Present Time—Schedule of Payments — Exemptions—Procedure of Assessment, Collection and Appeal

THE Canadian Income War Tax Act, 1917, has now been amended twice, during the legislative sessions of 1918 and 1919, respectively, and with a view to giving a convenient summary of the present taxation the Royal Bank has issued a booklet showing the legislation as it now stands. Commencing with definitions, this summary says:—

"Board" means a board of referees. (See Sec. 12).

"Minister" means the minister of finance.

"Normal tax" means the tax authorized by Sub-Sec. I., para. (a), Sec. 4.

"Person" means any individual or person and any syndicate, trust, association, or other body and any body corporate, and the heirs, executors, administrators, curators and assigns or other legal representatives of such person, according to the law of that part of Canada to which the context extends.

"Surtax" means the taxes authorized my Sub-Sec. I., para. (b), Sec. 4.

"Dependent child" means child under 21 years of age and dependent on his parent for support, or over 21 years of age and dependent on his parent for support on account of physical or mental incapacity.

"Taxpayer" means any person paying, liable to pay, or believed by the minister to be liable to pay, any tax imposed by this Act.

"Year" means the calendar year.

"Persons employed in Canada" means all persons who receive, directly or indirectly, salary, wages, commissions, fees or other remuneration derived from sources within Canada for personal services, any part of which is performed in Canada.

"Commissioner of Taxation" means the officer appointed by the governor-in-council, having powers and performing duties assigned to him by the governor-in-council, or by the minister under the provisions of this act.

Definition of Income

"Income" means "the annual net profit or gain or gratuity, whether ascertained and capable of computation as being wages, salary, or other fixed amount, or unascertained as being fees or emoluments, or as being profits from a trade or commercial or financial or other business or calling, directly or indirectly, received by a person from any office or employment, or from any profession or calling, or from any trade, manufacture or business, as the case may be, whether derived from sources within Canada or elsewhere; and shall include the interest, dividends or profits directly or indirectly received from money at interest upon any security or without security, or from stocks, or from any other investment, and, whether such gains or profits are divided or distributed or not, and also the annual profit or gain from any other source; including the income from, but not the value of property acquired by gift, bequest, devise or descent; and including the income from, but not the proceeds of, life insurance policies paid upon the death of the person insured, or payments made or credited to the insured on life insurance endowment or annuity contracts upon the maturity of the term mentioned in the contract, or upon the surrender of the contract, and including the salaries, indemnities or other remuneration of members of the "Senate and House of Commons of Canada and officers thereof, members of provincial legislative councils and assemblies and municipal councils, commissions or boards of management, any judge of any Dominion or provincial court appointed after the passing of this act, and of all persons whatsoever, whether the said salaries, indemnities or other remuneration are paid out of the revenues of His Majesty in respect of his government of Canada, or of any province thereof, or by any person, except as provided in Section 5 of this Act."

Exemptions and Deductions

Such reasonable amount as may be allowed by the minister of finance for depreciation. The minister, in determing the income derived from mining and from oil and gas wells and timber limits shall make such allowance for the exhaustion of the mines, wells and timber limits as he may deem just and fair.

For purposes of the normal tax only, $200 for each child under 18 years of age dependent upon the taxpayer for support.

Amounts paid by the taxpayer during the year to the Patriotic and Canadian Red Cross Funds and other patriotic and war funds approved by the minister.

Dividends received by shareholders of a corporation shall not be liable to the normal tax in the hands of shareholders, but shall be liable to the supertax and surtax provisions of this act. The amount of exemption shall not exceed the net amount of such dividends after deduction of interest or carrying charges in respect of such dividends. *(See also Sec. 4, Sub-Sec. 5, "Deductions," and Sec. 5, "Incomes not liable to Tax.")*

In determining the income no deduction may be allowed for personal and living expenses. If personal and living expenses form part of the profit or remuneration of a taxpayer, it shall be assessed as income under this act.

Deficits or losses sustained in transactions entered into for profit but not connected with the chief business of the taxpayer may not be deducted from income.

Holding Companies

If an incorporated company conducts its business in such manner as either directly or indirectly to benefit its shareholders by selling its product or goods and commodities at less than the fair price which might be obtained therefor, the minister may determine the amount which shall be deemed to be the income of such company for the year. In determining the income, the minister shall have regard to the fair price which, but for any agreement, arrangement, etc., might have been obtained for the company's product, goods and commodities.

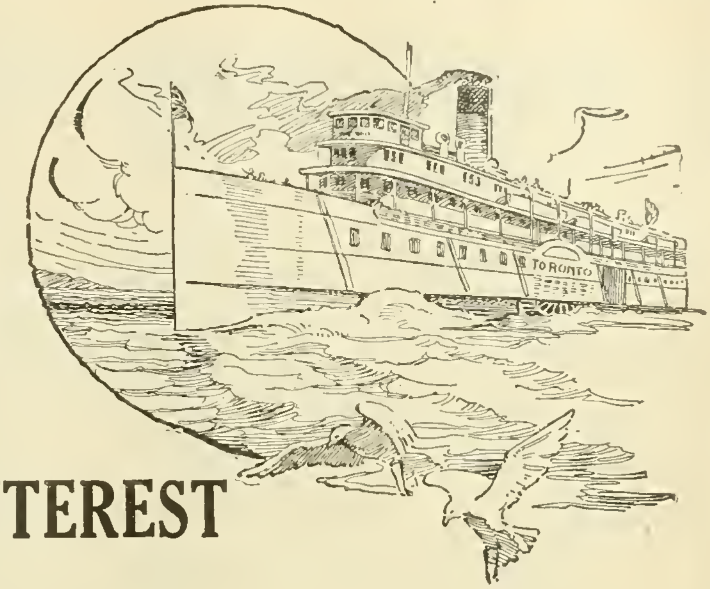
In the case of the income of persons, corporations, etc., residing or having their head office or principal place of business outside of Canada, but carrying on business in Canada, the income shall be the net profit arising from the business in Canada.

The share of a taxpayer in the undivided profits of a corporation shall not be deemed to be taxable income, unless the minister is of opinion that the accumulation of such undivided profits is made for the purpose of evading the tax, and is in excess of what is reasonably required for the purposes of the business.

Dividends or shareholders' bonuses paid to shareholders by a corporation on or after January 1st, 1917, shall be taxable as income of the shareholder in the year in which the same are received unless paid exclusively out of accumulated profits on hand prior to January 1st, 1917. No dividend or shareholders' bonus shall be deemed to be paid out of accumulated profits on hand prior to January 1st, 1917, if the earnings of the corporation since the beginning of the accounting period which ended in the year 1917 are sufficient to provide for the said dividend and other taxable dividends paid since the said date.

Income of a beneficiary of an estate shall be deemed to include the amount accruing during each taxation year to which he, his heirs or assigns, are entitled from the income of the estate whether distributed or not.

Any part of the remuneration of a taxpayer retained by his employer for superannuation or pension fund, shall be



A BOAT TRIP OF THRILLING INTEREST

THE route is one of wondrous beauty—the boats are floating palaces, providing a new experience in travel de luxe.

Through the kaleidoscopic beauty of the far-famed "Thousand Islands" winds this route of scenic enchantment. Then it traverses the River Rapids of the St. Lawrence—the "shooting" of them is an experience that charms and exhilarates.

Many miles of scenic splendor—so wonderful you'll marvel why anyone ever went across the sea for scenery when this vacation route is so readily accessible, and at so moderate a cost.

TORONTO TO 1000 ISLANDS AND RETURN $17.20

Boats leave Toronto Daily at 3.30 p.m., for Rochester, 1000 Islands, Montreal and points east.

Tuesdays, Thursdays, Saturdays

An additional boat leaves Toronto at 5 p.m. direct to Clayton, Alexandria Bay and Odgensburg, connecting for Montreal, Quebec and points east. (Schedule subject to change without notice.)

For Tickets, Berth Reservations and all information write our City Ticket Office, 46 Yonge Street, Toronto

CANADA STEAMSHIP LINES, Limited

allowed as an exemption or deduction from the income of the taxpayer, and any payment out of such pension fund to an employee shall be included as taxable income of the employee.

Normal Tax

The following is the normal tax upon the income of every individual residing in Canada for six months or more (of the taxable year), or, who having been resident in Canada has left that country with the intention of resuming residence therein, or who is employed in Canada, or is carrying on any business in Canada, *corporations and joint stock companies excepted:—*

4% upon income in excess of $1,000 but not exceeding $6,000, in the case of unmarried persons and widows or widowers without dependent children, and persons who are not suporting dependent brothers or sisters under the age of 18 years, or a dependent parent(s), or grandparent(s), and 4% upon income in excess of $2,000 but not exceeding $6,000 in the case of all other persons, and 8% upon all income exceeding $6,000.

The following table shows the amount of the normal tax of 4% payable on income up to, but not exceeding $6,000:—

UNMARRIED PERSONS, WIDOWS, ETC.		ALL OTHER PERSONS.	
$1,000	Exempt		
1,500	$ 20	$2,000	Exempt
2,000	$ 40	2,500	$ 20
3,000	$ 80	3,000	$ 40
4,000	$120	4,000	$ 80
5,000	$160	5,000	$120
6,000	$200	6,000 (1% surtax on $1,000*)	$170

Upon income in excess of $6,000 a normal tax of 8% is payable instead of 4%.

Surtax

In addition to the normal tax, surtaxes on the following scale will be levied on income of individuals *(not corporations)* exceeding *$5,000**:—

On Amt. by which Income exceeds	But does not exceed	Surtax	On Amt. by which Income exceeds	But does not exceed	Surtax
$ 5,000	$ 6,000	1%	$ 58,000	$ 60,000	28%

Corporations and Partnerships

Corporations and joint stock companies, no matter how created or organized, (*) shall pay a tax of 10% upon income exceeding $2,000. Any corporation, the fiscal year of which is not the calendar year, shall make a return and have the tax payable by it computed upon its income for its fiscal year ending within the calendar year for which the return is being made.

Persons carrying on business in partnership shall be liable for the income tax only in their individual capacity, provided that a husband and wife carrying on business together shall not be deemed to be partners. A member of a partnership or the proprietor of a business whose fiscal year is other than the calendar year shall make a return of his income from the business for the fiscal period ending within the calendar year for which the return is being made, but his return of income derived from sources other than his business shall be made for the calendar year.

Evasion of Taxation

Any person who, after August 1st, 1917, reduces his income by the transfer or assignment of any real or personal, movable or immovable property to his wife or husband, as the case may be, or to any member of the family, shall nevertheless be liable to be taxed as if such transfer or assignment had not been made, unless the minister of finance is satisfied that it was not made for the purpose of evading taxes imposed under this act.

Deductions

Taxpayers are entitled to the following deductions from the amount that would otherwise be payable for taxes:—

(a) The amount paid by the taxpayer for corresponding accounting periods under the provisions of Part 1 of The Special War Revenue Act, 1915, and amendments, or The Business Profits War Tax Act, 1916, and amendments, provided, that in computing the taxable income the taxpayer

---

*Taxpayers may deduct the tax under the "Business Profits War Tax Act" from the "Income Tax." If the Business Profits Tax is the greater, it is the only tax payable.

Make Every Hour Count

FOR the salesman, collector, contractor —the man who "must get there"— the Ford Runabout.

Through the traffic of the city, over rough country roads to the outlying town, the Ford Runabout travels rapidly and economically.

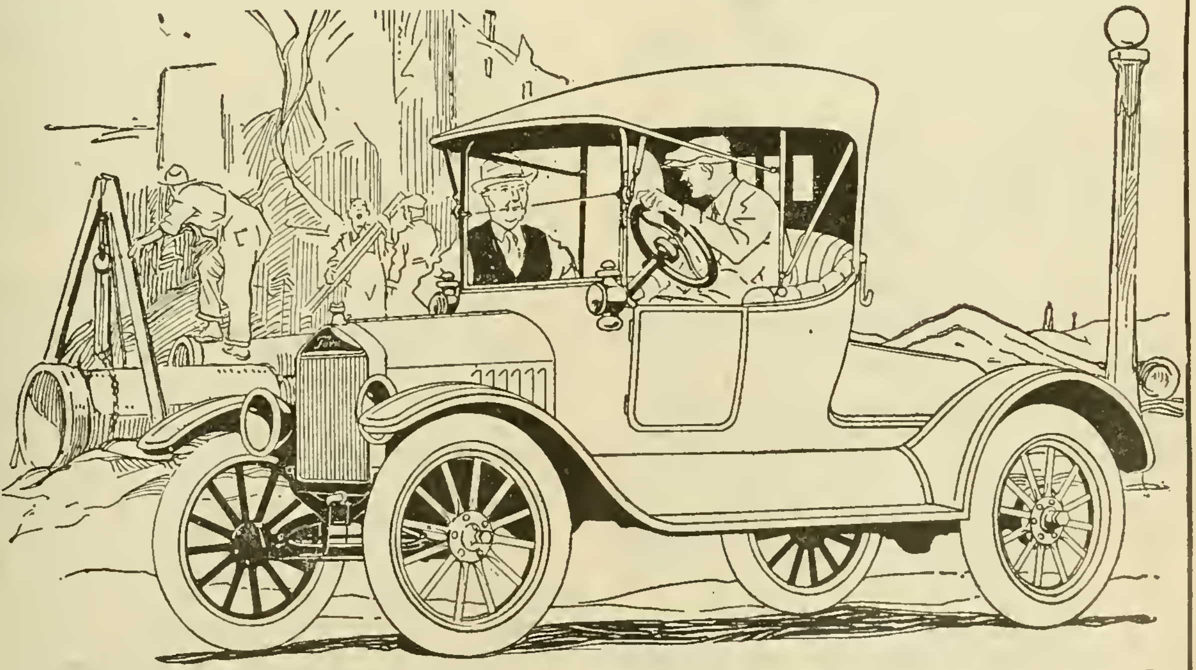
Ford Runabout $660. Touring $690. On open models the Electric Starting and Lighting Equipment is $100 extra.

Coupe, $975. Sedan, $1,175. (Closed model prices include Electric Starting and Lighting equipment). Demountable rims, tire carrier and non-skid tires on rear as optional equipment on closed cars only at $25.00 extra.

These prices are f. o. b. Ford, Ontario and do not include War Tax

Buy only Genuine Ford Parts

700 Canadian Dealers and over 2.000 Service Garages supply then. 124



Ford Motor Company of Canada, Limited
Ford - Ontario

shall not include any taxes paid under the said acts in the expenses of his business, and the minister of finance shall have power to determine any question that may arise in consequence of any difference in the several periods for which the taxes under the said acts and under the Income Tax Act, respectively, are payable, and the decision of the minister shall be final. In the case of a partnership, each partner shall be entitled to deduct such portion of the tax paid by the partnership under the Business Profits War Tax Act, 1916, and amendments, as may correspond to his interest in the income of the partnership, provided that such deduction shall not affect the liability of the taxpayer to tax in respect of any income which does not form part of the profits assessed under the Business Profits War Tax Act, 1916, but such income shall be assessed in the same manner as if it were the only income of the taxpayer.

(b) The amount paid to Great Britain or any of its self-governing colonies or dependencies for income tax in respect of income of the taxpayer derived from sources therein, and the amount paid to any foreign country for income tax in respect of the income of the taxpayer derived from sources therein, (if, and only if, such foreign country in imposing such tax allows a similar credit to persons in receipt of income derived from sources within Canada) provided, that such deduction shall not at any time exceed the amount of tax which would otherwise be payable under the provisions of section 3, of Chapter 25, of the Statutes of 1918, or of any amending act, in respect of the said income derived from sources within Great Britain or any of its self-governing colonies or dependencies, or any foreign country; and further provided, that the said deduction shall be allowed only if the taxpayer furnishes satisfactory evidence showing the amount of tax paid and the particulars of income derived from sources within Great Britain or any of its self-governing colonies or dependencies, or any foreign country.

Incomes not Liable to Tax

The following incomes are not liable to taxation:—

The income of the Governor-General of Canada.

The incomes of consuls and consuls-general who are citizens of the country they represent and are not engaged in any other business or profession.

The income of any company, commission or association not less than 90% of the stock or capital of which is owned by a province or municipality.

The income of any religious, charitable, agricultural and educational institutions, boards of trade and chambers of commerce.

The incomes of labor organizations and societies, also of benevolent and fraternal beneficiary societies and orders.

The incomes of mutual corporations not having a capital represented by shares, no part of the income of which inures to the profit of any member thereof, and of life insurance companies except such amount as is credited to shareholders' account.

The incomes of clubs, societies and associations organized and operated solely for social welfare, civic improvement, pleasure, recreation or other non-profitable purposes, no part of the income of which inures to the benefit of any stockholder or member.

The incomes of such insurance, mortgage and loan associations operated for the benefit of farmers as are approved by the minister.

The income derived from any bonds or other securities of the Dominion of Canada issued exempt from income tax.

The military and naval pay of persons who have been on active service overseas during the present war in any of His Majesty's military or naval forces or in the forces of His Majesty's Allies.

The incomes of incorporated companies whose business and assets are carried on and situate entirely outside of Canada.

Income derived from any pension granted to any member of His Majesty's military, naval or air forces for any disability suffered by the pensioner while serving in any of His Majesty's forces during the war that began in August, 1914, and the income derived from any pension granted to any dependent relative of any person who was killed or suffered any disability while serving in the said forces in the said war.

Annual Return to the Minister of Finance

Every person liable to taxation shall, on or before April 30th in each year, without notice or demand, and any person whether liable to taxation or not upon receipt of a notice or demand in writing from the Commissioner of Taxation, deliver to the minister of finance a return, in such form as the minister may prescribe, of his total income during the last preceding calendar year. In his return the taxpayer must state an address in Canada to which all notices, etc., may be mailed or sent.

The return of a corporation, association or other body, shall be prepared and signed by the president, secretary, treasurer or chief agent having a personal knowledge of the affairs of such corporation, etc., or, in any case, by such other person or persons employed in the business liable, or believed to be liable, to taxation, as the minister may require.

The guardian, curator, tutor or other legal representative shall make the required return on behalf of any person unable for any reason to make the return. If there is no legal representative, the return shall be made by some person acting as his agent and in the case of the estate of a deceased person by the executor, administrator or heir. If there is no one to make the return required under this act, then the minister of finance shall appoint some person to make the return.

Returns by Employers

Employers shall make a return of all persons in their employ receiving any salary, or other remuneration, in excess of such an amount as the minister may prescribe. Corporations, associations and syndicates shall make a return of all dividends and bonuses paid to shareholders and members and all persons in whatever capacity acting, having the control, receipt, or disposal of fixed or determinable annual or periodical gains or income of any taxpayer, shall render a separate and distinct return of such profits or income and the name and address of each taxpayer. This return shall be delivered to the minister of finance on or before March 31st in each year, without notice or demand, in such form as the minister may prescribe.

The minister may at any time extend the time for making the required returns.

Every person who fails to make a return as required under Section 7, Sub-Section 1, within the time limited therefor shall be subject to a penalty of 25% of the amount of the tax payable, and every other person who is required to make a return under the provisions of this section who fails to do so within the time limited therefor, will be subject to a penalty of $10 for each day during which the default continues, and all such penalties shall be assessed and collected from the person liable to make the return in the same manner in which taxes are assessed and collected.

Additional Information

Section 8 empowers the minister to demand further information if he deems it necessary, also to require the production of letters, accounts, statements and other documents bearing upon the assessment of the income of any taxpayer. He may also authorize an officer to institute such inquiry as he may deem necessary for the purpose of ascertaining the income of any taxpayer.

If a taxpayer fails or refuses to keep adequate books or accounts, the minister may require the taxpayer to keep such records and accounts as he may prescribe.

Any taxpayer who fails to comply with the provisions of Section 8 with respect to returns and information required by the minister is liable to a penalty of $100 for each day during which the default continues, and any person making a false statement in any return or in any information shall be liable to a penalty not exceeding $10,000 or to six months' imprisonment, or to both fine and imprisonment.

Assessment and Date of Payment of Tax

The minister shall, on or before October 31st in each year, or on or before such other date as he may in any case or cases prescribe, determine the several amounts payable

for the tax, and shall send by registered mail a notice of assessment to each taxpayer notifying him of the amount payable by him. *The tax shall be paid within one month from the date of mailing of the notice of assessment.* In default of payment within one month, a penalty of 5% of the amount of such tax shall be added thereto, and a further 1% per month for each additional month or portion thereof during which the tax and penalty remain unpaid.

The minister may refund any tax or penalty wrongfully assessed and collected, but no refund shall be allowed because of any alleged error in the assessment unless application therefor is made within 12 months of the date of payment.

No Bank Charges on Cheques

Chartered banks shall receive for deposit, without charge for discount or commission, cheques payable to the receiver-general in payment of income tax or penalty, whether drawn on the bank receiving the cheques or on any other chartered bank in Canada.

No person employed in the service of His Majesty shall communicate or allow to be communicated to any person not legally entitled thereto, any information obtained under the provisions of this act, or allow any such person to inspect or have access to any written statement furnished under the provisions of this act. Any person violating any of the provisions of this section shall be liable on summary conviction to a penalty not exceeding $200.

Revision and Appeal

Sections 12 to 16 provide for the appointment of a board, or boards, of referees as a court of revision to hear and determine any appeal made by a taxpayer under this act.

Under these sections a taxpayer who is dissatisfied with the decision of the board may give written notice within twenty days to the minister of finance of his desire to appeal. The minister will then refer the matter to the Exchequer Court of Canada for hearing. The decision of the latter shall be final.

Under Sections 22 and 23 the minister of finance is given the administration of this act and the control and management of the collection of the taxation levied thereunder, and of all matters incident thereto. He may make any regulations deemed necessary for carrying this act into effect and may authorize the commissioner of taxation to exercise such powers conferred upon the minister as may be conveniently exercised by the commissioner of taxation.

AUGUST FIRE LOSSES

Total for Eight Months Indicates More Moderate Losses for Whole of Year

The Monetary Times' estimate of Canada's fire losses for the month of August is $1,374,495, compared with $1,118,377 in July and $3,110,445 in August a year ago. The total for the eight months of the year is $15,856,721, or less than half of the whole fire loss in 1918, indicating that the losses for the whole of this year will be more moderate. The following is the estimate of the August losses:—

Fires exceeding $10,000	$1,025,000
Small fires reported	87,260
Estimate of unreported fires	262,235
Total loss	$1,374,495

$10,000 and Over

The following is a list of fires at which the loss amounted to $10,000 and over:—

Gatineau Point, Que., August 2, two stores, post-office and residence, $20,000.

Halifax, N.S., August 4, C. H. Mitchell's fish warehouse, $15,000.

Montreal, Que., August 4, malt storage warehouse of Molson's brewery, $10,000.

Toronto, Ont., August 5, greenhouses of W. W. Tattle, $10,000.

Montreal, Que., August 9, Mystic Mill and Scenic Railway, $45,000.

Port Colborne, Ont., August 9, government grain elevator. Report of commission appointed not yet complete.

Merritton, Ont., August 14, six houses and a store of M. Sarazen, $10,000.

Sardis, B.C., August 7, timber in the vicinity of the Vedder River, $450,000.

Strome, Alta., August 8, business section of the town, $100,000.

Three Rivers, Que., August 15, stable and contents of the St. Maurice Paper Co., $20,000.

Vancouver, B.C., August 10, plants of the Dust Control Co. and Kennedy's Sash and Door Co., $20,000.

Black Lake, Que., August 17, Buildings on the mines of the Asbestos Corporation of Canada, Ltd., $40,000.

Belle Ewart, Ont., August 25, icehouse of the Lake Simcoe Ice Co., $35,000.

Brookfield, Ont., August 26, factory and three freight cars of the Bishopric Wall Board Co., $175,000.

Montreal, Que., August 26, lumber yards of J. P. Belladeau, $25,000.

Campbellton, N.B., August 23, business block, $50,000.

Many Barns Destroyed

Among the structures destroyed or damaged last month were: Sawmill 1, restaurant 1, residences 15, stores 4, barns 25, business buildings 3, scenic railway 1, grain elevator 1, sheds 4, garage 1, granaries 2, stables 5, university 1, plants 3, icehouse 1, mine buildings 2, wholesale house 1, factories 2, lumber yard 1, church 1.

Among the causes reported were: Blower from thrashing outfit 1, playing with matches 1, lightning 8, spark from chimney 1, plumber's torch 1, overturning oil stove 1, overturning oil lamp 1, spark from engine of separator 1, spontaneous combustion 2.

Many Fatalities

The following is a list of fires at which fatalities occurred last month:—

Three Rivers, Que., August 1, explosition of kerosene	1
Hamilton, Ont., August 2, fell into hot soot	1
Montreal, Que., August 9, trapped in scenic railway	8
Port Colborne, Ont., August 9, trapped in building	11
Regina, Sask., August 11, explosition of traction engine	1
Toronto, Ont., August 15, lightning	1
Victoria, B.C., August 25, fire from burning grass	1
Total fatalities	24

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,460,437	1,317,714	3,240,187	1,080,070
May	1,850,205	1,163,110	3,570,014	1,785,030
June	494,557	1,184,627	3,080,982	3,337,530
July	3,039,634	1,101,734	3,369,684	1,118,377
August	1,057,109	1,230,183	3,110,445	1,374,495
September	981,703	1,301,700	917,286	....
October	1,077,815	704,605	5,119,145	....
November	923,235	959,049	1,059,580	....
December	3,271,496	5,144,100	1,733,917	....
Totals	$20,487,509	$20,086,085	$31,815,844	$15,856,721

REBATING LAW AND "LOCAL ADVISOR" CONTRACT

Latter Held as Being an Inducement to Take Insurance, and Therefore in Violation of Anti-Rebating Law

By M. L. Hayward, B.C.L.

THE Canadian law forbidding "rebating" on insurance policies is universally known and generally obeyed, and a case recently decided by the Wisconsin Supreme Court dealt with an interesting phase of the question.

In this case it appeared that in March, 1903, the agent of the Conservative Life Insurance Company, one White, obtained from Frank C. Richmond two written applications addressed to said insurance company, one being an application for $5,000 life insurance policy and the other an application for appointment as "local adviser" of the company. This latter application provided that, if appointed, he would on written request furnish confidential information as to the character and habits of prospective applicants for insurance or reinstatement, also such information as would tend to protect the company against false and fraudulent claims, but that he was not to solicit insurance or to write applications therefore; also that he should not be required to take out a policy of insurance as a condition precedent to appointment. The application further provided that the compensation for his services was exclusively set out in the contract of appointment, a specimen of which the applicant had examined, and that all compensation should cease on termination of the contract by the company, except that as long as at least $5,000 of insurance placed by the applicant's efforts or assistance remained in force the compensation should be continued. Soon after receipt of these two applications by the Conservative Company, it issued and sent to the agent White a $5,000 policy of life insurance and a so-called "Contract of Local Adviser—Limited to 300," both dated April 9th, 1903. This latter contract or appointment contained the following provisions:—

Number of Advisors Limited

"The Conservative Life Insurance Company of Los Angeles, California, in consideration of the application for this appointment, which application is made a part hereof, does hereby appoint and commission Frank C. Richmond, of Arcadia, Wisconsin, a local adviser of said company, subject to the insurance statutes and the following express conditions:—

"1. The number of said local advisers appointed in the state of Wisconsin shall not exceed three hundred.

"2. On the 1st day of February of each year, during the continuance of this contract, the company shall compute the number of thousands of insurance in force written for a period of ten years from and after February 1st, 1902, in the state of Wisconsin, upon which there shall have been paid in cash during the preceding year one full annual premium, two semi-annual, or four quarter-annual premiums.

"3. The company further agrees on the dates aforesaid (February 1st, in each year) to credit said local adviser with such a sum of money from the expense element of premiums paid on insurance written in said state, during said period after said date, as shall be obtained by dividing an amount of money equal to $1.00 for each $1,000 of insurance in force at said dates, written during said period, after February, 1902, by the number of said adviser's contracts in force at time of such distribution.

"4. The amount so credited to said local adviser shall each year on the anniversary of the date of this contract, or within thirty days thereafter, provided this contract be in force, be paid to him by said Conservative Life Insurance Company, subject to the agreements of said local adviser in his application herefor. And said payment shall be in compensation for his services as local adviser and for no other consideration."

For a time the Conservative Company paid to Richmond the compensation specified in the above contract by crediting it on his $5,000 policy, but, later, the Conservative Company sold out to another company which "knew not Richmond," and the latter brought suit for the compensation payable to him under his agreement.

Law Against Rebating

Now, at that time there was a law in force in Wisconsin providing that "no life insurance company doing business in this state shall make or permit any distinction or discrimination in favor of individuals between insurants of the same class and equal expectations of life in the amount or payment of premiums or rates charged for life or endowment policies, or in the dividends or other benefits payable thereon or in any other of the terms and conditions of the contract it makes; nor shall any such company or any agent thereof make any contract or agreement as to such contract other than as plainly expressed in the policy issued pursuant thereto, nor pay or allow, or offer to pay or allow, as an inducement to insurance, any rebate of premium payable on the policy, or any special favor or advantage, in the dividends or other benefits to accrue thereon, or any valuable consideration or inducement whatever not specified in the policy."

The company claimed that Richmond's contract was void and unenforceable under the above law, and the Wisconsin Supreme Court decided in favor of the company, on the ground that the contract with Richmond was in effect a rebate on his policy.

"Here are the facts stripped down to the essentials," said the court. "An insurance agent comes to a lawyer with a blank application for an insurance policy in one hand and a blank application for appointment as local adviser in the other. By this latter application (if accepted by the company) certain payments, depending on the policies in force in the state, will be made to the lawyer annually on the premium day of the policy, in consideration that he will 'on written request' furnish information as to the character and habits of the applicants for insurance or for reinstatement, and also such information as may tend to protect it against false or fradulent claims. The number of local advisers in the state is not to exceed 300. This application has some very singular features. The applicant is required not to solicit or write applications for insurance. He is not required to take out a policy of insurance himself, but the appointment may be terminated at any moment by the company, except that so long as $5,000 of insurance placed by the applicant's efforts or assistance remains in force the compensation shall be continued. This seems confusing at first, but a little study renders it plain. The applicant is not to interfere with the business of regular agents by soliciting insurance; he cannot, therefore, place or assist in placing insurance on anyone but himself; consequently, while not in terms required to insure himself, the applicant must keep the insurance on his own life in force in order to be sure that his so-called compensation does not cease, for this is the only insurance which by the contract he is allowed to place or assist in placing.

Contract Was Inducement to Insure

"This application is placed before Richmond with the application for insurance unquestionably as an inducement to take out the insurance; both applications are signed at the same time, forwarded to the company together, and the policy and appointment returned together and delivered to the insured. Here comes a significant bit of silent testimony in the wording of the receipt given to the agent by the insured. By this receipt the insured acknowledged that he had received 'a 20-payment life, advance dividend local adviser policy of insurance.' Now, if the appointment as local adviser is an independant contract of service, having nothing to do with the insurance policy, why should the insurance policy be described as an 'advanced dividend local adviser policy?' We know of no good reason that can be given. This phrase, written by the insurer and signed by the insured, seems to make it very sure that both parties regarded the local adviser contract and the insurance policy to be simply parts of one general arrangement, by whose terms Richmond's life was insured and certain sums were to be paid him every year for certain vague and indefinite services by giving him a credit on the premium, so long as he kept the insurance on his own life in force, but no longer. This is the kind of an insurance contract which the insurance company made with Richmond, and which it proposed

to make with a class of favored individuals not exceeding 300 in number in the state.

"Perhaps, if it appeared that the services to be rendered were solid and substantial services, thoroughly proven, this sort of an arrangement might not be obnoxious to the law; but we are convinced that they were not so. The requirements as to the furnishing of information are of the most vague and shadowy character; under the terms of the contract it is to be furnished on written request, but the insured is unable to produce a single written request; he makes simply the most general and indefinite statements as to the character of his services, and only in one instance does he name a definite item of service, namely, assisting in securing a local agent at Arcadia, and this was a service entirely outside of the duties required of him by the contract. The law denounces not only discrimination or distinction between insurants of the same class, but the giving of any rebate on premiums, or of any special favor or advantage in the dividends or other benefits to accrue on the policy, or any valuable consideration or inducement not specified therein."

ONTARIO MUNICIPAL ASSOCIATION CONVENTION

Report of Resolutions' Committee—Election of Officers—Closing Session

THE closing session of the Ontario Municipal Association was held in Toronto, on Friday morning, August 29th, last. An address was given by W. A. McLean, Deputy Minister, Department of Public Highways, on "Good Roads." The report of the Resolutions' Committee was submitted and adopted. Among the more important resolutions that were approved were:—

"That this association memorialize the government of the province to have the tax rate for road construction and maintenance imposed on urban municipalities at the same rate as rural municipalities in the same county." Referred to Ontario Good Roads Association.

"That the Assessment Act be amended so as to exempt income from personal earnings of non-householders in rural municipalities, and be the same as that in urban municipalities."

"That this association recommend the provincial authorities to provide for an optional system of municipal government for cities and towns of the province to consist of the Council, with its present legislative authority, and a city manager or a board consisting of the mayor and such of the permanent officials as the council shall appoint to administer the affairs of the municipality with similar authority to boards of control in larger cities."

"Whereas dissatisfaction has been expressed by citizens with the present form of municipal government;

"And whereas more centralized control of all civic activities by one governing body is desired, either by what is commonly called commission government, or by some method of co-ordinating the existing councils, boards and commissions;

"Be it resolved that the provincial legislature be petitioned to secure a report on improvement of the present municipal government system which will best conform to Ontario ideals of government and satisfy modern demands."

"Whereas cities are annually unable to collect large sums of business and income taxes by reason of removal or ceasing to continue in business during the year following the year in which the assessment is made:

"Be it resolved that this association petition the provincial legislature to amend the Municipal Act to provide that taxes due for business and income may be levied the year in which the assessment is made and that the time for collection of the said business and income tax may be different from the time for payment of taxes on real, and notwithstanding that the assessment roll for real assessment may be adopted as the basis approved of taxation for the following year.

"Whereas municipalities are, from time to time, called upon to undertake municipal works which demand high priced expert skill and experience;

"And whereas the financial standing of many municipalities require careful and conservative consideration when large expenditures are involved;

"Therefore resolved—That all by-laws, plans and specifications providing for the construction of permanent improvements and the issue of debentures therefor, should be approved by the municipal bureau.

"That the executive be requested to prepare bills embodying the recommendations of this association to be presented to the legislature."

New Officers and Executive

The following officers were elected for the coming year: President, S. H. Baker, city clerk, London; 1st, vice-president, T. J. Moore, city clerk, Guelph; 2nd, vice-president, M. B. Holmes, warden, Leeds and Greenville; 3rd, vice-president, Miss Mary Grant, London Township; 4th, vice-president, M. Huenergard, assessment commissioner, Kitchener; 5th, vice-president, J. F. Vance, county clerk, Hamilton. B. H. Spence, was re-elected secretary-treasurer, and a permanent appointment is to be made by the executive.

The following are the members of the executive committee: W. Johnson, city solicitor, Toronto; W. B. Doherty, city solicitor, St. Thomas; W. J. Henry assessor, Peterborough; T. F. Milne, city clerk, Port Arthur; T. L. Church, mayor, Toronto; H. F. Leonard, city clerk, Brantford; S. Watt, city treasurer, St. Catherines; K. W. McKay, county clerk, St. Thomas; G. W. Riseborough, Harwich; F. R. Waddell, city solicitor, Hamilton; J. A. Denney, alderman, Ottawa; W. J. Ross, clerk, Sudbury.

AN EXCHANGE QUOTATION SUGGESTION

By A. B. Barker

Now that the old method of quoting sterling exchange as a premium on the old par of $\$4.44\frac{4}{9}$ per pound sterling has been abolished in Canada and the decimal system adopted, why not quote New York funds in the same way instead of by fractions? Montreal funds are quoted at a premium or discount of cents per $100, but New York exchange remains as before, though the transactions with that centre are much more numerous than with Montreal and the rates change more frequently.

Sterling, French, Italian and Hong Kong exchange rates in Canada are governed by New York rates, which are in decimals, and when we calculate the rate, the premium or discount on New York funds quoted in fractions of eighths, sixteenths, thirty-seconds or sixty-fourths must be allowed for to arrive at the local price.

In ordinary banking practices when estimating the changes in the value of a balance in New York, a sixty-fourth is considered as 15 cents per $1,000, and it would simplify matters considerably if the actual rates were quoted in this way.

In the financial markets of other countries with a decimal coinage, this system is in use, and it seems strange that in a country so progressive as Canada, the present method should be maintained, particularly when, as a mere matter of arithmetic, the decimal quotation is so much more convenient.

The Chamber of Commerce, of London, Ont., and the Board of Trade of St. Thomas, Ont., held a joint outing to Cleveland, Ohio, on August 27th. They were the guests of the Cleveland Chamber of Commerce and of business firms there.

The initial flat rate levied by the Saskatchewan Hail Insurance Association will not be sufficient to meet claims this year, and it has already been decided that an excess levy will be raised on the basis of seeded acreage. A meeting of the board of directors was held on September 1st to decide what rate would be required.

Conservation of Life Insurance

Life insurance is of supreme value in these uncertain times. Life insurance should not only be jealously guarded and kept in full force, but it should be increased if at all possible. It is a well-known fact that the dollar has greatly diminished in value, so that a given income will not purchase much more than one half the amount that it would have yielded in prewar days. Not only therefore should we resist every inducement to relinquish our insurance; we should rather increase our protection to the limit of our ability. There is nothing else to be compared with a life insurance policy as a protection for the home. During the policyholder's life it is an asset of ever-increasing value: at death it is the financial anchor of one's dependents. Do not allow your "best friend" to induce you to give up a policy in a sound company. Take a new policy if you can, but never give up the old!

TRANSPORTATION TO SOUTH AMERICA

The Canadian Manufacturers' Association, in a circular dated August 21st, recalls the attention of manufacturers to the fact that the Canadian government merchant marine steamer, "Canadian Pioneer," sails from Montreal on or about September 10th for Buenos Ayres. The Canadian National Railways have had difficulty in securing cargoes for the boat.

Another circular states that two companies, the Pacific Steam Navigation Co. and the Royal Mail Steam Packet Co., are contemplating the establishment of a service from Halifax to ports in Chile. Manufacturers are requested to advise as to amount of goods they have or might have for shipment.

EMPLOYMENT SERVICE OF CANADA

Reports from Employers for Ontario and Quebec for the Week Ended August 16th, 1919

WEEKLY reports from employers in Ontario and Quebec to the eastern clearing house of the employment service of Canada, department of labor, indicate that, apart from unemployment due to strikes, there was a considerable increase in employment in these provinces during the week ended August 16th, greater than was anticipated in the return for the preceding week.

Returns for the week ended August 16th, showed that 2,543 Ontario and Quebec firms with 355,199 persons on payroll has increased their staffs by 4,310 persons or 1.2 per cent., and anticipated making a further increase of 1,912 persons or .5 per cent. during the week ended August 23rd.

Returns for the week ending August 23rd, showed 2,686 firms with 338,612 persons on their pay rolls, increased their staffs by 591 persons or .2 per cent. The anticipated increase on August 9th, for the week ended August 16th, was 2.071 persons or .6 per cent., which was one-half of the actual increase of 1.2 per cent.

Gains in Some Industries

The plus industries—those registered net increases in the number of persons employed—during the week ended August 16th, were: Building and construction registering an increase of 5.8 per cent.; commercial and mercantile occupations .2 per cent.; lumbering 2.1 per cent.; clay, glass and stone products, 5.5 per cent.; food, drink and tobacco 2.8 per cent.; leather 1.1 per cent.; metals .5 per cent.; pulp paper and printing 1.1 per cent.; textiles 3 per cent.; vehicles .4 per cent.; woodworking .2 per cent.; railway construction 1.7 per cent.; railway operation .7 per cent. All of these groups, without exception, anticipated making further net gains during the week ended August 23rd, the gains being distributed quite uniformly over all groups.

The only minus industries—those that registered net decreases in the number of persons employed— were: Quarrying and mining registering a decrease of 1.7 per cent., and miscellaneous .5 per cent. Both of these anticipated making increases during the week ended August 23rd.

Reports from Ontario firms alone show the increase in that province to have been 1.6 per cent., the greatest gains being in textiles, with an increase of 4.4 per cent.; food, drink and tobacca 4.1 per cent.; railway operation 1.5 per cent.; vehicles 1.5 per cent.; lumbering 2.5 per cent.; metals .7 per cent.; railway construction 2.2 per cent.; building and construction 6.2 per cent.; pulp paper and printing 1 per cent., and clay, glass and stone 4.7 per cent. Chemicals, and quarrying and mining showed slight decreases but the latter anticipated a more than compensating increase for the week ended August 23rd.

Reports from Quebec show the increase there to have been 438 persons or .3 per cent., the most notable increase having been in building and construction with an increase of 5.3 per cent.; pulp paper and printing 1.1 per cent.; clay, glass and stone 6.9 per cent.; food, drink and tobacco .8 per cent., and leather 1 per cent. Vehicles registered a decrease of .7 per cent.; commercial and mercantile .4 per cent.; quarrying and mining 2.1 per cent.; railway operation .4 per cent.; and miscellaneous 1.9 per cent. All of these decreases, with the exception of quarrying and mining and miscellaneous were compensated for in the total return by the increase in Ontario in these groups.

ALBERTA FLOUR MILLS STOCK

Shares of stock in this company to the number of 5,000 are being offered by the Manitoba Finance Corporation. The organization of the Alberta Flour Mills Co., the head office of which is in Calgary, was completed several months ago, and it has a strong board of directors. It is anticipated that the establishment of a well-equipped mill at such a far western point will give it an advantage in competing for Pacific trade.

DIVIDENDS AND NOTICES

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two per cent. (2%) on the Common Stock of the **Dominion Textile Company, Limited**, has been declared for the quarter ending **30th September, 1919**, payable **October 1st** to shareholders of record **September 15th.**

Penticton, B.C., August 28th, 1919.

VERMILION, ALTA.

Sealed tenders will be received by the undersigned up to noon, September 22nd, for $20,000.00 20-year term 6½% town of Vermilion debentures, payable in twenty equal annual instalments. Purpose of debentures, for Fire Hall erection and additional equipment, and it is a charge on the town at large.

H. P. LONG,
Secretary-Treasurer,
Town of Vermilion.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

A THOROUGHLY EXPERIENCED LOAN AGENT desires the agency of a loan or trust company who have money to lend on improved farms or modern city property in Saskatchewan. Financially responsible to guarantee loans if required, and organized in the best districts. An interview can be arranged by writing Box 223, *Monetary Times*, Toronto.

LIFE INSURANCE SALESMAN AND OFFICE MAN.—Young man, with several years' experience in Head Office and Agency work, desires position with first-class life company, either in office or field. Holds records in both branches of the work. Confidential. Box 219, *Monetary Times*, Toronto.

YOUNG MAN, with a thorough knowledge of Accident, Sickness, Plate Glass, Automobile, etc., insurance, and with ten years' experience, desires a position with a first-class Company. Capable of handling a province, and can guarantee satisfactory results. Apply, stating position, etc., to Box 221, *Monetary Times*, Toronto.

AUGUST BOND SALES

Coming Loan Shows its Effect—Municipal Market Characterized by Dullness

According to *The Monetary Times'* record, bond sales in August totalled $6,571,124, compared with $21,942,108 in July. The total last month reached the lowest level this year. There were only two provincial issues, viz.; Ontario, $3,000,000, which was practically taken over by American firms, and nearly all disposed of on the other side of the line, and an issue of Manitoba telephone bonds, which was disposed of privately. The municipal market was characterized by dullness, municipalities postponing offerings on account of bond selling organizations being taken over for the coming domestic loan. The Royal Securities Corporation which purchased the $1,750,000 issue of Donnacona Paper company, bonds, the only industrial issue during the month, have announced their intention to withhold public offering until after the coming loan. The following is the summary of all bonds sales during August:—

Provincial	$ 3,500,000
Municipal	1,321,124
Corporation	1,750,000
Total	$ 6,571,124

Municipal bond sales last month totalled $1,321,124, compared with $3,492,108 in July, and $3,158,307 in August a year ago. With one exception the total is the lowest on record this year, the lowest being in May when the total was $1,268,101. The following is a summary of municipal bond sales by provinces for the month of August:—

Ontario	$ 430,421
Quebec	65,000
Nova Scotia	60,000
Manitoba	500,000
Alberta	182,253
Saskatchewan	83,450
Total	$1,321,124

Bank loans to municipalities have for this year practically reached the highest level. Although there has been a steady increase since January last of nearly $20,000,000, the July figure is nearly $6,000,000 short of the amount last year. The following table compiled by *The Monetary Times*, shows bank loans to municipalities since January, 1916:—

	1916.	1917.	1918.	1919.
January	$32,015,371	$24,487,272	$40,015,466	$32,640,198
February	35,149,915	26,121,324	43,535,628	36,830,183
March	38,649,462	29,877,911	50,652,061	41,993,305
April	44,371,050	35,931,996	55,685,350	47,911,199
May	43,924,036	39,700,191	57,728,226	50,356,227
June	46,773,032	42,757,673	58,000,424	52,349,353
July	42,385,096	43,989,207	56,589,173	54,455,738
August	39,882,811	43,940,176	56,662,931	....
September	38,708,745	42,721,563	47,977,472	....
October	37,613,530	41,204,781	46,275,106	....
November	32,945,963	36,459,598	40,865,358	....

AUDITORS: Savage, Baker, Birnie & Co.

CAPITALIZATION

Authorized - - - $2,000,000

10,000 Shares of 7% Cumulative Preferred Stock

10,000 Shares of Common Stock

THE Anglin organization has been operating for thirteen years in Montreal and throughout the Dominion, and has specialized in industrial buildings. The Norcross Company has been in successful operation for over fifty-three years and has built literally hundreds of America's biggest buildings. During the past six years, these two firms have jointly done over $9,000,000 of work in Canada, an average of $1,500,000 per annum, and that, despite adverse war conditions. Since March 1st, under the new organization, over $650,000 of new contracts have been signed up and are now under construction. This is in addition to about a million dollars of work in hand at the time of amalgamation.

On the basis of a fair average net profit, after deducting overhead charges and depreciation, a minimum of $2,000,000 turn-over per year would provide earnings to pay all charges and preferred dividends and earn about 8% on the entire outstanding Common Stock. On the same basis, $3,000,000 of business would earn about 14% on the Common Stock.

NOTE: Where fractions arise in distribution of bonus in common shares, such fractions will be adjusted in cash on the basis of $32 per share.

We consider this stock one of the best securities now available for public investment

NEWS OF MUNICIPAL FINANCE

Edmonton Tax Rate to be Higher—Winnipeg Business Tax Collections Good

Calgary, Alta.—During the month of August, or since the tax notices were sent out by the city, the treasurer's department has collected approximately $151,904. The best day's collection amounted to over $26,000.

Outremont, Que.—At a meeting of the council the report of the assessors for the year 1919-20 was received and adopted. The total assessment as adopted by the council was $23,144,817, of which $5,407,653 is non-taxable and $17,737,164 is taxable. It is an increase of $15,098 on the non-taxable and of $51,596 on the taxable over last year. The total realty taxable for school purposes is $17,713,178, of which $3,647,714 is for non-Catholic and $14,065,464 is Catholic.

Toronto, Ont.—According to a report issued by Finance Commissioner Bradshaw, the amount of taxes outstanding at the close of July, 1919, which were due in 1918 and previous years, was $2,038,300. During the month of August $154,114 was paid on account of these arrears, leaving still outsanding at the close of the month the sum of $1,884,186, as compared with $2,031,972 outstanding on August 31st, 1918. Of the sum of $1,834,186 outstanding on August 31st, 1919, the amount of $1,118,508 represents taxes which fell due in 1918, and $465,678, which fell due in 1917 and previous years.

Winnipeg, Man.—One-third of the city's business tax levy has been collected within ten days. On a levy of $375,000 the city tax collector announced that $141,000 had already been taken in. This collection is on an assessment of $32,000 more than last year. The business tax assessment is $5,631,540, and on a rate of 6⅔ per cent. the levy is $375,436. The demands were sent out on August 15th, and returns started to come in immediately. About $702 has been allowed on the payments as discount. A comparison with the returns of former years was difficult to arrive at, as the demands for 1918 were sent out on June 1st, and this year's were held up ten weeks from the same date this year, due to strike conditions.

One-half of one per cent. discount was allowed if the taxes were paid before the end of August. From then until September one-quarter of one per cent. would be discounted, and then until the end of the month the taxes are payable at par. On October 1st penalties of three-quarters of one per cent. per month will be added.

Regina, Sask.—The operation of the three public utilities in the city for the first seven months of the year show a surplus of $2,210, according to a statement prepared by Gladwell, Wilson and Co., the city auditors.

The statement of the finances of the utilities as at July 31 is as follows:—

	Seven months.	Estimate for year.
Debit:		
Street railway deficit	$22,217	$27,911
Balance carried to general revenue and expenditure account	......	13,301
Totals	$22,217	$41,212
Credit:		
Electric light surplus	$ 5,833	$15,290
Waterworks surplus	2,171	5,346
Property sales loan to street railway sinking fund	12,001	20,574
Balance carried to general revenue and expenditure account	2,210	......
Totals	$22,217	$41,212

Saskatoon, Sask.—The finance committee of the city council have decided, on Commissioner Yorath's recommendation, to turn the present low rate of exchange on English sterling to account by transferring to London £20,000 interest due and payable October 1st, saving approximately $7,500. The commissioner in his report states: "As the rate of sterling exchange between Great Britain and Canada is extremely low, it was thought advisable to transfer immediately to London £20,000 interest due and payable October 1st. It is possible that the rate of exchange might go still lower, but it was thought advisable, after conferring with the Bank of Montreal, not to speculate on futures. The saving effected will be approximately $7,500. The bank loan is at present made up as follows:—

1918 loan	$ 85,000.00
1919 loan	324,550.25
Total	$409,550.25

"This loan includes the advance necessary to pay the October interest. The balance cash in the sinking fund account is $66,889, and in the debenture account, $42,022.97."

Edmonton, Alta.—The city council has fixed the tax rate at 35.30 mills. On lands only the rate will be one mill more, on account of the provincial supplementary revenue tax. The final estimates for the year were presented to council by City Comptroller Mitchell, and it was then possible for the mill rate by-law to be passed. The total amount required to be levied this year is $2,804,133. That is made up as follows: General municipal purposes, $958,020; general debenture debt interest and redemption, $927,883; public school district, $800,887; separate school district, $95,929; library board, $21,412. The rate is increased by 5.30 mills over last year which was 30. "Although the present year's tax rate represents an increase over last year, owing to a reduction in the net assessment for 1918 of 13.7 per cent. on a comparative basis and applying the present year's assessment against the requirements of last year, the increase may virtually be said to be approximately one-half of one mill," explained the city comptroller to council. Of this increase, the library tax for the current year accounts for .27. The comptroller shows that included in the allowance for general municipal purposes is a reserve of $160,000. This is to provide for $60,000 for soldiers' home exemptions and $100,000 additional towards the reserve for uncollectible taxes. It is apparent that while the assessment is coming down, the mill rate is taking an opposite course. Last year's assessment was $91,873,720. This year it was reduced to $79,306,320, or a lowering of $12,567,400. The following is a statement of the city's tax levy and mill rate:—

	Amount required.	Mill rate.
General municipal purposes	$ 958,020.34	12.08
General debenture debt interest and redemption	927,883.94	11.70
Public school district	800,887.10	11.25
Separate school district	95,929.14	
Library board	21,412.70	.27
	$2,804,133.22	35.30

TO DEVELOP NOVA SCOTIA POWER

The Nova Scotia provincial government has brought into effect the Act passed at the last session of the legislature respecting the development of electrical energy from water power and other sources. This Act gave a commission a certain authority over the water powers of the province, and is intended to enable the people of Nova Scotia to get cheaper power for manufacturing and any other purposes. The commission named is as follows: Hon. E. H. Armstrong, of Halifax, Commissioner of Public Works and Mines; Frank C. Whitman, of Annapolis Royal; Robert H. McKay, of New Glasgow. Hon. E. H. Armstrong will be chairman of the commission.

A meeting of textile manufacturers and others interested in the trade is to be held in Toronto on September 6th. The arrangements have been made by the Canadian Textile Institute and the Canadian Manufacturers' Association.

INVESTMENTS AND THE MARKET

Lake Superior Corporation Plans Structural Steel Mill—Two Pulp and Paper Concerns Present Good Reports

Price Bros. and Co., Ltd.—The company, which possesses very extensive plants and holdings in the province of Quebec, and is one of the leaders in the manufacturing of pulp and paper, celebrated its centenary this week.

Anglin-Norcross, Ltd.—The Atlas Bond and Security Corp., Ltd., Montreal, is offering the unsold balance of an issue of $400,000 7 per cent. cumulative preferred shares of the company at $100 per share, carrying a bonus of 50 per cent. of common stock. The company is an amalgamation of two well-known contracting firms, a review of which was given in these columns recently.

Canada Iron Foundries, Ltd.—Shareholders have approved a scheme providing for redemption of all outstanding "A" and "B" debenture stock and confirmed a by-law decreasing the common stock by the cancellation of 20,000 unissued shares, par value $10. Confirmation was also given to a by-law, increasing preference stock by 200,000 new shares, par value $10, and sanctioned the issue of 20-year first 6 per cent. debenture stock of $1,000,000.

Matthews-Blackwell, Ltd.—The company has issued a notice calling for redemption on December 1st, 1919, of all the outstanding 6 per cent. 20-year bonds issued by Matthews-Laing, Ltd., and that on said date it will redeem such bonds on surrender thereof accompanied by December 1st, 1919, and all subsequent coupons, at the office of the Royal Trust Co., Montreal, Canada, by paying in cash to the holders thereof $105 for every $100 par value and will also pay the interest coupon due December 1st, 1919.

Wabasso Cotton Co.—The annual meeting of the company was held in Three Rivers, Que., last week. The statement of the company which was reviewed in these columns recently was favorably commented on. The following officers and directors were elected: C. R. Whitehead, president; James W. Pyke, vice-president; W. G. E. Aird, Three Rivers; R. N. Ball, Woodstock, Ont.; Lt.-Col. W. I. Gear, Montreal; William Harty, Jr., Kingston; and Hugh MacKay, K.C. Montreal. The changes from the personnel of the board elected a year ago were the inclusion of Mr. MacKay who replaces Alex. Pringle, and that of Mr. Harty, who succeeds his brother, the late Dr. J. J. Harty.

Canadian Pacific Railway.—The earnings of the company for the second consecutive time this year show an increase over the level of 1918, the July total of $2,996,703 being greater by $826,691 than for the same month last year, an increase of slightly upwards of 38 per cent. The better showing was made possible through a gain of $2,346,197 in the month's gross receipts, which at $14,720,362 stand at the highest point in any July in the railway's history. Working expenses during the month increased by an excess of 1½ millions to $11,723,659, the ratio towards gross earnings being 79.6 per cent., as against 82.4 per cent. in July, 1918, indicating that the management of the big road has been able to effect economies despite the ever increasing costs of labor and material.

Black Lake Asbestos Co.—The company is informing its bondholders and shareholders that the interest on its bonds due September 1, was passed without payment. The statement issued by the president to stock and bondholders, is as follows: "The results of the company's operations for the six months ended June 30 last have been submitted to the directors, and after due consideration they are under the necessity of passing, without payment, the bond coupon due September 1 last. Business conditions attributable to the cessation of hostilities have necessitated many changes in the company's operations, involving considerable additional expenditures of capital. The demand for some grades of asbestos has increased during the past two months, though there have not been as large orders from European countries as was anticipated. The demand for chrome ore, which was practically nil until July, has increased, and substantial orders have been received, sufficient to take care of the output for the next three months."

Spanish River Pulp and Paper Mills, Ltd.—The annual report of the company for the year ended June 30th last shows a total net revenue of $2,757,964, as against $1,729,231 a year ago, which is an increase of well over $1,000,000, and shows the strength of the company. The profit and loss account for the past two years compares as follows:—

	1919.	1918.
Total net revenue	$2,757,964	$1,729,231
Less reserve for depreciation	501,068	344,137
	$2,256,896	$1,385,094
Less interest on fund, debentures, etc.	799,975	807,519
Total net surplus for year	$1,456,921	$ 577,675
Less appropriations for contingent and government taxes	160,000	....
	$1,296,921	$ 577,575
Balance of consolidated profit and loss accounts carried forward from previous year	1,071,301	993,726
	$2,368,222	$1,571,301
Appropriation for deferred account	....	500,000
Surplus forward	$2,368,222	$1,071,301

With the annual statement, shareholders are in receipt of notices from the company announcing the holding of the annual meeting of the enterprise in Toronto on September 18 next, as well as a special meeting on the same date, to consider, and, if approved, to confirm a by-law authorizing the issue of $5,000,000 6 per cent. serial mortgage lien notes.

Laurentide Pulp and Paper Co., Ltd.—The annual financial statement of the company for the past fiscal year shows that operating profit for the year amounted to $2,743,374, as compared with $2,459,921 in 1918 and $2,095,609 in 1917. After taking care of the usual deductions and a new item of timber depletion reserve of $175,554, net income for the year available to the capital stock amounted to $1,823,657, as compared with $1,704,655 in 1918 and $1,720,011 in 1917. The indicated earnings on the outstanding capital stock of $9,600,000, after all deductions, is 18.88 per cent., compared with 17.75 in 1918, 17.91 in 1917, 9.77 in 1916, 8.20 in 1915 and 7.61 per cent. in 1914. Current assets are given as $7,238,085, up from $6,334,375 in 1918, while current liabilities are $1,882,417, up from $1,616,474 in 1918. Net working capital amounts to $5,355,669, which compares with $4,717,901 in 1918, a growth of $637,768. Total assets are also at a good increase, amounting to $15,617,160, against $14,805,905 in 1918. Among current assets the principal changes are: Logs and supplies, $2,533,912, up from $1,855,251 in 1918; cash, $580,518, up from $227,223 in 1918; and investments, $1,988,052, up from $1,635,541; while the item call loans, which amounted to $400,000 in 1918, have been abolished.

On the liabilities side of the account, bond debt has been reduced through retirements from $620,615 in 1918 to $565,779. Accounts payable are $313,067, as compared with $520,645, while bills payable amount to but $3,100, as compared with $173,500 in 1918. Accrued wages are $184,171, up from $58,285 in 1918.

The board of directors and officers of the company stand as follows: George Chahoon, Jr., president; Charles R. Hosmer, vice-president; Louis Armstrong, treasurer; Wm. F. Robinson, secretary; F. E. McNally, assistant secretary. The directors are: George Chahoon, Jr., C. R. Hosmer, R. B. Angus, F. A. Sabbaton, Edwin Hanson, Commander J. K. L. Ross and Sir Thos. Skinner, Bart., London.

Lake Superior Corporation.—At a recent meeting of the directors of the company, President Cunningham presented to the board a proposal of the subsidiary railways' bondholders for settlement of their claims. The board now has the proposal before it, but has not yet had sufficient time to consider it and determine action on the matter. Members of the committee proper have returned from London, where they met English bondholders of the subsidiary railways, but would not discuss details of the offer for settlement, but

That Home of Yours

Is there a mortgage against it? In that case, what will happen if you should die suddenly? Will your widow be able to pay off the indebtedness? Or will she and the kiddies be thrown out on the street?

A few dollars saved each year and invested in an Imperial Endowment policy will provide for a mortgage repayment whether you live or die. We'll tell you all about it if you write to

THE CONTINENTAL LIFE INSURANCE CO.
Head Office - - TORONTO, ONTARIO

appeared to be gratified with the result of their visit. Directors ordered payment of the annual 5 per cent. interest on the 5 per cent. income bonds October 1. The annual report for the fiscal year ended June 30, 1919, was approved.

Mr. Cunningham, in his report to the shareholders, says that the directors are of the opinion that the time has arrived for the establishment of a structural steel mill, and that engineers are now at work on plans for such an addition to the plant—for a mill which, in addition to rolling beams and channels up to 24 inches, will be able to roll a substantial steel tonnage to meet the increasing demand for heavier and longer rails.

ONTARIO FIRE PREVENTION LEAGUE

The first annual meeting of the Ontario Fire Prevention League was held in Toronto on September 4th. This league was organized at a meeting called by the provincial government on August 30th, 1918, and was incorporated last February. Three special meetings of the officers were held during the year.

About 40 were present at the annual meeting. The president, Arthur Hewitt, of Toronto, outlined the growth of the organization and its work. G. F. Lewis, secretary-treasurer, stated that preparations are now being made for Fire Prevention Day, October 9th, for which 10,000 posters are to be distributed. There will be more publicity this year than last, and the co-operation of the local chapters organized through the league will ensure its more thorough observance.

An address on "Dust Explosions" was given by Dr. H. H. Brown, of the explosive section, Department of Agriculture, Washington, and one on "Fire Prevention from a Patriotic Standpoint," by Hon. Dr. H. J. Cody, minister of education in Ontario.

The following officers were elected: Hon. president, Sir Wm. Hearst, K.C., M.P.P., premier of Ontario; president, A. Hewitt, Toronto; vice-president, H. J. Waddie, Hamilton, Mrs. L. A. Hamilton, Toronto; secretary-treasurer, Geo. F. Lewis, Toronto; executive committee, Mrs. A. M. Huestis, Toronto, and Tom Moore, Ottawa; members of the legislation committee, Hon. Thos. Crawford, M.P.P., Toronto, H. H. Dewart, K.C., M.P.P., Toronto, C. W. Jarvis, M.P.P., Fort William.

Among the recommendations adopted were the following: The adoption by municipalities of a building standard in order to reduce fire risks and the restriction of the use of inflammable roofing; the adoption by the province of a minimum building code for hospitals, schools, asylums, etc., outside city limits or in small communities in which the establishment and enforcement of building regulations is impracticable; the adoption by municipalities of the by-law suggested by the fire marshal's office for the systematic inspection of buildings; the wider use of automatic sprinklers; standardization of fire equipment with a view to co-operation between towns in the event of serious fires; the universal adoption of the safety match, the adoption of legislation prohibiting smoking in industrial and mercantile buildings except in rooms specially provided and approved by the fire department; the adoption of proper ordinances governing the transportation and storage of explosives and inflammable liquids, the education of children in fire prevention and the use of fire appliances; the adoption of a statutory obligation upon municipalities to provide a certain percentage of revenue for equipping fire brigades; the laying of water mains in cities and towns of not less than 6 inches in diameter when used for fire protection purposes, and the elimination of "dead ends" as far as possible; The universal use of lightning rods on farm buildings; the prohibition of fire works except under the permit of the fire department; the extension of Hydro wiring inspection; the clearing of specified areas in the north to serve as fire breaks.

RECENT FIRES

Loss Not Large For Past Week—Six Fatalities

Alderson, Alta.—August 23—Business section and some residences were damaged. Extent of damage not known.

Battersea, Ont.—August 25—Barn and stable of J. Sleeth were destroyed by lightning. Estimated loss, $5,000.

Brockville, Ont.—September 1—Barns of S. Bowers, marble cutter, R. G. Freeman, undertaker, and Mrs. G. E. Johnston, were destroyed. Cause, spontaneous combustion. Loss partly covered by insurance.

Driscoll Lake, Sask.—September 1—Residence of C. Monroe and R. McKnight was destroyed. Six fatalities.

Guelph, Ont.—September 2—Bake shop on Morris St., owned by J. Tedesco, was damaged. Estimated loss, $1,100, partly covered by insurance.

Harding, Man.—August 25—Granary of G. A. Todd was destroyed. Cause, lighted match or cigarette.

Pike Creek, Ont.—August 28—Barn and contents of Philip May were destroyed.

St. John's, Que.—August 31—Silk factory of the Belding-Paul-Corticelli, Ltd., was destroyed. Estimated loss, $50,000, partly covered by insurance. Cause, spontaneous combustion.

St. Thomas, Ont.—September 2—Two barns and contents of A. Leaky were destroyed. More than 1,000 bushels of grain and 40 tons of hay were destroyed.

Weston, Ont.—Building, J. Ruinsbottom, 1103 Weston Rd., and adjoining building, were destroyed. Estimated loss, $2,075.

West St. Andrews, N.S.—August 26—Three barns of A. Ramsay were destroyed by lightning.

West Toronto, Ont.—August 28—Coal pile at High Park Ave. Methodist Church was destroyed. Cause, spontaneous combustion.

ANGLIN-NORCROSS, LIMITED, STOCK ISSUE

$400,000 7 per cent. preferred shares of Anglin-Norcross, Ltd., are being offered at par with a bonus of 50 per cent. common stock. This firm is the outcome of an amalgamation of Anglins, Ltd., of Montreal and Toronto, and the Canadian branch of the Norcross Bros. Co. of Worcester, Mass. The former company specialized in steel buildings, and the Norcross firm in institutional and public buildings. Some of the best specimens of architecture in Canada have been planned by them.

The new company is capitalized at $2,000,000, of which one-half is preferred; there are also bonds outstanding to the amount of $130,000. The underwriting firm is the Atlas Bond and Security Corporation, of Montreal.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the month of August: —

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
August 7	$3,442,000	$2,882,000	+ $ 560,000
August 14	3,298,000	2,759,000	+ 539,000
August 21	3,374,000	2,942,000	+ 432,000
August 31	4,759,000	4,130,000	+ 629,000
	$14,873,000	$12,713,000	+ $2,160,000

Grand Trunk Railway.

	1919.	1918.	Inc. or dec.
August 7	$1,392,477	$1,236,343	+ $ 156,134
August 14	1,461,258	1,285,064	+ 176,194
August 21	1,532,996	1,341,827	+ 191,169
August 31	2,333,190	2,238,804	+ 94,386
	$6,719,921	$6,102,038	+ $ 617,883

Canadian National Railway.

	1919.	1918.	Inc. or dec.
August 7	$1,811,263	$1,546,287	+ $ 264,976
August 14	1,891,104	1,583,071	+ 308,033
August 21	1,797,669	1,648,924	+ 148,745
August 31	2,774,846	2,477,660	+ 297,186
	$8,274,882	$7,255,942	+ $1,018,940

A Swiss delegation of about 300 representatives is to visit this continent, and will be in Canada during the first two weeks of October. It will include representatives of many lines of industry, education, and various professions.

Gold Mining Outlook is More Promising

Low Water Mark in Ontario Output was Reached in 1916 — Since Armistice Labour has Become More Plentiful, but High Prices are Still a Handicap — New Development Work Being Done in Some Districts

By W. L. EDMONDS

THAT Canada's need of gold is greater to-day than at any time in her history there can be no doubt. Generally speaking, her need is two-fold. She needs it in the first place as a factor in the payment of her public debt, which now stands at about $2,000,000,000, compared with $336,000,000 five years ago. She needs it in the second place as a basis for the country's currency, which at present is in a somewhat inflated condition, the percentage of gold held by the government and the banks against note issues being 40.14 per cent. compared with 69.12 per cent. five years ago.

In his budget speech of June last the minister of finance announced that the percentage of gold held at the close of the fiscal year 1918-19 against the outstanding note issue of $298,058,697 was 38.92 per cent., a proportion far below statutory requirements, according to which gold to the amount of 25 per cent. should be held against the first issue of $50,000,000 and dollar for dollar against any subsequent issue.

Sir Thomas White, while acknowledging that it "will be a long time before the currency inflation of the world will be abated," intimated that the policy of the government "will be to gradually restore our note issue to the statutory condition." This, he pointed out, could "be done by buying gold on the one hand, or on the other hand by retiring outstanding notes from time to time from the proceeds of loans or from revenue."

Ontario as a Source for Gold

It is rather interesting in connection with Canada's undoubted need of gold to study the possibilities of the province of Ontario as a source of supply.

Ten years ago, Ontario could scarcely have been accounted a factor. True, gold mining in the province had its origin fifty-three years ago, but it was not until 1909, when the Porcupine district began to come into evidence as a producer, that the industry gave promise of substantial possibilities. And even then it was not until 1912, just seven years ago, that the output of yellow metal reached large figures, the output for 1910 and 1911 having a value of but $68,498 and $42,637 respectively.

The year 1912 witnessed a phenomenal increase, the value of the output in the province at that time being $2,114,086. It more than doubled the following year, and steadily advanced until 1916, when the total output of gold had a value of $10,339,259. That year saw the peak in production, for in 1917 it was down to $8,698,735, just $197,344 above the figures for 1915, while in 1918 it was $8,567,178. Production the current year promises to be slightly in excess of 1918.

Effect of the War on Production

Although the annual production is on a lower scale by nearly two million dollars than three years ago, yet it can not be attributed to any petering out of the gold resources of the province. On the contrary it is due entirely to causes created by the war. In the first place the demand of the army for men necessitated depletion in working staffs at the mines. In the second place, the men remaining, although averaging lower in efficiency, demanded and obtained higher wages, while in the third place supplies of all kinds advanced, in certain instances to an extent of over 100 per cent. If the mine operators, like producers of other kinds of merchandise, could have advanced the price of their product, an easy way of obtaining compensation for the higher cost of production could have been found. But the price of bullion being fixed by international agreement, they either had to accept the stipulated $20.67 an ounce or keep their gold.

Under the adverse conditions obtaining several of the producing mines, being unable to operate at a profit, closed down during 1917, among them being the Dome mine. Others ran at reduced capacity. In fact for about a year all the gold-producing mills in the north except the Hollinger and the McIntyre ceased operating. Under the circumstances it is rather remarkable that production should have been maintained at the scale it was during 1917 and 1918. To the Dominion total, Ontario contributes about 60 per cent., while among the world's producers she ranks fourth.

Improvement in Operating Conditions

Since the armistice was signed in November last there has been a gradual modification of the adverse conditions under which mining operations were carried on during the greater part of the war period. This is particularly true in respect to the supply of labor, which, through the return of former employees, is more efficient as well as more plentiful. While certain supplies are costing about as high as before, the general average is somewhat lower. Furthermore, through an arrangement with the government, the mining companies are obtaining a price for their bullion above that of the regular market quotation, being paid, plus the fixed $20.67, a sum equal to the amount of the premium ruling on New York funds. During the last few weeks this premium has ranged all the way from 3 to 5 per cent.

A Total of $59,500,000 in Gold

From its inception down to the close of the current year the province of Ontario will have produced gold to the approximate value of $59,500,000, of which about $56,854,000, or 95 per cent., is the product of the mining operations of the last ten years. But that which is still more noteworthy is to be found in the fact that of the total produced during the ten-year period about $52,264,000 was contributed by one district alone, namely, the Porcupine. Still more remarkable, of the latter total approximately $32,000,000 can be credited to the properties controlled by one mining company. Dividends paid during the past ten-year period by gold mining companies operating in the north amount in the aggregate to about $13,000,000.

But the matter of supreme importance at the moment is not what the gold mining industry of northern Ontario has done in the past. It is what it is capable of accomplishing in the future. To compute in figures that possibility is, of course, beyond the ken of man. Of one thing, however, we may be assured, and that is that the extent of the country in which gold-bearing ores have been discovered warrants the belief that present production is merely a tithe of that which it is likely to be in years to come.

The mines at persent producing gold are practically confined to the Porcupine and Kirkland Lake districts, with an aggregate mill capacity of about 6,000 tons of ore a day. This mill capacity is about 85 per cent. of that of all the mills installed at the gold mines in the north country, there being all-told about fifteen. The mills still temporarily closed down are of the medium to small description, mostly the latter.

Although there are but two districts in which active production is being carried on, there are about a dozen of a more or less promising character, in certain of which considerable development work is being done, some being close to the producing stage. In the Larder Lake district, for instance, one company proposes within the next couple of years to install two mills, each with a daily capacity of five thousand tons. During the past year two or three new mines have become producers, and recently the Dome mine, whose mill, with a capacity of 1,500 tons, is the second largest in the north, has resumed operations.

Canadian Life Insurance Payments in 1918

Two Canadian Payments in Excess of $200,000 — Number in Excess of $10,000 less than Last year — List of Totals for all Cities in Canada

During 1918, there were 61 payments in Canada exceeding $10,000, in respect of claims under life policies, according to an estimate of the Insurance Press. In 1917, the number was 71. The 1918 list, however, includes a payment on the life of W. J. Poupore, Montreal, of $238,549, and one on the life of E. L. Steindler, Cobalt, of $236,879, whereas the largest last year was for $76,125. The payments of $10,000 or over were:—

Bowmanville—John McClellan, $15,073.

Brantford—Gordon James Scarfe, $45,000.

Cape Breton—Kenneth McCuick, $15,000.

Cobalt—Eugene L. Steindler, $236,879 (credited to New York City).

Elmira—George Jung, $10,052.

Fox River—George M. Cochrane, $15,622.

Halifax—William B. A. Ritchie, $31,000; Andrew M. Jack, $25,282.

Harbor Grace—Walter A. Strapp, $10,000.

Kingston—Edward T. Steacy, $12,000.

London—George C. Gibbons, $15,082.

Magrath—Robert B. McIntyre, $25,000.

Montreal—William Joseph Poupore, $238,549; Howard C. Stone, $58,602; Charles F. Sise, $30,001; Daniel Gilmore, $20,317; William J. Scott, $18,500; G. A. Greene, $17,675; Ernest J. Nadeau, $17,109; Joseph Margolese, $15,025; Name not given, $14,380; David Stewart, $11,022; Odilion Letourneau, $10,053; William Ball, $10,000; Thomas J. Rutherford, $10,000.

Okanagan—T. E. Ellis, $20,000.

Orillia—Howard T. Blackstone, $15,974.

Ottawa—William Parker, $52,000; H. Brennan, $42,000; Archelas Boldus, $18,680; F. White, $15,000.

Pembroke—A. A. Fisher, $15,622.

Port Arthur—F. E. Gibbs, $20,000.

Quebec—John S. Budden, $12,500; Pierre Hamel, $10,000; Louis N. Lemieux, $10,000.

Russell—John D. McPhail, $18,000.

Saskatoon—W. W. McKim, $23,500.

Sault Ste. Marie—Frederick J. S. Martin, $15,000.

Toronto—Horace R. Emery, $52,145; R. Kilgour, $20,-

Toronto—Horace R. Emery, $52,145; R. Kilgour, $20,000; R. W. Sutherland, $20,000; Walter Nation, $15,000; G. H. Watson, $15,000; Thomas D. Edmanson, $10,000.

Vancouver—Benjamin T. Rogers, $21,256; H. J. Duncan, $16,000; John D. McMurrich, $10,000.

Victoria—Ernest V. Bodwell, $25,000; Oswald M. Jones, $13,066; Richard Hall, $10,000.

Westmount—Sydney J. Hodgson, $10,000.

Winnipeg—Robert McD. Thomson, $26,000; Henry F. Lewis, $12,000; Archibald McLaren, $10,000; Fair Stamburg Ryine, $10,000.

Woodstock—J. White, $15,000.

Wyoming—F. J. Gunn, $25,000.

Curling, N.F.—James H. Baggs, $13,610.

St. John's, N.F.—John S. Munn, $26,000; T. M. McNeil, $19,035.

Payments by Cities

Total payments, classified according to cities in the various provinces, were as follows:—

Alberta—Calgary, $88,500; Edmonton, $75,000; Magrath, $35,500; Lethbridge, $26,000; Ponoka, $25,000; Castor, $17,500; Viking, $15,500; West Calgary, $13,500; Excel, $12,500; High River, $12,500; Ribstone, $12,500; Vegreville, $12,500; Camrose, $11,500; East Calgary, $11,500; Galahad, $11,500; Gen, $11,500; Langdon. $11,500; Lougheed, $11,500; Mountainville, $11,500; Redcliff, $11,500; Rocky Ford, $11,500; Taber, $11,500.

British Columbia—Vancouver, $443,000; Victoria, $175-000; Okanagan, $30,500; North Vancouver, $25,000; Kamloops, $15,500; Kerrisdale, $15,500; Chemainus, $13,500; Kitchener, $13,500; Cranbrook, $12,500; Eburne, $12,500; Bairanquilla, $11,500; Grand Forks, $11,500; Headquarters, $11,500; Maramata, $11,500; New Westminster, $11,500; Penticton, $11,500; Prince Rupert, $11,500; Richmond Road, $11,500; Rossland, $11,500; Sechelt, $11,500; Wardner, $11,500; Westminster, $11,500.

Manitoba—Winnipeg, $541,000; Brandon, $37,500; St. Boniface, $12,500; Argyle, $11,500; Gimli, $11,500; Napinka, $11,500; Vidir. $11,500.

New Brunswick—St. John, $38,500; Woodstock, $25,500; Albert County, $11,500; Bathurst, $11,500; Boiestown, $11,500; Centreville, $11,500; Dorchester, $11,500; Hampton, $11,500; Milltown, $11,500; Normandie, $11,500; Pointe due Chene, $11,500; Rothesay, $11,500; Sackville, $11,500; St. George, $11,500; St. Stephen, $11,500.

Newfoundland—St. John's, $88,000; Curling, $24,500; Harbor Grace, $20,500; Burlin, $13,500; Seal Cove, $12,500; Bonavista, $11,500; Burgeo, $11,500; Carbonear, $11,500; Gloverstown, $11,500; New Harbour, $11,500; Pointe aux Basque, $11,500; Ramea, $11,500; Springdale, $11,500.

Nova Scotia—Halifax, $266,000; Fox River, $26,500; Cape Breton, $25,500; Glace Bay, $25,000; Sydney, $25,000; Yarmouth, $13,500; Amherst, $12,500; Pugwash, $12,500; Canning, $11,500; Clark's Harbor, $11,500; Dartmouth, $11,500; Elmsdale, $11,500; Kentville, $11,500; Liverpool, $11,500; Mill Village, $11,500; Riverport, $11,500; St. Bernard, $11,500; W. Lawrencetown, $11,500.

Ontario—Toronto, $1,104,000; Ottawa, $369,500; Hamilton, $250,000; Brantford, $159,500; London, $118,500; Sault Ste. Marie, $93,500; Orillia, $59,000; Port Arthur, $57,500; Kingston, $55,000; Stratford, $52,000; Wyoming, $35,500; Elmira, $34,000; Russell, $28,000; St. Marys, $27,000; Pembroke, $26,000; Peterborough, $26,000; Preston, $26,000; Simcoe, $26,000; Smith's Falls, $26,000; Bowmanville, $25,500; Niagara Falls, $25,000; Mimico, $16,500; Athens, $15,500; Rockwood, $15,500; Beeton, $13,500; Cobourg, $13,500; Guelph, $13,500; Latta, $13,500; Milton West, $13,500; Oshawa, $13,500; St. Thomas, $13,500; Waterloo, $13,500;

Windsor, $13,500; Chatham, $12,500; Grimsby, $12,500; Montreal, $12,500; Petrolea, $12,500; Victoria, $12,500; Agincourt, $11,500; Arthur, $11,500; Aurora, $11,500; Cambellford, $11,500; Cobalt, $11,500; Dennis, $11,500; Elore, $11,500; Fort William, $11,500; Gravenhurst, $11,500; Hanover, $11,500; Haileybury, $11,500; Harlem, $11,500; King, $11,500; Little Current, $11,500; Merrickville, $11,500; Middlesex, $11,500; Nashville, $11,500; Owen Sound, $11,500; Oxford, $11,500; Palmerston, $11,500; Rifle Range, $11,500; Rockliff, $11,500; St. Catharines, $11,500; Sarnia, $11,500; Strange, $11.500; Summerstown, $11,500; Timmons, $11,500; Todmorden, $11,500; Trenton, $11,500; West Lorne, $11,500; Wingham, $11,500.

Prince Edward Island—Charlottetown, $15,000; Souris, $13,500; Georgetown, $11,500; Little Harbor, $11,500; Pinette, $11,500; South Shore, $11,500; Summerside, $11,500.

Perpetue, $11,500; Upton, $11,500.

Saskatchewan—Saskatoon, $45,000; Regina, $26,000; North Battleford, $25,000; Weyburn, $25,000; Battleford, $13,500; Davidson, $13,500; Chamberlain, $12,500; Cut Knife, $12,500; Eston, $12,500; Moose Jaw, $12,500; Pennant, $12,500; Willmar, $12,500; Dundurn, $11,500; Girvin, $11,500; Milestone, $11,500; Prince Albert, $11,500; Sutherland, $11,500.

Yukon—Dawson, $13,500.

SESSIONS OF WHEAT BOARD FIXED

An order-in-council has been passed covering regulations which will govern the operations of the Canadian Wheat Control Board. Provision is made for the holding of regular meetings on the second Thursday of the months of September and November, 1919, and in the months of January, March, May, July, September and November, 1920, at Winnipeg. Special meetings of the board may be held at any time and at any place at the call of the chairman, assistant chairman or any three members of the board.

It is provided that from the date of the establishment of the board "no person, firm or corporation other than this board shall buy wheat, operate any elevator or warehouse where wheat is carried, or handle wheat on commission or otherwise, unless licensed by this board. Provided, however, that this regulation shall not apply to: (a) Registered seed wheat; (b) wheat grown from seed of registered merit in respect to purity of variety, subject to permit being granted by the Canadian Government Seed Purchasing Commission; (c) wheat bought by one farmer from another for seed or feed purposes, which has not gone through an elevator, or which has not been loaded on cars, either through an elevator or over the platform."

CREATING BUSINESS AT THE FALL FAIR

Excellent Opportunity Provided for Doing Little Services to Farmers, Which All Help Business

THE latest edition of the "Teller," issued by the Sterling Bank, lays timely emphasis upon the value of the country fair as a place where the banker can meet his customers in a friendly manner.

"What does the country fair mean to the managers of our town branches?" is the question asked. "The superficial observer sees in it only a kind of holiday-time, when country swains buy peanuts and pink lemonade for the village belles. Perhaps the country fair was like that—in the days of the three shell game and the medicine man. But the fun of the fair to-day is secondary to the business end of it. The farmer comes to the fair to-day to learn—to learn about new farm machinery, new home comforts, new ways to produce bigger crops and better livestock. The farmer comes to the fair in a business frame of mind—and it is a mighty good time to talk business to him. This applies just as much to banking business as to cream separators or gasoline engines.

"One of the outstanding things at the fall fair is sales—sales of tractors, gasoline engines, wind mills, separators, churns, washing machines, electric light plants, milking machines—a hundred and one things. Practically every one of these sales calls for a cheque. See that all these exhibitors are supplied with Sterling Bank cheques. Most of these men are local dealers and local agents. They handle quite a volume of business in a year. It will pay to be of service to them.

Get in Farmers' Confidence

"But the real gold-mine for the bank manager at fair time is the live-stock exhibit and show-ring. There you will meet the farmers. There they talk shop. You will meet a lot of your customers. You will be introduced to a lot of prospective customers. You will hear all the news of the section. You will learn who are grading up their herds, who are improving their land or buildings or equipment, how crops are coming. You will be able to give a real personal invitation to a great many farmers to visit you at the bank. If you handle this thing rightly there will be a lot of new names on your books after the fair.

"Another thing; see that the staff is well supplied with information about the fair. A lot of your customers will come in for some cash for spending money. They will want some information—when is the judging of Holsteins; when are the horse-races; which is the best hotel; where can I park my car; where's a good place for a meal; what time is the last train for Hooper's Corners.

"These things are not connected with banking. But they are things your customers want to know. That should be sufficient for any Sterling Bank officer. See that your staff has a stock of information. And if a customer asks a question which can't be answered off-hand, don't be afraid to use the telephone.

"Still another idea; the fair will give you a chance to write some very effective personal letters to customers and prospects. Compliment one man on the prize taken by his livestock. Congratulate another on having secured a high-grade herd sire. Don't forget the proud mothers whose babies took prizes in the baby-show. Nor the farm boy whose corn was the biggest ever. All these people are important. They all have a say in the farm business. And they all like to be noticed by men who are important factors in the life of the community."

The proposed purchase of the Grand Trunk Railway by the Dominion government was discussed at a meeting in Ottawa on September 4th, between Sir Alfred Smithers, chairman of the Grand Trunk board, Howard G. Kelley, president of the Grand Trunk and members of the cabinet.

PERSONAL NOTES

Canadian Newspaper Service Photo

Mr. Henry J. Cross, who occupies the position of vice-president and treasurer with the recently amalgamated building firm of Anglin-Norcross, Limited, of Montreal, has supervised the construction of some of the most important buildings in Canada, among which is the Drummond Building, the Royal Trust Building, the Bank of British North America, of Montreal, and the head office of the Bank of Toronto Building, of Toronto. He also supervised the interior and exterior stone work on the new Sun Life Building, Montreal. In the United States Mr. Cross was connected with the construction of the New York Public Library, Portland City Hall and the Field Museum of Natural History of Chicago. Mr. Cross was vice-president and general manager of the Norcross Brothers Company, of Worcester, Mass., and had been with the firm for nearly twenty years before purchasing their Canadian interests during the present year, later on transfering these interests to the Anglin-Norcross, Ltd., when he was appointed to his present position.

Mr. W. E. Milner, the new secretary of the Winnipeg Board of Trade, was born in Brampton, Ontario, and was once mayor of that town. In 1904, he was liberal candidate for Peel County for the Dominion House of Commons. After going to Winnipeg he soon reached a prominent position in the city's affairs, and in now taking over the management of the Board of Trade he is charged with one of the most important offices of its kind in Canada. The board was reorganized a short time ago with a view to preventing duplication, and now performs duties carried on by separate organizations in most other cities. He succeeds W. B. Moore, who resigned on account of ill-health.

The Hon. Murdock McKinnon has been appointed Lieutenant-Governor of Prince Edward Island. Mr. McKinnon was formerly provincial secretary-treasurer, and commissioner of agriculture in the Arsenault administration.

Professor S. A. Cudmore, of Toronto, has been appointed chief of education statistics for the Dominion Bureau of Statistics, Department of Trade and Commerce, Ottawa.

Mr. A. R. Pringle has been appointed Canadian fire manager of the Western Assurance Co., in addition to his present duties as an assistant secretary. Major C. C. Wansbrough has also been appointed an assistant secretary.

Mr. W. Aenas Mackay, general manager of the London and Lancashire Life Assurance Company, who has been in the United States in connection with the company's business, has been in Canada recently. Mr. Mackay visits this continent from time to time and this visit is especially in connection with the opening of agencies here for the Scottish Metropolitan Life. The latter company is a new subsidiary of the London and Lancashire. Both these companies now operate in Canada under Dominion license, the chief agent in each case being A. Bissett, Montreal.

Mr. S. L. Jones, manager of the Dominion Bank, in London, England, is on a short visit to Canada. He spent a few days in Winnipeg, of which city he is an old resident, having left Toronto in 1897, when the Dominion Bank commenced business in Winnipeg under the management of F. L. Patton, now superintendent of western branches. In 1899 he opened the north end branch of the bank as manager, this being the first subsidiary city branch of any Canadian bank established west of Toronto. Mr. Jones represents the Dominion Bank on the governing council of the British Overseas Bank, Ltd., which has just opened in London, England.

MAKES COINS FOR CANADA

Mr. A. H. W. Cleave, Deputy Master of the Canadian Mint, was born in London, England, in 1868. He was educated at the Battersea Grammar School and King's College, London, and received training at the Royal Naval Engineering Colleges at Portsmouth and Devonport. In January, 1893, he entered the service of Royal Mint, London, and was appointed superintendent of the Royal Mint, Ottawa, 1st September, 1906. He at once came to Canada, supervised the erection of the mint buildings, and equipped them with necessary machinery. His appointment as deputy master was made on 1st July, 1919; in succession to Dr. James Bonar, who retired. In 1897 he was elected a member of the Instituiton of Mechanical Engineers of Great Britain, and in 1907, was elected a fellow of the Royal Microscopical Society of Great Britain.

OBITUARY

Mr. J. B. Pepler, one of Winnipeg's best known financial and realty men, died last week at the age of 64.

THE PREMIER INVESTMENT IN CANADA

WHILE this is a war year in so far as our national expenditure is concerned, yet from the point of view of borrowing, war time conditions no longer prevail. Patriotic motives which were a substantial factor in the success of the previous war loans, cannot be counted on to a great extent for this loan. In the vast majority of cases it will be considered only from the investment point of view. The fact that the bonds will be taxable, will also lessen the large subscriptions which heretofore have been received from wealthy investors and from industrial and financial institutions.

The key note of the campaign, therefore, should be the investment side, and there is no reason why a sufficient amount cannot be raised in this way to meet the balance of our capital requirements during the current financial year. In spite of the distinct success of the previous loans, they were nevertheless not as popular as they would have been, had an additional income yield been substituted for the tax exempt feature. There is good reason to believe that if the terms are fairly attractive, and the merits of the bonds emphasized by wide-spread publicity, this loan should not be still more popular and at the same time successful.

The necessity for raising the sixth large loan is already appreciated by those who will take an active part in the campaign. The national financial position was exhaustively dealt with by Sir Thomas White at a preliminary meeting of the Dominion Executive Committee which will have charge of the loan, at Ottawa on August 1st. He showed how the money raised by the previous loans had enabled us to grant credits to Great Britain and to other European nations; which resulted in extensive orders being placed here, and Canadian industry thereby stimulated a critical period. Also an extensive shipbuilding progam was pursued and the government went ahead with the purchase of rolling stock for the National Railways. Apart from these items, there is the large expense of demobilization. "Until last fall," he said, "we borrowed from Great Britain in London and that was a set off of our advances to Great Britain here, the amount of money required by us to maintain our purchase in Great Britain and on the continent. We did not have to find the money here in addition to the credits that were furnished to Great Britain. They furnished that money to us in London, and to that extent it was not a burden on our financing here."

With the bringing home of the overseas forces, however, Canada itself has had to pay them until discharged, and in addition there are the large war gratuities amounting to about $130,000,000. There are also the loans under the settlement scheme.

It was the experience of all the other belligerents said the minister, that their war expenditures also extended beyond the armistice period. In Great Britain they also had to raise a huge loan to liquidate floating liabilities of about eight billion dollars.

Sir Henry Drayton, who succeeded Sir Thomas White as Minister of Finance, emphasized similar points in a speech last week at the Canadian National Exhibition, Toronto. While the previous minister had expressed the view that no further foreign credits should be granted. Sir Henry Drayton is evidently of a different opinion for he emphasized the value of further credits in maintaining industrial prosperity here. Speaking more particularly to agriculturists, he said:—

"First of all, I want to congratulate you. By your great efforts you have greatly increased production and your own business. In 1914 Canada's export of foodstuffs amounted to $196,909,312. In 1918, this export had increased to $385,746,765, an increase of over 90 per cent. In this increased production the Ontario farmer has most worthily played his part. The increase of foodstuffs produced in Ontario in 1918, showed a percentage increase over the production of 1914, of 95 per cent.

"Your crops grown, your work finished, let us consider how it was possible to make these exportations. You obtained cash for your products. What enabled these results to be obtained? Credit. What funds enabled these great quantities of foodstuffs to be acquired by purchasers without available money? The funds raised by the subscriptions of the people of our country to the various war loans. The mother country is the great market for our farm products. Canada has supplied Great Britain with credits as and when these credits were necessary in order to ensure the movement of your crops and the sustenance of our kindred overseas. Canada has extended credits to Great

Britain for the purchase of dairy products to the amount of $69,055,708; for the purchase of bacon, $5,000,000; for the purchase of wheat, $173,500,000, directly, and $100,000,000 through Canadian banks. Credits have been given for the purchase of other Canadian food products amounting to $31,2000,000. In all, Canada's credits to Great Britain for the purchase of foodstuffs have amounted to $294,564,744, apart from the $100,000,000 advanced by the banks. Canada has also made advances to her Allies for the purchase of Canadian foodstuffs amounting to $4,750,000. These advances, while of inestimable benefit to the purchasers of the foodstuffs produced by you, are also of like benefit to you and have enabled you to carry on.

"But the end, while in sight, is not yet. The need for intensive production still exists. The necessity of food supplies across the seas is still great. The rate of exchange debasing the English pound to 4.34 ½ means great difficulty, an added expense to Great Britain in making current payments. In order to enable you to market your products, further credits must, during the current year, be granted. You have the last chance. It is the last chance to participate in any large Canadian loan."

AN ASSAULT ON THE NATIONAL TREASURY

THE Dominion government has acted wisely in refusing to be stampeded in the direction of a further war gratuity, by an element among the war veterans which is conspicuous in this agitation, but which is not taking a leading part in producing those things out of which such bonuses must be paid. The Great War Veterans' Association at their recent convention in Vancouver, decided to request the government to appoint a commission, composed of representatives of the government and of the war veterans, to determine the advisability and practicability of further financial assistance. This was done, and on September 5th, the government gave its reply, refusing to appoint such a commission. The Dominion secretary of the Great War Veterans' Association now graciously concedes that, in view of the fact that adjustment is still possible, no campaign will be instituted for the purpose of embarrasing the present administration.

Those who have closely followed the career of the Great War Veterans' Association regret the process by which radical and selfish elements have gradually supplanted the sane and intelligent control established by the earlier officers. The organization is admittedly for the purpose of guarding the interests of returned soldiers, but the definition of their interests has gradually narrowed until it is now practically defined as further cash bonuses, special consideration in employment, and many impracticable projects as the fixation of rents, deportation of all aliens, and the entire abolition of civil service examinations for war veterans. Coincident with this narrowing in the platform there has been a corresponding withdrawal of active support on the part of many of the more intelligent members, who have resumed their employment and wish to regain their financial status by their own efforts. These, who constitute the great majority of the veterans, do not need any further bonus; some of them in fact were able to resume employment immediately upon return, and others, employees of cities or of the Dominion and provincial governments, having been in receipt of full salary during the period of enlistment, had found the war a highly profitable venture. There is plenty of employment in many branches of industry, and generous vocational training is given to those who are incapable for physical reasons, of pursuing their former occupations.

In spite of these opportunities and positive encouragement, there is a small minority gathered in our larger cities, which seeks to have the gratuity extended, and will continue to do so just as long as there appears to be a chance of success. To use the words of a speaker in Toronto on September 7th, they "sleep, eat and drink" gratuity. There is only one reply to an agitation of this kind, and quite apart from the condition of our national finances, the best thing that can happen to this class is that they must be conclusively impressed with the necessity of looking after themselves. It is rather peculiar that elements which have been foremost in crying out against "profiteering," should endeavor to be first in the line for a government bonus; and that those who resent "paternalism" should wish to enter into such a distinctly paternal relation.

CANADIAN BANK LOANS TO INDUSTRY

NUMEROUS criticisms of Canadian banks on the part of borrowers, who maintain that the banks do not adequately meet industrial needs, indicate undue optimism as to our industrial future rather than a defect in the Canadian banking system. A more careful analysis of the banking business would show that it is to the interest of the banks to support industry to the maximum consistent with their resources, and as our banks operate on a national scale, equal consideration is given to all sections of the country. British Columbia is anxious to promote manufactures within its boundaries, and the feeling that the banks were not satisfactorily filling the needs of the province was evidenced in the recent establishment of a Department of Industry, with power to loan money to such enterprises. Reference to these measures has already been made in these columns.

This charge was, evidently brought to the attention of heads of Canadian banks who have been in British Columbia recently, and in reply the following statement was made by D. C. Macarow, general manager of the Merchants Bank:—"Speaking for our own bank, that is a fallacy. The fact is, the resources of the banks in general are allocated to this province for deserving enterprises in as large a proportion as to the other provinces of Canada. As for the Merchants Bank, although we are a long way off at the head office, it is our claim that any proposition put to us receives as prompt a reply as though the board of directors was on the spot. Branch managers are allowed a reasonable latitude in their activities, and there is no real need for any extension of this, for the promptness of our service fulfils in the highest degree practical the conditions of banking. As a proof of this I might say that we have received many letters from British Columbia commendatory of the manner in which the propositions of our clients have been met.

"As for British Columbia, it is our opinion that it is one of the richest provinces in Canada, if not the richest, and capable of the greatest development, and in that development we hope to have a major share. The province will certainly receive the same measure of financial support accorded the east."

Mr. Macarow stated that British Columbia municipal issues were well received in the east at present, and pointed to the effect of the provincial government's taking charge of the finances of South Vancouver as a major reason why investors were disposed to regard such issues as preferred investments. The conditions on the prairies, he stated, showed great improvement over those foreshadowed in earlier reports, and that a fair crop seemed assured. "Conditions are good in Canada. The country is passing through the reconstruction stage with wonderful smoothness. Let both sides of the economic controversy be fair and sane; let fair dealings and co-operation prevail, and we in Canada can look forward to a prosperous future and not a distant one."

The Great War Veterans' Association volunteers to find the wherewithal to pay an additional war gratuity. Necessity breeds invention, and ways and means present little difficulty to those who would force an autocratic policy in the face of popular opinion.

* * * *

Since the organization of the Ontario Fire Prevention League one year ago, fire losses in the province have been substantially reduced. Other important factors have contributed to this reduction, but a continuation of this record will imprint a conclusive stamp of approval upon the movement.

UNLICENSED INSURANCE DRAINS CANADA

"Made in Canada" Movement Urged by Manufacturers, Could Equally Well be Applied to their Insurance

NOW that New York exchange is so adverse to Canada, a new point of view arises in connection with the controversy over "unlicensed" insurance. Manufacturers insist upon having the privilege of placing their insurance where they please. The licensed fire companies, on the other hand, naturally feel the unfair competition of companies which do not pay for a license of any kind in Canada, nor pay taxes here, nor support the first underwriters' organization. That the manufacturers themselves might help relieve the exchange situation is the contention of a prominent Canadian fire insurance man, writing to *The Monetary Times*. "The adverse rate of exchange against Canada," he says, "is at present causing concern to the manufacturers, merchants and financiers of Canada, and in order to correct this situation the public generally is being urged to buy less from the United States and buy more in Canada. This is good advice, but if it is a good rule for the general public it should be an equally good rule for the manufacturers and merchants, who, at the moment are suffering from the present situation

"Let us see what their own practice is in regard to insurance. The manufacturers and merchants of Canada obtained from the parliament at Ottawa some years ago the privilege to place their insurance outside of Canada, and they are required to make a report of the amount so placed; whether all is reported it is impossible to say, but the amount of transactions actually reported is given in the report of the Superintendent of Insurance, Ottawa, for 1918, recently issued, as follows:—

"Analysis and summary of the statements of fire insurance carried on property in Canada by fire insurance companies, associations or underwriters not licensed to transact business in Canada, such insurance having been effected under the provisions of sec. 129 of the insurance Act, 1918:—

Nature of property insured.	Amount of insurance.
Lumber and lumber mills	$ 17,561,958
Other industrial plants and mercantile establishments	245,982,358
Stock and merchandise	46,877,311
Railway property and equipment	553,650
Miscellaneous	2,724,818
	$318,700,095

"No figures are given of the premiums paid, but an estimate might be made as follows:—

$ 17,561,958	@	4%	........$ 702,478.32
245,982,358	@	½%	.... 1,229,911.79

2,724,818	@	2%	.... 54,496.36
$318,700,095			$2,366,234.55

The above indicates that over $2,000,000 a year is sent out of Canada for premiums to unlicensed insurance companies by the men who are urging every one to purchase all they can in Canada. That is not the only part, however, of the situation, for in connection with the insurance placed in United States mutual companies it is the practice of those mutuals to demand a cash premium on the average of one per cent of the amount of insurance, and there must be over $2,000,000 of money of Canadian manufacturers and merchants permanently held by these mutual companies so long as the insurance is in force.

"The manufacturers and merchants may say, 'We can buy better insurance in the United States,' but the same statement can be made by the ordinary public of Canada in regard to the goods which the Canadian manufacturers and merchants have to sell, and it would seem that the time is opportune for an application to their own business of the good advice they now give to others.

"Credit is freely given to the great bulk of Canadian manufacturers who insure in Canada, recognizing that it is the proper and right thing to do, but many of the very wealthiest and most influential manufacturers, who are always to the front when the public is being informed of their duty, are the worst sinners in this respect. 'Do to others as you wish others to do to you.'"

QUEBEC PROVINCE HAS SURPLUS

The Hon. W. G. Mitchell, provincial treasurer, announces at the government offices that the ordinary receipts of the province of Quebec for the fiscal year ended June 30, 1919, amounted to $12,666,352.03, and the ordinary and extraordinary expenditure amounted to $12,371,131,01. The surplus of ordinary receipts over ordinary and extraordinary expenditure is consequently $295,221.02.

TORONTO BOND DEALERS BUY BUILDING

Wood, Gundy and Co., bond dealers, Toronto, have purchased the five-story building at the north-east corner of King and Victoria Streets, known for many years as the Rice-Lewis building, from Messrs. Strathy and Orphen, for $140,000. Some years ago this building was purchased for $130,000. It is the intention of the purchasers to make internal alterations to the extent of about $70,000, to occupy the ground and first floors, and to fit up the three top floors as up-to-date office space.

EXTRA PARLIAMENTARY SESSION OPENS

A special session of the Canadian parliament opened on September 2nd. This session will be quite short, and is being held primarily for the purpose of ratifying the peace treaty. In his speech from the throne the Governor-General said that estimates would shortly be laid before the House of Commons, and referred as follows to the general economic situation:—

"For more than five years the world has endured the devastation and horror of war forced upon it by an intolerable spirit and purpose of aggression. Fortunately, our country has been spared the desolation and ruin which have been inflicted upon many other nations; but our participation in the war has involved heavy burdens and vast sacrifices, which our people have borne with an unflinching spirit. With reverent thankfulness we realize that the world emerges victorious from its long struggle against the forces of barbarous militarism and savage aggression. The labors of reconstruction may be difficult and even painful, and we must undertake them with the same united resolve and inflexible purpose as sustained our efforts during the years of conflict. To you and to the great nation whose affairs are committed to your charge, I bid God-speed in all your endeavours."

CROP CONDITIONS FROM COAST TO COAST

Rains in West were too Late for Grain Crops, but Helped Growth of Feed—Other Parts of Canada Report Good Returns

THE following summary of telegraphic reports on the condition of field crops at the end of August was issued by the Dominion Bureau of Statistics on September 4th:—

Atlantic Provinces—Prince Edward Island (Charlottetown).—Weather favorable for hoed crops. Heavy crop of hay well saved. Cereals have filled well and yield above average. Potatoes and corn doing well. Nova Scotia (Kentville).—Weather dull and favorable for all growing crops; haying generally finished and above average yield; early-seeded grain ripening rapidly and 25 per cent. harvested; yield above average and well filled; potatoes promise an average crop, with little blight; corn, excellent; apples, developing well. New Brunswick (Fredericton).—August has given moderately warm weather; many showers, but only two inches rainfall; rather slow haying and harvesting weather, but excellent for growing crops; grains are all up to average except wheat; potatoes promise a full crop unless blight becomes general; roots are good and pastures better than usual.

Quebec (Ste. Anne de la Pocatière).—Weather conditions have been seasonable and favorable to all crops; cereals, ripening normally, will yield a little over average crop, so will the field roots; potato affected by late blight and mosaic, which reduce the yield 30 per cent. (Quebec).—All grain and corn for silage better than average; potatoes good, roots medium, pastures fair, apples very good, plums, cherries, pears, bad; all vegetables promise fine crop with exception of onions. (Lennoxville).—Weather throughout August favorable for crops, although the rain for the last ten days has retarded the harvesting of grain. Practically all grain is cut, with a large percentage still in shock; silage corn, potatoes and roots looking well.

Ontario (Toronto).—All grain crops well secured; fall wheat and rye average yields, long straw. Spring wheat average yield, short straw; barley and oats very light in grain and straw. Summer pastures very poor, corn barely middling, potatoes and roots poor, but all growing crops are improving with recent rains.

Manitoba (Morden).—Thrashing half completed, wheat yielding from 12 to 15 bushels; oats, 40 bushels; weather, hot and dry; potatoes, poor; garden stuff ripening well.

Saskatchewan (Indian Head).—Thrashing general in this district. Wheat will average about 20 bushels per acre, oats 50 bushels and barley 20 bushels. Later wheat damaged by rust, some wheat grading number one, but dockage heavy for small grains; bulk of crop will grade number two. (Scott).—Beneficial rains early in month have improved the feed situation considerably, but were almost too late to help early maturing grain crops. Cutting is nearly completed and thrashing has commenced; yields are more variable than usual, wheat yields running from 2 to 3 bushels per acre up to 30. (Rosthern).—No frost during August; rust did damage 50 per cent. of ripe grain; yield of wheat, Duck Lake to Rosthern, 12 bushels; Rosthern to Hague, 5 bushels; Hague to Saskatoon, nothing; feed for three-quarters stock between rivers; no cultivated hay, only native hay on sloughs; oats and barley insufficient for seed.

Alberta (Lacombe).—Weather during August warm; showers totalled 1.5 inch at Lacombe. No frost reported; cutting now general; grain yields better than expected. Wheat, 20 to 30 bushels; oats, 40 to 60 bushels; barley, 30 bushels; sample good. Late green feed growing, and feed situation improved. (Lethbridge).—While the rains in the early part of the month improved the summer pasture, it has not greatly improved the live stock situation, so far as winter feed is concerned; second cutting of alfalfa well advanced. Wheat harvest in southern Alberta completed and thrashing started.

British Columbia (Invermere).—Rains from 1st to 4th broke long-continued drought, precipitation for the four days exceeding that of previous three months; crop prospects materially improved in consequence. Second crop hay from irrigated plots very good, especially alfalfa; dry farming plots a failure; harvesting of all grains has been completed and thrashing commenced; potatoes and corn promise well. (Summerland).—Hot, dry weather has ripened crop very quickly. Some districts are suffering from want of water; the apple crop is largest in the industry; peaches fair crop, but small. (Agassiz).—August, with only .45 inch rain, is driest for four years. Excellent month to harvest and thrash. Grain yields slightly below average. Roots and pasture badly in need of moisture. (Sydney).—Grain-cutting completed and 50 per cent. of thrashing done; autumn grain yielding well; spring grain below average; roots, corn and potatoes suffering from drought; pastures dry.

Canadian National Railway Report

Canadian National Railways' detailed crop report for the week ended August 30, covering areas served by its lines in western Canada, indicate that yields of grain throughout the country are considerably better in many cases than opinion some few weeks ago expected. Cutting may be regarded as practically completed except in a few points along the northerly line, and thrashing is under way generally, with the exception of those northern points, and where weather conditions have prevented activities from being continued. The yields by points and by provinces are given as follows, wheat to be understood where other classes of grain not stated:—

Manitoba.—St. Jean, 17; Letellier, 18-20; Rosebank, 20; Miami, 20, oats 40, barley 35; Altamont, 18-23, oats 40, barley 30; Lowe Farm, 16; Myrtle, 18-20; Grosse Isle, 20, oats 45; Fisher Branch, 15, barley 35; Sanford, 14, oats 25 and barley 30; Sperling, 15-22; Somerset, 18-20, barley 25, rye 30, oats 30-40; Hallboro, 20-22; McConnell, 18; Decker, 25; Isabella, 17; Eden, 13-22; Birnie, 15-18, have shipped 7 cars of new wheat; Warren, 20-30; Moosehorn, 17, oats 50-60, barley 28-35; Amaranth, 14, oats 30, barley 30; Portage, 20, barley 30, oats 60; MCreary, 15-20; Makinak, 15; Pleasant Point, 10-25; Carberry, 20; Holmfield, 14-15, oats 20-25, barley 10-14; Clanwilliam, 25; Rossburn, 20, oats 40-50; Cromer, 10; Scarth, 18-20; Virden, 12; Elgin, 15; Margaret, 18; Minto, 12-15; Hartney, 12,000 bushels of wheat marketed to date; Grandview, 15; Gilbert Plains, 14; Sifton, 6-13, oats 40, barley 35; Durban, 15-20.

Saskatchewan.—Davin 3 cars of wheat shipped from Dreghron and 2 from Cunliffe siding; Regina, northern district, 15-20, southern 5-15; Colgate, 4; Estevan, 5-8; Bienfait, 8; Bengough, 2-10; Hardy, 2-18; Truax, 10-15; Hearne, 8-20; Forward, 8-10; Briercrest, 15-20; Mazenod, 20; Spring Valley, 20, flax, oats and barley, 25; Mossbank, 15-20; Quill Lake, 25, oats 50; Ruddell, 10; Borden, 3; Langham expect about 50 cars of wheat from this point, grading good; Birch Hills, 10, oats 30-40, barley 30; Lumsden, 15; Disley, 12; Condie, should ship between 50,000 and 75,000 bushels from here and 25,000 from Bredin siding; Hague, 4-5; Blaine Lake, 9; Richard, 6; grain shipments from this point will be heavier than last year, expect about 100,000 bushels; Krydor, 10; Carlton, 5-10; Swanson, 3-5, probably 5 or 6 cars shipped from this point; Elrose, expect to ship about 50,000; Wiseton, 4; Laura, 7-8; Rostown, 7-8, oats 15; Edam, 8, oats 12-40; Turtleford, 18, oats 30-40; Pinkham, 16-18; Flaxcombe, 5-20; Marengo, 12-15; Alsask, 10.

Alberta.—Lavoy, 10, oats 20; Forestburg, 15-20, oats 30; Kelsey, 20, rye 12, oats 50; Sangudo, 50, oats 75; Mecheche, 40; Drumheller, 25, oats 30; Benton, 2-20; Oyen, 5-7; Cereal, 3-7; Morrin, 25.

The following information regarding the grading of grain is given by points and these have also been divided into provinces: **Manitoba.**—Miama, No. 2 Nor.; Lowe Farm, 2 and 3 Nor.; Somerset, 2 and 3 Nor.; Eden, good grade; Birnie, 2 and 3 Nor.; Moosehorn, good grades; Portage, generally 2, some No. 1; Pleasant Point, good quality; Carberry, 2; Rossburn, 2 and 3 Nor.; Grandview, 2 and 4. **Saskatchewan.**—Vibank, 2 and 3; Colgate, 2 and 3; Hearne, 2; Ettington, 2; Veregin, 3; Ruddell, 2; Lumsden, 2 Nor.; Blaine Lake,

2; Marengo, 3. Alberta.—Chipman 90 per cent. of wheat grading No. 1, highest for years.

A report issued by the Manitoba Department of Agriculture, under date of August 30th, says:—

"The close of August finds Manitoba with all its crop cut except a small percentage of the later fields, most of these later crops being intended for feeding purposes; also a big swath of the thrashing is done. It is safe to say that the work is a full month ahead as compared with some years, and at least two or three weeks ahead of the average. In the main, the weather for the past month has been hot, dry, and rather inclined to be windy, and the western side of the province has been in need of a good rain in order to soften the ground for ploughing and to help the late pastures. Over a considerable area such a rain fell on Thursday, August 28th. A great many correspondents believe that the heat did more harm to the crops than was wrought by the rust; this is more true of the western than of the eastern side of the province.

The average of all the estimates as to yields as reported below is as follows: Wheat a little over 15 bushels; oats about 38 bushels; barley 23 bushels. Wheat grades generally will not be high. Perhaps the most disappointing crop all round is late barley. Reports as to potatoes vary a great deal, but are not generally above the average. In the eastern side of the province some correspondents report plenty of hay and straw to spare, while there will not be quite enough for the stock on hand in the southwestern corner of the province. Fodder corn has been a great success this year and garden crops have been good. The correspondent at Bowsman River, in the Swan River Valley, reports that lots of tomatoes have ripened on the vines, and nowhere in Manitoba, we believe, has so far had any frost. With the plough already started, farmers should be able to push their work farther along this fall than usual, and if enough rain falls to germinate annual weed seeds much good work can be done in the way of cleaning up the fields of this class of plant.

The Manitoba Free Press, in its sixteenth annual crop estimate, issued recently, summarizes the probable yields for the three western provinces as follows:—

	Bushels.
Wheat	166,225,000
Oats	268,885,000
Barley	46,961,095
Rye	8,470,000

So much of the best flax of the three provinces is as yet too green to cut that any estimate at the present time would be most misleading.

	Acres.	Per acre.	Yield.
Wheat.			
Manitoba	2,913,000	16	46,608,000
Saskatchewan	8,879,000	11	97,669,000
Alberta	3,658,000	6	21,948,000
Oats.			
Manitoba	1,715,000	35	60,025,000
Saskatchewan	5,088.000	30	152,640,000
Alberta	2,811,000	20	56,220,000
Barley.			
Manitoba	1,082,000	25	27,050,000
Saskatchewan	643,000	20	12,860,000
Alberta	470,073	15	7,051,095
Rye.			
Manitoba	249,000	20	4,980,000
Saskatchewan	137,000	20	2,740,000
Alberta	50,000	15	750,000

The first meeting of the Canadian Railway Club, Montreal, for the 1919-20 season, was held on September 9th, the speaker being E. J. McVeigh, general storekeeper of the Grand Trunk.

MANY BANKERS TOUR WEST

A feature of the past few weeks has been the large number of chief officials of Canadian banks who have been visiting the west. A Royal Bank group left Montreal a few days ago for this purpose, it includes E. L. Pease, managing director, and Sir Mortimer Davis, C. S. Wilcox and A. J. Brown, K.C., directors. The Royal Bank now has a subsidiary board, which meets in Winnipeg.

Lt.-Col. Sir W. M. Allan, president of the Merchants Bank, D. C. Macarow, general manager, and other officers, are just completing a similar tour of the west.

A party of Bank of Nova Scotia officials is visiting western Canada. It includes: H. A. Richardson, general manager; Charles Archibald, president; J. Walter Allison, vice-president; W. D. Ross, and Lieutenant-Governor M. C. Grant, of Nova Scotia, directors.

HAIL INSURANCE IN PRAIRIE PROVINCES

At a meeting of the directors of the Saskatchewan Municipal Hail Insurance Association, held on September 1st, it was decided that an excess seeded acreage rate of 22 cents per acre would be levied. The total indemnity to be paid this year is about $1,950,000. Up to August 30th, the association had received 7,780 claims and while there were a few more claims yet to come, in respect to late oats and flax, these will not be sufficient to materially change the total estimate. The flat rate of four cents per acre, which is levied on all lands within the municipalities adopting municipal hail insurance, is estimated to produce this year a revenue of about $800,000. It is estimated that about 6,000,000 acres of cultivated land is liable for the excess levy of 22 cents per acre, which will add $1,320,000 to the revenue, bringing the total income up to approximately $2,120,000, which it is estimated will provide for the indemnity and the expenses of operation.

This is the first year since the legislation was approved providing for an excess seeded acreage levy, that the application of the new measure has been approved by the association and put into effect. Under the act the municipalities have up to November 15 in which to pay the hail taxes over to the association and until this is done it will be impossible for the association to pay the claims. The heaviest losses incurred by hail this year were during the big storm of July 1, which swept the central part of the province. Some of the municipalities were heavy losers. Claims totalling $126,000 have come in from R.M. Dufferin, R.M. Longlaketon is asking for $123,000 and R. M. Eyebrow $178,000. The biggest loss was in R. M. Cupar, where a total indemnity of $185,000 is reported. While the losses from hail this year are heavy, they do not aggregate nearly as much as in 1916, when 11,000 claims were received, and the total indemnity was $3,600,000.

In Alberta, it is estimated that hail losses will be about 30 per cent. The business this year was small, as many farmers cancelled their policies, which they have the option of doing up to September 15th, when crop prospects became poor. Owing to the losses in Alberta during the past two years being but moderate, a greatly increased number of companies now write hail insurance. There are from 30 to 35 such concerns in operation this year as compared with 17 or 18 last year. In view of the light business, however, it is predicted that the profits made in Alberta will be but small, and these will be more than counterbalanced by the losses in Saskatchewan. While some companies have been fortunate, others have not had the same luck. For instance, hail insurance companies that did extensive business in the neighborhood of Gleichen were exceptionally hard hit by the storm that struck that part of the province in July last. A forecast of the approximate total loss by several local companies would indicate that generally speaking the figures will be much about the same as last year. These run anything from 30 per cent. to 50 per cent. The losses up to date, for instance, of the insurance department of the U.F.A., is 31 per cent. Allowing about 30 per cent. for expenses, this will leave a profit in round figures of about 35 per cent. There is still some slight danger of damage by hail although this is not generally expected now.

SELLING BUSINESS INSURANCE

Applicable to All Classes of Firms, and in Many Cases Indemnity Should be Placed on Lives of Skilled Employees

ONE of the most valuable addresses before the Life Underwriters' Convention in Calgary was that on "Business Insurance," by Wm. May, jun., of the Confederation Life Assurance Co. He emphasized the fact that there is little or no difference between the selling of life insurance for business and for ordinary purposes. In each case it is sometimes necessary to sell to several individuals before the transaction can be put through. Mr. May gave illustrations of the value of business insurance to different kinds of firms, such as the individual proprietor, the partnership, the private corporation and the large company. With the average retail store, for instance, the proprietor is the only one who thoroughly knows the business, and his death may result in serious loss, which should be provided against. In the partnership or private company there is almost always a division of functions, such as that between the production man and the salesman, and the death of one disarranges affairs for some time. In the large company the same is also true, not only of the general manager and executive heads, but also of many skilled employees.

Discussing business insurance for corporations, Mr May said:—

"When all is said and done, insurance sold to corporations only differs from all other forms of business insurance in the amount of the policies, and, on account of the amounts of insurance placed being so large, it seems to have surrounded itself with a great deal of mystery. A corporation is only a partnership on a larger scale, with a large number of the partners taking no active part in the business. These non-active partners are the stockholders. The supervision and direction of the business is placed in the hands of a few men called directors. These directors, with the exception of one, also do not participate in the actual working of the business. That is left to the managing director, who surrounds himself with a number of executive officials.

Large Amounts Written in Canada

"The necessity for life insurance by a business of this nature is varied, and also on account of the tremendous business which is generally done the amount of insurance placed is large. I have in my hand a list compiled by the Spectator Co., showing a large number of business firms who carry from $50,000 to $1,500,000, so that 'business insurance' is being appreciated. From the list I observe United Grain Growers carry on the life of C. Rice Jones $100,000, and that Messrs. Dewey and Gardiner Lumber Co., of Moosejaw, carry $50,000, and the Blaf Grain Co., of Winnipeg, carry $100,000. Even in the less progressive cities of the east there can be found corporations carrying large blocks of insurance, amongst the latest being the Office Specialty Co., who have just placed $150,000 on the life of their Mr. Stemin. So many corporations are taking out 'business insurance' to-day that every list is out of date before it is printed.

"Allow me to review briefly why these corporations take out 'business assurance.' Look back at the construction of the corporation, and you find that the actual management of the business lies in a few hands, and, generally, very capable hands. Without them the directors would be helpless and the stockholders without dividends. We have been told that a corporation is an 'indestructible body without a soul,' but whoever told us that is wrong, for 'good management' is 'the soul of the modern successful business,' and good management lies within the bodies of a few men, subject to all the human ills. Out of their wisdom, therefore, the directors of these corporations have arranged that large sums of money will be available when death destroys 'good management,' and thus, without unduly injuring the business, they are given time to replace 'good management.'

"Insurance is taken in that case to replace brains. While good management has been called 'the soul of the modern business,' credit has been called its 'life blood.' I once had the pleasure of introducing a prominent official of a certain concern to a prominent banker. They immediately recognized each other's names, and apparently knew a lot about each other's business. They were pleased to meet each other. To my amazement I found that the business of which my friend was an officer did its banking with my other friend, the banker, who occasionally had to oblige with substantial overdrafts. Going into the matter, I found out that the banker dealt entirely with the president of the concern, and I wondered aloud as to where their credit would stand if the president would die.

Emphasis on the Individual

"There are many corporations in a similar position. The banker does not give the credit to the corporation, but to the individual. It is on his knowledge of the individual that the banker bases his faith. Of course, all bankers are Presbyterians, and they have an eye on the works also, but, nevertheless, the qualities and personality of the individual are a great factor in the obtaining of credit. Death removes the individual, and the banker removes the credit. He removes it at the very time that it is most needed: when every other creditor is nervous about the future of the concern, and is anxious to have his bills paid; when the stock of the deceased official is perhaps thrown on the market, and it would be of advantage to buy it in; when the other executives are wondering what is going to happen, and feel less confident through the sudden removal of the experienced advice and direction they were accustomed to rely upon; when everything is upset, directors nervous and stockholders anxious, Bradstreets and Duns will show the amazing number of bankruptcies caused by the death of an individual, and the consequent withdrawal of credit. It is apparent that the proceeds of a substantial life insurance policy would be both welcome and useful at that time.

"Look for a minute into the banker's mind while he is deciding whether he should grant credit or not, and you will quickly see another reason why corporations carry life assurance. In that mind there is being unfolded pictures of the business operations of the firm in the past. How the expert knowledge of Jones and the initiative of Brown helped the corporation to present a creditable balance sheet and pay a handsome dividend. Then the picture changes There looms up valuable buildings on valuable land. Expensive machinery next passes the mind's eye of the banker, and he notes the flow of merchandise on its way to the markets of the world. Two faces appear, and he smiles. He likes Jones and Brown. He trusts them, but the smile fades away. Between 10 a.m. and 5 p.m. a banker's heart is made of stone, and Jones and Brown are asking for money which he holds in trust. True, they will pay him for the loan of it, but the question is, Will they be able to pay him the money back? Jones is not so young as he was, and the other day Brown looked a little tired. Men have been known to crack up before, and what use to him would be the buildings, the machinery and the unsold merchandise without Brown and Jones to keep the wheels going. Still another picture comes into being. It is a picture of a stately building. Engraved across it is the name of a life assurance company. With the picture there comes into the mind of the banker the promise of that company to pay if Jones or Brown, or both, should die, a sum greater than the loan required, and the set look disappears from the face of the banker. Decision clears his brain. Brown and Jones alive, all is well. Brown and Jones dead, loan is paid. The eyes of the banker soften. The affirmative decision is spoken. He is pleased to be able to oblige Jones and Brown. Life assurance has come again to the rescue.

"Then, again, there come to corporations opportunities to increase their activities. It is necessary to obtain extra capital if the opportunity is to be taken advantage of, and bonds have to be issued. The bonds can be made very attractive and easily sold if the prospective buyer be informed that an annual premium is being paid for an endowment policy of a sufficient amount to retire the bonds at maturity, or

Your Final Settlement

This is the title of an interesting and instructive booklet which you should read.

Settlements—the final closing of business matters—are important.

The final settlement of your business matters is, therefore, the most important thing that you will ever face.

"Your Final Settlement" makes some interesting suggestions about it.

Mailed to your address on request, and we believe when you have read it, you will want to discuss the question of your will, and your Executor and Trustee with us.

in the event of the death of an important official of the concern selling the bonds. Other speakers and writers have indicated a number of other methods whereby 'business assurance' can be used probably by the corporation, so I need not waste your time going over them again, but I would like to make this general observation in connection with corporation insurance. It is this: that the corporation cannot wait until the hour of necessity before placing the insurance, and it is our function to make the men at the head of these corporations realize that, just as they visualize the future for the ordinary necessities of their business; just as they buy the adjacent lot in order that they may extend their factories, and just as this year they purchase the raw material for next year's manufacture, so must they to-day apply for insurance. How are we going to take advantage of it? The first step is, obviously, to obtain the necessary information as to the person on whom and the reason why the insurance should be placed. One cannot very well walk into the office of a managing director, throw on the table one's card, and demand an application for 'business insurance.' One must go prepared. So the first task you set yourself is to obtain the necessary information. Having obtained this, interview your man, and set before him in as lucid a manner as possible the reason for putting on the insurance. If he be in full control of the corporation, you can carry on and attempt to write him, then and there. If, however, others have to be consulted, and you think you can do it without offending him, offer to interview them for him. If he says that's not necessary, heave a sigh of relief quietly and concentrate on him. I remember W. J. Graham saying at Hamilton that he always endeavored, and generally succeeded, in getting the man to do all the work himself, and I will admit that that is the best way; but, unlike Graham, I've generally had to do a lot of it myself. I've had to address directors' meetings frequently, and once a shareholders' meeting. Mr. Graham's objection to tackling the meeting was that you had to control so many minds, and that the chances were great that you would run against a snag. This brings to my mind a rather amusing comment made by one of our agents with whom I was remonstrating because he had run me into addressing a directors' meeting. I told him of the danger of this, but he said, 'Oh, you go ahead. Only the president and general manager will understand one word you say, and they are the two who matter.' To this day I have wondered whether he was referring to the stupidity of the directors or to my accent, which in those days was very Scotch."

Dislikes Joint Policy

Concluding, Mr. May said:—

"I do not like the joint policy. Its one advantage is that the premiums are less than those for two separate policies. Its disadvantage is that if one dies, the other is left without insurance, and may be physically unfit to obtain it. It is true also that if the partnership should be dissolved—and such things do happen—the policy becomes useless, whereas under similar conditions separate policies can be quite easily handled. Great care has to be taken in filling out the application in order that, when death occurs, the insurance money may be payable promptly and without trouble to the proper beneficiary. I have found myself between the devil and deep sea on more than one occasion in handling settlements on business assurance, and I have not yet made up my mind whether the corporation lawyer or the insurance company's legal adviser was the devil. In order to prevent any question about the matter I have made the person to be assured sign the application, and have made the corporation the beneficiary. I have stated in the application that the corporation was to pay the premium. At the same time, I have submitted full evidence as to the reason for the insurance and the insurable interest. After the premium was paid I have had official insured assign the policy absolutely to the corporation. It has always amazed me that a business man is willing and ready to buy on behalf of his business any kind of insurance except life. He will insure his plate glass windows. He will worry the fire insurance broker until he receives his fire policy. He will go frantic if he finds an employee handling cash without a bond. He will pay premiums for burglary insurance, and he will without hesitancy put on insurance which will indemnify him against loss of use and occupany of his buildings and plant, but he will shy at a proposition from a life underwriter who wishes to protect his business against the irreparable loss of the brains, the experience and the intimate knowledge which make the foundation of all business success.

"When you examine the situation, it is bound to astonish you that the modern business man, with his highly-trained intelligence and his readiness to take hold of everything of use to him in his business, should not use life assurance to a greater extent than he does. Stupidity cannot be the cause. It must be ignorance, and we, who are the teachers of mankind in use of life assurance, must sweep that ignorance away and take advantage of the magnificent opportunity to benefit the world of business and ourselves."

NEW HYDRO LINE FOR WESTERN ONTARIO

Speaking at a meeting of the London Railway Commission on September 6th, Sir Adam Beck stated that a new radial line would be built from Hamilton through Brantford, Woodstock and Ingersoll to join the London and Port Stanley Railway in the neighborhood of Westminster. This work will be proceeded with if the municipalities interested want it.

NORTH AMERICAN LIFE CONVENTIONS

The western members of the Nalaco Club of the North American Life Assurance Co. met at Calgary on August 19th for a convention. Mr. E. J. Harvey, supervisor of agencies, was present with about twenty-five of the members. Following this meeting, the members stayed to attend the Life Underwriters' convention upon invitation of the company. The eastern members of the Nalaco Club are being entertained at a convention in Quebec city on September 23rd and 24th.

TRAINING FOR TEXTILE WORKERS

Textile manufacturers of Canada desire the establishment of a school for the training of workers for their industry, according to views expressed at a convention in Toronto on September 6th of the Canadian Textile Institute and the Canadian Woollen Manufacturers' Association. The feature of the meeting was an address by Prof. A. F. Barker, of Leeds University, who has been in this country for some weeks investigating the textile industry. Canada, he said, should not confine herself to agriculture and mining, and is, in fact, already committed to the development of textiles. A scheme of industrial education suited to the special needs of the country is required.

Other speakers at the meetings were Dr. R. A. Falconer, president of Toronto University, who, while emphasizing the necessity for retaining the humanitarian element in education, assured the support of the university. Hon. Dr. Cody, Minister of Education for Ontario, referred to agricultural colleges as a parallel case, and said that the time was no doubt near at hand when similar institutions should be established for other lines of industry.

The election of officers for the institute for 1919-20 resulted as follows: President, C. W. Bates, Bates, Innes Co., Carlton Place; vice-president, Percy Webster, Dominion Textile Co., Montreal; second vice-president, R. R. Moody, Eagle Spinning Co., Hamilton. Members of executive council—John M. Lawlor, wool-stock manufacturer, Toronto; C. R. Reynolds, Belding Paul Co., Montreal; Edgar Worth, Canadian Woollens, Peterboro; Richard Thomson, Hawthorne Mills, Almonte; Mr. Holden, Hamilton; Harold G. Smith, Mercury Mills, Hamilton.

OUR CHARGES

Our charges for the management of an estate are no more and often less than those of a private executor. They are fixed by the Surrogate Court Judge when he audits the estate accounts. The amount which he allows, as the Order of the Court reads, is "a fair and reasonable allowance for our care, pains, trouble, and time and personal disbursements expended in and about the administering, arranging and settling the affairs of the said estate."

ANALYSIS OF ALBERTA REVENUE

THE Citizens' Research Institute of Canada, in the first of a series of pamphlets on the cost of government in Canada, finds that the figure per head of population in Edmonton, Alta., for the year 1917 was $89.20, made up as follows:—

National government	$16.40
Provincial government	12.94
Municipal government	59.86
Total	$89.20

During 1917 the province of Alberta paid out $6,752,503 in operating account and collected revenue to the amount of $6,260,136. It is pointed out, however, that all the amounts received are not revenue receipts, and all the amounts paid out are not revenue payments, as, for example, certain advances and refunds under the department of agriculture. The provincial revenue and expenditure and the income and expenditure of the city of Edmonton are analysed according to the tables given herewith. On account of the difficulty of determining just what reductions should be made on account of public utilities (railways, telephones, etc.) conducted by the Dominion and provincial government, all items of expenditure of whatever nature have been included in the totals.

Alberta Revenue (1917).

Dominion government	$1,915,527	or 30.6%
Telephones	1,190,803	“ 19 %
Miscellaneous fees, licenses and fines	1,029,610	“ 16.4%
Department of municipal affairs	780,383*	“ 12.5%
Agriculture department	445,817†	“ 7 %
Taxes on corporations and companies	209,427	“ 3.3%
Succession duties	146,535	“ 2.3%
Railway tax	110,900	“ 1.8%
Department of public works	54,628	“ .9%
Department of education	34,523	“ .6%
Other items	341,983	“ 5.6%
	$6,260,136	100%

*Of this amount, $598,670 came from the Wild Land Tax.
†Of this amount, $310,971 was "Refunds of Advances on Butter and Poultry."

SPECIAL FEATURE.

Wild land and timber taxes amount to over one-half of the provincial expenditure for education.

Alberta Expenditure (1917).

Civil government, legislation and administration of justice	$1,354,242	or 20 %
General education	1,168,994	“ 17 %
Telephones	1,039,860	“ 15.4%
Public debt charges	1,029,382	“ 15.3%
Agriculture (including educational activities)	719,205*	“ 11 %
Public works	681,008	“ 10 %
Hospitals, charities, public health and institutions	315,922	“ 4.7%
Miscellaneous	443,890	“ 6.6%
	$6,752,503	100%

*Of this amount, $322,595 was "Advance Payments—Creameries." This is not properly an expense.

SPECIAL FEATURES.

Note that the expenditure on education, not including certain amounts for agricultural education, was 17% of the total. The total expenditure represented an expenditure per head of population of $12.94. (Canada Year Book.)

Edmonton Income (1917).

(Including surplus from preceding year. Taxation for education and certain special purposes is included. Revenue from public service enterprises is excluded.)

Taxation, less discount	$3,020,577.06	or 91.5%
Interest, exchange, etc.	179,421.12	“ 5.5%
Miscellaneous departmental revenues	58,816.82	“ 1.8%
Net surplus, 1916	41,591.72	“ 1.2%
	$3,300,406.72	100%

Edmonton Expenditure (1917).

(Including surplus. Expenditure represented by taxes for schools and libraries is included. Expenditure on public service enterprises is excluded.)

General government	$1,862,430.86*	or 56.5%
Education	772,000.00	“ 23.4%
Protection of persons and property	240,671.05	“ 7.3%
Highways	115,269.62	“ 3.5%
Health and Sanitation	100,166.65	“ 3 %
Social service, charities and correction	66,199.07	“ 2 %
Recreation	14,489.07	“ .4%
Various special expenditures	121,088.69	“ 3.7%
Surplus, 1917	8,091.71	“ .2%
	$3,300,406.72	100%

*This includes $1,744,701.74 covering Interest and Exchange, General and Local Improvement Debenture Interest and Redemption of Debt, which is equivalent to a per capita expenditure of $31.72.

SPECIAL FEATURE.

The expenditure of the city of Edmonton for 1917, less the surplus for the year, represents an expenditure per head of population of about $59.86.

The Hamilton Provident and Loan Society

Capital Subscribed	$2,000,000.00

OUR FAULTS IN HANDLING EXPORT TRADE

Buyers Complain Not About Quality of Goods, But of Carelessness in Business Methods

THE August letter of the Canadian Bank of Commerce contains some valuable pointers to Canadian firms regarding export trade:—

"Representatives of this bank," it says, " recently visited New Zealand, Australia, China and Japan, the object of the trip being principally to ascertain the possibility of trade development between those countries and Canada, and to learn something about general conditions. Each one of the countries in question offers a market for Canadian goods and undoubtedly a share of the trade can be secured if our manufacturers will go to the expense of sending a competent representative to study local requirements, select local representatives and co-operate with the latter in the sale of their goods. Immediate results should not be expected and manufacturers should be prepared to bear at least a share of the cost of advertising for a few years until their goods are well established, and their reliability and durability proven. We can sell in another country only if the goods are at least equal to those of our competitors in price and quality and we should aim to have the stamp "Made in Canada" represent absolutely undoubted quality, the best workmanship and the finest materials. It is only by producing a superior article that we can hope to make rapid progress in our foreign trade.

"Our representatives called upon a number of firms in each of the above-mentioned countries, and almost invariably they were given to understand that representatives of reliable Canadian firms would be welcomed, and that if the merchandise could be obtained on as favorable terms as elsewhere Canada could secure a reasonable share of their business. A great many complaints, however, were made about Canadian carelessness in handling foreign business and some of the instances related were so glaring that we are recording a few of them in the hope that it may bring home to exporters the necessity for greater care in future. It is essential in filling foreign orders that directions be followed implicitly, and that the goods be carefully packed so that they will arrive at the point of destination in perfect order. If a few shippers are careless it reflects on the whole foreign trade of the country.

How We Fall Short

"1. A shipment of angles, ordered to be a certain length, was sent to the east. When the shipment arrived there were at least three lengths in the consignment which were shorter than the specifications called for, with the result that the shipment was of no use for the purposes required. If the shipping clerk had checked the goods carefully before they were packed he would have discovered the error, and the resulting discredit to his employer, and a great deal of inconvenience to the importer, would have been saved.

"2. A shipment of goods, which required several cases to contain them, went forward with the cases numbered and a statement that certain goods were in certain numbered cases, which was just what the importer desired. When the latter proceeded, however, to open some of the cases to secure the goods he needed, he discovered that the goods were not packed as indicated, with the result that he was put to considerable unnecessary inconvenience and annoyance.

"3. A shipment of hardware went to the east and when it arrived a great quantity of the goods had been stolen. This might have been avoided if the cases had been bound with metal straps.

"4. A shipment made against a banker's credit on a through bill of lading went forward from the exporter's warehouse on schedule time in accordance with the contract and the shipper paid no further attention to it. The goods went as far as the seaboard, but there they lay for months and the importer at the other end was kept waiting for them. Finally he cabled to find out the cause of the delay and the exporter then woke up to the fact that he should have followed up the shipment and ascertained that it was promptly placed on board ship, thus looking after his client's interests. The importer, in view of this experience, says that he will not pay for any more goods shipped from Canada unless on an ocean bill of lading. There were numerous complaints of this kind.

"5. An Australian importer stated that he purchased a considerable amount of merchandise from Canada for sentimental reasons, but that he always had the goods forwarded through a New York forwarding house as he could then rely on the shipment being in order. He stated that Canadians were too careless about handling this business.

"6. One large foreign house recently sent a man through Canada and the United States with a view to establishing connections, and after looking the situation over he came to the conclusion that he could probably buy a considerable part of his requirements in Canada, but from his point of view he decided that the Canadians lacked "pep" and initiative, and were too careless in their business methods to compete with the Americans, with the result that he gave his business to United States firms.

"7. The number of complaints that Canadian export houses fail to answer letters and even cables was really astonishing.

"8. Some firms complained bitterly that they would take up a line of Canadian goods and after going to the expense of introducing them and building up a good market for them, the Canadian house would suddenly cease shipments without even a letter of explanation.

"The complaints about Canadian goods being badly packed, and the lack of prompt and thoughtful attention to correspondence were the most numerous of any. Some of the criticisms were very severe and it is unfortunate that an impression should have spread abroad that Canadian houses are careless in their handling of foreign business. As few complaints were heard about the quality of our merchandise, we feel that if exporters would study more closely the conditions governing export business, and see that greater care is exercised in their shipping departments, we should be better able to compete for trade.

"It is apparent that Canadian manufacturers can secure a fair volume of trade in these countries, but they must send a representative to secure it, as not much can be accomplished by mail. It would be preferable for the manager of the exporting house, or one of the partners, to cover the foreign ground first, so that the management may know exactly what the foreign conditions and requirements are. If smaller firms find this undertaking too expensive for them individually, there is no reason why a few non-competitive firms handling different lines of a similar character might not jointly send a man abroad for this purpose. It is quite important to appoint a local representative in the principal centres who will continually keep the exporter's goods before intending buyers, and an importer would much prefer to deal with a reputable local representative in the adjustment of any disputes over a shipment of goods.

"At Yokohama we learned that a large consignment of Canadian pulp had come forward through a United States firm, and apparently considerable quantities of Canadian goods are being shipped abroad in this manner. As far as possible exporters should aim to ship direct, as this not only advertises Canada but will induce foreign importers to look to Canada for the goods which this country is able to export.

"While on the subject of exports it must not be forgotten that trade works both ways, and that foreign merchants expect to sell in Canada as well as buy from this country. Our policy should, of course, be to buy our raw materials in the cheapest market, favoring the British Empire first—so that we may be able to sell our goods on as favorable a basis as any other country where reasonable wages and conditions prevail.

"Canadian trade representatives visiting the far east should not overlook Java and the Straits Settlements. Java is a country of about 40,000,000 people, with no preferential tariffs, and is looked upon as the garden of the east.

"Our representatives report that the outstanding feature of their trip was the friendly disposition shown towards Canada by all the countries visited. This is a tremendous asset and, if our exporters really make a serious effort to secure a share of the foreign trade of the countries in question and are not too impatient, they should be successful."

FIRE MARSHALS' ASSOCIATION CONVENTION

Fire Prevention Day Endorsed—Co-operation with Other Organizations Urged—Education is Best Agency

AT the last session of the convention of the Fire Marshals' Association of North America, held recently in Toronto, the following officers were elected for the year 1919-20: President, John G. Gamber, Illinois; vice-president, J. S. Horan, West Virginia; secretary, G. H. Nettleton, Minnesota; two other members of the executive committee, G. F. Lewis, of Ontario, and Homer Rutledge, of Michigan. The following resoluions were passed:—

1. Whereas, the present time is one of unprecedented social disturbance and violent internal attack upon the foundations of our national liberty, therefore be it

Resolved, that the Fire Marshals' Association of North America hereby endorses the suggestion of the National Board of Fire Underwriters that this year October ninth be specially observed as a "Patriotic Fire Prevention Day," and that all possible effort be made to emphasize its largest patriotic values as an occasion for constructive thought, conservational effort and mutual co-operation for the public welfare.

Approves National Board

2. Whereas, the National Board of Fire Underwriters has established a Loss Information Service in its Actuarial Bureau, and

Whereas, the successful operations of this service will be of great value to the work of our several departments in that it will centralize information from the several States relative to suspicious fires and facilitates the apprehension of incendiaries; now, therefore be it

Resolved, that the Fire Marshals' Association of North America hereby endorses the establishment of this service and recommends that the members of the association avail themselves of the wealth of material collected by this bureau, and that the members of this association supply to the said Loss Information Service any data that may appear to be of value to the various Fire Marshals' Departments and the Loss Information Service, which will, by its use, aid in lessening the great fire waste of the country.

3. Whereas, the Committee on Co-operation with the National Board of Fire Underwriters, appointed by the last annual convention of this association, held a two-days' session in New York, upon January 9th and 10th, 1919, devoted to the consideration of plans for increasing the safety of the American public from preventable fire; and

Whereas, the considerations of this conference were formulated in ten resolutions, unanimously adopted by your committee and by them circulated among the members of this association; therefore be it

Resolved, that the Fire Marshals' Association of North America hereby endorses these resolutions and recommends to its members the fullest practicable compliance therewith.

4. Whereas, the International Association of Fire Engineers are working in such a splendid manner for the furtherance of the aims to which this association is dedicated.

Resolved, that this association desires to co-operate in every possible way with the above association, and that we delegate the then president of this association to attend the next meeting of said association.

5. The splendid program containing as it does the livest topics of a constructive and instructive character on the various subjects of fire prevention and allied matters have, in our opinion, been not only valuable to the members of the association, but we believe it will prove of great educational service in the future and we especially commend President Fleming, Secretary Gamber and the Executive Committee for their untiring efforts in thus making this convention one of the most successful in the history of the organization.

6. It is our firm belief that education in fire prevention is most important in the elimination of the enormous fire waste obtaining in both Canada and the United States, and we recommend the adoption of all means that will call to the minds of the people the need of conserving the created resources in our countries suggesting public instruction in our graded schools by using such books as "Safeguarding the Home from Fire," published by the National Board of Fire Underwriters, and other pamphlets prepared and promulgated in the States or Provinces of our several members, and, we believe, that a well-defined advertising campaign should be carried out using newspapers and posters and other mediums of information. We endorse "Fire Protection" as the official organ of the association.

7. Resolved, that this association expresses its appreciation of the great city and county in which the convention has just been entertained. The splendid men and women of this great land have made a deep impression upon us. The high character and readily recognized ability of every public official with whom we have come in contact have been a source of great pleasure to all of us. The fine courtesy of the press and the splendid and unequalled hospitality of the people have placed us under perpetual obligation to them. We thank Fire Marshal Heaton, Deputy Fire Marshal Lewis and their committee, for their wonderfully successful efforts in making our stay here such a pleasant one. We wish also to acknowledge our sincere appreciation of the courtesy extended to us by the Rotary Club, officers and directors of the Exhibition Association, the Canadian Manufacturers' Association, the city of Toronto, the Province of Ontario, the Ontario Motor League and the King Edward Hotel.

HEALTH AND ACCIDENT UNDERWRITERS' CONFERENCE

The 1919 annual convention of the Health and Accident Underwriters' Association was held in Niagara Falls, Ontario, September 2nd to 4th. In addition to the usual business and reports of committees, there were a large number if papers read on subjects of interest to the delegates.

Two Canadians were present, Colonel A. E. Kirkpatrick, Canadian manager of the U.S. Fidelity & Guarantee Company, and Frank W. Cox, of the Imperial Guarantee and Accident Company. Colonel Kirkpatrick, in speaking on "The Effect of War on the Moral Hazard," said in part:—

"To lucidly interpret the expression '*Moral Hazard*' when applied to accident and health insurance, to a thinking man opens a wide horizon of thought and consideration. So many apparently trivial points of character and environment obtrude themselves persistently, and each seem to suggest another with some analogy to the subject. Speaking of the human race as a whole in its relation to insurance, and of the individual in particular, we may say, I think, that the moral hazard is based on character. We may truthfully say also, I believe, that a man who is honorable in his business dealings, scrupulously honest in his relations to his fellows, asking fair and honest treatment without undue exaggeration of the personal ego, presents to us a type of the highest moral hazard that we can find—and speaking inversely, in so far as a man departs from the excellent standard which we have erected then to that extent the moral hazard is increased and aggravated. Therefore, character may be taken as the foundation stone of moral hazard—and character as developed by this great war shall be the theme of my remarks to-day."

The speaker then showed the beneficial effect of the war upon the character of those who had been engaged in it. "Recently," he said, "at a general meeting of a large financial institution I asked for an expression of opinion from a number of large employers of labor as to the comparative value, character, capability and resourcefulness of the returned man over what he had been before he went overseas. It was the unanimous opinion that with extraordinarily few exceptions a decided improvement was noticeable, some going as high as to make 50 per cent. of their efficiency and reliability, and recently speaking to one of the prominent officials of our greatest railway in a western city this was confirmed by him to me from his actual experience with hundreds of returned men in their employ. My own personal experience bears this out absolutely."

NEW MONTREAL BROKERAGE FIRM

The Montreal Stock Exchange has announced that Laurent G. Morin has been elected a member of the exchange. Mr. Morin is the sole member of the new stock brokerage firm of L. G. Morin. Prior to forming the new firm, Mr. Morin was office manager for R. Forget, with whom he was connected for twelve years, after having been with the firm of L. J. Forget since 1895.

Reports received from Montreal state that a large export company, with a capital of several million dollars, will probably be formed shortly. The plan is that it will act as agent for Canadian manufacturing and exporting companies.

BUILDING PERMITS INCREASE

Building activity in Canada was slacker in June than in May, but was in excess of that for the preceding year by about 75 per cent. The building permits for the thirty-five largest cities were as follows:—

DEPARTMENT OF LABOUR FIGURES	May 1919	June 1919	June 1918	June, 1919, compared with June, 1918. Increase+ Decrease−	
				Amount	Per Cent.
CITIES	$	$	$	$	
Nova Scotia	542,644	288,520	259,479	+ 29,041	+ 11.19
Halifax	403,190	224,290	200,086	+ 24,204	+ 12.10

INDUSTRIAL ACTIVITY IN CANADA

Erection and Extension of Many Plants in the Dominion—Lake Huron Steel Plans Large Works

SINCE the signing of the peace terms, and more especially during the past month and a half, as pointed out in these columns, industrial activity in Canada has been in evidence by the number of new plants and factories erected by Canadian, British and American concerns, and of the large extensions to the present industries. Among the more recent announcements, one of the most important is that of the Lake Huron Steel Corporation, a large enterprise backed by American capital, to the effect that it will stand by its original decision to establish its plant at Goderich, Ont. A conference was held recently of municipal officials of Goderich and directors of the company. The corporation has asked for freedom from city taxes, with the exception of school taxes, for a period of ten years. The expenditure of $2,000,000 on the electric steel plant is planned during the next 12 months, and the total for blast furnaces during the second year is placed at $6,000,000. Six electric furnaces of the Heroult type will be installed, according to present plans. A blowing mill, rod mill and bar mill will be built for the production of high-grade steel billets, rods, bars and ferro-alloys needed for the production of automobile parts and for general commercial purposes.

The company has stated that it will use 14,000 h.p. during the initial operations, and that this will be increased to 20,000 h.p., which will be secured from the Hydro-Electric Power Commission. It is estimated that 4,000 employees will be the maximum number when operations are at full.

West Not Inactive

Regina, Sask., is to have one of the largest motor accessories businesses in the west within a few weeks, according to an announcement made recently. The new firm is the General Motors Accessories, Ltd., a company capitalized at $200,000, the charter of which was issued recently. A. J. Gibson, who is to be the managing director, was formerly manager of the Motor Sales Corporation, Ltd. The company intends to centralize the motor accessories business of the west in the city of Regina, and will have a big staff of efficient experts in charge of the business there.

The Capital City flour mills, located at Regina, have changed hands. The Soo Line Mills, Ltd., of Weyburn, have already taken over the management of the mills, and have secured a lease on the property for a period of ten years. Important improvements in connection with the property are contemplated.

The directors of the United Grain Growers in western Canada have decided to move the headquarters of the organization in British Columbia, from New Westminster to Vancouver. "This does not mean that we will remove from New Westminster entirely," said C. Rice-Jones, vice-president and general manager of the association. "It only means that our business in the province has expanded from $350,000 last year to $500,000 this year, and as much of our delivery is demanded in Vancouver, we have decided to take over the Burnett Flour and Feed plant and elevator on Front St. The storage capacity of the New Westminster plant is only 30,000 bushels and the new elevator in Vancouver will give an additional 100,000 bushels capacity."

Other Extensions

Announcement has been made of the extension of various other industries. The Dominion Sheet Metal Co., Hamilton, Ont., has been granted a permit for an addition to its factory, to cost $23,000.

Dominion Linens, Ltd., is erecting a thrashing and cleaning mill at Guelph, in connection with the flax-growing operations by the company.

At the plant of the Imperial Oil, Ltd., Dartmouth, N.S., extensions are now under way. This enlargement calls for the employment of a large number of men and the present capacity of 2,500 to 3,000 barrels per day is being enlarged to 8,500 barrels per day.

Another industry is being located at Kitchener, Ont., in a felt plant, which is being built on a piece of land behind the Rieder property on West King St., purchased three months ago by T. H. Rieder, president of the Ames-Holden-McCready Co., Ltd. The factory, presumably, is being erected by that company, and it is thought that they will devote it to the purpose of manufacturing felt footwear.

The Brockville Board of Trade has discussed and endorsed plans for the immediate construction of a big paper manufacturing plant. An agreement has been entered into with promoters as represented by C. F. Buss, of Mille Roches, and G. R. Buchanan, of Ottawa. The board of trade will contribute the site upon which the plant will be built. The board is also in touch with other industries that will probably locate in the city.

Conservation of Life Insurance

Life insurance is of supreme value in these uncertain times. Life insurance should not only be jealously guarded and kept in full force, but it should be increased if at all possible. It is a well-known fact that the dollar has greatly diminished in value, so that a given income will not purchase much more than one half the amount that it would have yielded in pre-war days. Not only therefore should we resist every inducement to relinquish our insurance; we should rather increase our protection to the limit of our ability. There is nothing else to be compared with a life insurance policy as a protection for the home. During the policyholder's life it is an asset of ever-increasing value: at death it is the financial anchor of one's dependents. Do not allow your "best friend" to induce you to give up a policy in a sound company. Take a new policy if you can, but never give up the old !

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Walkerville, Ont.	Dominion Bank.
Rosenfeld, Man.	Bank of Hamilton.
Edmonton, Alta. (102nd and Jasper)	Canadian Bank of Commerce.
*St. Moise Station, Que.......	La Banque Nationale.

Mr. William Bedford has been appointed manager of the branch of the Bank of Hamilton just opened at Rosenfeld, Man.

Mr. Thomas F. How, general manager of the Bank of Toronto, and J. A. Woods, superintendent of western branches, were in Fort William, Ont., recently making arrangements for the opening of a branch there. Regarding the opening of the new branch, Mr. How stated that it was being opened to take care of the grain business, but the conditions of a growing city would warrant the establishing a branch at the head of the lakes in any event.

The Bank of Hamilton has secured the premises formerly occupied by the Sovereign Bank at Goderich, Ont., and will shortly open a branch at that point.

The Bank of Commerce has taken out a permit for a branch on Portage Avenue, between Donald and Hargrave Streets, Winnipeg, Man. The building will cost about $55,000.

The Union Bank of Canada has nearly completed a branch at the corner of Main Street and Mountain Avenue, Winnipeg, at a cost of about $25,000.

The Imperial Bank of Canada is preparing plans for a large block on the corner of Richmond and Dalhousie Streets, Amherstburg, Ont., opposite the post-office.

A new building of the Royal Bank of Canada has been commenced at Cadillac, Sask.

The Bank of Hochelaga is starting a new branch at Cadillac, Sask.

A sub-branch of the Dominion Bank has been opened at Petersfield, Man., under the supervision of the manager at Selkirk, Man.

A new building is being erected at Minden, Ont., by the Sterling Bank of Canada.

The following staff changes have been announced by the Sterling Bank of Canada: Mr. A. J. Hunt has been appointed manager of Cornwall branch, together with supervision of the branches in his district, Mr. Roth having resigned. Mr. H. S. Calder has been appointed acting manager at Myrtle Station. Mr. A. M. Rice has been appointed manager at Straffordville. This has enabled Mr. Sutton to return to Port Burwell; and Mr. Wilkie has left Port Burwell branch and is at present relieving the managers in the city for holiday purposes. Mr. H. Dunlop, who has returned from military service, has rejoined our staff at Montreal. We are glad to know that he is well and has come through his military career without injury.

E. L. Pease, managing director of the Royal Bank, announced in Winnipeg a few days ago that they would probably withdraw shortly from operations in Siberia. A branch was opened a short time ago in Vladivostok. He was optimistic as to the outlook in South America, however, and said that premises had already been secured in Buenos Ayres, Rio de Janeiro and Monte Video, the staffs were on the ground, and active operations would commence about October 1st.

---

*Sub-agency to Grande-Baie, Que.

BANK BRANCHES OPENED IN JULY

According to the August number of Houston's Bank Directory, fifty-three branches were opened and none were closed. The number of branches opened by each bank is shown as follows: Royal, 13; Merchants, 9; Montreal, 7; Commerce, 5; Imperial, 3; Nationale, 3; Sterling, 3; Standard, 3; Home, 2; Toronto, 1; Union, 1; Nova Scotia, 1; Provinciale, 1; Hochelaga, 1; total, 53.

AUGUST BANK CLEARINGS

No tender necessarily accepted.

WM. E. B. MONYPENNY,
City Clerk.

VERMILION, ALTA.

Sealed tenders will be received by the undersigned up to noon, September 22nd, for $20,000.00 20-year term 6½% town of Vermilion debentures, payable in twenty equal annual instalments. Purpose of debentures, for Fire Hall erection and additional equipment, and it is a charge on the town at large.

H. P. LONG,
Secretary-Treasurer,
Town of Vermilion.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

A THOROUGHLY EXPERIENCED LOAN AGENT desires the agency of a loan or trust company who have money to lend on improved farms or modern city property in Saskatchewan. Financially responsible to guarantee loans if required, and organized in the best districts. An interview can be arranged by writing Box 223, *Monetary Times*, Toronto.

LIFE INSURANCE SALESMAN AND OFFICE MAN.—Young man, with several years' experience in Head Office and Agency work, desires position with first-class life company, either in office or field. Holds records in both branches of the work. Confidential. Box 219, *Monetary Times*, Toronto.

GOVERNMENT AND MUNICIPAL BONDS

Monday, September 8th, was the day on which the agreement among bond dealers to postpone further solicitation of business went into force. This agreement covers the war loan campaign period. It provides that dealers are "not to negotiate for, purchase, or offer for sale, any issues of securities." Practically all of the dealers, and their employees, have, however, been absorbed in the loan organization.

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97	97 3/16
United Kingdom 5½% (Nov. 1, 1919) ..	99⅞	100
United Kingdom 5½% (Nov. 1, 1921) ..	98⅝	98⅞
United Kingdom 5½% (Feb. 1, 1937) ..	96	96¼
Canadian Pacific 6% (Mar. 2, 1924)	99½	100
City Paris 6% (Oct. 15, 1921)	96½	97
Dominion of Canada 5½% (Aug. 1, 1921)	99⅜	99¾
Dominion of Canada 5½% (Aug. 1, 1929)	97⅛	97½
Russian Govt. Ext. 5½% (Dec. 1, 1921)	42	44
Russian Govt. Ext. 6½% (July 10, 1919)	44	47
Swedish Govt. 6% (June 15, 1939)	97¾	98

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Trail, B.C.	$ 15,500	7	20-years	Sept. 15
Penticton, B.C.	75,000	6	20-years	Sept. 15
Pipeston R.M., Man.	10,500	..	20-years	Sept. 20
Vermilion, Alta. ...	20,000	6½	20-instal.	Sept. 22

Charlottetown, P.E.I.—The city desires to receive tenders until September 22 for the purchase of $100,000 5 per cent. 20-year debentures.

Sydney, N.S.—Bonds to the amount of $5,000 will be floated shortly, to secure funds for necessary water extensions and street construction. The bonds will be for 30 years, with interest at 5½ per cent.

New Glasgow, N.S.—Ratepayers have passed by-laws for the issuance of debentures to the amount of $50,300 for various local improvements. Of this amount, $3,800 is for payment of the Halifax Relief Fund.

Smith's Falls, Ont.—By-laws have been passed authorizing the issuance of debentures to the amount of $5,574 for the extension of waterworks, and for debentures to the amount of $14,300 for the Hydro-Electric Commission.

Barton Township, Ont.—School trustees of school section No. 3 have been given authority to issue debentures to the amount of $45,000 for the erection of a new school on Wellington St. Ratepayers will also be asked to sanction the expenditure of $60,000 for other further school improvements.

Windsor, Ont.—Tenders were to be received until September 12 for the purchase of $175,000 5½ per cent. 10 and 20-year instalment debentures. In view of the agreement between bond dealers' association and the government that the flotation of all loans and securities on the market be stopped, the city cannot sell the bonds until next December, except to purchasers outside of the association.

Scarborough Township, Ont.—At the last regular meeting of the township council transfer of school debentures was thoroughly discussed and finally approved. The debentures were in two lots, one of $40,000, school section No. 13 bonds, and another of $25,000, school section No. 15 bonds, and had been sold to G. A. Stimson and Co., Toronto. Numerous applications have been received from residents of the township, and in order to allow such investors to take advantage of issue, blocks will be sold in $500 and $1,000 bonds.

Regina, Sask.—The sale of school debentures was successfully conducted by the Local Government Board at Regina recently, the final one before the pending loan has been subscribed. Prices were quite up to the mark of the preceding sale. In practically every case a premium was paid by investors on 20-year securities bearing 6¼ per cent. and on ten-year 6½ debentures. While few bond houses entered

Why the Discount on the Canadian Dollar?

The current issue of *Investment Items* is devoted to a readable explanation of Foreign Exchange, with particular reference to the present American and Sterling Exchange situations.

Among other things, it explains why the Canadian dollar is worth only about 96 cents in payment of American goods. It indicates also how this discount can be overcome.

The issue is of timely interest to business men and Investors.

ANNUAL REPORT

OF

The Quebec Railway, Light, Heat and Power Co., Limited

FOR THE

Fiscal Year Ending 30th June, 1919

Submitted at the Annual Meeting held in Montreal on the 9th September, 1919.

To the Shareholders:—

Your Directors beg to submit the following report and Financial Statement of the Company's operations for the fiscal year ended June 30th, 1919.

The Gross Earnings from Operation for the year were $2,077,621.13 as compared with $1.797,852.83, being an increase of:

$279,768.60

The Operating and Maintenance Expenses were $1,444,516.08 as compared with $1,235,724.33, being an increase of:

$208,791.75

leaving a Net Revenue of $633,105.35 as compared with $562,128.50 being an increase of:

$70,976.85

After adding Miscellaneous Income $27,722.61, not including earnings on Quebec & Saguenay Railway Company's securities, and deducting Fixed Charges, Taxes, Depreciation on Cars, etc., of $726,101.55, there remains a deficit of $65,273.59, leaving a balance at the credit of Surplus Account to date of:

$682,464.29

The line of railway between St. Joachim and Nairn's Falls under construction for the Quebec & Saguenay Railway Company,—one of this Company's subsidiaries,—has been acquired by the Dominion Government. This sale took place under date of March 4th, 1919, and the Trustees are now in possession of the funds for disposal in accordance with the bondholders' instructions. The construction of the road is now being continued by the Government and, when completed, should prove a valuable source of revenue for the Montmorency Division of the Quebec Railway, Light & Power Company.

The accounts of the Company have been duly audited and certified to by Messrs. P. S. Ross & Sons, Chartered Accountants, Montreal.

In conclusion, the Directors desire to express their appreciation of the efficient services rendered by the officials and staff of the Company.

Respectfully submitted on behalf of the Directors,

LORNE C. WEBSTER, President.

Statements of Assets and Liabilities at 30th June, 1919.

bids, competition was good among investors, which included a number of insurance companies and municipal sinking funds.

Verdun, Que.—Tenders are being received until to-day, September 12th, for the purchsae of $225,000 5½ per cent. 20-year coupon gold, general improvement, and deficiency debentures.

Edmonton, Alta.—A meeting of the city council was held last week, to discuss various financial matters. The sale of $260,000 telephone extension debentures to W. Ross, Alger and Co., at 96.75, was confirmed. Third reading was given the by-law to issue $5,000,000 of consolidated debentures against tax arrears, and it was finally passed. In this matter, the public utilities commission have only given the city the authority to issue $3,500,000 of these debentures, as the board first wishes to see how the ten-year tax payment plan will work out. A communication from the manager of the Imperial Bank of Canada dealing with the city's credits for the balance of the year was referred to the finance committee for a report.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railroads for the first week in September:—

Canadian National Railway.			
Sept. 7	$1,737,454	$1,504,832	+ $ 232,622

WINNIPEG GRAIN EXCHANGE

At the annual meeting of the Winnipeg Grain Exchange, held on September 10th, John E. Botterell was elected president, N. L. Leach vice-president, and Dr. Robert Magill secretary. T. A. Anderson, the retiring president, in his annual address to the members covered the work of the exchange during the past year, and dealt at length with efforts that had been made to secure open markets for handling of the Canadian wheat crop.

NEWS OF MUNICIPAL FINANCE

Toronto Assessment and Population is Increased—Edmonton Utilities Show Good Results—Burnaby Collects More Taxes

Calgary, Alta.—During the month of August the city collected taxes and rents to the extent of $10,452. The total collections from this source to date for the year have been $72,898.

Winnipeg, Man.—At a meeting of the civic finance committee general manager A. W. McLimont, of the Winnipeg Electric Railway Co., asked that patience be exercised in regard to the company's overdue account of $409,000 for taxes. He claimed every effort was being made to wipe out all liabilities.

Regina, Sask.—On the assumption that the revaluation of buildings which is now being made by the city assessor will result in a considerable increase in the amount of taxation levied on improvements, the city council has decided not to raise the rate of assessment on improvements next year above the present 30 per cent. standard.

Burnaby, B.C.—Tax collections of the municipality for 1919 shows an increase of $86,956 over collections for 1918. The figures of the collections as embodied in a report submitted to the council at their regular meeting are as follows: Current taxes, $205,987, as against $150,376 for 1918; arrears, $97,928, against $70,317 for 1918.

Levis, Que.—At a meeting of the general committee of the council it was shown by Dr. V. Roy that the indebtedness of Levis City was $940,000, and that the city was spending approximately $10,000 per month. The salary of civic employees had also been increased, and it was urged that a valuation of property, should be made in the autumn, and the tax should be fixed at 1½ on financial value. It is expected the assessment role will amount to $4,000,000 this year.

Winnipeg, Man.—At a meeting of the civic finance committee last week, a statement of the appropriation balances for the three months ended July 31 last, was presented as follows:—

Total appropriation for the year	$6,464,846
Expended to July 31st	987,020
Credit balance	5,477,826
Revenue other than taxation, estimated for the year	617,260
Revenue received to July 31st	154,869

According to a statement by Hon. Edward Brown, provincial treasurer, the amusement tax is to be permanent for Manitoba. He said that the tax was not introduced by the government as a war-time measure, but as a permanent tax for the raising of money for governmental purposes.

Edmonton, Alta.—A satisfactory report of the earnings and expenditures of the various civic utilities for the period of seven months ended July 31st last, has been submitted. The report shows a combined net surplus, inclusive of capital and depreciation charges, of $13,854, as compared with a deficit for that month of last year of $1,993. The gross earnings for the seven months ended July 31st, amounted to $1,148,314, while operation and maintenance expenditures were $618,526, showing a surplus on operation of $529,787, as compared with $468,426 for the same period of last year, and after deducting capital and depreciation charges, there is a net surplus on all utilities, inclusive of the deficit on the street railway, for the seven months, of $85,146, as against $27,675 for the corresponding period of 1918.

For the first occasion within a period of several years, there is a net surplus on the operation of the street railway department after providing for capital and depreciation charges, of $2,218 for the month of July, as compared with a net deficit for the same month last year of $7,514.

Toronto, Ont.—The city's revised assessment shows a gross increase of $21,000,000, compared with last year, and now reaches the total of $642,816,690, while the population has gone up from 489,681 to 499,278.

The assessment rolls on which the city's taxes will be collected in 1920, show that the city is now losing $122,706 in taxes yearly on account of bonused industries. The bonuses, which take the form of tax exemption, were inherited by Toronto from the municipalities which the city annexed, and some of them will continue until 1933. The annual loss of the city at the present tax rate is as follows:—

Canadian General Electric Co., full exemption on $988,576 property and $683,145 business assessment	$ 47,644
Boake Mfg. Co., full exemption on $53,460 property and $31,730 business assessment	2,428
Gunn's Abattoir, exemption on $143,000 property and $115,800 business assessment	7,376
Union Stockyards, exemption (except school rates) on $636,009 property and exemption on $381,605 business assessment	23,977
Harris Abattoir, exemption (except school rates) on $442,900 property and exemption on $265,740 business assessment	16,697
Swift Canadian Co., exemption (except school rates) on $634,360 property and exemption on $380,616 business assessment	23,915
Ontario Fertilizers, exemption (except school rates) on $17,765 property and exemption on $10,659 business exemption	669
	$122,706

A SUCCESSFUL NATIONAL FAIR

Attendance at the Canadian National Exhibition, Toronto, which lasted from August 23rd to September 6th, was 1,201,500; the previous record of 1,009,000 was made in 1913, and the attendance last year was 946,400. Plans for the future include a live stock arena and extensive waterfront improvements, to be carried out by the Toronto Harbor Commission.

BANKS TAKE UP PROGRESSIVE ADVERTISING

Writing in the "Financier," on the subject of bank advertising, A. G. Sclater, manager of the statistical department of the Union Bank of Canada, says:—

"In Canada the bankers, trained in a school whose traditions were even more conservative than those of the bankers on this side of the line, until quite recently took much the same disdainful attitude towards advertising. This was reflected in the make up of all their publicity. Many thousands of dollars found their way out of the banks' coffers and were charged to 'advertising,' but it is very questionable whether the banks ever really received any return for their money. It was hardly to be expected that they would; neither their printed matter nor the copy they used in their advertising was designed to get results; the men who wrote them, and the banks who paid for them, did not believe they would or could get results, and they did not.

"When a bank manager gave a solicitor a contract it was to a great extent with the feeling that he was doing a very great favor. Banks did a certain amount of advertising every year, they felt, and they must keep their own end up. To-day, among progressive Canadian bankers, this view of advertising is no longer held. As with United States bankers, the war awakened them to a new appreciation of their opportunities and a new appreciation of the fact that only through carefully designed advertising can they hope to inculcate the thrift that means more business for them and greater productiveness for the country with which their fortunes are so intimately bound up.

"During the war they did yeoman service in teaching thrift. When I tell you that in April, 1919, the total bank deposits in the Dominion of Canada, a country with a population of 8,500,000, in the throes of industrial and commercial readjustment at the close of a five-year war, were $1,730,600,000, or approximately $203 for every man, woman and child in the country, or $159,410,000 more than they were a year before, you can see why Canadian bankers to-day believe that advertising gets business. True, some of the increase in Canadian thrift is due to government thrift publicity, but a great part is due to the work done by the Canadian banks."

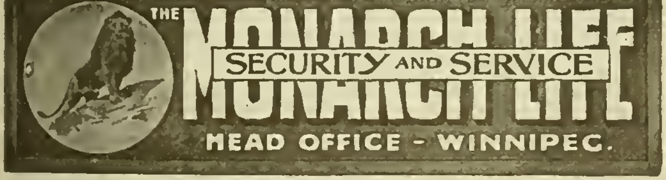
LARGE ORDER FROM GREECE

The Canadian Trade Commission in London has announced a new order from Greece for $25,000,000 worth of Canadian manufactures. Two items on the list are 420,000 yards of frieze and 420,000 yards of serge. The Canadian Manufacturers Association is placing these orders in Ontario and Quebec. An order of $25,000,000 from Rumania for clothing, paint, roofing, agricultural implements, etc., has already been filled in Canadian factories.

While the commission is a government body it is self-supporting. It makes a charge of one per cent. on all orders it secures for Canadian firms. Since its inauguration last January, around $100,000,000 worth of orders has been obtained for Canada from countries in Europe outside the United Kingdom. This means that the commission has made $1,000,000 to date, so that it is not only self-supporting, but will be able to turn quite a substantial sum back to the government after the salaries of the staff and other expenses are met. The members of the commission are Sir Charles Gordon, of Montreal, head of the Dominion Textile Co., chairman; R. D. Fairbairn, of Toronto, and H. B. Thompson, of Vancouver, who was formerly head of the government food board.

RELIEF FOR SASKATCHEWAN FARMERS

A convention of Saskatchewan municipalities interested in the question of providing relief for farmers whose crops have been dried out this year is being held in Swift Current to-day, September 12th. The convention is called for the purpose of discussing methods to be adopted in ameliorating the conditions of those who require assistance to tide them over the coming winter. It is generally admitted that the relief given in 1914 was abused in some cases and some method will have to be devised that will safeguard the government from any imposition. Some uniform and systematic method of administration must be evolved which will provide for relief where it is really needed and yet eliminate opportunities for imposition.



LIFE INSURANCE SALESMEN

Seeking to improve their positions, should get in touch with the undersigned **The Continental Life's** business increased by over 50 per cent. during the first five months of this year, compared with 1918. This Company issues all the desirable forms of policies, and has attractive openings for good, live agents of sterling character. Every assistance given to new men. INVESTMENTS AND THE MARKET

Canada Bread President is Optimistic—Quebec Railway Statement is Good—Montreal Will Appeal Tramways Decision

Stocks have this week recovered somewhat from their recent depression, but trading in listed shares has not been heavy. In their weekly comment on the unlisted securities market, A. J. Pattison, Jr., and Co. say: "The feature of the last seven days' trading has been the excellent demand for unlisted bank shares, particularly Home Bank. The enquiry seems to be quite general, and orders have been difficult to fill, even at the advanced prices. Early in the week transactions took place around $92.75 and $93, gradually advancing. At the close of the week there were transactions at $95.50. Sterling Bank has worked up to $105 bid, at which figure there appears to be little or no stock offered. Unlisted bonds are quiet and slightly easier in price. All indications point to an active market this fall."

Canadian Cottons, Ltd.—The company has sold to the Dominion Textile Co., Ltd., lots in the parish of Montreal, with buildings (manufacture, etc.), thereon erected, and fronting St. Patrice St., for $2,375,270.

Dome Lake Mining Co.—Shareholders of the company have ratified, practically without discussion, a by-law passed by the directors a few weeks ago, empowering them to borrow money from time to time on debentures. Money raised in this way will be for the development of the property and the taking care of the company's general business.

Trinidad Electric Co., Ltd.—The following is a statement of the earnings of the company for July, 1919:—

	Gross.	Net.
Railroad	$17,318	$4,945
Light and power	12,128	1,974
Ice and refrigeration	5,447	1,858
Total		$8,779

Canada Bread Co.—The annual meeting of the company was held last week in Toronto. President Mark Bredin was optimistic as to the future. He pointed to the difficulties caused by the labor unrest and the increasing of men's wages that had been necessary, and referred to the bread war last spring, but expressed his opinion that all was righting itself, and a favorable future was looked for. Shareholders adopted the annual report, an outline of which was given in these columns recently. The former directors were re-elected as follows:—Mark Bredin, president; F. H. Phippen, K.C., vice-president; George Weston, H. C. Tomlin, W. J. Boyd, Alfred Johnston, Malcolm Stobie.

Boundary Mining and Exploration Co.—At a recent meeting at Cranbrook, B.C., shareholders authorized the board of directors to issue debentures with which to provide funds for development work. At this meeting, James Finch, of Medicine Hat, was elected president, and E. B. Sawyer, of Spokane, was elected vice-president. A substantial portion of the issue, it is expected, will be taken up by the shareholders. The property which is under development is a coal prospect situated about two miles west of Midway, B.C., the seam having a general width, where exposed, of from four to eight feet. Development has taken the shape of two tunnels, one 400 feet long and the other about 200 feet.

Universal Tool Steel Co.—The annual report for the year ended December 31st, 1918, shows gross profits on shell-making of $540,876, and a loss on bolt-making of $30,146. The net income for the year was $278,382. A dividend of 2 per cent. on common stock absorbed $189,824, while dividend on preferred, amounting to $6,000, was paid. The common stock outstanding is $9,500,000, and preferred $100,000. The company was busy on munitions-making practically to the end of last year, when, on the contracts being completed, the plant was closed down. Since then some progress has been made in connection with a bolt which, it is hoped, will find a market with railways and shipbuilding concerns. Sir Donald Mann is president of the company, and Sir William Mackenzie is also associated with it.

Windsor, Essex and Lake Shore Rapid Railway Co.—Notice is given in the Canada Gazette calling the shareholders of the company to a special general meeting, to be held on September 22nd next. The meeting is for the consideration and confirmation of the report of the directors of the company, with the accompanying financial statements, and the confirmation of the adjustment of certain of the assets and the adjustment and settlement of certain of the liabilities of the company and the other financial arrangements recommended by the directors, confirmation of the by-laws amending the present general and special by-laws of the company, and presenting the duties of the officers of the company, and reducing the number of directors to five and fixing their remuneration, and the election of directors and auditors of the company.

Bell Telephone Co.—The city of Toronto has prepared its case against the company's increase in rates, and appeal will be made to the Governor-General-in-Council.

The city submits that the increases granted by the board should be rescinded, (1) because obviously no emergency exists; (2) because errors of calculation made by the board vitiate its conclusions, and (3) because the judgment is not founded on the evidence submitted.

It is stated that the relief granted by the Railway Board is expressly based on the hypothesis that it was to meet an emergency. All parties agreed that insufficient evidence was before the board to enable it to fix permanent rates, but the company urged that wages and cost of materials made it impossible to wait. The city claims that the financial position of the company, as disclosed by its own statements, entirely controverts this. The city calls special attention to $2,648,760 set apart for depreciation, and claims that this is not based on experience, but is an entirely arbitrary amount, which is far too high. On the 1918 operations the company had a cash balance of $4,753,449.

The main ground of the judgment of the board was that the company would require in 1919 about $1,500,000 above 1918 requirements to meet wage increases, but 25 per cent. of this, or $366,000 of the annual wage increase, was absorbed in 1918, and yet the company had a substantial surplus. The city points out that no account was taken of dividends from outside investments, which in 1918 amounted to $238,526, and objection is made to the inclusion of the items of war relief and influenza relief on two grounds, that they are exceptional and non-recurring, and that they are properly chargeable to the contingent reserve. If these items are deducted, the cash balance, after paying capital commitments, will be $2,529,341, or enough to pay the depreciation of 5.7 per cent. which the board have allowed as proper to leave a surplus of $146,257. Immediately after the delivery of the judgment, the company announced an issue of $4,500,000 capital stock at par to its shareholders, although its stock, even through the depression engendered by the war, never sold under 130. The city submits that such bonuses to stockholders should not be permitted.

Quebec Railway Light, Heat and Power Co., Ltd.—The annual financial statement of the company, presented to the shareholders at the annual meeting this week, shows that gross earnings from operations for the year which ended June 30th last, were $2,077,631, as compared with $1,797,853 in the same period of last year, an increase of $279,768. Operating and maintenance expenses, however, were at a considerable increase, and this left a net operating revenue of $636,105, compared with $562,128, an increase of $70,977. After adding miscellaneous income of $27,723 (which does not include earnings on Quebec and Saguenay Railway securities), and deducting fixed charges, taxes, depreciation on cars, etc., of $726,102, there remains a deficit of $65,274,

Actual Experience

The Ontario Temperance Act is Emptying Ontario's Jails

Jail Commitments Before and After Passage of the Act.

ALL CRIMES	DRUNKENNESS
1915—20,337	**1915—6,235**
1918—13,242	**1918—2,595**

From Annual Reports of Inspectors of Prisons 1915 and 1918, and Schedule H. Report of the Board of License Commissioners for Ontario for the year 1918.

ONTARIO'S experience with prohibition under the Ontario Temperance Act since September 16, 1916, has been all the argument any fair-minded man or woman wants, to prove that the Act should neither be repealed nor weakened by Amendments.

Jail Commitments for crimes and offences of all kinds have decreased more than one-third since 1915.

Jail Commitments for drunkenness alone decreased from 6,235 in 1915, the year preceding the Act, to 2,595 in 1918.

Jail Commitments for drunkenness decreased despite the fact that the Act makes drunkenness in public places a "prima facie" offence, punishable by fine or imprisonment, whether accompanied by "disorderliness" or not. A drunken man on the street has become a rare sight.

The number of commitments for drunkenness in Ontario in 1918 was the lowest in seventeen years, although the population of the Province increased by over 500,000.

Some jails received no drunkards in 1918 at all. Others show well nigh unbelievable decreases, notably in the cities and larger towns.

Do you want to see the taste for alcoholic beverages revived, and the population of Ontario's prisons, jails and lock-ups restored ?

If you are convinced that drunkenness is undesirable in this Province mark X in the "No" column after each question.

"No!"—Four Times—"No!"

Each and every one of the four questions on the ballot paper in this Referendum must be answered or your ballot is "spoiled." And unless you mark X after each question in the "No" column, the Ontario Temperance Act will be spoiled, and years of Temperance progress lost.

Ontario Referendum Committee

which leaves a balance at credit of profit and loss account of $682,461.

Turning to the balance sheet, total current assets amount to $1,410,529 as compared with $1,001,821 in 1918, while total current liabilities amount to $2,565,436 as compared with $2,335,223 in 1918 This leaves a surplus of current liabilities over current assets of $1,154,907 as compared with a similar surplus of $1,330,399 in 1918. Cash is up from $97,037 in 1918 to $247,762, accounts and bills receivable up from $676,208 to $897,360.

Three new names were placed on the board of directors, these succeeding three retirements. Those who were newly elected to the board were Senator Jules Tessier, Quebec; J. N. Greenshields, K.C., and C. G. Greenshields, both of Montreal. Those who retired from the board were L. G. Morin, J. T. Donohue and Charles Donohue.

Montreal Tramways Co.—The city will appeal against the decision of the Montreal Tramways Commission fixing the new schedule of fares which were to have gone in force next week. This decision was arrived at by the administrative commission on September 8th. The appeal will be to the Quebec Public Utilities Commission. The lines of the appeal have not yet been definitely decided upon, being so far of a general character, but it is understood that the contention will be made that the estimate of expenditure made by the commission is one that can be considerably curtailed, especially in view of the fact that within the last few months there has been a considerable curtailment of the number of cars in use, and, consequently, fewer employees engaged.

The action of the city commissioners will result in the holding up of the new fares, and the existing tickets and prices will therefore remain in effect until such time as the commission makes its award and the necessary eight days' public notice of the change be given.

RECENT FIRES

Many Buildings Burnt, But Damage Not Large—Insurance Loss is Light

Canton, Ont.—September 8—Implement sheds of the Bickle Bros., were destroyed. Cause thought to be from the shooting of a sparrow on the roof of the building. The loss will be heavy, several thousand dollars' worth having been stored.

Chatham, Ont.—September 11—The Springs Building of the Dowsley Spring and Axle Works was destroyed. Estimated loss, $50,000.

Fredericton, N.B.—September 4—Two barns on Shore St., and an adjoining residence were damaged. Estimated loss, $1,000, fully covered by insurance. Mr. Geo. Bell and James Gough are the losers.

Gatineau Point, Que.—September 1—Harbeck's hotel was destroyed. The property was valued at over $3,000, and only $800 was carried in insurance.

Harrow, Ont.—September 1—Outbuildings and year's crop on the farm of Herbert Ferris were destroyed. Only a small amount of insurance was carried.

Hamilton, Ont.—September 3—Dwelling and garage on Catherine St. North, and dwelling at 97 Macaulay St., were damaged. Estimated loss, $500.

Halifax, N.S.—September 7—Stable, sixty tons of hay and two carloads of oats, were destroyed at the Exhibition Grounds. Estimated loss, $12,000.

London, Ont.—September 4—Piggery buildings on the farm of the Ontario Hospital for the Insane were destroyed. Estimated loss, $8,000.

Moose Horn, Man.—September 11—Half the village was destroyed by fire. Cause, explosion of gasoline lamp in local creamery. Estimated loss, $100,000.

Newmarket, Ont.—September 7—Barn and contents of Fred Williams of the 2nd Concession were destroyed. Cause, spark from thrashing machine. Estimated loss, $5,000.

New Toronto, Ont.—September 10—N. Goiwreles' grocery and three dwellings were damaged. The total loss will exceed $7,000, which is the amount of insurance carried.

Parkbeg, Sask.—September 4—The hotel, post office and postmaster's residence were destroyed. Cause, hot ashes. Estimated loss, $9,000.

Plympton, Ont.—September 5—Residence of N. Osborne, Lot 12, Concession 2, was destroyed. Estimated loss, $1,000, partly covered by insurance.

St. Catharines, Ont.—September 5—Home of Mrs. Taylor was destroyed. Cause, fire from lighted oil stove. Estimated loss, $1,500.

Sussex, N.B.—September 5—The old Col. Beer homestead, situated near the Sussex bridge, was destroyed.

Toronto, Ont.—September 4—Elevator shaft in the plant of the Sheet Metal Products Co., River St., was damaged. Estimated loss, $200.

September 8—Dwelling at 46 Murray St., was destroyed. Estimated loss, $1,300. Cause reported to be incendiarism.

September 10—Imperial Varnish Works were damaged. Cause, pot of varnish boiling over. Estimated loss, $800. Motor car of W. Warwick ignited at the corner of Church and Carlton Streets. Estimated loss, $400. Building at 277 Queen St. W., was damaged. Estimated loss, $200.

Vancouver, B.C.—September 3—The Libert Store on Hastings Street was damaged. Estimated loss, $10,000.

Woodside, N.S.—September 5—Plant of the Imperial Oil, Ltd., was damaged.

Woodstock, Ont.—September 7—Barn on the premises of T. H. Ayers, 206 Dundas St., was damaged. Loss partly covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES

Ontario.—In the Public Service Bulletin for July, 1919, the summary of fires for the first six months of the year is given. Although for the month of June an increase in loss is shown over the five preceding months, a large decrease is shown for the six months of 1919 over those of last year. The following is the summary for the six months: No. of fires, 4,856; loss, $4,455,968; insurance loss, $3,256,447; loss not covered by insurance, $1,199,521.

Campbellton, N.B.—August 23—According to a statement issued by H. W. Frink, of R. W. W. Frink and Son, appraiser of the recent fire in the business section, the loss is placed at $46,580. This loss is covered by insurance to the extent of $25,300 as follows: Sun, $4,760; Occidental, $3,500; Royal, $2,750; Royal Exchange, $2,750; Palatine, $2,520; New York Underwriters, $2,000; Imperial Underwriters, $2,000; Atlas, $1,050; Canada Accident, $1,000; L'Union, $700; Union, $500; Law, Union and Rock, $500; Guardian, $375; Northern, $300; North British and Mercantile, $250; Norwich Union, $210; British Colonial, $100; National Union, $40.

Montreal, Que.—August 26—The lumber yards of J. P. Belladeau, at the corner of Ontario and Parthenais Streets, were damaged. Estimated loss, $25,000. Insurance to the amount of $55,000 carried as follows: North America, $28,000; Providence Washington, $4,000; Alliance of Philadelphia, $4,000; North British and Mercantile, $4,000; National of Paris, $2,000; Mount Royal, $13,000.

Vancouver, B.C.—The following is the report as submitted by the fire chief for the month of July: The total estimated loss by fire, $8,427, of which amount $4,076 was covered by insurance, leaving the property loss above insurance at $4,351. The total value of the property involved was $1,575,556.

Vancouver, B.C.—August 11—Frame building and all machinery of mop manufacturing company, the Dust Control Co., were destroyed. Estimated loss, $12,000. No insurance carried.

A report from Chief Inspector Naud, of the Montreal Fire Department, shows that there were 61,229 buildings inspected by him during the first six months of the current year. Of this number in 2,418 cases the methods of prevention suggested by the inspectors have been acted upon by the owners of the buildings. There were sixteen cases in which building proprietors refused to take the required measures of prevention against fire, and measures were taken to compel them to comply with the regulations.

Third Victory War Loan Organization

Organization of 2nd Victory Loan will be Duplicated—Dominion Executive Committee with Special Dominion Committees—Provincial Committee in charge of each Province, with other Special Committees Canvassers to be appointed by each Province

AS the coming domestic war loan is to be the last of its kind in Canada, and as the amount of money required is not as great as in the case of either of the other Victory loans, the organization built up for handling the two previous loans will be utilized with very few changes. This organization was the result of the experience gained in the earlier loans and in view of the phenomenal success of the second Victory Loan, and the comparatively low cost of raising it, there is no doubt but that it was effective.

This year, as last, there will be a Dominion Executive Committee in charge of the entire campaign. This committee must of course be appointed by the Dominion government, through the Department of Finance. Last year there were about forty-five members, but this year the number is increased to around seventy-five in order to make it more thoroughly representative of all classes of people and of all geographical sections of Canada. A meeting of this committee was held in Ottawa on August 1st, at which the coming loan was thoroughly discussed. It is not certain yet whether a second meeting will be necessary. The personnel of this committee is practically complete, but the names have not as yet been announced by the government. In addition to this Dominion Executive and subject to it, there will, as last year, be four national special committees. These are the Dominion Administration & Finance Committee, the Dominion Special Subscriptions Committee, the Dominion Publicity Committee and the Dominion Business Committee. Co-ordinate with this national organization, the Canadian Press Association will distribute suitable reading matter to the newspapers and trade journals of Canada.

E. R. Wood,
Chairman, Dominion Executive Committee

In each province there will be a Provincial Executive Committee and special committees corresponding to those for the Dominion. Quebec province will, as last year, be divided into two parts—namely, Montreal, and Quebec province outside of Montreal, each of which will have a provincial form of organization. Business communication between Dominion Special Committees and corresponding Provincial Special Committees will pass through the Provincial Executives.

The number of canvassers required, will be for each province to determine. This will, of course, depend upon the terms of the loan, as each Provincial Executive will wish to be certain of attaining its proportion. The arrangement with the banks is to be the same as last year.

The membership of the various committees is not yet announced. The principal officers, however, are as follows: Dominion Executive Committee, E. R. Wood (chairman), J. H. Gundy, Sir Augustus Nanton and J. M. Mackie (vice-chairmen), W. R. Fleming (secretary); Dominion Administration and Finance Committee, 53 King St. West, Toronto, A. E. Ames (chairman), E. Hanson (vice-chairman), C. E. Abbs (secretary), A. H. B. Mackenzie (treasurer); Dominion Special Subscriptions Committee, 12 King St. West, Toronto, J. H. Gundy (chairman), P. P. Cowans (vice-chairman), R. A. Daly (secretary); Dominion Publicity Committee, 20 Victoria St., Toronto, W. N. McIlwraith (chairman), E. M. Emory (vice-chairman), C. H. Rankin, (secretary); Dominion Business Committee, 26 King St. East, Toronto, W. S. Hodgens (chairman), C. W. Fleming (secretary).

A. E. Ames,
Chairman, Dominion Administration and Finance Committee

Publicity Work Started Already

A general meeting of the Dominion Publicity Committee was held in Toronto on September 11th. This meeting was attended by Sir Henry Drayton, minister of finance, E. R. Wood, chairman of the Dominion Executive Committee, and by W. J. Taylor, president of the Dominion Press News and

Features Committee, in addition to the officers of the Dominion Publicity Committee.

Sir Henry Drayton emphasized the necessity for the loan for the purpose of meeting Canada's war obligations, and to establish credits in Canada in order to preserve the industrial and agricultural life of the country. He was confident that the loan would be heavily subscribed, and that for the purpose of raising it there would be no political or provincial lines in the Dominion. He praised the campaign organizers for their efforts in previous loans and was confident that with an organization this year similar to those of other campaigns, the loan would be a success. E. R. Wood referred to the fact that there were patriotic as well as business reasons why everyone should subscribe to the Victory loan, 1919. He assured Sir Henry that when the campaign closed, it would be as big a success as previous loans, and expressed the opinion that with the organization that was being perfected, the loan could not help but be a success. W. J. Taylor referred to the advertising and publicity campaigns being carried on in the newspapers with the co-operation of the Canadian Press Association. The organization was explained, and he was confident that the press of the country could be relied upon in supporting the Victory loan this year as it had in the past.

J. H. Gundy,
Chairman, Dominion Special Subscriptions Committee

W. S. Hodgens,
Chairman, Dominion Business Committee

Alberta

Owing to the poor crops in many parts of the west, the quotas of the prairie provinces may be less proportionally this year. Confidence is expressed, however, in their ability to subscribe large sums again this year.

A preliminary meeting for southern Alberta was held in Calgary on September 5th, at which William Toole presided. The Hon. C. R. Mitchell was elected provincial chairman, and Edmund Taylor, chairman for southern Alberta. Other officers for southern Alberta are: F. M. Harvey, treasurer; Donald McLean, secretary; E. Willis, chairman of Publicity Committee; and J. H. Woods, chairman of Press Publicity Committee. The General Committee appointed was as follows: Wm. Toole, P. L. Naismith, T. A. Hornibrook, C. P. McQueen, G. A. Robinson, J. B. Sutherland, John R. McFarland, Walter Robie, R. A. Darker, J. W. Davidson, J. L. Hunt, H. L. Kenny, L. W. Roberts, Sydney Kidd, A. McTeer, W. F. W. Lent, G. T. C. Robinson, F. W. Harvey, J. H. Woods, Wm. Davidson, H. W. Wood, Eugene Coste, S. J. Shepherd, W. S. Woods, S. G. Petley, Lieut.-Col. Drummond, Wm. Cousins, Wm. Ardern, P. Burns, A. E. Cross, R. J. Lydiatt, Geo. L. Peet, Edmund Taylor, Ald. Fred White, Geo. F. Tull, F. W. Hess, Hal. Middleton, C. A. Larmour, Dr. M. C. Costello, Dr. A. M. Scott, P. A. Wintemute. This committee will appoint the executive and other special committees.

Plans for the campaign in northern Alberta were prepared at a meeting held in Edmonton on September 4th. The following were elected to the executive committee: Hon. C. R. Mitchell, provincial chairman; James Ramsey, chairman for northern Alberta; H. M. E. Evans, vice-chairman; W. Ross Alger, secretary; S. R. Peden, treasurer; M. J. Hutchison, chairman Publicity Committee; Capt. G. D. Hunt, H. D. Heaney, H. M. Martin, L. A. Darby, F. B. Matthews, E. F. Racey, N. A. Hilburn, K. W. Townshend, M. R. Jennings, appointed from Ottawa. On the finance committee were named: A. E. Serace, G. H. Gowan, A. M. Frith, G. R. Peden, W. Ross Alger.

W. N. McIlwraith,
Chairman, Dominion Publicity Committee

Saskatchewan

Preliminary organization for the forthcoming loan in Saskatchewan was effected at a conference in Regina on September 12th. Hon. C. A. Dunning, provincial treasurer, was elected honorary chairman of the Victory loan committee, and D. M. Balfour, of Regina, chairman. J. O. Hettle, of Saskatoon, and J. H. Kern, of Moose Jaw, were elected vice-chairmen, and S. W. Harris was chosen secretary of the meeting. It was felt that Saskatchewan would have no difficulty in raising its objective of $17,000,000, provided everyone was prepared to get behind the campaign from the first and stay with it until the last available dollar was rounded up. While there was not the stimulus of the war this year to assist the campaigners, it was explained that the need was just as great if Canada was to do its duty to the returned soldiers, and meet its financial obligations.

It was the consensus of opinion that intensive organization should not be carried out in those areas in the province which had been particularly hard hit through drought. It was decided, however, that an opportunity should be given all those in these areas who had means to subscribe to the loan if they wished to do so.

In discussing the loan, Mr. Dunning stated that it was being launched for the purpose of raising $350,000,000. There were several important points touched upon by Hon. Mr. Dunning, relative to the changed position which the country found itself in this year as compared with last, the war being over, and some parts of the province faced with drought. Partly owing to the fact that the war was over, Mr. Dunning felt that the organization could not depend so much this year on voluntary assistance. While it was the desire to utilize voluntary help as much as possible there would have to be more paid officials than there were last year, and this constituted somewhat of a problem.

Manitoba

Similar organization work has been done in Manitoba. J. A. Thompson, of Winnipeg, who has undertaken the supervision of Districts Nos. 1 and 2 in connection with the loan, returned to the city a few days ago, after spending a week in the territory in which he will work. These districts cover an area of over five thousand square miles, and take in such important towns as Pilot Mound, Killarney, Boissevain, Deloraine, Napinka, Melita and Minto. Each one of these towns was visited, and while the crop is exceptionally light, the prospects for the reception of the loan are bright. A feeling amongst some people seems to be that the patriotic spirit has ceased to exist. This, however, is mostly imagination on the part of a few. The majority of the people feel that they have contracted an obligation which must be met, and they will, without question, invest in the loan this year in the same generous way as they did on the two previous occasions.

DANGER OF FREEZING OF SPRINKLERS

The National Fire Prevention Association has issued a pamphlet urging that vigilance be exercised to see that fire appliances do no suffer temporary disability from frost. Automatic sprinkler systems, hydrants and all appliances using water require special care and attention in winter.

WANTS TO TAX GOVERNMENT ROADS

The Alberta government has commenced legal action against the Canadian Northern Railway Co. and the Canadian National Railway Co., as co-defendants, to recover the amount of taxes under the Act to supplement the revenues of the Crown in the province of Alberta for the years 1913 to 1918, both inclusive, and amounting, with interest, approximately $150,000. When this Act was passed exemption was made of lines of railway, whose bonds were guaranteed by the government of the province for a period of 15 years. The Canadian Pacific Railway Co. have been paying taxes on their lines ever since the Act was passed, but the Canadian Northern Railway Co. claimed that it was not required to pay taxes upon the main line from Lloydminster to Edmonton, notwithstanding the fact that this line had never been assisted in any way by the province.

The Dominion Government was notified when taking over the Canadian Northern Railway of this claim for taxes by the province. The province has now commenced action to recover the money and writs have been issued against the Canadian Northern and Canadian National Railway companies.

MANITOBA TAXATION COMMISSION

The Manitoba Taxation Commission is now receiving evidence in various parts of the province, and in Winnipeg, on September 4th, it was urged before it that the provincial supplementary revenue tax of one and one-half mills on the dollar for all assessable property in Manitoba be repealed at the next session of the legislature. The recommendation was made by Reeve C. L. Richardson, as representative of the Winnipeg Suburban Municipal Association, consisting of the rural municipalities of Assiniboia, Charleswood, Fort Garry, East Kildonan, West Kildonan, East St. Vital and the town of Transcona. The association also demanded that the provincial amusements tax should be abolished. They point out that both these measures were adopted owing to the increased cost of operating the government owing to the war. With the greatly increased cost of municipal government they declare that such burdens should be lifted such as provincial supplementary tax.

CROP CONDITIONS THROUGHOUT CANADA

Early Harvest Throughout Canada—Returns in West are Better than Expected

THE detailed crop report of Canadian National Railways for the week ending September 6th, and covering areas served by its lines between Port Arthur and the Rocky Mountains, seem to confirm the more favorable crop reports that have been coming out from various sources in connection with the yield and quality of grain in the prairie provinces. In the central district, in the majority of cases, thrashing is half completed, the delay being due to rain, which covered wide areas. The yield of wheat is said to be higher than previously reported or expected. There seems to be plenty of car space available wherever grain is ready for shipment.

Rain has also delayed thrashing operations in the prairie district. The average yield is not as high as that in the central, but there appears to be generally a better outturn than was expected some weeks ago. Two instances of particularly high wheat yields are at Invermay, 35 to 40 bushels, and Arran, 35 bushels. In the western district farmers are still cutting, and thrashing in many cases has only been begun. There has been some frost, but little or no damage is reported. Where thrashing returns are given the yield runs from 2 to 40 bushels for wheat.

Good Feed Supply in Ontario

A report issued by the Ontario Department of Agriculture, under date of September 16th, says:—

"Fall work generally is still well advanced, although ploughing has slackened somewhat, especially on clay fields, as the land has been getting dry again. Some fall wheat is yet to be sown, but the bulk of the crop has been put in, and much of it is already showing up nicely. Early potatoes are being dug, but the yield is rather light. Late potatoes are still growing, and promise to do better. Roots are now doing fairly well, except turnips, which in several counties are suffering from the attacks of aphis. Corn-cutting is proceeding actively, and, generally speaking, the crop will be a fair one. Silo-filling has begun, and the indications are that nearly all the corn will be well matured and make good silage.

"Pastures generally are only fair, and many farmers are doing some feeding. Norfolk, however, claims that alfalfa is giving good pasture. Market offerings of cattle are about normal, but good, heavy animals are comparatively few. Co-operative shipments, however, show a steady increase. Grade dairy cows are selling at from $110 to $175. Eastern buyers in Peel are paying from $200 to $250 for good, heavy horses. According to the Wentworth representative, hogs have been rushed on the Hamilton market on account of the fall in values. Prices over the province vary from $18 to $19.75 a hundreweight. There is a good supply of hay on hand, but there will be less grain for feeding than last year, and straw will be relatively scarce. Haldimand states that co-operative clubs will engage in the sale of their hay, and are already looking to increasing their supply of concentrate stock feeds. Lincoln claims that more men are going on the farm for winter than in previous years."

CREDIT MEN'S TRUST ASSOCIATION

The fifth annual meeting of the National Council of the Canadian Credit Men's Trust Association was held in Montreal on September 8th. Delegates from all parts of Canada were present. The new Board of Commerce was discussed, and also the formation of a wholesale association, and the position of the middleman in the present system of distribution. The association approved of the Industrial Conference being held in Ottawa.

BANK MANAGERS ON VISIT

Peleg Howland, president; W. Moffit, general manager, and other officers of the Imperial Bank have started on a visit to the Canadian west.

M. C. Hart, assistant general manager of the Bank of Hamilton, has already spent some weeks in the west.

John Galt, president of the Union Bank, is now in England, and H. B. Shaw, the general manager, will sail from Canada on October 2nd.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	3 5-16 pm	4 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.2850	$4.3050	....
Cable transfers	4.2950	4.3150	....

Rates in New York, sterling, demand, opened $4.13¼, closed $4.14½.

Bank of England rate, 5 per cent.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railroads for the first two weeks in September:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
Sept. 7	$3,599,000	$3,053,000	+ $ 546,000
Sept. 14	3,763,000	2,915,000	+ 848,000

Grand Trunk Railway.

Sept. 7	$1,422,955	$1,346,536	+ $ 76,419
Sept. 14	1,647,304	1,415,000	+ 232,304

Canadian National Railway.

Sept. 7	$1,737,454	$1,504,832	+ $ 232,622
Sept. 14	2,017,960	1,593,343	+ 424,617

MANITOBA MAY BUILD RAILWAY

The Manitoba government will be forced to consider the question of the construction of the 72-mile railway north of The Pas, required for the development of the mining area in northern Manitoba if the work is not undertaken by the Dominion authorities, was the statement of Hon. Edward Brown, provincial treasurer, on September 13th. Mr. Brown said that members of the provincial cabinet recognized the necessity of such a railroad to enable the mines to operate, but he declared that the building of the railroad was up to the Dominion government. The resources were still in the hands of the Dominion, and the Canadian National Railway was the nearest line to the mines. It would be easy for the Canadian National Railway, said the minister, to construct a 72-mile line.

The Canadian Pacific Railway, it was stated, proposed to erect a line running to The Pas and the mine fields. It would be several years, however, before this was completed, Mr. Brown said. He declared that the mines were of such immense value to Canada and the province that a railroad was essential. It was clearly the duty of the federal government to act, and quickly.

RAILWAY BOARD SESSIONS

The Board of Railway Commissioners for Canada began their regular traffic sittings on September 16th, to be held throughout the season in Ottawa, the first and third Tuesdays of each month. Hon. F. B. Carvell, recently appointed to the chairmanship, presided for the first time.

NORTH EMPIRE FIRE INSURANCE COMPANY

A notice in the Canada Gazette states that the North Empire Fire Insurance Co. will apply to the Dominion parliament at its next session for an Act to validate the issue of shares exchanged for shares of the Canada West Fire Insurance Co. The company also asks for a declaration that in respect to this transaction it has complied with legislative requirements, and thereby is empowered to write explosion, inland transportation, sprinkler leakage, hail, automobile, plate glass, burglary and theft, steam boiler, tornado, cyclone and weather insurance.

ASSOCIATION OF CHARTERED ACCOUNTANTS

The 1919 annual convention of the Dominion Association of Chartered Accountants was held in Winnipeg, September 17th to 19th, having been postponed from the dates originally fixed, September 9th to 11th The president, John Parton, of the Winnipeg firm of Webb, Read and Hegan, presided. Lieutenant-Governor Sir James Aikins welcomed the visitors, who numbered about 100. Special features of the convention were addresses by J. W. Dafoe, editor of the Manitoba Free Press, on "Pressing Questions of the Day," and by J. H. Evans, Deputy Minister of Agriculture for the province, on "Agriculture as a Western Industry." The usual business programme was carried out.

MANITOBA INCORPORATION FEES RAISED

The Manitoba government passed an order-in-council a few days ago increasing the tariff for the issue of letters patent for the incorporation of joint stock companies. The following is the new tariff now in effect:—

$ 20,000	$ 40	$ 250,000	$160
30,000	50	300,000	170
40,000	60	400,000	180
50,000	70	500,000	200
60,000	80	600,000	210
70,000	100	700,000	220
100,000	120	800,000	230
125,000	130	900,000	240
150,000	140	1,000,000	250
200,000	150		

After this amount $20 for each additional $100,000.

OBITUARY

Mr. William Cromwell Gurney, president of the Gurney Foundry Company, died of heart failure this week in Toronto at the home of Dr. Goldsmith.

The Times, of Toronto, formerly the News, ceased publication on September 12th. The company was capitalized at $500,000. The company's application for a winding-up order has been granted, and G. T. Clarkson appointed liquidator.

The financial centre of the United States will be shifted to St. Louis during the week of September 29, when more than 4,000 financiers, representing many billions of dollars and 20,000 banks, will gather in that city to participate in the forty-fifth annual convention of the American Bankers' Association. A total attendance of about 5,000 is expected.

GREAT BRITAIN'S OUTLOOK

An optimistic view of the future for Great Britain, in trade and finance, was taken by Sir Charles Hanson, in an address before the Montreal Board of Trade on September 16th. This was his last public appearance in Canada. Sir Charles Hanson is an ardent imperialist and a strong believer in preferential trade within the empire. As to finances, Sir Charles said that Britain's debt had reached figures where millionaires only could imagine what it meant, with a total debt of some forty billions of dollars, although the net debt was much less, being set off by loans to the allies and dominions. The resources of the country are still very great, because the great proportion of this debt was in the way of domestic loans, and so still owned in the country. A further strength of the empire was the manner in which the dominions had been strengthening themselves by following that example of domestic loans, in which connection he referred to the success of Canada's past Victory loans, and prognosticated a similar success for the forthcoming final loan.

Regarding the labor situation in Great Britain, Sir Charles said that it was undoubtedly serious, but he had been surprised at the general impression he had encountered here that the labor situation was so bad in England that the country was going to the dogs. This idea he earnestly combatted, declaring that there was plenty of sane opinion in Great Britain to meet the situation and pilot the country safely through, while he, with many others, sympathized with the efforts of the labor element to secure better wages and conditions. As to these problems, he declared that the British people are facing them as they arose, and would face them, as they had faced other problems before, until they are worked out to a satisfactory conclusion. There never was a time, he said, when the manufacturers of Great Britain had so keenly risen to the national needs, nor when the great banking concerns and financial corporations were so awake to the necessities of the future, with a determination to see that the country came safely through the troubled times. As to the proposition for nationalization of mines, Sir Charles strongly opposed it, declaring that this would mean the nationalization of the transportation systems, the shipping, and eventually all the key industries of the country. "This would be impossible," he emphatically declared, "and I am convinced that Great Britain will not have it."

COMPETITION ASSURES THE REWARD OF CAPITAL

The government of the state of North Dakota some time ago passed into the hands of socialistic influences, and after a campaign hostile to the rights of investors, an actual exodus of capital is being experienced. A recent visitor to Saskatchewan, Jerome M. Wheeler, president of the Capital Trust and Savings Bank of St. Paul, Minn., stated that as a result of legislation of this kind, this bank is retiring entirely from North Dakota and will seek an outlet in Saskatchewan for funds formerly invested in that state. An office will probably be opened in Regina or in Moose Jaw.

Capital does not recognize international boundaries, and naturally goes to countries where the prospects are most secure, and where the best returns are expected. Recognizing this essential principle, and the fact that Canada will remain a borrowing country for some time to come, our treatment of investors who have registered their faith in Canada should be equitable, and our legislation must admit of attractive opportunities for funds in the future.

LIMITS TO INDUSTRIAL CONTROL

The newly created Board of Commerce is making a noisy attempt at restricting and controlling prices but thus far no settled policy has been apparent. At one time the statement was made that the profits on commodities would be fixed, while again it was stated that maximum prices would be fixed beyond which it would be illegal to make sales. Apparently the attention of the board will be directed to any kind of article, regardless of the conditions under which it is placed upon the market. Such an indescriminate policy can have only one result, and that is that the board will be reduced to a gigantic farce, like the recent Cost of Living Committee of the House of Commons, which aimed at much but accomplished nothing in the way of direct results.

When competition prevails throughout every stage in the production of a commodity, nothing can be gained by any attempt at regulation; it is towards the discovery and disbanding of combines that the board should concentrate its efforts. If it is found that the public interest will be better served by a continuation of the combination, under the regulation of the board, an equally useful purpose will be served. There has for some time past been lacking in Canada, executive machinery such as this to investigate cases of alleged combination, and to deal with them when found.

The high prices prevailing in the foreign markets for food and other essential commodities have produced much talk of embargos on export. The heavy interest obligations which Canada must meet abroad every year, must, however, be paid in the form of goods. The Canadian farmer and producers of other primary commodities are entitled to the prices ruling in the markets of the world.

PROVINCIAL UNIONS OF MUNICIPALITIES

WHILE the Union of Canadian Municipalities is a singularly inactive body, the provincial unions which now exist in practically all of the provinces do effective work for their members. The reason probably is that the problems of keenest interest are the result of legislation on the part of the respective provinces. Such a provincial union can very effectively co-ordinate and present the views of municipalities on assessment, taxation and other laws, and on the rights of the municipalities as affected by public utility and industrial corporations. Another excellent field is open in the formation of agreements as to what concessions should be extended to industry, to eliminate the reckless competition now being carried on.

Quebec still lacks such a provincial union, but during the past year steps have been taken to organize one. Co-incident with this movement was the inauguration of a Department of Municipal Affairs about a year ago, with Oscar Morin as Deputy Minister. This department is taking the lead in the organization of a union, and a meeting of municipal representatives was held in Montreal on September 18th, where the plans were discussed. With the exception of a few leading cities there are no municipalities in Quebec sufficiently large to maintain adequate municipal staffs, and to these a good Department of Municipal Affairs and an active union can be of much assistance. The expense of the union, when apportioned among the members, is small in comparison with the benefits derived. The work of the union is especially valuable to the provincial government, in serving as a guide to wise municipal legislation.

PRIVATE COMPANIES TO RESUME SHIPPING

AMONG the many fields in which public ownership and control advanced during the war period, shipping is one of the most important. Under the stress of a great scarcity of ocean tonnage, the belligerent nations not only took over many ships from private hands, but also set out on building programs on their own account. The use of vessels for purposes connected with the war has now practically ceased, and the most economical means of returning the business to the private companies is being looked for. This is emphasized by P. A. S. Franklin, president of the International Mercantile Marine, who has just returned from Europe. "The British and other European governments" he said in an interview, "are realizing that the private steamship lines can operate vessels more profitably and expeditiously in every way than the governments can do, and I hope that our government will see it, too, so that we can keep the position America has won for herself after so many years' struggling."

The Canadian government also finds itself with a large number of vessels on hand, and a building program still uncompleted. As the costs in both cases are abnormally high, capital charges will be heavy. Competition is bound to prevail in ocean shipping, however, and with the prospect of a surplus of tonnage the Canadian people can look forward to meeting an annual deficit on this account. It would be much safer if these assets, while they are still in good condition, and can command a high price, were to be disposed of, even if some loss were to be incurred.

The Canadian parliament is holding an "indemnity session," a fitting acknowledgment of the "more pay and less work" movement.

* * *

One year after entering a claim for property lost in the U. S. parcel post system, the owner received a reply stating that the claim had been allowed, but that there was no money available to pay the amount ($25). The U. S. Post Office is insuring parcel post packages, but evidently sometimes has no funds to meet claims.

* * * * *

Within the walls of the Canadian protective tariff a textile industry employing 40,000 hands has been built up. In this as in other lines of manufacture, our economic position can be strengthened by impressing upon the employees the basis upon which their livelihood depends.

* * *

The Board of Commerce has announced that it will fix profits on all kinds of commodities. Judging from the applause with which this announcement has been received in various quarters, it is regarded more as an assurance of adequate profits, than as a threat to cut them down. In fact, if the board proceeds to penalize successful industry it will also have to bonus the failures, to the disadvantage of the consumers on the one hand, and of the public revenue on the other.

* * * * *

The movement for a still more popular form of government, such as control by the labor or agrarian party, which is now in evidence in democratic countries, cannot but result in radical political changes. The immediate effects will no doubt be for the worse; nevertheless it must be remembered that it is by such movements that democracy has been achieved, and the force of circumstances has in each case eliminated those elements which were fundamentally unsound, leaving a structure resting upon a continuously broader and firmer basis.

* * * * *

Failing to pass the "Sale of Shares Act," which was planned at the last session, the Ontario government announces that it will from now on strictly enforce the provisions in the Companies Act dealing with stock issues. The earlier adoption of this policy, rather than the attempt to rush through a dangerous bill before the public had had due opportunity to consider it, would have been well advised. The announcement of the attorney-general made on September 5th, was:—"The Department of the Provincial Secretary proposes from this date on to carefully scrutinize all advertisements of stock and bond offerings, and it is proposed to prosecute all companies and individuals who fail to comply with the requirements of the Ontario Companies Act. In the past there have been many legitimate offerings of stocks and bonds, but with failure to comply with the provisions of the act as to filing a prospectus and giving information in all advertisements, as required by the act. The public may accept this as notice that not only oil companies, but all others offering stocks and bonds, must take the risk of prosecution unless they comply strictly with the law. Newspapers are liable to prosecution for publishing such advertisements in violation of the law."

National Industrial Conference at Ottawa

Desirability of Uniform Provincial Labor Laws — Industrial Competition and High Prices are Obstacles to Shorter Hours — Application of Whitley Scheme in Canada

THE National Industrial Conference opened at Ottawa on September 15th. The three groups in attendance are representative of employers, of employees, and of the public; the last mentioned group includes government officials, representatives of the Great War Veterans Association, etc. Some of the delegates had arrived in Ottawa on September 13th, and spent the week end in conference with other representatives of their group. The attendance is about 200, and the expenses are met by the Dominion government, which pays each delegate $10 per day and expenses.

At the first meeting on Monday committees on the following subjects were appointed: Consideration of labor features of the Peace Treaty; unifying and co-ordinating the existing labor laws of the Dominion parliament and provincial legislatures and consideration of any new labor laws which are deemed necessary; consideration of recommendations of Royal Commission on Industrial Relations concerning hours of labor; consideration of minimum wage law; consideration of (a) employees' rights to organize, (b) recognition of labor unions, and the right of employees to collective bargaining; consideration of recommendations of Royal Commission on Industrial Relations in favor of establishment of a bureau to promote the establishment of and development of joint industrial councils; consideration of the recommendations of the Royal Commission on Industrial Relations that the finding of committee be put into effect in all works controlled by the government where the principles of democratic management can be applied; consideration of resolutions relating to any other features of the report of the Royal Commission on Industrial Relations; consideration of any other proposals which may be introduced bearing on the relations of employers and employees. Each committee is representative of all three groups.

The conference is presided over by Senator Gideon Robertson, Minister of Labor. Premier Borden was ill at the time it opened, but a message from him was read, which was in part as follows:—

"In common with every nation in the world, the Canadian people are called upon to meet new and untried conditions surrounded with difficulties not less grave and complex than those which we encountered at the outbreak of war and during its continuance. Canada, in the extent and variety of her resources and in the energy, persistence and initiative of her people, is more thoroughly equipped for meeting these difficulties than most nations. The first great essential is to keep constantly in our minds a thorough realization of actual conditions and of the needs by which they are attended. The second and not less vital essential is to bring to bear upon the problems of peace, the unity of purpose and of action, the persistence and determination, in short, the national spirit, which maintained our effort throughout the war.

Interest Must be Paid by Exports

"For half a century or more Canada has been a great borrowing country. Enormous sums, chiefly borrowed in the London market, have been brought into this country not only by the federal, provincial and municipal authorities, but by industrial and commercial institutions. The interest on these borrowings constitutes a heavy charge upon our future which can only be met by constantly increasing production of all commodities for which we can find a profitable sale in the markets of the world.

"Five years ago the interest charge upon the federal debt of Canada was less than $13,000,000. During the coming fiscal year the interest payable on our federal debt will be at least $115,000,000. In addition there will be for many years to come an annual charge of from thirty to forty million dollars to provide pensions for our gallant soldiers and for the dependents of those who have fallen. Owing largely to the increased cost of operation on this continent, our extensive system of national railways will confront us with considerable deficits for an indefinite period, and, if our railways are to be maintained and developed in any reasonable proportion to the needs of the people, a heavy capital expenditure will be necessary within a very short time. One grave governmental problem is to find such means of raising the enormous sums annually required for meeting these charges and for carrying on the ordinary administration of public affairs as will not drive away capital, restrict industry or hinder development. For many years before the war there had been an adverse balance of trade against Canada. During the war this condition was absolutely reversed, but the change was due in no small measure to the enormous production and exportation of munitions of war, and to the higher prices obtained for our grain foodstuffs and other exports. Unless there is largely increased production accomplished under such conditions as will enable us to compete in the world's markets there is serious danger of an unfortunate return to pre-war conditions. There should be no such outcome, for we have at hand, and in abundance, the raw materials upon which a great industrial development should be securely based.

Rights and Duties on Both Sides

"Here, as elsewhere, there has been conflict between capital and labor, with the inevitable consequence that production has been checked and development hindered. In many cases the results of such conflict were inconclusive, and the struggle was merely postponed until one of the parties selected what it deemed a favorable opportunity for renewing it. The lockout and the strike have been in too frequent evidence, and too often there has been reluctance or refusal to compose difficulties by more reasonable methods.

"Questions touching the welfare of the laboring populations of the world were under attentive consideration during the Peace Conference, and the Peace Treaty set forth conclusions and recommendations which have already been made public, and which will be commended to your attention during this conference. The Peace Conference also affirmed that war is no longer to be regarded as a recognized method of settling international differences. In establishing a League of Nations the Conference addressed itself to the task of substituting for the horrors of war the peaceful determination of arbitral tribunals. Thirty-two nations consecrated their future endeavor to the maintenance of the eternal principle that right and not might shall reign in the world's body politic. If among nations so widely divergent in material, social and political development, so sharply divided by ancient antagonisms and divergent interests, it was possible to secure unanimity in the ideals embodied in the covenant, surely it behooves every member of the League to find within its own body politic means of composing industrial differences otherwise than by war. The nation that is able to solve for itself most thoroughly and satisfactorily the questions involved in this issue need not fear for its place in the industrial development of the world.

"It is perfectly idle to expect that the grave and difficult questions will not arise between employer and employed in this country. These questions must be solved in such reasonable manner and by such effective methods as will command the confidence of both capital and labor. On the one hand, employers must realize that out of the horror and welter of this war new ideals have evolved and new conditions established. Industrial development and supremacy have sometimes been purchased at a price greater than any people can afford to pay. I am speaking not of conditions in this country, but of those which, to my knowledge, have prevailed elsewhere. The physical degeneracy of a considerable portion of the population is too high a price to pay for domination of the world's markets.

INDUSTRIAL ACTIVITY INCREASES

Live Plans Announced by Alberta Flour Mills, Ltd.—Nova Scotia Steel and Coal Co. Makes Extensions

AMONG the important developments in the industrial field during the past few weeks is the organization of the Alberta Flour Mills, Ltd., the stock of which is being sold by the Manitoba Finance Corporation. The company has under construction what will be a very large flour mill in Calgary, Alta. The new plant will have a capacity of 6,000 barrels of flour a day and the storage elevator will have a capacity of one million bushels. The capital of the company is fixed at $5,000,000. Of this sum $2,500,000 will be in the form of bonds, and this amount will be supplied from London, England, by a corporation known as the Investment Registry. The balance of $2,500,000 is in the form of common stock, and it is the intention of the directors to place all this stock in the prairie provinces, with the exception of such amounts as may be incidentally placed by the directors among personal friends in other parts of the world.

It was the original intention of the Alberta people who are interested in this enterprise, to secure practically every dollar needed for the purpose in the province of Alberta. This was found impracticable owing to successive crop failures, and it was decided to endeavor to place at least $500,000 in the province of Manitoba. The province of Alberta has already, in spite of conditions which obtain there, subscribed a million. If Manitoba takes at the present time half a million, there will remain one million still to be sold, and it is expected that this will be distributed among the four western provinces. Vancouver is interested, since that city hopes that a considerable quantity of the grain ground in Calgary may be shipped through that port, and people there have volunteered, if given the chance, to push the project along.

The stock is being sold at $100 a share, 25 per cent. on application, 25 per cent. on allotment, and the balance within 90 days. Considerable of the work has been done on the mill and elevator. The site is of ten acres in east Calgary, and connection is made with all three transcontinental railways there. It is the expectation that the $500,000 worth will be placed in Manitoba within thirty days and that the campaign will be over before the selling of Victory bonds begins. The president of the company is Mr. George Lane, and the vice-president is Mr. A. E. Cross, two well-known Alberta residents.

New Nova Scotia Steel Plant

Toward the latter end of last week, the announcement was made of the intention of the Nova Scotia Steel and Coal Co. to erect a by-product plant in the near future to cost over two million dollars. The plant will be erected near the company's works at Sydney Mines, Nova Scotia. The erection of the new ovens will mean a further enlargement of the present plant and the necessity for the erection of an additional blast furnace which will cost in the neighborhood of another million and a half dollars. It has not been decided just when work will be commenced, but it is understood that construction work will commence within a short time. There is a possibility that the company may decide for the electrification of the present railroad system.

Activity on the Border

The border cities are coming in for a fair share of American capital. It is definitely known that at least three United States concerns intend opening, and the decision of many more is waited on. It is expected that the two plants of the Canadian Products, Ltd., subsidiary of the General Motors Corporation, will open shortly at Walkerville, Ont. The opening of this large enterprise has been held up owing to the delay of the machinery. The want of housing accommodation is also felt, and is one of the serious problems of the company, because it is estimated that of the 2,000 employees, 60 per cent. will be family heads.. At first it will be the sole aim of the company to produce only for the McaLaughlin Car Co. and the Chevrolet Motor Car Co., of larghawa, and the estimated annual production is placed at our 00, totalling several hundred thousand dollars.

F. J. Wolfe, Toronto, manager of the Imperial Oil, Ltd., was in Windsor last week, looking over the company's new distributing plant at Ford City. The huge plant is almost completed, and from there the whole of the western peninsula will be supplied with oils, etc. The estimated cost of construction is $100,000, and it will be the only place in this district where tank steamers will dock and discharge their cargoes.

Western Activity

Announcement has been made by the manager of the Advance-Rumely Thresher Co., Laporte, Indiana, of the purchase of a quarter of a city block in Regina, Sask., at the intersection of Osler St. and Seventh Ave., from the Union Bank of Canada, as a site upon which the company will proceed next spring to erect a large and modern fireproof warehouse. The estimated cost of the new warehouse will be $150,000. The new structure will provide offices for the southern Saskatchewan branch of the company's business and better warehouse facilities than it at present enjoys. Mr. Arnot, the manager, stated that this large building, which will provide 50,000 square feet of floor space, was rendered necessary by the increasing demand for Advance-Rumely products, and would be in addition to its present warehouse plant at Regina.

Ratepayers of New Westminster, B.C., have approved of a free site for the Western Canada Cordage Co., a concern composed of returned soldiers, and the company will immediately proceed with building operations. This is the company which the provincial government, acting upon the recommendation of the advisory board of the new department of industry, recently authorized a loan of $200,000 from the $2,000,000 fund which was created by legislation passed at the last session of the legislature. Tenders for the new buildings will be immediately called for. The company is capitalized for $300,000, of which $100,000 is subscribed by returned men. Each shareholder holds the same amount of shares and each has but one vote. The shares are held on the profit-sharing plan.

The Imperial Oil, Ltd., is to expend $600,000 on improvements at their premises at Ioco, Burrard Inlet. The work is to be undertaken this fall and will give employment to 250 men. By these improvements the "still" capacity of the plant will be doubled.

About $300,000 is to be spent in additions to stockyards of the Alberta Stockyards Co., Ltd., Calgary, Alta. These additions are made necessary by increased business.

Other Industries

The Sunbeam Chemical Co., of Canada, Ltd., a branch of the Sunbeam Chemical Co., Chicago, Ill., are opening a plant in Toronto at the corner of Lombard and Jarvis Streets, to manufacture dyes, dye products and disinfectants, and will employ forty hands at the outset.

Repairs are to go ahead to the Cold Storage Building, Trenton, Ont., to put it into shape for a paint factory. It is proposed to manufacture from the ore found in Ontario, and will include the full process of crushing, grinding and mixing. E. James and W. W. Young, negotiating with an established paint concern at Montreal, are the interested parties

The board of trade of Petrolea, Ont., assisted by Mr. E. Hyatt, has succeeded in getting another industry. Mr. Frank A. Halstead, of Port Huron, has purchased the Stevenson boiler works, and will remodel it for the manufacture of soaps and greases. The concern will employ 25 to 40 hands.

Mr. Arthur Burgess, of Carleton Place, Ont., will approach the municipal council with a request to be permitted to bring electric power into Almonte from Blakeney, to run a flour mill which he proposes to install if he secures their permission.

In connection with the big steel plant of the Lake Huron Steel Corporation, it is proposed to annex 900 acres to the town of Goderich. Already on the options for the land $60,000 has been paid. A by-law is being prepared to be submitted to the people, and the matter is being taken up in Toronto by the Ontario Railway and Municipal Board.

AN OPEN LETTER TO THE BANK CLERKS OF CANADA

Young Ladies—
Young Men— You are both vitally concerned with the problem of general mental efficiency, as upon this depends the measure of your promotion. You will both be interested, therefore, in the following statement, though it is addressed particularly to

Young Men— You look forward to the day when you will be transferred to a branch bank as manager. Perhaps your first experience will be in a rural community, and, of course, you will want to "make good" from the start. Contemplate the requirements for success now so that if you have less than 100% in any of them, you may take time by the forelock and prepare yourself!

For instance, have you a quick-action brain that will enable you to get a ready grasp of farm topics? The successful bank manager in a small place knows breeds of live stock and quotatations; knows how farmers "plow and sow and reap and mow"; knows something about land and seeds, farm machinery and equipment. This is where a trained brain is valuable—it gets the data and grasps the data that prove the bank manager's ability to succeed.

BANK MANAGERS ARE REQUESTED TO DRAW THE ATTENTION OF EACH OF THEIR CLERKS TO THE FOREGOING

Another thing: to what extent can you trust your memory? If you were moved to-morrow to a strange village and met an average of a dozen farmers a day, could you, say in a week, call each man by name, remember the concession he lived on, the farm problems he told you about and his financial standing? If you could not do all of these things—and more, your memory is not 100% efficient; and if you had to ask anyone to remind you of his name, you surely would be suffering a handicap.

Fortunately it's a handicap that can be avoided. There's a scientific method of mental training that gives one a good memory and quick thinking. At the same time, it develops one's powers of observation and concentration, which are also essentials to success. This is the much talked of Pelman Course, students of which become mentally efficient and find themselves possessed of initiative, self-reliance and a personality—all of which go a long way towards qualifying a man for promotion. Pelmanism makes a very special appeal to bank clerks. A clerk who is not ambitious should not stay in the bank. But every clerk who has the spark of Ambition should investigate what Pelmanism will do for him.

You can Pelmanize in your spare moments, no matter where you live. All correspondence is confidential, and by sending in the coupon below to the Pelman Institute (Canadian Branch), 761 Temple Building, Toronto, you will receive all information by return mail.

THE PELMAN INSTITUTE

PERSONAL NOTES

Canadian Newspaper Service Photo

Mr. C. D. Harrington, B.Sc., vice-president and manager of the Anglin-Norcross, Limited, construction engineers of Montreal, will take an active part in the new firm's future building operations. The Anglin-Norcross, Limited, is an amalgamation of Anglins, Limited, who have been in operation for more than fifteen years, and the Norcross Brothers Co., who have over half a century of building success to their credit. The new organization have on hand nearly two million dollars worth of contracts and the outlook is encouraging in view of the building possibilities throughout the Dominion. Mr. Harrington was connected with Anglins, Limited, since its inception, and previously with Byers and Anglin. Before going with the latter firm he was with the Eastern Concrete Construction Company, of Boston.

Canadian Newspaper-Service Photo

Mr. Hugh Mathewson, of the firm of Riddell and Mathewson, members of the Montreal Stock Exchange, who have recently succeeded to the business of A. F. Riddell and Company, is a son of the late F. H. Mathewson of Montreal and Winnipeg. A. F. Riddell and Company were established in 1881 and during their many years of business were amongst the best known and most highly regarded commission houses on the Street. The retirement of A. F. Riddell leaves the business in the hands of his son, J. A. Riddell, and Hugh Mathewson, both of whom were partners in A. F. Riddell and Company for many years. Mr. F. Stanton Mathewson has also become a partner and is the firm's representative on the floor of the Montreal Stock Exchange.

Mr. W. H. Wiggs, has been elected president of the Committee of Industries of the Quebec Board of Trade.

Mr. Walter Leaf, of the London County, Westminster, and Parrs, Ltd., is in Canada, and will make a tour of the western provinces.

Mr. C. W. Connell has been appointed manager of the Continental Life Insurance Company's business in Southern Saskatchewan, with offices at 19 Canada Life Bldg., Regina.

NATIONAL INDUSTRIAL CONFERENCE AT OTTAWA

(Continued from page 12)

"If in any lines of industrial development we cannot hold our own without so terrible a sacrifice, then such lines ought to be abandoned, and our effort directed elsewhere. Labor is something more than a commodity. The physical well-being and the moral welfare of the people should go hand in hand. Standards of living which are regarded as satisfactory in some industrial communities of the world cannot be tolerated in this country. The employer, if he is wise, will concern himself with all the recommendations and suggestions laid down in the Peace Conference as to hours of labor, sanitary conditions, protection of women and children, and the general welfare of the laboring men. There can be no permanent or satisfactory industrial development which is not founded upon the welfare of the laboring population which maintains it.

"On the other hand, there are considerations which the labor organizations of the country will do well to hear in remembrance. Full right of organization on the part of both employees and employers has become so well recognized a principle that those who do not accept it are in a small and short-sighted minority. The rights of both employees and employers are thus moulded and governed by agreements reached through negotiations between such organizations in the different trades. But there can be no hope of the cooperation and confidence which are not only desirable but vital unless obligations thus entered into are maintained inviolate and unbroken on both sides. If they are to be regarded as mere scraps of paper, to be cast aside when convenience or advantage dictates, there can be no faith and security.

"One other consideration I should dwell upon. During the past five years the world has wasted more than it saved in half a century. That waste must be made up through increased production, and this cannot be accomplished during shorter working hours unless there is increased efficiency resulting in increased output. The relation of the output to the fixed or overhead charges directly and materially affects the cost. Moreover, the industries of Canada are not yet organized or developed upon the vast scale reached in some countries with which we are called upon to compete in the world's markets. In such countries an enormous output materially reduces the cost of the finished article. If we cannot sell to advantage the industries concerned must develop a lower cost of production or they must discontinue. Thus increased relative efficiency is as important to labor as to capital. And it is as essential in the office of the management as on the floor of the factory."

Speeches were also delivered on the first day by W. L. Mackenzie King, Hon. N. W. Rowell, Hon. A. L. Sifton, Col. David Carnegie, and W. J. Louck, of Washington.

Mr. W. L. Mackenzie King referred to the growth in the activities of the Department of Labor during the past twenty years. He also emphasized the necessity of a national viewpoint on the labor question; there was, he said, no difference of opinion between the two political parties in Canada on the labor clauses in the Peace Treaty, and it was for the Conference to show how these terms could be carried out here.

Col. David Carnegie described the Whitley scheme as it is operated in England; at first received with much doubt, it has now been found to be fairly successful.

On Tuesday two of the most important subjects were discussed by the conference as a whole. The first was the unification of provincial laws in regard to labor. Discrepancies were pointed out, and it was also urged that some of the provinces were in favor of nation wide standards. Mr. Tom. Moore, said that if this were found desirable, there should be no hesitation in having the British North America Act amended. The second subject was the hours of labor, in connection with which it was pointed out that the desirability of the eight hour day is now recognized, although it is not generally applied because of the keenness of competition. These topics, and the question of the recognition of labor organizations, continued to occupy the attention of the conference on Wednesday and Thursday.

Commission to Investigate Municipal Law

British Columbia Government Appoints Commission headed by Finance Minister to go into Subject Thoroughly — Municipalities Views will be Expressed at Coming Conference — Summary of Discussions during Past Two Years

REVISION of municipal law has been under discussion in British Columbia for about two years past, but has not as yet taken statutory form. So many amendments have been made to the old Municipal Act that it was decided to pass an entirely new one. The provincial government accordingly appointed F. A. McDiarmid, who is solicitor for the Union of British Columbia Municipalities, to draft a new Act. This was in June, 1918. The Union had, as a result of their 1916 conference at Vernon, and also after their 1917 convention at Duncan, already urged upon the government the necessity for a revision.

When the Union met for its 1918 convention at Penticton, in September, a draft had not, of course, been fully prepared, but the solicitor submitted a statement of the principles upon which he proposed to frame such an Act. Similar statements had already been presented to the government. The Union appointed a committee of fifteen members to supervise the drafting, and to make such representations as they might deem proper. At the same time they endorsed the principles submitted.

Legislature Did Not Act

The draft was prepared and placed before the committee. This committee's report will be introduced and discussed at the 1919 convention of the Union, which is to be held October 6th to 8th. The draft Act was also submitted to the provincial Legislature by the Attorney-General, and was sent to the Municipal Committee. This Committee, however, declined to pass upon the same; first, because it was incomplete in that the Municipal Elections Act was not incorporated, nor were the Compensation sections altered or amended, and there was no index; and secondly, the government had announced its intention during the following summer (1919) of reviewing the sources of revenue of the municipalities with the object of giving such assistance as might be found necessary. The Municipality Committee, however, passed the provisions concerning compulsory tax sales, and ordered the whole as then drafted to be printed and distributed for discussion. After this session was over an index was prepared and some work was done towards redrafting the sections relating to compensation, and towards a redraft of the Municipal Elections Act. A further memorandum was then addressed to the Minister of Finance and to the Premier, describing the changes proposed. In the absence of the Minister of Finance, the Premier stated that, although he had no previous knowledge of Mr. McDiarmid having been retained by the Attorney-General, this arrangement would henceforth be terminated.

The provincial government has now appointed a commission, composed of Honorable John Hart, Minister of Finance, chairman; R. Baird, Inspector of Municipalities, and Mr. Johnson, formerly treasurer of Prince Rupert, and now inspector of provincial revenue for the province. This commission will take up all the outstanding questions between the municipalities and the government.

The financial situation in British Columbia is complicated. In a letter to *The Monetary Times*, F. A. McDiarmid, who acts for the municipalities, outlines some of their views as follows:—

"The matters upon which they have to decide are tremendously complicated. I have been complaining on behalf of the Union of British Columbia Municipalities of very many things besides the taxation problem. For instance, all the administration of police, police magistrates, police prosecutors (called County Crown Attorneys in Ontario) are here paid by and under the control of the municipality. The administration of justice generally is in the hands of the municipalities alone, and costs on an average a half a million dollars, while fines received are a hundred thousand dollars. Owing to our geographical situation, 95 per cent. of our criminal work in the line of prevention of crime comes from the constant presence on the docks of police paid by the city of Vancouver, and inuring to the benefit of all the lower mainland municipalities, some twenty-two in number, and by the Victoria police force, inuring to benefit of the whole of Vancouver Island and all the municipalities on it.

"There is the matter of adjustment of the hospital accounts. If a man moves into a city and is in it two hours and takes sick, the city must pay $1.50 a day to the hospita although he came from provincial territory. There is the matter of amusement ticket tax, the theatre inspections, the care for the licensing of places and operator, the policing, the lighting, etc., all municipal functions required by the theatre; and practically all the taxes that the theatre pays go under the head of amusement ticket taxes to the province

Inequitable Assessments

"Sometimes it is a case of inequality of adjustment between municipalities themselves, sometimes a case of inequality of adjustment between the province and the various municipalities. No two of the municipalities are in the sam situation with the government, either. In Prince Rupert the government own a very large amount of property upon which they will pay no taxes, about one-quarter of the city. It retards all works of local improvement and forces the city to do out of general revenue what in all the other municipalities is done by local improvement taxation. Point Grey is in a somewhat similar situation. Here the government sold a lot of property, the purchasers petitioned for local improvements, the local improvements were made, assessment put upon the property, the slump came and the war, and the government took back properties from the purchasers under agreement for sale, and now calmly refuse to pay any of the local improvement charges. North Vancouver, Richmond Municipality, Kelowna, Vernon, and Armstrong are very hard hit by the operation of the Canadian National Railway and the Pacific Great Eastern, both of which obtained tax exemption, against the protests of the municipalities, from the provincial government. Rossland has a separate kick of its own. The great portion of the property is mines; mines are withdrawn from municipal taxation even as to the surface, while the government collect a very large and substantial amount from taxation upon the output of the mines and pay no municipal taxes at all. Victoria is in the same situation, with the Songhees Indian Reserve purchased by the Crown, large industries established there, water must be supplied, police protection must be given, lights must be given, roads must be built, and there is no taxation.

"There is very great dissatisfaction over the provincial Board of Health regulations in the "flu" epidemic, and the monetary arrangements between government and municipalities in connection therewith. There is a very great deal of dissatisfaction concerning the regulation that the municipalities must pay 75 cents a day to the government for every prisoner sent for the municipality to the provincial jail.

"In short, it is my contention that the government have always been willing to do the very right and proper thing by the province, but always at the expense of the municipality. The same thing in school matters. The government sits down, says: 'You must have a $45,000 school, and we will give you $10,000 towards it.' The School Boards say, 'all right,' and the municipalities say a $25,000 school is good enough, and in order to get the government grant and stand in with the Department the School Boards insist and

then either one of two things happen, either the ratepayers throw out altogether the school that they ought to have, or have got to swallow an utterly useless unnecessary expense of $20,000.

"The province has always lost sight of the fact that the municipality is not for purposes of taxation of the inhabitants of the area within the municipality; the municipality is simply those people who are unfortunate enough to own the land inside the municipality. The merchant class, professional class, the labor class, all persons making an income, are not members of the municipality at all so far as their taxation is concerned. Their taxation goes to the province, while the things the municipality has to do are not so much for the benefit of the land in the municipality as for the benefit of the classes who pay provincial taxation, owners of personal property, etc., etc."

ONTARIO METALLIC PRODUCTION DECREASED

Output Greatly Reduced, Owing to Falling Prices of Metals and Labor Difficulties

RETURNS received by the Ontario Bureau of Mines for the six months ending June 30th, 1919, are tabulated below, and for purposes of comparison the values are given for the corresponding period in 1918.

	Value.	
Product.	1918.	1919.
Gold	$ 4,648,164	$ 4,666,759
Silver	8,267,624	5,951,362
Platinum	....	818
Palladium	....	987
Cobalt (metallic)	249,045	93,157
Nickel (metallic)	83,332	1,825,437
Nickel oxide	5,551	1,567
Cobalt oxide	339,052	301,791
Cobalt sulphate and hydroxide	27,505	16,164
Nickel sulphate and carbonate		15,531
Molybdenite, concentrates	45,845	......
Lead (pig)	66,630	54,802
Copper (blister)	......	452,055
Nickel in matte (*)	12,385,950	3,535,915
Copper in matte (*)	4,283,040	1,128,753
Copper ore	318	....
Iron ore, exported (†)	138,018	44,309
Iron (pig) (§)	1,034,517	670,512
Total	$31,574,591	$18,759,829

*Copper in matte was valued at 20 cents and nickel at 30 cents per pound in 1918. For 1919 the values have been placed at 13 and 25 cents per pound respectively. The total matte produced contained 10,605 tons of nickel and 5,911 tons of copper. See heading "nickel-copper" for explanation.

†Total output of iron ore was 70,955 short tons worth $307,645.

§Total output of pig iron was 305,577 tons valued at $8,503,644. Figures in the table represent proportional product from Ontario ore.

Figures Show Reduction

As a result of after-war conditions there was a material reduction in Ontario's metalliferous production for the first six months of 1919, as compared with the corresponding period of 1918. This is due chiefly to the curtailed production of nickel-copper matte to about half that of 1918, when there was the greatest production of these metals that this province has ever known. The silver output continues its natural decline, although the price of the metal has been rising steadily. Gold, however, shows a slight increase over both the 1917 and 1918 production. Molybdenite, for lack of a market, is not being mined. The precious metals, platinum and palladium, are now recovered at the Port Colborne refinery of the International Nickel Company of Canada, Ltd. Lead along with most other metals has fallen in price since the close of the war.

Gold production, 231,729 ounces, shows an increase but is still a little under the figures for the first half of 1916, when 235,060 ounces were recovered. Unfortunately the strike at the Kirkland Lake camp, which began on June 12th, is still effective, and that source of gold supply is shut off for the time being. At Porcupine, however, the output is increasing, more particularly at the Hollinger, Dome, and McIntyre mines. During the half year 490,523 tons of ore were milled, of which 465,407 were treated at Porcupine and 25,116 tons at Kirkland Lake for a recovery of 212,895 and 18,637 ounces respectively. As a by-product of nickel-copper refining at Port Colborne gold to the value of $3,921, also platinum and palladium in small quantities as shown in the table of production, were recovered.

Silver

Despite the high price of silver, which averaged 103.677 cents per ounce for the half year, production from Cobalt declined nearly three million ounces as compared with 1918. There were 28 properties from which shipments were made; those marketing one-quarter million ounces or over are named in descending order; Nipissing, Mining Corporation of Canada, McKinley-Darragh-Savage, Kerr Lake, Miller Lake-O'Brien, Coinagas, O'Brien and Buffalo. On July 23rd a strike was called by the Miner's Union. A settlement in the near future is probable as representatives of both miners and managers are meeting in conference. Even with an early resumption of work the year's output will be materially reduced by the strike. Of the total output 42,900 ounces were recovered from gold ores and 11,714 ounces from the refining of nickel-copper matte. The Miller Lake-O'Brien and Crews-McFarlan mines at Gowganda contributed 409,344 ounces of the total, the balance coming from Cobalt proper and Casey township. Seven shippers were paid for the Cobalt content of the silver ore, receiving therefore $16,737. The ore testing and sampling plant at Cobalt, formerly operated by Campbell and Deyell, was purchased by the Ontario government on May 8th, and since that date has been under the management of A. A. Cole, Mining Engineer of the T. and N. O. Ry. Commission.

In addition to metallic cobalt and nickel and various compounds of these metals, as noted in the table, southern Ontario refineries recovered 2,659,569 ounces of silver and marketed 1,949,280 pounds of white arsenic. This production came from plants located at Deloro, Thorold, Welland and Chippawa. Nickel metal from these refineries to the extent of 106,023 pounds was marketed for $37,119.

Nickel-Copper

Since July 1918, when the production of refined nickel and blister copper by the International Nickel Company of Canada, Limited, began at Port Colborne, Ontario, the total quantities of nickel and copper in matte do not appear in the table of production. The figures given represent the shipments of matte to the United States and Wales. The close of the war found the nickel companies over-stocked, and consequently the price fell and production was curtailed. Until the surplus stock has been absorbed nickel-copper matte production will not increase even to a pre-war basis. Ore smelted in the period totalled 370,541 tons as compared with 717,119 tons for the corresponding period in 1918. Ore shipped from the Alexo Mine to the Mond Company smelter was 2,215 tons and the British America Nickel Corporation on June 30th had 46,814 tons stock-piled.

Iron Ore and Pig Iron

Of the total output of iron ore 65,151 tons went to Ontario blast furnaces, and 5,804 tons were shipped out of the province. The Magpie and Moose Mountain Mines were the chief producers.

Four iron furnaces at Sault Ste. Marie, two at Hamilton and one each at Midland, Parry Sound, Port Colborne and Deseronto were in blast. Foreign ore smelted in the period was 598,581 tons and Ontario ore 51,238 tons. The total output of pig iron was 303,577 tons worth $8,503,644; steel 296,081 tons worth $8,770,717 and 23,955 tons of spiegel valued at $868,148. The Algoma Steel Corporation now makes in its own ovens all the coke required in its plant, the output being 183.970 tons for the period.

OUR CHARGES

Our charges for the management of an estate are no more and often less than those of a private executor. They are fixed by the Surrogate Court Judge when he audits the estate accounts. The amount which he allows, as the Order of the Court reads, is "a fair and reasonable allowance for our care, pains, trouble, and time and personal disbursements expended in and about the administering, arranging and settling the affairs of the said estate."

WINNIPEG GRAIN EXCHANGE ANNUAL

Open Trading Had Short Career—Dealers Point Out that Exchange Method of Marketing Has Proved Best

As stated in these columns last week, the annual meeting of the Winnipeg Grain Exchange was held on September 10th. The following officers were elected for the year 1919-20: John E. Bothwell, president; N. L. Leach, vice-president; Dr. R. Magill, secretary; executive council, F. J. Anderson, J. B. Craig, R. R. Wobell, C. E. Eggleston, C. C. Fields, Andrew Kelly, C. H. Leaman, W. E. McGaw, W. L. Parrish, J. A. Richardson, H. E. Sellers, S. T. Smith.

The retiring president, F. J. Anderson, outlined the efforts made by the Exchange to secure an open wheat market. "All the efforts of this exchange during the year were directed towards the restoration of the open markets," he said. "We knew that the Board of Grain Supervisors was going out of existence as soon as it could wind up the transactions involved in the handling of the crop. That being the case the main obstacle in the way of opening the markets was the method of buying adopted by the Royal Wheat Commission of Great Britain. There would have been no use in opening the Winnipeg market had that commission decided to put one buyer in the market to buy all the wheat needed both by the United Kingdom and its allies in Europe. What we needed in order to open the market with some prospect of success, was that the Royal Wheat Commission should buy the wheat from the grain trade not nearer than the Atlantic seaboard. We considered, too, that, as the war was ended, the British Wheat Commission should not purchase wheat for any country except the United Kingdom, but should leave each country to do its own buying, and we took steps to have our views brought to the attention of the British authorities through Canada's officials in London. The British authorities agreed to buy the wheat from the grain trade at the Atlantic seaboard, and to leave other countries to make their own arrangements for trading, except in the case of France and Italy, and even in regard to these two countries the attitude of the British authorities was not altogether unfavorable to our point of view.

Sudden Reversal in Policy

"On July 7 the government announced that the grain markets would be reopened. The chief objection to opening the markets at that time was the probability that if the markets were opened the price of wheat would fall to a degree that would injure the producers. This belief was founded upon the then prospects of the new wheat crops of the United States and Canada. Up to that time record crops were expected in both countries. The estimate for the United States was about a billion and a quarter bushels, and for Canada about three hundred million bushels, and it was argued that because of these abounding crops, and because of the existing stocks of wheat in various parts of the world, the price of wheat was likely to fall considerably, and in addition it was predicted that if the Canadian markets were opened American speculators would bear the price down to $1.40 per bushel for certain purposes of their own.

"The Winnipeg market was opened on July 21. In the meantime the estimates of the new crops both in the United States and Canada had been greatly modified. It was estimated that the drought had caused a loss of about 400,000,000 bushels of wheat in the United States and perhaps of 150,000,000 bushels in Canada. When the market was opened this condition immediately reflected itself—instead of the price of wheat falling, it soon showed an increase, until it reached $2.45. On July 29 the market was closed by the orders of the government. It had been opened only six days, and it was closed in a somewhat peculiar way. The government called a conference in Ottawa on July 28—a conference at which this exchange was not represented. Why did the government change its plan? It opened the market when all the probabilities pointed to a fall in the price of wheat, and it closed the market when, as the result of six days of open trading, the price rose to $2.45. Naturally the suggestion is that this increase in price was what led the government to change its plan.

"It has been stated that the farmers were in favor of closing the markets, and of the government undertaking to buy and sell the wheat. The farmers are very well organized and they have very many ways of making their views known and effective, and their views on the methods of marketing their produce must always command full consideration. The farmers are not ignorant of the effect of the supply of wheat upon the price. They were quite well aware of the loss both in the United States and in Canada caused by the drought. They were quite alive to the change in the prospects, and I do not know of any association of farmers, whether local or provincial, that demanded the closing of the market after it had been opened, and after the price had shown a marked tendency upwards. It is equally certain that the grain trade did not ask the government to close the market, and so far it has not been stated that the British authorities had changed their proposal to purchase the wheat as they needed it from the grain trade at the seaboard.

Grain Exchange on Sound Basis

"The system of marketing represented by the Grain Exchange was not created by governments. It is the result of of commercial experience, and is the result of commercial experience in every country where wheat enters international trade. It has always been subject to criticism. It has often been investigated. In various countries, and among these the most highly developed commercial countries, legislations have attempted to find substitutes for it. So far it has stood every test, and I am repeating a commonplace remark, when I say that no more efficient and no more economical method of marketing grain has yet been devised.

"Authority has been embodied in the order-in-council creating the wheat board, enabling the board to utilize the ordinary channels of trade as far as possible and to pay them a reasonable remuneration for their services. In keeping with this the wheat board is making arrangements whereby the ordinary channels of trade will be utilized. The wheat-board does not propose to handle the grain at country points without the services of the country elevators, and arrangements have been made by the board in regard to street prices, storage and handling at country points similar to those put into effect by the Board of Grain Supervisors last year. The country elevators will be utilized by the wheat board, and their owners will be reasonably compensated. The commission rule of the exchange is protected, so that commission merchants may handle such grain as is consigned to them as before. A rate of brokerage has been fixed payable by the seller of the grain, so that cash brokers will be able to do business at that rate. The wheat board also proposes to utilize the trade for the purpose of selling wheat to flour mills in eastern Canada and for the purpose of delivering wheat to the board at the Atlantic seaboard.

Government Takes Risk

"The most outstanding feature of the new method of handling wheat is that the government of Canada becomes directly responsible for the price of wheat, becomes responsible not only because it buys the wheat, but also because it assumes the responsibility of selling the wheat, and the object of the method adopted is to give the farmer a price as closely approximating to what is called the "world price" as is possible. The world price during the year may vary very considerably. It is the claim of the grain exchanges on this continent that their prices from moment to moment are the immediate reflection of world prices. Under the new scheme the government undertakes to sell wheat in the international market, to obtain the highest possible prices, and to pay the farmer accordingly.

"Some enthusiastic admirers of this plan seem to think that it is so good that it should be made permanent. We in the grain trade may be somewhat prejudiced in the matter, but we cannot help feeling that any government that undertakes to handle Canadian wheat in this way permanently will very soon tire of it. We cannot help thinking that while so long as what is called the world price is high, and so long as the government can secure a high price, and therefore pay a high price to the farmer, it will be fairly easy going, but

that when the price of wheat falls—as fall it will—a different sentiment will soon prevail. Suppose, for example, the government within a year or two offered 80 or 90 cents to the farmer for his wheat—one wonders what would happen to that government at the next election. We cannot help feeling that so long as a government takes upon itself direct responsibility for the price of wheat in times of peace, it will make the whole matter a political issue of the worst kind. The successful exporting of wheat means more than buying wheat, for example, at Winnipeg and selling it at Liverpool. In peace times there are few days in the year when one can buy wheat at Winnipeg and sell on the Winnipeg price at Liverpool. The successful exporter requires to be as expert in regard to ocean freight rates and international exchange as in regard to cash wheat. He also needs to be able to utilize the markets for future delivery as the only means of reducing the risk of price variations.

"It goes without saying that if the Canadian government abolished the grain exchange system of international trading in Canada, it could not and would not itself patronize the condemned methods. In exporting wheat in competition with the great firms of the United States, or of the United Kingdom, or of France, it would be like a boxer entering a ring with his right hand tied to his back. We, in the trade know what would happen to any company or any government that tried to do business this way. We know that such a company or government would fail to secure the 'world price.' We know that it would incur grave risks. And we know that it could compete with commercial exporters only by taking losses and transferring them to the producer by lowering the price to him."

Questions for This Year

Referring to the outlook for the coming year, the newly elected president said:—

"There are many questions of importance to us in the grain trade at Winnipeg that require settlement, and that soon. For example, the trades that were made while the market was open have not been dealt with yet. Another important matter is the effect of making 'regular' on this exchange warehouse receipts issued by private elevator companies. Another is the question of whether we should have future trading in rye or not. Others are our weather map system, our statistical information and the facilities we give our members for consulting the statistics that we gather from time to time; also the telegraphic and quotation service between this exchange and our sister exchanges to the south of us; cable service with Great Britain and Europe and the rates charged by the cable companies; commission charges on cash grain and on grain that is bought and sold for future delivery, and, finally, all the provisions that have been made by the government and the various exchanges concerned in regard to sample markets. All of the above matters your council will be called upon to deal with during the coming year, and they should all be considered at an early date.

"I may be permitted at this time to say it has seemed to me for a long time that there is considerable misunderstanding by the public, by the producer and by our members of parliament as to the real nature and functions of grain exchanges, and I think the time has come when an effort should be made by us—I do not say to educate, but I do say to put our case clearly before the public, the producer and the members of parliament. Our case is very clear and well defined—namely, that the grain exchange method of handling grain is more efficient and more economical than any alternative that has yet been proposed. I think that we have a good case and that we should make it known, for if there is one outstanding organization in Canada that enables buyer and seller to meet on common ground and transact their business with the least possible cost to both buyer and seller, it is on this exchange."

The situation at the Cobalt mining camps is again getting down to a normal state. The second shipment since the end of the strike has been made by the Coniagas Mine, totalling 137,125 pounds of ore.

BANK OF NEW SOUTH WALES

The net profits of the Bank of New South Wales for the half-year ended March 31st, 1919, were £277,057, to which was added an undivided balance of £131,046 from the preceding half-year, making a total of £408,103. After paying two quarterly dividends at the rate of 10 per cent. per annum, and carrying £75,000 to reserve, a balance of £310,456 is carried forward into the current half-year.

Total assets are now £67,075,870, deposits totalling £41,937,044. The connections of the Bank of New South Wale are extensive, and in Canada it is represented by the Bank of Montreal, Bank of Hamilton, Royal Bank, Imperial Bank and the Canadian Bank of Commerce.

WILL HANDLE STANDARD RELIANCE ASSETS

Standard Assets, Ltd., is the name of the company which is now being incorporated for the purpose of realizing on the properties of the Standard Reliance Mortgage Corporation, which is in liquidation. The directors will be appointed by a committee of the creditors, which is to meet next week. It is expected that the new board will include G. T. Clarkson, the liquidator, and that the other directors will represent the different centres in which the corporation was active.

The court inquiry into the failure is to open on September 25th, before J. A. C. Cameron, Master in Chambers. G. H. Kilmer, K.C., will be Crown Counsel, and one of the first witnesses will be Lt.-Col. W. S. Dinnick. The operations of the corporation, year by year since it commenced business, will be examined.

EMPLOYMENT CONDITIONS IN CANADA

Weekly reports from employers to the Dominion headquarters of the Employment Service of Canada, Department of Labor, indicate that, apart from unemployment due to strikes, there was a slight decrease in the volume of employment during the week ended August 30th, this being the only week in August during which a decrease has been registered. Returns for week ended August 30th showed that 3,595 firms reported to the Employment Service of the Department of Labor, as compared with 3,623 during the week ended August 23rd, a decrease of 18 firms. Of those reporting 323 were in the maritime provinces, 1,658 in Ontario, 864 in Quebec, 454 in the prairie provinces and 295 in British Columbia. The number of persons employed by these firms on August 30th was 494,138 as compared with 494,222 by the same firms during the preceding week, a decrease of 84 persons or .02 per cent. An increase of 3,042 persons or .6 per cent. was anticipated, however, during the week ended September 6th.

The plus industries—those that registered net increases in the number of persons employed were: Building and construction with an increase of .9 per cent.; commercial and mercantile .8 per cent.; lumbering 2.5 per cent.; clay, glass and stone 6.6 per cent.; chemicals 2.1 per cent.; textiles .1 per cent.; woodworking .45 per cent. and miscellaneous .95 per cent. Without exception all these groups anticipated further increases to their staffs during the week ended September 6th, textiles and lumbering anticipating the greatest gains.

The minus industries—those that registered net decreases in the number of persons employed, were—food, drink and tobacco with a decrease of .3 per cent.; leather and leather goods .2 per cent.; metals .1 per cent.; pulp, paper and printing .1 per cent.; vehicles 1.5 per cent.; quarrying and mining .1 per cent.; railway construction 1.9 per cent. an drailway operation .7 per cent. With the exception of vehicles and pulp paper and printing, all these groups anticipated increases during the week ended September 6th, those in railway construction, quarrying and mining and food, drink and tobacco more than compensating for the appreciable decreases in these groups during the week in question.

INCOME TAX STATEMENTS

New Requirements Will Not Only Benefit Banks, Wholesalers and Other Creditors, but Will Also Keep Merchant Posted on His Real Condition

By A. B. Barker

THE income tax law of the Dominion will bring about a change in business methods in Canada which will inure to the benefit of banks, manufacturers, wholesalers, retailers and all classes of the business community. It will in time make the basis of credit definite, detailed information of the applicant's position, supplied from his own records.

In the past, while the law called for the proper keeping of books by business men, it was as much honored in the breach as in the observance, as the records of almost any insolvent show, and the records kept by a large percentage of business men, and not always the smaller dealers, were quite inadequate to give the proprietor any clear idea of where he stood. It is true that the majority were able to furnish statements of assets and liabilities, but as in many cases stock was never taken, nor were the books closed at regular intervals, the items in the statement were only approximate and the results of the trading largely a matter of guesswork. Banks and credit men have tried to remedy this state of affairs, but their efforts were usually confined to suggestions only, as, on account of competition for business, they realized that over-urging might lose a customer. It is well known that a statement can be made up to show any desired result by over-valuing assets and underestimating liabilities, and the only way of arriving at actualities is by assembling the results of a season's operations in a profit and loss account. In a trading concern this calls for the total purchases and sales, the amount of stock in hand at the beginning and close of the period under review, and the total of expenses of all kinds With this information, a statement can be analyzed and the correct position ascertained. Under previous conditions the number of dealers able to give this information was lamentably small, and many a dealer has lived his business life without more than a general idea of his position, judging his progress entirely by guess and his bank passbook.

The new returns for purposes of taxation, however, make it necessary to prepare an analytical statement, which, when completed, will make the business man see in black and white his turnover, his gross and net profits, and what proportion his expenses bear to his business. From the standpoint of the bank, these statements will pave the way to better appreciation of bank credit in its relation to business. The function of the bank is to assist trade and commerce by supplementing the working capital of its clients, not to furnish funds for fixed investments, and for this reason bank loans are based on trading transactions. In other words, the banks' loans are to enable their clients to keep their stocks moving. It is by the frequent turning of stock, buying and selling, that a dealer makes his profit, and, as profit is the object of all business, it is to the mutual advantage of bank and customer when the loans are at short date and quickly repaid, this being an indication of frequent turnover of the dealer's stock-in-trade.

WANT PROVINCIAL BOARD OF COMMERCE

On September 8th, representatives of twenty-seven municipalities in British Columbia met with Hon. J. W. De B. Farris, attorney-general, to discuss measures for relieving the cost of living. They adopted a resolution suggesting the appointment of a provincial board of commerce for British Columbia, with full judiciary and administrative powers, to be appointed and administered to by the federal government. The gathering asked the board of commerce to establish a legal business profit "spread" as an initial basis upon which profits could be figured where essential commodities were concerned.

LETTER TO THE EDITOR

ADJUSTING FROM THE ASSURED'S STANDPOINT

I read, with much interest, the address on this subject given before the 1919 convention of the Dominion Association of Fire Chiefs at Calgary, expecting to find some information of value to adjusters of fire losses. Having experience in adjusting fire losses extending over more than fifty years and having had the benefit of training instruction and cooperation from the best known adjusters on this continent, I think myself competent to reply to this address.

In the first place, an adjuster is one who *adjusts*, whether he is instructed by the assured or by the companies; he comes upon the scene after the fire; it is his duty to obtain knowledge of all the facts as they existed at the time of the fire and govern himself accordingly. To make it appear in doing so he acts in a deceptive manner, is quite unwarranted. The assured has the policies on which are printed the statutory conditions by which all parties are bound. These conditions are the law of the land, they are not the arbitrary dicta of the insurance companies.

Owners of properties may believe themselves justified in the opinion that with the ordinary, and sometimes with the special facilities for extinguishing fires, and their own care in preventing them, there is no reasonable probability of any loss, or, if a fire occurs, the damage will be serious in amount, consequently persuade themselves to save money by means of co-insurance agreement. If the assured obtains policies which he is too careless to read, it is most likely that he is equally careless in the amount of insurance he carries, and in keeping proper business accounts. The insurance companies desire neither spark-catchers, nor over-insurances, nor bad accounting. In all my experiences I have never known an insurance company to desire sharp-practice, they have always instructed me to really adjust. If those who pose as adjusters for the assured would take action before a fire occurs and see to it that the property was properly described in the policies, that the accounting was such as is necessary to a well conducted business, the insurance fairly proportionate to values at risk, and the warranties given by the assured honestly lived up to, then he would properly earn generous fees, and, by preventing fires and disputes, become a public benefactor.

Henry Lye.

FIRE PREVENTION DAY TO BE NATIONAL

An order-in-council has been passed by the Dominion government, setting aside October 9th as a fire prevention day throughout Canada. After referring to the heavy fire losses, and the desirability of reducing them, it is recommended that:—

1. All dwellings and their surroundings be carefully inspected by their occupants and all conditions likely to cause or promote the spread of fires removed.

2. All public buildings, stores and factories be inspected and cleared of rubbish.

3. Fire drills be held for the children in all schools and for employees in all large stores and factories.

4. Special instructions on the subject of fire prevention be given by the teacher and by municipal officials in the schools, and that such appropriate literature as may be made available be distributed to the pupils.

5. All legislation and regulations enacted or issued by Dominion, provincial or municipal authorities dealing with fire prevention be given publicity by the municipal officials, and that by public meetings or otherwise as may to them seem most fit, they endeavor to impress upon the citizens the national importance of safeguarding life and property from loss or fire.

For the week ended September 5, shipments of ore from Cobalt Station were nil, owing to strike conditions. The strike is now terminated and operations will soon be under way.

BRITISH MANUFACTURERS IN CANADA

The first general meeting of the Canadian Association of British Manufacturers and their representatives was held in Toronto on Septmber 8th. John Wilson presided, and pointed out that the 55 members of the association represented over 300 British manufacturers. The association hoped to have a representative in London, and that in time it would become as large as the C.M.A. Trade sections of the association were formed, and the chairmen will form the publicity committee. The appointment of tariff and transportation committees are to be looked after by the executive committee. F. W. Field, trade commissioner, reported that the British trade commissioners in Canada have been granted authority by the department of trade and commerce to appoint an expert to deal with all matters of dispute in regard to quality of goods. Capt. John Harris stated that there were in Toronto 250 representatives of British manufacturing firms.

A small delegation of English cotton manufacturers will shortly make a visit to the United States and Canada. After visiting the spinning and weaving centres of New England, they will come to Montreal, Ottawa and Toronto, and then proceed to the central states.

POST OFFICE SAVINGS BANKS

During the month of May the post office savings banks lost over $900,000 in deposits. This was in spite of substantial transfers from the Dominion government savings banks and from the post offices of the United Kingdom. The statement for the month is as follows:—

Dr.	MAY, 1919		Cr.
	$ cts		$ cts.
Balance in hands of the Minister of Finance on 30th April, 1919	40,950,513.98	**Withdrawals** during the month........	1,909,835.04

GLENS FALLS MAY INCREASE CAPITAL

At a meeting of the directors of the Glens Falls Insurance Co. held on September 9th, a resolution was unanimously adopted in favor of an increase in the company's capital stock. The present capitalization is $500,000, and it is proposed to increase it by the same amount, the new stock to be offered for subscription at par to the present shareholders. A special meeting of the shareholders is to be held on September 25 to vote on this proposal.

BEARISH FACTORS IN THE STOCK MARKET

McCuaig Bros. and Company, of Montreal, in their August Review, summarize the influences which recently have been depressing security prices. The article says:—

"While security prices were moving upward almost without interruption, there was a distinct tendency on the part of the public to ignore unfavorable factors, but since the recent severe reaction the market has experienced a relapse from the feverish activity of the first half of the year and more attention is being paid to the less favorable aspects of the situation, and the numerous conflicting factors are being carefully weighed by thinking people.

"One factor which is exercising a repressive influence is the indifferent outlook for the western wheat crop, which it is predicted, will be under the 200,000,000 bushel mark and may not exceed 150,000,000 bushels. The importance of the wheat crop, particularly at the present time, cannot be overestimated. The United States has three principal crops, and if one is poor, the average is as a rule kept up by the other two. Canada on the other hand is peculiarly dependent on its one big crop, and a small yield means a greatly reduced buying power for a large section of the country, and consequently affects all industries more or less.

"The moving of a crop, even below the average, imposes a serious strain on the banks. As harvesting has commenced, it is to be expected that call money will show a tendency to harden, and as bull markets do not thrive on tight money, this factor is apt to have a restraining influence on market operations. Added to this the responsibility of the banks will be still further increased by the approaching Victory loan.

"These two factors, unfavorable crop news and the probability of tighter money, have combined with the normal seasonal tendency towards dullness to restrict transactions on the stock exchange and the market has lost a good deal of the great public momentum, which forced prices up steadily in the first half of the year.

"Another important factor, which only recently commenced to come in for public attention is labor unrest and the problem of satisfying labor is by no means easy to solve. The underlying cause for popular discontent is the high cost of living, a problem which statesmen are realizing is the most pressing one of the period. Labor is becoming more and more unreasonable as political leaders, afraid of loss of backing, gives in to their demands, which succeed each other almost without interruption and the possibility of a great conflict between the governing powers and labor is not beyond the range of possibilities. Naturally, the market is apprehensive of developments of this nature. They might not only seriously disturb domestic business and retard its return to a stable basis but considerably upset efforts in the direction of participating in the provisioning and rebuilding of Europe."

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended September 11, 1919, compared with the corresponding week last year:—

	Week ended Sept. 11, '19.	Week ended Sept. 12, '18.		Changes.
Montreal	$126,563,658	$107,390,186	+	$19,173,472
Toronto	80,896,897	66,945,859	+	13,951,038
Winnipeg	43,097,376	26,525,575	+	16,571,801
Vancouver	14,832,551	12,834,418	+	1,998,133

Conservation of Life Insurance
Life insurance is of supreme value in these uncertain times. Life insurance should not only be jealously guarded and kept in full force, but it should be increased if at all possible. It is a well-known fact that the dollar has greatly diminished in value, so that a given income will not purchase much more than one half the amount that it would have yielded in pre-war days. Not only therefore should we resist every inducement to relinquish our insurance; we should rather increase our protection to the limit of our ability. There is nothing else to be compared with a life insurance policy as a protection for the home. During the policyholder's life it is an asset of ever-increasing value: at death it is the financial anchor of one's dependents. Do not allow your "best friend" to induce you to give up a policy in a sound company. Take a new policy if you can, but never give up the old!

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

A REMINDER
In redeeming your Fall obligations, do not forget that there is an urgent obligation no man can afford to ignore—a debt he owes to himself and to his family—the obligation to protect his energies and interest by means of LIFE INSURANCE.

The Great-West Life Assurance Company, in its wide range of Policies, provides for every need and circumstance. The farmer, the merchant, the professional man, and the wage-earner, may all find Policies peculiarly adapted to their needs. Premium rates are low, and the profit returns to Policyholders are remarkably high.

Full information of the Company's many attractive plans will be gladly given on request.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Terrebonne, Que.	Bank of Toronto.
Stettler, Alta.	Bank of Toronto.
Ladner, B.C.	Bank of Montreal.
Langley Prairie, B.C.	Bank of Montreal
*Chambly Canton, Que. (Chambly)	Canadian Bank of Commerce.
*Elk Point, Alta. (Vermilion)	Canadian Bank of Commerce.
Hamilton, Ont. (Ottawa and Campbell)	Canadian Bank of Commerce.
Graysville, Man.	Union Bank of Canada.
*Homewood, Man. (Carman).	Union Bank of Canada.
Perth, Ont.	Royal Bank of Canada.
Clyde, Alta.	Royal Bank of Canada.
Picardville Alta.	Royal Bank of Canada.
Wayne Alta.	Merchants Bank of Canada.
Benalto Alta.	Imperial Bank of Canada.

*Sub-branches.

Mr. A. H. Watson, of the Standard Bank of Canada, has been appointed manager of the branch of that bank at Ericksdale, Man.

Mr. Wm. C. Murray, manager of the Bank of Nova Scotia at Sydney, N.S., died recently.

According to the information received by *The Monetary Times*, the names of many new branches are to be added to the list of Canadian banks this year. Many of Canada's chartered banks contemplate and have under erection, new buildings for the purpose of opening new branches.

La Banque Nationale has awarded a contract for a new building at Levis, Que., for $19,000.

The Bank of Hamilton has awarded a contract for the building of a new branch at Locke and Herkimer Sts., Hamilton, Ont., for $15,000, and will also conveniently locate at Goderich, Ont., as a direct result of their investigation as to the assurance of the Lake Huron Steel Corporation locating their plant there.

The Home Bank of Canada will erect a branch at Main and Danforth Sts., Toronto, at a cost of $20,000. Alterations and additions will be made to the Sun Life Building, James St. North, Hamilton, Ont., for the bank at a cost of $26,000.

The Imperial Bank of Canada is erecting a branch at Kingston Road and Balsam Ave., Toronto. The bank is also calling for tenders for the erection of buildings at Oulette Ave., and London St., Windsor, Ont., and Amherstburg, Ont.

The Canadian Bank of Commerce has purchased a lot at the south-west corner of Coxwell and Danforth Aves., Todonto, Ont., and contemplates the erection of a new branch there in the near future.

Some changes will be made in the building at Winnipeg, Man., formerly occupied by the Bank of British North America, for the Bank of Montreal and the Royal Trust Co. The Bank of Montreal took over the structure when the Bank of British North America was absorbed, and sold later to the Royal Trust. The Royal Trust was formerly accommodated in the Bank of Montreal Building.

The Merchants Bank of Canada has purchased from the provincial government the corner of Main St., Barons, Alta., facing the hotel, and plan to erect a modern brick building there in the spring. The building at the corner of Talbot and King Sts., London, Ont., known as the Bank Hotel, will be remodelled and added to by the bank.

Mr. C. D. Neville has been appointed manager of the branch of the Canadian Bank of Commerce recently opened at Ottawa St. and Campbell Ave., Hamilton, Ont.

Mr. Wm. May, whose address on "Business Insurance," given before the Life Underwriters' convention in Calgary, was reported last week, is with the Sun Life Assurance Co., not the Confederation Life.

CANADIAN RAILWAY WAR BOARD

In circular number 107, supplement number 1, dated September 9th, 1919, the board says:—

"Owing to character of service rendered by regularly organized railway and steamship ticket agencies to the public and the railways in handling railway transportation, such agencies are exempt from compliance with terms of clause 1 circular 107, dated May 6th, 1919. The handling of railway tickets by the organizations referred to may be carried on under such arrangements as the individual railway companies consider best suited to protect their interests."

MARITIME TELEPHONE RATES PROTESTED

The Halifax Board of Trade has protested against the increase in rates recently granted to the Maritime Telegraph and Telephone Co. The council of the board of trade on September 4th, submitted to the Board of Public Utilities that the measured service as introduced by the company placed an unfair share of the cost of upkeep on the business men of the city whose telephone bills in some cases had increased 300 per cent. It was pointed out that messages received were equally important as those sent out, and that a charge on out-going messages only, was not, in their opinion, just. The protest charged that a discrimination was made against the business user who, according to the schedule made out, was only permitted two calls per day at the rate under which domestic users were allowed 15 calls per day. It was urged that the Board of Utilities return to the old system for a year during which time expert advice might be had.

It was suggested further that an increase might be made of 25 per cent. on all telephone rates, thus providing the funds necessary for a better service. The protest concluded:—

"If you decide that it is not possible to follow this suggestion and insist on measured service for business phones being put into effect, we must ask you to change your basis and give business phones the same number of calls as you give domestic phones for the same cost per year, and charge a fair rate for excessive calls."

LARGER INDUSTRIAL CONGRESS NEXT YEAR

In place of a provincial Industrial Congress, like that held in Alberta this year, plans are already being made for an inter-provincial meeting next year. The interest of British Columbia at least has been aroused, and visits to points in both these provinces, as features for next year, are being discussed.

LONDON AND PORT STANLEY RAILWAY

The annual statement of the London and Port Stanley Railway for the year ended June 30th, 1919, was made public on September 6th by vice-chairman Philip Pocock. It shows a net profit of $31,053. The total revenue for the year was $499,656, being an increase of $131,000 over the previous year. The net profit for the first four years' operation is $99,612. Mr. Pocock pointed out that whereas the rental under the Pere Marquette management was $19,000 yearly, London is now receiving $60,000 a year from the road.

The following are the annual revenues for the first four years' operation, commencing in 1916, with a revenue of $281,058; 1917, $316,685; 1918, $368,914; 1919, $499,656. The operating expenses for the same period were as follows: 1916, $261,284; 1917, $290,103; 1918, $345,410; 1919, $468,602. The number of passengers carried by the Pere Marquette during 1915, the last year of its operation was 105,567, while the following year the L. & P.S. carried 548,326 passengers. In 1917 there were 726,799 passengers carried, 842,641 were carried the following year and last year was the greatest on record, when 958,587 passengers were carried.

DIVIDENDS AND NOTICES

PROVINCIAL PAPER MILLS CO., LTD.

NOTICE IS HEREBY GIVEN that dividends of one and three-quarters per cent. (1¾%) on the Preferred Stock, and one per cent. The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Pipeston R.M., Man.	$ 10,500	..	20-years	Sept. 20
Vermilion, Alta. ...	20,000	6½	20-instal.	Sept. 22
Charlottetown, P.E.I.	100,000	5	20-years	Sept. 22
Three Rivers, Que...	80,000	6	30-years	Sept. 29
Coronation, Alta. ..	3,000	6	5-instal.	Sept. 29

Orillia, Ont.—A by-law to borrow $24,000 for waterworks extension and improvements has been passed.

Riverside, Man.—The rural municipality has authorized the sale of $84,500 30-year 5 per cent. debentures for good roads.

Hamilton, Ont.—The city council has sanctioned the issue of debentures covering the cost of school improvements for $98,775.

Vermilion, Alta.—A bill authorizing the borrowing of $20,000 for the erection and equipment of a new fire hall has been passed.

Glencoe, Ont.—The municipality will be required to authorize a debenture issue of $18,000, extending over twenty years, for hydro purposes.

Toronto, Ont.—A by-law authorizing the issuance of debentures to the amount of $509,000 for the enlargement of public schools has been passed by the city council.

Pipestone, Man.—The rural municipality has decided to postpone the telephone debenture issue, particulars of which were recently published in these columns, until next January.

Summerland, B.C.—The municipality is receiving tenders for an issue of $75,000 6 per cent. 25-year serial bonds. Tenders are to be addressed to J. J. Nixon, West Summerland, B.C.

Waterloo, Ont.—Debentures of $2,500 and $3,500 for the Park Board have been sold to the Waterloo County Loan and Savings Co at par. The debentures bear interest at 5¾ per cent.

Lasalle, P.Q.—Ratepayers defeated the by-law which provided for the borrowing of $131,000 for road improvements, extending and grading of streets and laying water pipes.

Coronation, Alta.—Tenders will be received until September 29th, 1919, for the purchase of $3,000 6 per cent. 5-instalment influenza epidemic debentures. (See announcement.)

Minnedosa, Man.—A by-law to authorize the purchase of an adequate lighting system for the town, and issuing of debentures for that purpose, will be submitted to ratepayers on October 3rd next.

Vancouver, B.C.—Ratepayers will, on September 30th, vote on the issuance of $176,000 5½ per cent. 20-year debentures for the construction of part of False Creek bridge, and for $110,000 5½ per cent. 20-year debentures for road improvements.

Three Rivers, Que.—Tenders will be received until September 29th next for the purchase of $80,000 6 per cent. 30-year debentures. Every tender shall specify whether the price does or does not include the interest accrued on the bonds at the time of their delivery.

Peterborough, Ont.—The city solicitor has been authorized to prepare a by-law to grant the Board of Education the sum of $240,000 for the erection and equipment of a new public school. It provides that 30-year debentures be issued to bear interest at 5½ per cent.

Walkerville, Ont.—The council has voted to request the Ontario government to advance $1,000,000 to relieve the housing shortage in the community. Approval has been given to advance $10,000 to the Hydro Commission pending sale of debenture securities for that amount.

Chatham, Ont.—The city treasurer informs *The Monetary Times* that over $80,000 of the issue of $130,000 10-year 5½ per cent. debentures have been disposed of locally at par since August 1st, 1919. For the last few years the municipality has disposed of practically all of its debentures to local investors at par.

Verdun, Que.—Only one tender was received on the issue of $225,000 5½ per cent. 20-year coupon gold bonds, for which tenders were to be received until September 12, according to information received by *The Monetary Times*. It is understood that the municipality will send a representative down to New York, to make arrangements for placing the issue there, if possible.

Levis, Que.—Delivery has been completed of $134,500 of 6 per cent. 20-year bonds, dated November 30th, 1918, and repayable in twenty semi-annual instalments of principal and interest, which had been sold in October, 1917, to La Caisse Populaire, of Levis. The price was par, less a commission of 1 per cent. This issue was made for construction and improvements to the waterworks system.

Kitchener, Ont.—At the last regular meeting of the finance committee it was decided to recommend the raising of $30,000 by debenture issue for the Water Commission to pay for certain improvement work in connection with the system. The committee also passed a motion, recommending the raising of $46,000 for the payment of the addition to Victoria School as requested by the school board.

Moose Jaw, Sask.—Through the resignation of Mayor Hamilton making necessary a new sale of the city's issue of $210,000 of bonds, over $9,000 less than was expected was received. The original sale to Wood, Gundy and Co. was at 97.66, for delivery about August 1st. The debentures were printed with Mayor Hamilton's signature lithographed on the coupons, but when they were ready for delivery he had resigned, and so could not sign the debentures. The purchasing firm stated that the signature of the deputy mayor would not be acceptable, and it was necessary to reprint the bonds, which took over two weeks. The buyers were then not willing to pay the price originally tendered owing to changed conditions in the financial markets, but a compromise price of 93.22 was reached.

Manitoba.—Hon. Edward Brown, provincial treasurer, has announced that, in addition to a sale of treasury bills to the amount of $500,000, the particulars of which were reported in these columns some weeks ago, the government has agreed to authorize a further issue of $750,000. The official statement says: "In addition to a sale of treasury bills announced some weeks ago to the amount of $500,000, for the purposes of the telephone commission, the government has agreed to authorize a further issue of $750,000, of which amount there will be appropriated $250,000 for the purpose of the telephone commission to complete its work for the current season, $250,000 for the purpose of the good roads construction, and $250,000 for the construction of the first section of a provincial hydro system. The bills in question will mature on the first of February, 1920, and are subject to a discount rate not to exceed 5 per cent. per annum net to the province, and are payable in Canada only, and are therefore not affected by the rate of exchange between Canada and the United States. On the first of February next a con-

siderable portion of the debt of the province held in New York matures, and a refunding issue to cover the same will have to be made in January. To this amount will be added the amount of the treasury bills in question—viz., one million and a quarter in all, and one issue or long-term bonds will then be made. January is looked upon in the United States as the most favorable month for bond issues, inasmuch as it is the month when dividends on outstanding securities are payable; and meanwhile a considerable saving in interest has been effected by the difference between the rate of the treasury bills disposed of and the rate at which a bond issue could be sold.

"The Provincial Treasurer stated as his opinion as the result of recent enquiry that the financial conditions were of a more unsettled character in the United States than in Canada; and further, that prices in the United States ranged considerably higher than in Canada. The actual expenditure by the government for capital purposes during the present fiscal year will fall short of what was outlined during the recent session. It is expected that the Telephone Commission will fully overtake its program as well as the Good Roads Commission. The construction of public buildings, however, has been greatly retarded because of the strike. The work on the parliament building is not as far advanced as was anticipated it would be at this period of the year, and the work on the group of buildings at Tuxedo for the deaf and dumb school as also the work of the extension of the asylum at Brandon is still in its initial stages.

"In two and a half months the fiscal year will have ended. Under the system of accounting and the daily balances which it provides, the Treasury Department now has a very good idea as to what the accounts will show when the year terminates. It will be gratifying to the public to know that in some respects certain revenues of the province adversely affected by the war are showing some signs of recovery. It is confidently expected that the showing this year will be of a very satisfactory character, and will tend to further strengthen the financial position of the province. The credit of the province is now at a high water mark, and is not exceeded in excellence by any other province in Canada. This is clearly reflected by the low rates at which the government is able to borrow."

NEWS OF MUNICIPAL FINANCE

Changes to be Made in Winnipeg Civic Income Tax Bill—Montreal Finances in Good Shape

Calgary, Alta.—Tax collections for the first week of September totalled approximately $160,000, according to a statement issued by City Assessor Wallace. Last year the date for discount was August 20th, but on account of the postmen's strike this was extended until September 20th. This year the city decided to make it September 20th again, and this has enabled more people to pay their taxes.

St John, N.B.—The discount period on taxes resulted this year in the payment of a total of 75.8 per cent. of the total assessment. The percentage of payment in the discount period last year was 79. The figures in detail as given out by the city chamberlain follow:—

	1919.	1918.
Total assessment	$1,295,573	$1,041,685
Total taxes paid in discount period.	983,182	825,998
Total percentage in discount period	75.8	79
Number of taxpayers in discount period	9,558	8,704

Last year the taxpaying period ended on August 2nd, and in the three days, July 31st, August 1st and 2nd, a total of 3,774 taxpayers paid in $557,173. This year in the three days, September 8th, 9th and 10th, 5,134 taxpayers paid in $704,892.

Toronto, Ont.—A statement issued by Finance Commissioner Bradshaw shows the total expenditure of the city to the end of August was $17,346,172 out of a total amount available of $26,019,258. The only excess over the original estimates in any case is that of special grants for which $11,250 was voted, for which the expenditure is $12,250. The amount available at the first of the year, the expenditures and the balance remaining, are as follows:—

	Amount Available.	Expend.	Credit.
Board of Education	$3,750,000	$2,175,000	$1,575,000
Local Board of Health...	545,860	332,940	212,920
Police department	1,183,838	714,585	469,253
Debt charges	8,759,706	7,105,718	1,653,988
Fire department	1,608,075	1,232,080	375,995
War grants	1,451,485	951,579	499,906
Waterworks	1,063,850	741,789	322,061

Winnipeg, Man.—Hon. Edward Brown announced last week that the provincial government will institute proceedings against the city for the payment of overdue taxes amounting to $48,000, with interest at 6 per cent. per annum since last February. The government's action has been determined by the stand taken before the taxation commission and at other municipal meetings, Mr. Brown said. Previous to Mayor Gray's departure from the city, over one month ago, he stated that he would see that the government received the overdue taxes without delay. The province made application to Alderman Frank O. Fowler, chairman of the finance committee, to instruct the city treasurer to issue a cheque for the amount. "Up to the present time we have not received the cheque, therefore we will institute legal proceedings to collect the overdue taxes," Mr. Brown said.

Changes in the collection clauses of the proposed civic income tax bill will be made as a result of the urgings of a delegation from St. Boniface city council appearing before the civic legislation committee and City Solicitor Hunt.

St. Boniface, in an endeavor to have its income tax levy harmonize with the Winnipeg tax, will regulate its provisions in such a manner that the collections and assessments will not overlap, and will co-ordinate with the city in the presentation of the bill to the provincial legislature in January after they have been passed upon by the Manitoba Taxation and Assessment Commission. Aldermen Leck, Gault and Taylor, representing St. Boniface, appeared by appointment, Alderman Leck explaining the object of their visit, namely, to endeavor to adjust the two tax bills in such a manner that their operations would dovetail. The main issue under discussion was the levying body, which, according to the Winnipeg proposed bill, will be the city in which the taxpayer works, regardless of his domicile. Alderman Leck and the members of the delegation advanced strong arguments in favor of this clause being changed so the city in which the taxpayer resided would levy the tax, and thus benefit according to the man's salary or earnings. The legislation committee adopted a favorable attitude towards this advocation and will go over the St. Boniface draft bill to attain the desired purpose.

Montreal, Que.—The annual report of the city treasurer, the city comptroller and auditor for the year 1918 was issued this week. In substance, the report shows that the total revenue amounted to $16,606,445 as compared with $13,470,801 of the preceding year, or an increase, due to the new taxes, of $3,135,644.

The report, which is the joint statement of the city treasurer and the city comptroller, declares that the total income from all sources for 1918 was $54,381,897. This figure, when analyzed, shows it is made up of not only revenue, but of loans raised during the year, and, as the cash disbursed shows that similar accounts were paid out to redeem these pledges, the larger sum is largely one of bookkeeping and for accounting purposes, leaving the net revenue for administerig the affairs of the city at $16,606,445.

City Comptroller Pelletier, in a tabulated statement, gives the following as the main sources of revenue for the year:—

Current Year Receipts.

Assessments	$ 7,827,396
Water rates	1,402,432
Business tax	1,166,270
Meter rates (and arrears)	567,275
Licenses	526,407
Recorders' Court	175,444
Markets	168,715
Permits and certificates	17,652
Rents and privileges	14,278
Sales of old materials	5,018
Miscellaneous	57,021
Insurance companies' contribution	43,029
Total	$12,496,412
Less refunds	42,156
Total current year	$12,454,255

Arrears.

Assessments	$ 3,956,821
Water rates	107,126
Business tax	88,241
Total arrears	$ 4,152,189
Total general revenue	$16,606,445

As Comptroller Pelletier, in a comparative statement, gives the revenue for 1917 to be $13,470,801, the increase for 1918 was $3,135,644. By the foregoing, the total realty tax collected last year, both on current and on arrears account, amounts to $11,784,217.

The amount of $13,000,000 is due to be paid into the city treasury during the last ten days of September for realty taxes. Unless these are paid by October 1st interest will be charged at 6 per cent., and at the end of November this will be increased to 7 per cent., with the spectre of sheriff's sales in the background for the remainder of the year. There are 70,000 accounts to be sent out, dealing with 160,000 properties. A notification that the taxes have to be paid will appear in the papers, and ten days after that notice appears interest will begin to be charged. Up to September 1st the treasury department had received $2,563,190 in water rates and business tax for the current year as compared with $2,358,499 for the corresponding period of last year.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

INVESTMENTS AND THE MARKET

Ames-Holden, McCready Planning Large Extension—Standard Chemical Company Making New Arrangements

Gurney Foundry Co.—Shareholders of the company are being notified of an increase in the capitalization of the company and a new issue of stock. Supplementary letters patent have been issued authorizing an increase in the capital stock of the company from $750,000 to $2,000,000. The directors now offer for immediate allotment 2,500 shares, $250,000, at par to shareholders of record September 15th in the proportion of one new share for every three shares now held. Payments are to be made, 10 per cent. on application, which must be not later than October 1st, and the balance on or before October 15th.

King Edward Hotel Construction Co., Ltd.—Notice was given in the Ontario Gazette of the incorporation of the King Edward Hotel Construction Co., Ltd., with a capital of $2,350,000. The company has been formed to take care of new additions to the present King Edward Hotel, Toronto. Messrs. A. Jarvis and Co., Toronto, who are taking care of the financing of the new company, state that already $1,000,000 6 per cent. 10-year bonds have been sold, largely to United States investers. There will probably be $1,350,000 preferred stock, paying 7 per cent. dividend, and carrying a bonus of 30 per cent. common stock.

Ames-Holden, McCready Co.—Plans for an extension of the company was the principal topic at the meeting of directors in Montreal last week. President Reider stated that plans for the payment of the 30 per cent. back dividends were under consideration. He also said the leather business was far ahead of last year, both as regards volume and profits, and no selling ahead would be done until next spring. Announcement was made that Sir Herbert Ames had retired owing to his duties with the league of nations, and W. A. Black was elected to take his place. The new Ames-Holden Tire Co., it was reported, will be selling tires next spring.

Maple Leaf Milling Co.—Shareholders of the company have received a circular announcing a special meeting for September 24th, at which the proposal to take over the Campbell Flour Mills Co., Ltd., will be voted on. Shareholders will be asked to confirm a by-law "providing for an increase of $1,000,000 in the preferred capital stock of the company, for power to the company to declare and pay dividends in specie, and for power to the company to fix the form of meetings of directors at less than a majority." Further, it is stated that shareholders will be asked "to consider, and, if thought fit, to confirm a by-law of the company providing for the purchase of approximately 11,000 shares of the Campbell Flour Mills Company, Limited."

Marconi Wireless Telegraph Co. of Canada, Ltd.—The annual meeting of the company was held in Montreal this week, as well as a special meeting of the shareholders.

At the annual meeting A. H. Morse was elected to the beard of directors, and appointed managing director of the company, while E. J. Nally, of New York, retired. J. N. Greenshields, K.C., is president, and Thomas Robb, formerly general manager, is vice-president for the ensuing year.

At the special meeting by-law No. 26 was ratified and adopted by the shareholders. This by-law provides for the reduction in the capital stock from $5,000,000 to $3,750,000 by reduction of the par value of the stock outstanding from $5 to $2.50 per share, and the issue of an additional 500,000 shares of the lower par value. Directors of the company were empowered to allot and issue all or any part of the new stock as they deem advisable for the carrying on of the company's business.

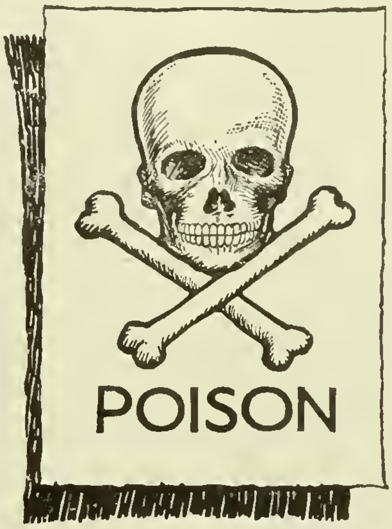
Standard Chemical Co., Ltd.—Announcement is made from Toronto and London, Eng., that L. M. Wood, president

Alcohol is Poison

Doctors Say It Is a Menace in Any and All Forms

FIVE ounces of alcohol will kill a full-grown healthy man within ten hours. Taken in smaller but repeated doses alcohol lets him live longer but gets him in the end. All alcoholic beverages are poison, slow or swift.

Medical science has established that alcohol is a poison and a narcotic chemically related to ether and chloroform, and not a stimulant. A man was once brought out of ether who had taken eight ounces, and a man was once brought out of chloroform who had taken 22½ ounces, but no man ever revived who swallowed five ounces of alcohol at a single dose. The unconsciousness or coma produced by alcohol if not broken within ten or twelve hours is followed by practically certain death.



Alcohol as medicine has been expelled from the American Pharmacopoeia by the American Medical Association.

2.51% Alcohol in Beer Makes it Poison

THE beer of the ballot contains 2.51% *alcohol by weight*—over twice as strong as the beer of the Ontario Temperance Act (2.50 *Proof Spirits*). The Beer of the Ballot is intoxicating. Three glasses of the Beer of the Ballot contains as much alcohol as a glass of whiskey.

When you are asked are you in favor of beer containing 2.51% alcohol by weight—in shops, bars, or anywhere else, vote

"No!"–Four Times–"No!"

Save yourself, save your family, save your country for the destiny God intended unhandicapped by "booze."

Be careful—mark your ballot after each question with an **X** under the column headed "No," or your vote will be lost to Temperance.

Ontario Referendum Committee

JOHN MACDONALD, *Chairman.*	D. A. DUNLAP, *Treasurer.*	ANDREW S. GRANT, *Vice-Chairman and Secretary,* (1001 Excelsior Life Bldg., Toronto.)

53

of the company, has resigned that office, and has become chairman of the board of directors. Mr. Wood is succeeded as president by David Gilmour. At the same time, the formation of a London committee for shareholders of the company resident in the United Kingdom, who hold about 75 per cent. of the capital stock, is announced.

In a circular to shareholders, with which is enclosed the formal circular from the secretary of the London committee, Mr. Wood points out that the new arrangement should work for the good of the company. He reviews the unfavorable position of the company as it was when it entered the period of forced production occasioned by the war, and says: "It became apparent soon after the outbreak of war that certain of the products of the company were vitally necessary to the British government in much larger volume than existing productive capacity of America could provide, and the policy of your board was to obtain the largest possible output, basing the prices upon the cost of the products, not on the high capitalization and of impoverished condition of the company. In the later stages of the war, owing to the increasing cost of labor and raw materials, our working capital requirements steadily expanded, and it, therefore, became necessary to provide strong reserves, regardless of the question of dividends, in order that our policy of maximum production before referred to might be placed in a financial position to withstand any disturbance which might occur upon cessation of hostilities. The company is now going through a readjustment period when curtailment of operations is necessary pending the liquidation of government stocks of materials and the restoration of our normal domestic and foreign trade, which is proving to be a slow process. While this readjustment must run its course, the addition of Mr. Gilmour's practical and technical knowledge should be a matter of satisfaction to the shareholders, as it is to the directors.

RECENT FIRES

Loss Not Heavy—Bush Fire in Alberta Damaged Large Amount of Timber

Beaverton, Ont.—September 17—Home of Mr. and Mrs. J. Lyon, about seven miles from Beaverton, in Thorah township, was destroyed. Three lives lost.

Bedford, Que.—September 11—Farm buildings and contents on the Bingham farm, owned by M. McNamara, on Dutch St., three miles south of Bedford, were destroyed. The loss will be heavy with little insurance.

Cardston, Alta.—September 10—Dry weather and carelessness of campers brought about a serious forest fire in the district south and west of Cardston. A large amount of timber and settlers' property has been destroyed.

Cavendisle, Sask.—September 10—The Roetter hardware store and part of the stock of Empress Lumber yards were damaged. Roetter carried $35,000 insurance, while the loss on the lumber yard was fully covered by insurance.

Okanagan, B.C.—September 3—Barn of T. R. French, on the Coldstream Road, was destroyed by lightning. About one-quarter of the loss is covered by insurance.

Chatham, Ont.—September 12—The plant of the Ontario Steel Products Co., was destroyed. The loss is covered by insurance.

Clandeboyne, Ont.—September 13—Barn of W. Hodgins, on the Coursey line, about three miles from Clandeboyne, was destroyed with contents. Estimated loss, $6,000, with only $1,000 insurance.

Fernie, B.C.—September 8—Garage, post office and other adjoining buildings were damaged.

Hamilton, Ont.—September 13—The plant of the Caledonia Evaporating Co , was destroyed. Estimated loss, $5,000.

Halifax, N.S.—September 10—Moir's carpenter shop on Grafton Street was destroyed. Estimated loss, $7,000. Insurance carried, $5,000.

Inwood, Man.—September 6—Barn of L. Skagen was destroyed with contents by lightning. Estimated loss, $2,500, with $1,150 insurance.

Lachute, Que.—September 15—Barn and contents of A. Filion were destroyed. Cause, spontaneous combustion.

Michel, B.C.—September 6—The Pacific Hotel was destroyed.

Napanee, Ont.—September 10—The Alpine Woods' cheese box factory was completely destroyed. Estimated loss, $5,000, with very little insurance.

Newcastle, N.B.—September 9—The barn of L. Grossman was completely destroyed with contents. Estimated loss, $2,000, with $1,000 insurance.

North Sydney, N.S.—September 6—One of the large sheds at Senator's wharf was destroyed with contents. Estimated loss, $2,000.

Regina, Sask.—September 12—House of E. Snelgrove, Douglas Park farm, was destroyed by lightning. Estimated loss, $6,000.

Westfield, N.B.—September 9—Dwelling, barn and general store of S. V. Prime were destroyed.

ADDITIONAL INFORMATION CONCERNING FIRES

Chatham, Ont.—September 11—Plant of Dowsley Spring Co. was destroyed. Cause, vat of oil boiling over and catching fire. Estimated loss, $100,000. Insurance carried, $105,000.

Hamilton, Ont.—Garage of Edwin Dean was damaged on September 1. Estimated damage to building, $100; to contents, $30. No insurance. Dwelling of Mr. Dean was also damaged. Estimated loss on building, $200; on contents, $30. Insurance to the amount of $1,000 was carried on the building in the Liverpool-Manitoba Insurance Association.

Dwelling of A. Martin, 97 Macaulay St. E. was damaged by fire from the garage. Estimated loss, $250. Insurance carried to the amount of $1,000 in the Liverpool and London and Globe Fire Insurance Co.

London, Ont.—September 3—Piggery of the Ontario Hospital for Insane. Cause, spark from chimney. Estimated loss, $9,000. No insurance.

Port Colborne, Ont.—Practically no damage was done by fire when the government elevator was destroyed by explosion last month, because the building was of fireproof construction. Practically all the grain amounting to about 450,000 bushels, has been successfully removed.

Vancouver, B.C.—Fire Chief Carlisle submits the following report for the month of August to *The Monetary Times*: Total value of property involved, $577,005; total insurance carried, $406,550; total loss, $23,753; total insurance paid, $5,717; total property loss above insurance, $18,036. The following causes were reported: Backfire-carburetter, 2; carelessness with cigarettes, matches, etc., 7; children playing with matches, 4; coal oil poured on kitchen stove, 1; defective chimney, 1; defective range, 1; child's doll catching fire from kitchen stove, 1; electric iron left on switch, 1; overheated stove placed too near wall, 1; sparks (flying), 10.

Woodstock, Ont.—September 7—Barn of P. H. Eyre was damaged. Estimated loss, $400. Insurance carried, $350; paid, $290.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

Industrial Accident Boards and Commissions

Officials of Workmen's Compensation Boards Hold Convention in Toronto—List of Addresses Read—Report of Committee on Statistics and Compensation Insurance Costs—Convention Lasts Four Days

THE sixth annual meeting of the International Association of Industrial Accident Boards and Commissions opened in Toronto on Tuesday, September 22nd. George A. Kingston, Commissioner of the Workmen's Compensation Board of Ontario, is president this year, and presided at the meetings. The convention will end to-day (Friday). Numerous papers were read, round table discussions held, and at the last session resolutions will be introduced and new officers elected for the ensuing year.

This association now has thirty-two active members, including the Department of Labor of Canada, the Department of Public Works and Labor of Quebec, and the Workmen's Compensation Boards of Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia, and Ontario. There are four standing committees, on Statistics and Compensation Insurance Cost, on Jurisdictional Conflicts, the Medical Committee, and the Safety Committee; the first mentioned is the only one that has been active. An annual fee of $50 is charged each active member. Practically all the work is done at the expense of Bureau of Labor statistics of the U. S. Department of Labor, however, and it is found that these dues are higher than is necessary. On the other hand if the association wishes to be independent, higher fees will be required.

Special features of the Toronto convention were visits to the offices of the Ontario Workmen's Compensation Board, and to local hospitals, and addresses by G. D. Robertson, minister of Labor for Canada, and by A. H. Young, manager of Industrial Relations for the International Harvester Company of Chicago.

Among the addresses were the following:—Minimum Requirements in Workmen's Compensation Legislation, by Royal Meeker, U.S. Commissioner of Labor Statistics; Some Comparisons of Workmen's Compensation Legislation, by Harry A. Mackey, chairman of the Workmen's Compensation Board of Pennsylvania; Is a Uniform Compensation Act Possible or Desirable? by Charles S. Andrus, chairman of the Illinois Industrial Commission; Compensation Law Administration, by J. F. Connor, Commissioner appointed to investigate the New York State Industrial Commission; Compensation Insurance under a State Fund, by F. Spencer Baldwin, manager of the New York State Insurance Fund; Defects in Workmen's Compensation Laws, (a paper prepared by the late John Mitchell, and read at the convention); Employees Engaged in Interstate and Foreign Commerce, by L. D. Clark, U.S. Bureau of Labor Statistics; Law Covering all Railway Employees, by D. L. Cease, editor and manager, the "Railroad Trainman"; Some Features of the Workmen's Compensation Law and its Administration, by S. Price, chairman of the Ontario Workmen's Compensation Board; Comparison of Insurance Rates under Different Systems, by E. E. Watson, chief actuary, Ohio Workmen's Compensation; Tests of Efficiency in Compensation Administration, by Carl Hookstadt, U.S. Bureau of Labor Statistics; Study of Accident Experience, by L. W. Hatch, chief statistician, Bureau of Statistics and Information, New York State Industrial Commission; Compensation Insurance Costs, by W. H. Burhop, of the Employers' Mutual Liability Insurance Company of Wisconsin.

In its report to the meeting, the Committee on Statistics and Compensation Insurance Costs stated:—

"In presenting the fifth annual report of the committee, it seems desirable to review briefly the work of the committee from its organization. The beginnings of the committee are to be found in the report of the first meeting of the association held in Chicago, January 12th and 13th, 1915. The meeting adopted a definition of a tabulatable accident, a standard form of a report blank for first report of accident, and a rule in regard to the time of submission of first report of injury. The meeting also provided for 'a permanent committee to which can be referred the item or items that cannot be disposed of at this time.' Under this resolution, the Committee on Statistics and Compensation Insurance Cost was appointed, the immediate task assigned to it being to prepare as expeditiously as possible reports on uniform tables for the establishment of compensation costs, uniform classification of industries, uniform classification of causes of injuries, and uniform classification of nature of injuries. The meeting, perhaps with the thought that the work which it had assigned to the committee was a slight task, directed that the committee make its final report at the regular meeting of the association in September, 1915.

"The first report of the committee submitted to the association held in Seattle, September 30th to October 2nd, 1915, dealt entirely with the classification of industries, the committee believing this to be the most important subject assigned to it, and finding the work more than sufficient to occupy all the time which could be given to committee work.

"The committee unanimously agreed upon and submitted a complete classification of industries by divisions, schedules, groups and classifications which had received the endorsement of an independent conference committee of statisticians. The report was unanimously adopted by the meeting of the association.

"The second report of the committee was made at the Columbus meeting of the association, April, 1916, and printed in Bulletin 201, United States Bureau of Labor Statistics, August, 1916. This report included the classifications of industries amplified by the inclusion of the final sub-divisions under each of the various industrial groups. It presented also classifications of causes of accident, location of industry, nature of injury, extent of disability and degree of partial disability.

"The third report of the committee was made at the Boston meeting of the association, August, 1917, and printed in the October number of the Monthly Review of the United States Bureau of Labor Statistics, as well as in Bulletin 248 of the Bureau. The report presented standard statistical tables on accidents and compensation insurance cost recommended by the committee with a scheme of severity weighting in terms of days lost as a standard measure of

(Continued on page 12.)

FINANCIAL ADVERTISERS' ASSOCIATION CONVENTION

Tendency is Away from Old Style of Dignified Advertising —Variety of Methods for Furthering Business

THE fourth annual convention of the Financial Advertisers' Association was held in New Orleans, La., September 21st to 25th, 1919. Several Canadian institutions are members of this association, and some of them were represented. One of the papers read was by D. McEachern, secretary of the Huron and Erie Mortgage Co. and of the Canada Trust Co., London, Ont., and was entitled, "Gingering Up the the Savings Department." This paper is given elsewhere in this issue.

"The so-called bank advertising of twenty and fifteen, and even ten, years ago, with a very few brilliant exceptions, was so absolutely inane as to be positively pitiful," said R. S. Hecht, president of the Hibernia Bank and Trust Co., of New Orleans, in welcoming the delegates. "I have heard it described as 'tombstone' advertising, and certainly no more appropriate adjective could be used, for it produced just about the same results as do the inscriptions that you will read in the average well-organized and well-conducted cemetery. With the birth of the Financial Advertisers' Association there was sounded the deathknell of the 'Steenth-National-Bank-Capital-and-Surplus-$50,000-Transacts-a-General-Banking-Business' style of bank advertising, and there was ushered in the modern, twentieth century style, now employed by practically all live banking and investment institutions."

Speaking on "Making Them See It," W. A. Schulte, advertising manager of the Cleveland Trust Co., pointed out that display advertising could very well be utilized to supplement regular advertising in newspapers and journals. Banks must realize, he said, that they also have "merchandise" to sell, and the effective methods adopted by commercial institutions could be adapted to banking and trust company work without exceeding whatever "dignity" should be observed by financial institutions.

"There is no reason in the world why any publisher should tell anything but the truth about his publication, provided he has the kind of a magazine that will stand the acid test of close examination," said C. De Puy, publisher of the Northwestern Banker, who spoke on "How Financial Publishers Can Give Advertisers Maximum Service." "Some pubilshers seem to desire to paint beautiful pictures of what their magazines contain and the wonderful editorials they publish, when, upon examination, it will be found that most of the editorials are quoted from other journals, and that the shears and paste-pot have done most of the work.

"If a publisher has found out what his subscribers really want to know, if he has studied their wants and needs, and is giving them the information desired every month through his periodical, he is really satisfying them, and is assisting them to increase their business, and is also making the magazine intensely valuable to the advertisers.

"Maximum service to advertisers can only be rendered when a publication has the standing and the prestige in its particular field and territoriy. The publisher who always tells the facts about his publication, and tells them in a straightforward, intelligent manner, is bound to win the admiration as well as the business of those from whom he would like to secure accounts."

"Standardizing an Advertising Program" was the subject of an address by F. W. Gehle, manager of advertising and new business for the Mechanics and Metals National Bank, New York. By standardization, he said, as applied to financial advertising, was meant the setting up of an ideal. Sameness in style should be avoided. In the case of a regular publication, such as the monthly letter of a bank., however, similarity of design should be preserved.

H. B. Grimm, director of the Department of New Business in the St. Joseph Valley Bank, Elkhart, Ind., described how a department of this kind could be established and successfully operated. Many customers used some of the bank's services, such as the savings bank and checking accounts, but did not use the deposit vaults or the bond department. Through a mailing list, built up from the bank's own customers, business could be increased by calling attention to these other features. He also described the regular advertising methods used, emphasizing the advantages of introducing a human element into advertising.

Helping Sale of Bonds

An address containing many valuable points was given by J. M McMillin, assistant manager of the bond department, Henry L. Doherty and Co., New York, whose subject was "Selling Bonds." He said, in part:—

"Everything that we do which will encourage more new people to become direct participants in the activities of corporations through ownership of stocks or bonds will very likely hasten the day to which we may look forward, when a more unbiased point of view will govern the public discussions of corporation affairs.

"The wage-earner cannot easily see that he is directly interested in the welfare of the railroads and the public utility companies. While he fully recognizes the diminished purchasing power of his own dollar, he too often takes a wholly cynical attitude regarding the problem of a street railway company whose increasing costs of operation must be paid with nickels that will buy no more for the corporation than for himself. He understands the facts well enough, but why should he worry about the matter when he is not financially interested in the company, and when he knows no one else who is, except the officers of the corporation, who, he surmises, are the paid hirelings merely of some absentee owner in the far-away land of the wealthy.

"A farmer readily recognizes the effect upon land values of the increasing prices of food, but he does not so cheerfully acknowledge the propriety of similar promoters' profits or reward for vision and foresight in railroad operations. He grants that these principles extend to the stock he may own in a local bank. He might agree they were equally true in regard to railroad securities, except for the fact that, so far as he knows, these bloated bondholders live back east somewhere, raising the children of the idle rich.

"No shopkeeper would think of offering his store for sale on the basis of its inventory and without consideration of the cost to him in time, money and genius in creating the enterprise; but unless he is a public utility stockholder, it is not easy to keep his point of view in the same place when discussing the so-called intangible values of an electric light or street railway company. Whatever valuation he may see fit to place upon the going concern value of his own business, too readily becomes over-capitalization, watered stock and high finance when the same idea is put into effect by a corporation, none of whose security holders he ever saw or heard of.

"Many of the gas and electric companies are now fully alive to the value of security holders among the customers of their service. The organization of which I am a member has on more than one occasion put aside an opportunity to sell securities involving very considerable sums to well-to-do investors, able and willing to pay promptly in cash, choosing instead the more tedious process of selling the issue in question, a few shares at a time, on extended terms of payment to a large number of people of moderate means. Their aggregate goodwill was deemed to be a consideration of equal importance to that of raising the necessary capital for the program of physical improvements.

"There is no thesis nor text book nor any other means of explaining corporate business to the uninitiated or thoughtless which is in any way comparable with the lessons which will discover themselves to the man who is a stockholder. The reason is quite simple. None of the questions regarding the capitalization of an expected future, or the justice of earnings of large amounts in comparison to the bare dollars invested in physical property, ever arise in the mind of a man respecting his personal business. His coldness of heart in these matters is manifest only in respect to the other man's business, particularly when these principles operate through a corporation owned by absentees.

"We have had a considerable experience in designing methods to encourage the distribution of securities to people of moderate means, and have for years included in our selling plans a scheme of compensation to investment dealers which enabled them profitably to seek small as well as large investors in our securities. Lately we have intensified our efforts to increase the number of stockholders in our companies in the communiities in which we do business."

Look After Old Business First

Similar points were emphasized by Harvey A. Blodgett, president of Harvey Blodgett Co., St. Paul, Minn., speaking on "Wanted: An Old Business Department." He expressed the view that in seeking for new business, banks sometimes overlooked the development of old and unprofitable accounts into satisfactory ones. "New Business departments," he said, "have become quite the vogue in the banking world, and the spirit behind them is, indeed, commendable. However, I could tell you, from first-hand observation, of many a bank, with capably managed New Business departments, with all the approved appurtenances, where the development of old business has scant consideration; and where personal, helpful contacts with customers are accidental, or, at least, wait upon the customers' initiative. My conception of an Old Business department is one dedicated to the purpose of aiding the depositor rear a substantial success upon the foundation of his present status with the bank, whatever his status may be. It will make bank service a real, tangible thing to him. It will organize methods for translating that service and applying it to the affairs of many, rather than of the few. It will establish closer contacts with those to whom, as yet, bank service has little significance."

"Bankers," the speaker continued, "willingly analyze a depositor's financial statement to ascertain whether he is entitled to a desired loan. But what happens when the applicant is turned down? Perhaps there is a brusque denial without explanation; or a statement that 'our committee couldn't see its way clear to grant the loan;' perhaps a word of friendly admonition; but do not these formalities usually close the incident? What is done further to educate that would-be borrower in the important matter of credit building? With what interest is his career pursued by the average bank? What greater service can a bank give than the practical help that will set a novice on the right track? Here is work for the Old Business department. Industry needs more people with good credit. Banks need more depositors who are able to borrow."

"The Human Nature Element," both with the bank's own employees as well as with the public, was dealt with by F. D. Conner, publicity manager of the Illinois Trust and Savings Bank. The employees should be encouraged to cooperate in producing and holding business, and, as regards advertising, "live" copy was not unsuitable for financial institutions. The "House Organ" was discussed by W. H. Marsh, advertising manager of the Burroughes Adding Machine Co., who expressed his faith in regular publications of this kind, in spite of the fact that vast numbers of them have a short career. Newspapers cannot devote much space to a topic of limited interest, hence the trade, financial paper and house organ fulfills this essential function.

Speaking on "Direct Advertising," E. A. Kendrick, president of Redfield-Kendrick-Odell, Ltd., New York, described the policies of some of the larger financial institutions in issuing booklets and monthly circulars of an informative character, and by personal canvassing of possible customers. Virgil M. Harris, trust officer of the National Bank of Commerce, of St. Louis, Mo., described the entry of national banks into the trust field, which was authorized by recent legislation of Congress.

Careful With Free Matter

Publicity should be built from the viewpoint of the newspapers to which it goes rather than of the corporation from which it comes, was a cardinal principle laid down by James I. Clarke, manager of the Service Department of the National Bank of Commerce, New York. His subject was "Legitimate Publicity." This principle, again, is simlar to that which governs the relation between the paper and its readers, for the former must also select and prepare its reading-matter, having in mind the interest of the readers. He referred especially to the supplying of news matter, and emphasized the fact that, if the company was "not doing things big enough and important enough to have a legitimate claim on the news interest of the public, the corporation doesn't deserve publicity. It should advertise and pay for it."

"To be more specific," said Mr. Clarke, "I believe that legitimate publicity concerning a financial institution may be classed into the four following divisions:—

"(1) It is legitimate publicity to offer to the papers news strictly of interest to the banking and financial community, such as the appointment of a new officer. It verges on the illegitimate to attempt to embellish such a personal item beyond its intrinsic value. In this category also falls an announcement of an increase in surplus or capital, or other items of a similar nature. Basically, items of this sort are news of value and interest to the specific financial community.

"(2) Articles and speeches by officers or members of the firm regarding technical aspects of their work, valuable to other practical workers in finance and banking, also constitute a legitimate source of publicity.

"(3) Legitimate publicity for a financial institution may consist of material of interest to specific businesses or trades, such as statistical studies on textiles, metals or other commodities, particular trade conditions, etc. This is legitimate news as long as it is informatve and accurate. It is not legitimate publicity if it is merely a careless array of figures sensationally treated only to serve as a vehicle for riding the name of an institution into public notice. Such items are boomerangs, with infinite possibilities for harm. Material of this sort, to have the requisite germ of news value, should deal with a phase of the subject of current interest and importance to the particular reader for whom it is intended. For instance, there would be no justification for putting out a statistical article on the cultivation of cotton in ancient Egypt; but there is justification in putting out an article on the cultivation of cotton in Egypt of to-day in relation to its possible effect on the American foreign cotton market, provided you have some new and reliable information on the subject.

"(4) Legitimate publicity material may be produced that has general news value by virtue of dealing with the general business situation, or with an economic study of conditions affecting the general run of people, as distinguished from a technical, financial discussion of interest only to those engaged in the practical work of finance, banking or trade.

"The style of publicity discussed in the first category—that is, appointment of officers, changes in financial arrangements, etc.—arises naturally out of the daily workings of a corporation and requires no special equipment. The material discussed in the second category naturally emanates from the officers themselves, and does not necessarily require special equipment.

"Back of the statistical studies and the economic discussions mentioned under the third and fourth categories there should be a substantial expert producing staff if the material is to be worthy of public consideration. This type of publicity requires the greatest effort to produce, but when it is basically sound, rightly handled and intelligently placed its influence for good is widespread, and it is worth the cost.

"This requirement was met in the National Bank of Commerce in New York by the organization of a 'Service Department,' which includes subdivisions devoted to the study of the various aspects of foreign trade; to statistics as applied particularly to commodities; to economics as applied particularly to money, banking, credit and allied subjects; to legislsation affecting business men, banks and corporations. A carefully selected business and financial library and a trained corps of investigators and general workers round out the department.

"I do not believe it would be legitimate publicity effort to offer to the field of journalism material of this sort that did not arise from such a thoroughly equipped organization. It would not be fair to place periodicals in the light of publishing half-baked or unsound material. They should be able to feel that when statistical material with our name attached to it comes to them, they can accept it with faith as to the facts and with confidence as to the point of view. They should at least be able to feel absolutely that they are not liable to mislead or misinform their public."

Edward Bird Wilson, of New York, spoke on "What of To-morrow? Looking Forward into Bank Advertising," and pointed out the defects of the old methods. "Financial advertising," he said, "has learned how to get the money out of the millions of little channels into the fewer bigger channels for increasing production. It is but a logical step from selling Liberty bonds and other war securities to selling municipals and industrials and railroads and utilities and savings accounts. Financial advertising has learned how to get money for worthy enterprises, and one of his greatest accomplishments in the near future, we can easily believe, will be to gather into the channels for constructive investment the millions of small bits of capital that should be used for investment, and akin to that great accomplishment will be the work of inducing millions of persons to save in order that they may have little and big bits of capital to pour into the treasury for the sake of the general prosperity."

"The Advertisement and the Service Behind It" was the subject of an address by W. W Douglas, assistant cashier of the Bank of Italy. Banks should not advertise special features which they have not got to offier, he said, and he also disparaged the use of material, booklets, etc., of too trivial a character. "An advertising campaign," he said, "can be of a type that ought to have the enthusiastic support of the men in the cages. But to accomplish this it need not be a heterogeneous collection of goodwill offerings. It should be an intelligent presentation of the fact that the institution is fulfilling, with the utmost degree of safety and economy, the legitimate purposes of a bank; that it is keenly interested in providing its community, farmers and merchants, with necessary credit, and in helping the salary and wage-earners of the community safeguard their earnings; that it is supporting, in short, all the interests of the community with vigor and enthusiasm."

George E. Lees, of Cleveland, whose subject was, "The Raw Materials and the Architecture of Bank Copy," gave some valuable suggestions. He analyzed the subject into the market or territory; common occurrences which could be advantageously emphasized; design; and construction.

CANADIAN CROPS WILL BE LIGHT

Wheat Estimate is Larger than Last Year, but Yields of Other Grains, Except Flaxseed, Will be Less

THE Dominion Bureau of Statistics issued on September 18th, the following report on the yield and condition of field crops in Canada, as compiled from the returns of crop correspondents at the end of August:—

"In the prairie provinces, the dry weather of June and July shortened the growing period and resulted in one of the earliest harvests on record. As a consequence of the drought, a large proportion of the areas sown in the west to wheat, oats, barley and rye proved either totally unproductive or was cut green. Crop correspondents throughout Canada were asked to return at the end of August their estimate of the percentages of the areas sown to these crops that were entirely unproductive or were cut green; but it is only in the prairie provinces that substantial percentages were reported as unproductive. These percentages range from 5 or 10 up to as much as 28 for wheat and 30 for oats in Alberta and 42 for rye in Saskatchewan. Taking these non-productive areas into account, the following preliminary estimates of total yield for all Canada are arrived at. Wheat 199,239,800 bushels, as compared with 189,976,350 bushels in 1918. Of the total for 1919, 22,875,800 bushels are fall wheat and 176,364,000 bushels are spring wheat. The estimated total yield of oats is 381,359,000 bushels, as compared with 426,312,500 bushels in 1918, of barley it is 65,584,000 bushels as against 77,287,240 bushels in 1918; of rye the yield is 8,010,500 bushels, as compared with 8,504,400 bushels in 1918 and of flaxseed 7,350,000 bushels as against 6,055,200 bushels in 1918.

Grain Yields of the Prairie Provinces

"The estimated total production of wheat in the three prairie provinces (Manitoba, Saskatchewan and Alberta) is 162,326,400 bushels, as compared with 164,436,100 bushels in 1918. In Manitoba the total yield of wheat for 1919 is 36,999,100 bushels, as compared with 48,191,100 bushels in 1918; in Saskatchewan 88,221,000 bushels, as against 92,493,000 bushels, and in Alberta 37,106,300 bushels as against 23,752,000 bushels. Oats yield 234,047,000 bushels in the three prairie provinces, as compared with 222,049,500 bushels in 1918; barley 45,988,000 bushels as against 47,607,400 bushels; rye 5,722,000 bushels as against 6,181,700 bushels, and flaxseed 7,099,000 bushels as against 5,776,000 bushels.

Condition of Late Crops

"Rain showers during August in the prairie provinces did much to revive the later sown field and fodder crops. Their average condition on August 31, for the whole of Canada, expressed numerically in percentages of the average yield per acre for the ten years 1909-18 was reported as follows: Peas 87, beans 93, buckwheat 95, mixed grains 87, corn for husking 89, potatoes 91, turnips, mangolds, etc., 99, fodder corn 97, sugar beets 83 and pasture 89."

Canadian National Railways Reports

Heavy rains have completely tied up threshing operations in the western provinces of Manitoba, Saskatchewan, Alberta and British Columbia, according to Canadian National Railways detailed crop report for the week ended September 13th, covering points served by the line between Port Arthur and the Pacific coast. This being the case a comparatively small amount of hauling and shipping has been done. Decker and Eden in Manitoba have shipped 27 and 63 cars respectively to date, while Rhein, Saskatchewan has shipped 39 cars; 35,000 bushels of grain have been hauled to the elevator from Girvin, Sask., Langham in the same province has marketed 7,500 bushels and Gravelbourg, Sask., 60,000 bushels.

While the yield in Manitoba compares favorably with the other provinces, the grade in all areas reporting is second, third and fourth, probably due to rust. In Saskatchewan the grain in the main where mentioned is of first and second grade, although in a few localities it does go down to third and fourth grades. Only two points in Alberta report on the grade, and in both of these the grade is No. 1.

Encouraging conditions are reported by special correspondents of the Calgary Herald. Wheat in some sections of Alberta will yield from 15 to 40 bushels, oats as high as 85 bushels, and rye and barley as high as 45 and 35 bushels respectively, per acre. The feed situation is quite good, and only in a few places are the grain crops exceptionally poor.

WINNIPEG BUILDING REVIVES

A wire just received from our Winnipeg representative says:—A start is being made in Winnipeg with the housing scheme, and already several loans have been authorized. Permits issued during September are away ahead of last year. While the whole of September, 1918, yielded $144,850, the total for the present month to date is $531,950, or more than three times the former figure. Last October the total was $95,000, but the city officials look for more than double that amount this year. Permits issued to date this year total $2,023,400 as against $1,866,150 for the corresponding period of last year.

NO MORE REAL ESTATE BOOMS WANTED

REPRESENTATIVES of the four cities of Alberta—Calgary, Edmonton, Lethbridge and Medicine Hat—met in Calgary last week for a conference on taxation questions of common interest. The principal topic was whether new subdivisions should be created and improved, and if so, how they should be financed. All were in favor of a policy of economy to avoid over-capitalization of unpoulated suburbs.

On September 17th the following points had been agreed on, and representations along these lines will be made before the Provincial Public Utilities Commission:—

1. That no portion of the city be excluded from the present limits of the city except those portions which may, for topographical and engineering reasons, be excluded by the various councils. Agreed to unanimously.

2. That the city be divided into an inner or residential area, and an outer or agricultural area, in accordance with the policy already outlined at the Edmonton conference. Lethbridge dissenting.

3. That the line separating and defining these two areas be fixed by the city with a view to their development in the near future. This boundary as so defined to be fixed by the Utilities Board, and subject to change only upon recommendation of the city and the consent of the board. Lethbridge dissenting.

4. No new plans of subdivision to be allowed in the outer or agricultural area, except in cases where land is ripe for development for residential purposes, when it shall be brought into the inner area in the manner above provided before being subdivided, the idea being to encourage cancellation of existing subdivisions in the outer area by allowing reduced assessments so soon as plans are cancelled. Lethbridge dissenting to application in details.

5. No utilities, except as required for trunk lines or other engineering reasons, to be extended into the outer area. Lethbridge accepting principle, but objecting to details.

6. The lands in the outer area to be assessed at their value for agricultural purposes. Agreed to with the exception of Edmonton delegates, desiring a maximum valuation extending for a definite period of years. Lethbridge dissenting to application in details.

7. The mill rate to be uniform throughout the city. Edmonton dissenting.

8. No compromise for back taxes, but an extension of the time of payment over ten years. Agreed to unanimously.

"SERVICE AT COST" ON TRIAL

ON September 23rd, the Quebec Province Public Utilities Commissions commenced its hearing of the Montreal Tramways case. A few weeks ago the company was awarded higher rates by the Montreal Tramways Commission, but the city of Montreal and other municipalities concerned were not satisfied with the decision and decided to appeal. Meanwhile, the company must manage with an inadequate revenue. In fact, when the Quebec Commission did meet, the city requested an eight-day adjournment in order that it might have an expert from Chicago, B. J. Arnold, make an investigation of the figures submitted by the company.

R. A. Ross, a member of the Montreal Administrative Commission, pointed out that he did not know for certain whether the affairs of the company were being managed with the utmost economy. He admitted that good service was given, but was doubtful if some of the expenditures were necessary. The company's counsel pointed out in reply that the duty of the Tramways Commission was to decide what fares would be necessary to meet expenses and pay interest on the investment, not to examine the system of management. The interest of the owners was limited to a return of 6 per cent. per annum, and all expenditures were, moreover, audited by the city.

Montreal is the first city in Canada to inaugurate the service at cost system, and the outcome is being watched with interest. Public utility problems have become more and more acute during the past few years, and an equitable solution of the rate question is especially required. The service at cost system has been devised for this purpose; it was of course planned to protect the investors against rapidly increasing costs, but on the other hand, it will protect the public when costs are going down, as is the case at present, and as will likely be the case for some years to come.

THE NATIONAL INDUSTRIAL CONFERENCE

Distinctive among the features of the National Industrial Conference held last week was the ready agreement as to the benefits to be derived from uniformity in labor legislation, and from industrial councils at the meetings of which questions arising in any plant or in any industry could be discussed. Curiously enough, these both concern the form rather than the substance of labor adjustments, for in the case of legislation the conference did not commit itself as to what legislation should be adopted, but suggested that this should be investigated by a commission, which would use existing labor legislation as its material.

On the subject of hours of labor, most of the employers' representatives were convinced that the eight hour day would reduce production. The labor delegates did not debate this issue, but on the other hand would not compromise it, preferring to stand by the eight hour day as part of the program of organized labor throughout the world. The third group, as represented in the committee on the eight hour day, passed a somewhat colorless resolution urging that it should be confirmed by legislation in those industries in which it had already been adopted. On this question, one of the principle subjects of debate at the present time, there was therefore no appreciable progress made.

Regarding the recognition of union, however, practically all employer delegates expressed themselves as not being opposed to organization, provided the employee was not forced to join the union. In reply to a question on this point, Tom Moore, president of the Trades and Labor Congress, stated that the recognition of a union did not imply the closed shop, unless this was specified in the particular agreement. There seems in fact to be no general objection to the organization of labor, provided that every employee is at full liberty to use his own discretion, and that employers are not forced to deal with organizations which extend beyond their own industry, and which can tie it up in spite of the fact that there is no disagreement at the time.

The report of the Dominion government on the cost of bread in Canada, now issued through the Board of Commerce, shows that while the cost of flour has decreased slightly, this reduction has been offset by increases in the other expenses of production. Prices of all raw materials are now falling rapidly, and prices of goods will soon follow, unless destructive efforts to restrict production and increase labor costs continue.

RENTS, ASSESSMENTS AND TAXATION

At a time like the present, when the supply of housing accommodation seems to be greatly exceeded by the demand, there is a tendency to look towards the fixation of rents as a solution of the price difficulty at least. The discrepancy between the supply of and the demand for essential commodities during the war period produced a similar agitation for a general policy of price fixing. Under ordinary circumstances, however, an advance in the price of one of these commodities brings forth an additional supply, whereas in the case of houses the time required to erect them, and the fact that available sites are limited, places an immediate though temporary obstacle in the way of meeting the demand. The practice of price fixing is rapidly being abandoned, and its application to rents would be equally devoid of practical benefit.

In so far as site value is concerned, the rental could of course be fixed at any price below the market; while this would benefit the immediate tenant, yet the benefit of such community value as exists in unimproved land could be appropriated much more easily and fairly by heavier taxes. The fixation of rentals for improvements, on the other hand, could not ultimately help the consumer, who must finally pay such rates as will remunerate the owner in proportion to the return obtainable from capital invested in other fields. The immediate effect of a forcible reduction of rents at the present time would be to still further restrict building activity, which would be quite inconsistent with public policy.

As a preliminary toward economy in administration Sir Wm. Hearst announces that Ontario is to have two more Cabinet Ministers. The province has already a bigger Cabinet than the United States with a hundred million people.—Toronto Globe.

* * * *

The policy of civil "re-establishment" is the one which should continue to be the guide of the Dominion government in its efforts to return all soldiers to civil life with a minimum of friction. In taking this stand the Great War Veterans Association, the controlling forces in which still represent the sane and intelligent majority, is to be commended. The first claim upon our resources is held by the disabled and by the dependents; the healthy and the capable must assume the responsibilities of citizenship without delay.

INSURANCE LICENSES ISSUED

The Merchants Fire Assurance Corporation, of New York, has been given a license to transact throughout Canada the business of fire insurance and hail insurance. This replaces a license issued April 22nd last for the transaction of hail insurance throughout Canada and fire insurance throughout the provinces of Ontario and British Columbia.

The China Fire Insurance Co., Ltd., has been given a license to transact business in the province of British Columbia. The chief agency of the company is to be situated in the city of Toronto, Ont., and Mr. C. R. Drayton has been appointed chief agent.

The following companies have been licensed to do insurance business in British Columbia:—

Continental Insurance Co., licensed to transact tornado insurance and explosion (including riot and civil commotion) insurance. Provincial head office, Vancouver. W. A. Lawson, insurance agent, 736 Granville St., Vancouver, is attorney for the company.

Fidelity-Phenix Fire Insurance Co. of New York, licensed to transact tornado insurance and explosion (including riot and civil commotion) insurance. Provincial head office, Victoria. Arthur Coles, insurance broker, Victoria, is attorney for the company.

National Benefit Assurance Co., Ltd., licensed to transact marine insurance. Provincial head office, Vancouver. James T. Summerfield, insurance agent, 320 Homer St., Vancouver, is attorney for the company.

Aetna Insurance Co., licensed to transact tornado and inland transportation insurance, in addition to automobile and marine insurance.

NATIONAL TRUST CONFERENCE IN WINNIPEG

A conference of officers of the National Trust Co. was held this week in Winnipeg. Among those there were W. E. Rundle, vice-president and general manager; D. W. Cooper, of Winnipeg; W. G. Styles, of Regina; J. D. Gunn, of Saskatoon, and A. E. Scrace, of Edmonton.

Thompson and Adams, insurance agents of Halifax, are replacing their present premises by a modern fireproof office building.

DOMINION CHARTERED ACCOUNTANTS

Membership Figures Show Over 100 Per Cent. Increase Since 1910—Next Convention at Toronto

THE seventeenth annual meeting of the Dominion Association of Chartered Accountants was held in Winnipeg on the 16th, 17th and 18th, September, with headquarters at the Fort Garry Hotel. The number of members attending was 76, seven provinces being represented. Mr. John Parton, of Winnipeg, was in the chair as president and the following members of the Dominion Council were present: From the Association of Chartered Accounts in Montreal, James Hutchinson and F. W. Sharp; for the Institute of Chartered Accountants of Ontario, R. J. Dilworth, A. C. Neff and Bryan Pontifex; Manitoba Institute, F. C. Gilbert; British Columbia, Geo. E. Winter and J. Hayden Young; Saskatchewan, V. J. Ferguson and G. C. Rooke; Alberta, Cecil E. Race and J. B. Sutherland; New Brunswick (by proxy) Mr. John Hyde.

The convention received a formal address of welcome from Sir James Aikens, Lieutenant-Governor of Manitoba, Mayor Gray, of Winnipeg, and Mr. F. C. Gilbert, president of the Manitoba Institute. The president's address dealt with legislation and other matters effecting the profession, the recent Bankruptcy Act and the new Income Tax Act and the Corporation and Loan Companies (Ontario) Act.

On Tuesday the visitors were entertained at lunch by the Winnipeg Board of Trade after which an address was given by Mr. J. W. Dafoe, Editor of the "Manitoba Free Press," on "Pressing Questions of the Day." Mr. Dafoe, as a well-known economic writer and speaker, was able to deal thoroughly and interestingly with the relative rights and duties of capital, management, labor and the community. On Tuesday evening the annual banquet was held.

Uniformity of Standards and Practice as between the eight constituent societies forming the Dominion Association, the number of examinations, the subjects covered, and the inter-recognition of certificates, these were introduced by George Edwards, of Toronto, and W. A. Henderson, of Winnipeg, and provoked considerable discussion, every delegate having some views to express. The Manitoba Agricultural College entertained the delegates at lunch on Wednesday, after which Mr. Batho of the provincial Department of Agriculture gave an address on "Agriculture of the Prairie Provinces," the visitors were then taken round the grounds and had everything explained to them.

Reports of constituent societies showed the following number of members: Montreal 90, Ontario 249, Manitoba 113, Nova Scotia 50, British Columbia 102, Saskatchewan 65, Alberta 66, New Brunswick 6 and "members at large," 4, an aggregate membership of 745 of whom 558 qualified for membership in the Dominion Association, the difference being due to some being members of two institutes and to members out of Canada. This membership of 558 shows an increase of 303 over the membership of 255 in 1910—the date of the reorganization of the association—an increase equivalent to nearly 120 per cent.

The next convention will be held in Toronto in September, 1920, under the auspices of the Institute of Chartered Accounts of Ontario.

INDUSTRIAL ACCIDENT BOARDS AND COMMISSION

(Continued from page 5.)

industrial hazard. Standard definitions adopted by the committee, and included in the report, covered among other subjects, tabulatable, reportable and compensable accidents, medical service, permanent total disabilities, permanent partial disabilities and accident frequency and severity rates.

"The fourth report of the committee was made at the Madison meeting of the association, September 25, 1918, and distributed in mimeographed form. It has not yet been printed, but will appear in Bulletin 264 of the United States Bureau of Labor Statistics, which is devoted to the proceedings of fifth annual meeting of the association. This report is devoted for the most part to a revision of the classification of the causes of accidents with the addition of numerous explanatory notes, the object of which was to make the interpretation and use of the classifications by the various states more nearly uniform. The report also made some minor revisions of the classifications of accident by location and nature of injury and extent of disability.

"During the past year the committee, in continuation of its work, has held one meeting, the regular duties of the members of the committee not permitting the giving of any more time to the work. This meeting was devoted to a consideration of the work of the committee in general, and the drafting of standard tables relating to: (1) Cost of medical and hospital treatment by nature of injury; (2) duration of total disability in permanent partial disability cases; (3) outline of the essential information in an investigation of industrial cripples; (4) outline of an American remarriage table for industrial accident widows.

SPANISH RIVER ISSUE APPROVED

The annual meeting of the Spanish River Pulp and Paper Co. was held in Toronto on September 18th. In the course of the proceedings much comment was made by the shareholders regarding the improved position of the company, and expression given to the view that the outlook for the deferred preferred dividends was considerably brighter than for several years. President G. H. Mead stated that the board of directors is developing a plan which they expect to submit to the shareholders in the near future, by which the matter of back dividends will be taken care of.

The following officers and directors were elected: Geo H. Mead, president; P. B. Wilson, and Col. Thos. Gibson, D.S.O., C.M.G., vice-presidents; J. G. Gibson, secretary, and A. H. Chitty, treasurer; directors, C. E. Mead, T. Watson Sine, G. R. Gray, and T. H. Watson, the latter being the new director on the board. The shareholders gave their approval to the issue of $5,000,000 of 6 per cent. serial mortgage lien notes, of which $3,500,000 will be offered in the near future. These funds are to be used to liquidate on February 1st next the talons and promissory notes issued in respect of deferred interest on bonds and notes due in 1922, and to pay off on March 1st next the second mortgage debentures maturing in 1924.

Results of National Industrial Conference

Agreement on Uniformity of Legislation, Minimum Wage, and Partial Agreement on Industrial Councils — Eight Hour Day not Practical

THE National Industrial Conference, which opened on Monday, September 15th, closed on Saturday, September 20th. Some direct results, in the form of resolutions unanimously approved, were reached. On other questions the discussions disclosed differences of opinion which could not be removed by mutual concessions, and in these cases it was decided that it would be better merely to include the discussions and committee reports in the proceedings, rather than to divide the conference in the form of a vote.

Uniformity of Laws

The report of the Committee on the Need for Unification of Labor Laws of Federal and Provincial Government was adopted unanimously. It is as follows:—

"That the advantage of uniformity in the law relating to the welfare of those engaged in industrial work in the several provinces of the Dominion of Canada, be brought to the attention of the government of Canada and of the several provinces respectively. And that this National Industrial Conference suggests the following as a means toward the end desired—namely, the appointment of a board composed as follows: (1) As respects the Dominion: (a) A representative of government; (b) a representative of the employers; (c) a representative of the employees. (2) As respects each of the provinces: (a) A representative for the government; (b) a representative of the employers; (c) a representative of the employees. And that the Dominion government be requested to ask the government of each of the provinces to select or have selected representatives in respect of the provisions above set forth."

Industrial Councils

The report of the Committee on Industrial Councils was also unanimously adopted. It is as follows:—

"Your committee is of the opinion that there is urgent necessity for greater co-operation between employer and employee. We believe that this co-operation can be furthered by the establishment of joint industrial councils. Your committee does not believe it is wise or expedient to recommend any set plan for such councils. We therefore recommend that a bureau should be established by the Department of Labor of the Federal government to gather data and furnish information whenever required by employers and employees, or organizations of employers and employees, that whenever it is desired to voluntarily establish such councils the fullest assistance should be given by the bureau."

Investigate State Insurance

The following report urging an investigation of insurance for sickness and unemployment was adopted:—

"This committee unanimously endorses the recommendations of the Royal Commission on Industrial Relations, that a board or boards be appointed to inquire into the subjects of state insurance against unemployment, sickness, invalidity and old-age. For the effective carrying out of the above this committee recommends:—

"(1) That such board or boards shall be representatives of interests participating in this conference—viz., the government, the public, the employer and employee, and shall include a representative of the women of Canada.

"(2) That in order to collect data the government shall forthwith attach to the proper branches of the labor or other department concerned experienced investigators, who shall do the necessary research work and furnish to the board, at the earliest opportunity, the result of their investigations.

"(3) That the government shall set a time limit for the receipt of the report and recommendations as to the advisability of enacting legislation.

"(4) While this committee has been appointed to consider only the questions of state insurance against unemployment, sickness, invalidity and old-age, it respectfully recommends that the subject of 'widows' pensions' be added."

Minimum Wage

The report of the Committee on the Minimum Wage, which was adopted, is as follows:—

"Whereas it is expedient that minimum rates of wage should be fixed throughout Canada for women and children, whether employed at a time rate or according to any other method of remuneration; Whereas minimum wage laws for women and children have been enacted in five and are now in operation in four of the provinces; "Therefore be it resolved that this industrial conference recommends to the governments of all those provinces which have not adopted minimum wage laws for women and children the speedy investigation of the necessity for such laws and, if so found, the enactment of such legislation. It is further recommended that the various provinces throughout the Dominion adopt a uniform law and method of application, but that in all cases the minimum of wages for women and children is to be determined from time to time, due regard being given to local living conditions.

"It is the opinion of this conference that the Dominion government should appoint a Royal Commission, composed equally of representatives of labor, employers and the public, to investigate wages to unskilled workers, and issue a report. Representation has been made to the committee that the remuneration paid female school teachers in one of the larger provinces of the Dominion is so low as to discourage the employment of the talent necessary to the proper education of its citizens. Your committee recommends that the various provincial governments be asked to investigate such conditions in the respective provinces, to the end that the children of all the provinces of the Dominion may have equal educational opportunities."

Housing

The government housing schemes were approved by this resolution:—

"Resolved that this conference, recognizing that much industrial unrest, economic loss and social suffering has resulted from poor land speculation and insufficient housing and high rents, heartily commends the action of the Dominion and provincial governments in their united effort to improve housing conditions and provide facilities for the proper and satisfactory housing of our people and recommends increased co-operation of and investigation by the Dominion and provincial governments to find a satisfactory solution of the problem."

Proportional Representation

Proportional representation was approved as follows:—

"Believing that there are defects in the system of electoral representation in Canada, which defects are stated by the Royal Commission on industrial relations to be a contributory cause of social and political unrest; This conference welcomes the declaration of the prime minister, on behalf of the government, that a Speakers' Conference will be called to investigate the merits of the proportional system, and urges that such action be taken without delay."

Minimum Wage

No agreement was reached by the Committee on the Minimum Wage. In order to place their respective views before the government, however, three resolutions were passed. That of the employees is as follows:—

"That we agree with the recommendations and finding of the Royal Commission on Industrial Relations and urge

the adoption of an eight-hour day by-law throughout the Dominion, with due regard and recognition of the Saturday half-holiday where same prevails and its possible extensions. In industries subjected to seasonal and climatic conditions, such as farming, fishing and logging, if it can be established by investigation that the operation of such a law is impracticable, then exemption shall be granted such industries from the operation of such law."

The employers' resolution reads:—

"The members of your committee, appointed to report the employers, beg to submit the following resolution: Resolved, that appropriate government commissions, composed of an equal representation of employers and employees of the various industrial, producting and distributing industries, should be appointed to undertake investigations as to the advisability of hours of labor, principles of the Peace Treaty to the different industries of the country, and to report as early as possible."

The minimum wage resolution of the third group is as follows:—

"We approve of the principle regarding employment and hours of labor set forth in the Treaty of Peace and in paragraphs 50 to 53, inclusive, of the report of the Royal Commission, and would recommend that the governments of Canada enact legislation providing for such in all industries where it is now established; and that by agreement at the earliest opportunity, and after due investigation by a commission composed of representatives of employers and employees representing the various industries, legislation be enacted by the governments of Canada providing for the same to be extended in all industries where it can be applied, having due regard to the curtailment of production and distribution."

DEPOSITS UP BUT TOTAL ASSETS DOWN

Canada's savings deposits during August increased over $21,000,000 to a total exceeding $1,196,000,000, as shown by the bank statement issued from Ottawa on September 24th. This statement will be given in full next week. Savings have now been steadily increasing for some months, probably in anticipation of the coming peace loan. Demand deposits for last month increased by only $124,000 over the July figures, which were more than $21,000,000 below the figures for June. Deposits outside of Canada fell off $56,000,000, but the figures, which are $238,368,859, are more than $18,000,000 over the deposits last year. This decrease offsets the $54,000,000 increase in July. Call loans in Canada advanced $2,300,000, which is a sign of more business activity than in the previous month, when call loans were down $2,000,000 from the June figures. Call loans outside of Canada during August were off $3,921,000, and current loans in Canada were down $2,600,000, while current loans outside of Canada increased nearly $9,000,000. This increase is due in a large measure to the extension of Canadian banks in other countries. Total liabilities were down $60,000,000, while total assets showed a decline of $58,000,000, as compared with July. The following is a summary of the bank statement made public at Ottawa, with comparisons:—

	August, 1919.	Changes from July, 1919.
Reserve fund	$ 122,273,225	+ $ 42,853
Note circulation	122,461,915	+ 15,554,974
Demand deposits	584,300,855	+ 124,120
Notice deposits	1,196,632,931	+ 21,540,778
Total deposits	1,780,933,786	+ 21,664,898
Deposits outside Canada	238,368,859	— 56,281,818

Total assets	2,713,809,050	— 58,933,538

PERSONAL NOTES

Mr. William Harvey, managing director of the Standard Trust Company, Winnipeg, Man., has been on a tour of inspection of the western provinces as far as Vancouver, B.C.

Mr. H. A. Kenty, after an absence of five years has returned to Winnipeg as western manager of the Continental Life Insurance Co. is in Winnipeg this week. The company some years ago.

Mr. John G. Richter, general manager of the London Life Insurance Company is in Winnipeg this week. The company has pursued an aggressive policy in western Canada, where J. G. Stephenson is general agent for the four provinces.

Mr. Joseph Innes, from the head office of the Sovereign Life Assurance Company, Winnipeg, has been appointed manager of the company for Ontario, with headquarters in Toronto. Mr. Innes was overseas with the Canadian forces for some time and got back to Canada last spring.

Mr. J. K. MacDonald, president and general manager of the Confederation Life, is visiting western Canada accompanied by his son, C. S. MacDonald, who is assistant to the president of the company. Mr. MacDonald is considering the question of further investments in the western provinces.

Mr. W. G. Falconer has been appointed manager of the Norwich Union Indemnity Company with head office in New York City. The company will do practically all classes of casualty, fidelity and surety business and has been organized by the Norwich Union. Mr. Falconer will be remembered as the former Canadian manager of the General Accident Assurance Company of Canada. At present Mr. Falconer is assistant secretary of the Hartford Accident and Indemnity Company. He expects to assume his new duties October first.

Lieut.-Col. H. L. de Martigny, just recently returned from overseas, will have charge of the sale organization and statistical department of Rene T. Leclerc, investment banker, in Montreal. Lieut.-Colonel de Martigny has seen long service in France, having left with the original 22nd Battalion, and recently returned to this country in command of the 10th Canadian Reserve Battalion. He was formerly secretary to the chairman of the Transcontinental Railway and was also connected for several years with the office of the vice president of the Equitable Life Assurance Society of the United States in New York.

Mr. A. Gordon Ramsay, assistant superintendent of the Canada Life has been visiting the west and is well satisfied with the outlook. With reference to the volume of business which will be written this year, Mr. Ramsay said that the company would take all that was offered. Last year the total amount was $25,000,000 and this year it became evident that there would be a possibility of writing a total very much in excess of this sum. The actuary of the company was asked to state what amount could be taken and the sum indicated was between $40,000,000 and $50,000,000. It is now clear that the volume for this year will exceed $40,000,000 and will probably be in the neighborhood of $45,000,000.

OBITUARY

Mr. James C. McGregor, senior member of J. W. Carmichael & Co., died at New Glasgow, N.S., on September 24th, at the age of 69 years. He was a director of the Nova Scotia Steel & Coal Co., the Eastern Car Co., and J. Matheson & Co.

The Imperial Life Assurance Co. has purchased a property adjoining its head office building on Victoria St., Toronto.

Official Administrator for the Judicial District of Weyburn

WINNIPEG STILL URGES INCOME TAX

Too Great a Burden on Land, and Too Many Exemptions—City Committed to Large Expenditures

THE city of Winnipeg has again presented its case for a civic income tax, to meet the continually increasing expenses of administration. Last year a plan was prepared and a draft bill drawn up, but the provincial legislature did not grant the necessary powers because the whole subject of public revenues was to be gone into by the Manitoba Assessment and Taxation Commission. Before this commission, which is now sitting, the city of Winnipeg presented the following statement:—

"The city of Winnipeg derives its revenue as follows: Realty tax, based on the assessment of land and buildings, netting $5,428,540; business tax, based on the assessment of the annual rental value of the premises occupied by every person, firm, partnership, corporation or corporate body that carries on business in any way in the city, netting $375,436; a system of local improvement taxes is also levied, which is more individual in its scope than the other taxes mentioned above, but which provides for certain special improvements on the public thoroughfares of the city, netting $1,083,091; some civic revenue is derived from special franchises (Winnipeg Electric Railway), netting $106,500; a number of businesses, which are not in a sense get-at-able easily for taxation, are subject to licenses, netting $510,760."

Extracts from the Winnipeg charter, setting forth the allowable exemptions from taxation, including lands held for the government, school lands, agricultural buildings, cementeries, churches, with certain reservations, were quoted in the document: "So far as information would be gathered from the various hearings by the board of valuation and revision, there is little opposition to the present law relating to the assessment of real estate, except from the advocates of single tax, but there is a widespread feeling that land is bearing an unreasonably heavy burden of taxation, taking into consideration the fact that it is the main source of revenue for fire protection, police protection, public schools and sanitation or public health. It is also submitted that so many exemptions in the city, including churches and charitable institutions, from general taxation is rather a hardship in getting an equitable assessment. Charitable institutions sell their properties to speculative companies at high prices, and the city does not share in the increased price derived from the sale of these properties, but that question will be taken up later on."

"The business tax was substituted for the personal property tax in 1893," the statement said, "the rate being at first the same as the general assessment rate. The various changes were outlined in the business tax methods, the present basis being the annual rental value, determined by the assessor. The ever increasing demands of citizens for expensive charitable institutions, for elaborately equipped places of recreation, for the most modern services and utilities necessarily means that the tax rate must go up," tho statement continued, "because the council has to collect these demands made upon the municipal exchequer, and as the main source of revenue is the land and two-thirds of the buildings thereon, the tax rate must climb in order to meet new and expensive undertakings."

City Investments

The following list of municipal enterprises was given:—

Invested in the hydro-electric power works, $8,007,334; bonded indebtedness, $7,402,000; revenue from plant, $1,097,196; reserve and depreciation accounts, $1,958,244.

Invested in the water works plant, $7,140,433; bonded indebtedness, $6,990,768; revenue from plant, $719,308; reserve and depreciation accounts, $1,809,966.

Invested in street lighting system, $504,724; bonded indebtedness, $641,375; ($136,651 unexpended). No revenue is derived from this plant. Reserve and depreciation, $128,095.

This is exclusive of the ornamental street lights costing $225,576, for which debentures were issued and retired.

Invested in stone quarry, $58,930; (balance outstanding). No bonded indebtedness, nor revenues, nor depreciation or reserve accounts.

Invested in fire-alarm system, $89,168; (balance outstanding); bonded indebtedness, $92,000; revenue from operation, $1,765; reserve and depreciation accounts, $16,649.

Invested in police signal system, $132,517; bonded indebtedness, $171,402; reserve and depreciation accounts, $25,921. No revenue is derived.

Invested in the high-pressure plant, $1,275,232; bonded indebtedness, $1,264,632; reserve and depreciation accounts, $288,507. No revenue is derived.

Invested in the asphalt plant, $77,938. No revenue, depreciation or indebtedness.

Invested in gravel pit, $68,814; bonded indebtedness, $68,000. No revenue nor reserve.

Invested in municipal hospitals, $836,876; bonded indebtedness, $836,189; revenue from operation, $28,218; reserve and depreciation accounts, $107,139.

Invested for garbage collection, $220,000; bonded indebtedness, $220,000; revenue from operation, $1,516; reserve and depreciation accounts, $44,570.

The foregoing figures are as at April 30th, 1919, although some expenditures have since been made.

Uncontrollable Expenditure High

"One has only to look at these figures in order to see the amount of controllable and uncontrollable expenditure in connection with the city's administration. Practically one-quarter or one-fifth of the total taxation of the city is absorbed by the school board, which is an independent organization whose demands must be met by the municipal council under any circumstances. Then there is the special levy for the parks board and the special levies by the provincial government.

"The estimated expenditure for the year ending April 30, 1920, is $6,464,846 and in the provision for this expenditure the estimated revenue is: From general or realty taxation, $5,428,540, or 83.7 per cent.; from business tax, $375,436, or 5.81 per cent.; from miscellaneous sources, such as licenses, police court fines, $617,260, or 9.55 per cent.; unexpended balance of previous fiscal year, $43,609, or 0.67 per cent. It will thus be seen that nearly 90 per cent. of the current civic revenue is derived from direct taxation and approximately nine-tenths of this is levied upon the real estate."

A statements of lands exempt from taxation was given showing the following totals: Lands, $21,617,340; buildings, $20,077,630; total, $41,694,970. This included churches, schools, city property, hospitals and educational institutions, government lands and railway lands.

Too Many Exemptions

"The argument in support of taxing land and exempting the buildings is that it not only affords considerable financial relief to the churches, but it is also a means of encouraging church buildings of a high class. To avoid the sudden infliction of the tax on church land, it was suggested that 20 per cent. be imposed each year until the full value of the land is reached. Such a recommendation was made by tho Phippen commission, and, after adoption by the city council, the necessary legislation was secured. However, at the end of one year, the legislature, upon representation of church interests, repealed the law and reversion was made to that formerly in force. Chief among those entirely opposed to church exemptions were the advocates of the single tax; since, however, their system in itself untaxes buildings, they are in reality opposed to the exemption of the church lands. In support of this they maintain that the increased value of church land is the creation of the community, exactly the same as that of theatre land, store land or factory land, and that the church ought accordingly to be taxed on land values. The other objections were against exemptions in principle, since they essentially mean either patronage or the shirking of a burden which ought to be common to all.

"Some churches have made a profit from the sale of their land, particularly in the down-town districts. Some of the land and churches have been converted into commercial purposes, and again come under taxation. In other cases a church has been held as a speculative venture and the church leased to a religious organization in order to hold it out of taxation until the rise in value of the land is such that the church property can be sold at a handsome profit. It has been suggested, to meet a condition of this kind, that there should be imposed a tax on the sale and transfer of churches and charitable institutions. It was not thought advisable to discuss the question of local improvements, as they are of a local nature, and, therefore, the principle having been adopted, needs no general change, so far as legislation is concerned."

GINGERING UP THE SAVINGS DEPARTMENT

An Address Delivered at the Fourth Annual Convention of the Financial Advertisers' Association, New Orleans, September 23rd, 1919

By D. McEachern

HAVING been asked to address this convention as a representative of the association from Canada, I shall chiefly confine my remarks to conditions and methods prevailing in my country. It is my hope that the suggestions herein—if not found new—will at least prove helpful to some of the audience by reminding them of available and perhaps hitherto untried methods of building a savings department.

For many months past, signs have not been lacking to show that unusually careful attention is being given by officials of financial institutions to their savings departments.

North of the border, the casual newspaper reader cannot but notice the distinct change that has taken place in the advertising of this department. Judging from newspaper space and from the frequency of insertions many important financial advertising appropriations have of late been heavily increased, while the tone of the appeal is noticeably warm, positive and full of good argument. Coupled with this awakening to the possibilities of good advertising is to be seen the opening of new savings branches in all parts of the country—wherever a foothold for such business can be secured.

A general all-round recognition of the savings department has taken place in Canada. The focus of the successive Victory loan campaigns was of necessity upon the saver, and the vigorous, although belated, government campaign on behalf of thrift stamps has undoubtedly made a deep impression upon the Canadian public. Canadian financial institutions have not been slow to realize the need on their part of an energetic follow-up in order that the educative effect of these campaigns might be conserved and broadened.

Savings deposits in Canada totalled in July last over $1,170,000,000. In July, 1914, the total was but $671,000,000, an increase of over 75 per cent. having been recorded during the past five years. This showing is noteworthy in view of the magnificent support given by the Canadian public to five internal loans during that period. Several of the more useful methods by which new ginger, energy and enthusiasm is being instilled into the savings departments of Canadian institutions may be of interest.

Problem of the Dormant Account

Advertising, like charity, should begin at home. In every savings ledger there are numerous accounts which for many months, perhaps for years, have been undisturbed by the addition of a deposit. The owner of the account may now be unable to save or he may have fallen into extravagant habits, and it is also quite possible that for some reason he now deposits in a rival institution around the corner.

The first step in winning back this customer is to make certain of his correct address. This question of depositors' addresses in these days of changes is of prime importance, and it is worth time and expense to keep them up to date. Good results in winning back old customers have been obtained by:—

(1) Securing correct address; (2) mailing a well-worded letter of invitation to revive the account; (3) mailing more well-worded letters containing "reasons why" until the end is gained or some good cause for ceasing the follow-up presents itself.

One letter that pulled told the depositor that his balance on the date of last deposit was $187.53 and if $20 each month had since been added he would now be the possessor of $540.22, including compound interest.

The Joint Account

Wherever the joint account system has been used it has been found a success. It is a convenience to depositors and causes but little additional work to the savings department staff. Institutions which extensively advertise the joint account find they are combining a much appreciated service feature with a business-getting and a business-holding force. Women are no longer content to allow the family purse or the family savings account to wholly remain in the possession of the nominal head of the household. The joint account steps into the breach and amicably solves this financial problem in many households. By its adoption, funds on deposit may be added to or withdrawn at any time by either of two parties or by any one of two or more parties. In the event of the death of one the money automatically belongs to the survivor or survivors without recourse to any form of legal procedure.

A joint account is opened in this fashion: "John Jones or Mary Jones or either or the survivor," and for purposes of protection to all concerned the signatures of both are secured on a card on which appears a declaration reading as follows:—

"We hereby declare that all moneys which are or may hereafter be deposited in above savings account are held by us on a joint tenancy. and are payable in the event of death of either of us to the survivor, and we hereby agree and direct that all such moneys may be legally paid to and received by either of us on a cheque or receipt signed only by such individual, and that such payment shall discharge The .... (institution's name) .... from all liability whatsoever in connection with the moneys paid."

The above wording is widely used, but of course it may be varied if thought advisable. A growing tendency has been noticed to use this joint savings account privilege to dispose of funds after death—in this way saving much inconvenience, together with the delay and expense attendant upon the probating of a will.

Women Depositors

Speaking of women depositors, have you ever analysed the new accounts opened in your savings department during, say, a twelve-months' period? If so, you will have noted the large and growing proportion of women depositors. This is, I believe, a general condition and it is leading financial advertisers into broader fields of endeavor. The majority of the urban male population cannot call at the savings wicket during office hours. The mechanic's wife is therefore not only responsible for the household expenditure but is also entrusted with the maintenance of the family savings account. Likewise to a large extent this is true in the case of the farmer's wife. A goodly portion of the farm income is actually earned by her in the dairy, poultry yard, garden and field. Why then should the bulk of financial advertising be aimed at the male population? Should not a substantial portion be expressed in the language that would best appeal to the good sense and thriftiness of women?

A somewhat neglected feature of savings department operation is the pass book. It is the connecting link between the depositor and the department, and a neat and well-printed book will repay an extra price per thousand. A badly soiled or torn pass book should be replaced by a new one after the ledger keeper has secured the depositor's permission.

When a savings account is wholly withdrawn, what does your ledger keeper do with the pass book?

The widespread practice of retaining the book at the wicket because of some musty regulation is open to criticism. If the depositor is allowed to surrender his pass book simply because he is temporarily in need of funds, his connection with the savings department is completely severed. He should be told to keep the book as doubtless it would be found of use at a future date when he has further funds to deposit.

Departmental Co-operation

It has been truly said that the savings department is the nursery for the other departments of a financial institution. Since, therefore, this department furnishes prospects who may be readily persuaded to use other branches of the institution's activities there should be reciprocation.

In the investment, trust, safe deposit box, real estate and other departments will be found hundreds of good customers who for no particular reason keep their savings accounts elsewhere.

The personal invitation of officers, tellers and clerks to customers of these departments with whom they come in

OUR CHARGES

Our charges for the management of an estate are no more and often less than those of a private executor. They are fixed by the Surrogate Court Judge when he audits the estate accounts. The amount which he allows, as the Order of the Court reads, is " a fair and reasonable allowance for our care, pains, trouble, and time and personal disbursements expended in and about the administering, arranging and settling the affairs of the said estate."

contact will accomplish good results at no additional expense to the institution. Oftentimes the mere suggestion that maturing interest coupons, rentals and other income be deposited at the savings wicket secures choice and profitable business and this form of co-operation supplies in many cases the missing link between general savings, advertising and the actual opening of accounts.

Personal enthusiasm on the part of every person connected with the institution is an important consideration when laying plans for a greater savings department. With this aid, carefully prepared programs will attain their goal with a minimum of expense and effort.

It has been amply proved that the interest of employees in the forward progress of any business is best secured when a system of reward for well-doing is worked out which will include all on the pay-roll in a fair and equitable manner.

The Question of "Stunts"

Freak advertising of any kind has never been very successful in Canada. Financial advertising of a sensational nature in the accepted sense of the term is regarded as a grave error, and seldom has it pulled satisfactorily.

The month in and month out, year in and year out, unrelenting persistence in presenting the savings story, while perhaps irksome at times to the stirring soul of the advertising manager, is nevertheless the safer and less expensive method of securing savings rather than the spasmodic effort which too often is tinged with sensationalism.

Present-Day Conditions vs. the Savings Account

The 1919 high cost of both necessities and luxuries imperils the onward progress of the savings account in many households. Any encouragement, incentive or even any argument that can be supplied to aid struggling savers should be gladly given. A ray of hope and incidentally a good argument to bring to the attention of depositors will be found in the recent government assurance that many articles of everyday use will fall in price during 1920. Every dollar therefore that can be saved this year will later on have a greater buying power.

Yet it will be readily agreed that it is the cost of extravagant living which robs the savings account of much of its due. A blast of thrift is imperatively needed throughout the land and from whom could the necessary thrift education better come than from the financial institutions?

The reward that surely comes to institutions which spend money to promote thrift cannot by any means be computed in dollars and cents. The reward is to be found in the goodwill of the thousands who have benefited by the sound advice and by the encouragement of a courteous service. It is to be found in the establishment of happy homes, the betterment of living conditions and in a growth of national prosperity.

NEW BRUNSWICK SUCCESSION DUTIES

On September 19th the New Brunswick Court of Appeal issued its judgment on the claim of the province for succession duties on certain charitable bequests, totalling $150,000, made in the will of the late A. R. McClellan.

It decided that the province has the right to collect 10 per cent. on $15,279, with interest at 5 per cent. The right of the province to double assessment tax on the ground that it had not been shown that the bequests were not to go out of the province was negatived by the decision.

NEW GUARANTEE CO. DIRECTORS

The Guarantee Co. of North America, Montreal, has announced the election of two new directors as follows: Samuel H. Miller, vice-president of the Chase National Bank, New York, and Lewis Lillie, vice-president of the United Gas Improvement Co., Philadelphia, have been elected to the local board of the Guarantee Co. of North America, in their respective cities.

CONVENTION OF EASTERN BOARDS OF TRADE

Discusses Trade and Transportation—Want Ports Used in Winter

At the annual meeting of the Maritime Board of Trade, held in Moncton, N.B., on September 18th, a resolution was unanimously adopted favoring union of the maritime provinces. The board elected the following officers for the ensuing year: H. J. Logan, Amherst, president; Miles E. Agar, St. John, first vice-president; J. O. Hyndeman, Charlottetown, second vice-president; James T. Burchell, Sydney; J. E. Masters, Moncton; E. A. McCurdy, Newcastle; Leroy Holman, Summerside, executive committee; Thomas Williams, Moncton, secretary-treasurer. The last meeting was held in Summerside, P.E.I., in 1915, sessions having been omitted since then owing to unsettled conditions.

In his address the retiring president, E. A. McCurdy, of Newcastle, N.B., urged that boards of trade, instead of "marking time," should make their influence felt in the affairs of the Dominion. He also suggested provincial organizations as an intermediate stage between the local boards and the maritime board. The subjects discussed, with the name of the board taking the leading part, were:—

Unit System of Management Needed for Canadian National Railways, with Headquarters for Eastern Unit in the Maritime Provinces—By Moncton, N.B., board.

Development of National Ports on the Atlantic Coast—By St. John and St. Stephen, N.B., boards.

Revision of Railway Freight Rates that Discriminate Against the Lower Provinces—By Bathurst, N.B., board.

Inquiry as to the Proportion of Work of the Geological Survey of Canada in the Maritime Provinces as compared with the other Provinces of the Dominion—By Moncton, N.B., board.

Transportation: (a) Standardization of the Prince Edward Island Division of Canadian National Railways throughout at the earliest possible moment. (b) The securing of a Car Ferry Steamer to supplement the present Car Ferry Steamer between Borden and Tormentine. (c) The placing of SS. Northumberland, which is now idle in Charlottetown—By Charlottetown, P.E.I., board.

Closer Relations with the British West Indies—Moncton board.

Better Transportation Facilities, including Water, Air and Rail, for the Maritime Provinces—By North Sydney, N.S., board.

Maritime Union—By Amherst, N.S., and Bathurst, N.B., boards.

Closer Relations between Employer and Employed—By Amherst, N.S., board.

Reorganization of the Military Forces of Canada—By Charlottetown, P.E.I., board.

After the discussion on the second subject, the following resolution was passed:—

"Resolved, That this Maritime Board of Trade, recognizing the extremely important relation which the national ports of the maritime provinces bear to the progress and prosperity of Canada as a whole, and appreciating the urgent need for their early development along comprehensive and efficient lines, would earnestly recommend to the government of Canada the necessity for expediting the development and equipment of these ports, so that the fullest possible use might be made of them in forwarding the ocean trade of Canada, while at the same time the development may be hastened of other strategically situated maritime ports which must ultimately share in the overseas traffic of the Dominion.

"Further resolved, That this board would urge upon the business men of Canada the importance, both from a commercial and national standpoint, of utilizing to the fullest possible extent the ports of the maritime provinces in preference to foreign ports, thereby adding to the wealth and efficiency of the nation's ocean outlets, and at the same time aiding in the development of Canada as a world power."

ORGANIZATION OF CANADIAN INDUSTRY

Must Gain Strength by United Effort and Should Also Have Advantage of Credit Facilities

IN the annual report of the Department of Trade and Commerce for the fiscal year ended March 31st, 1919, special emphasis is laid on the work which has been accomplished in the way of the organization of industries into groups. This report, which has just been issued, and which is signed by the Deputy Minister, says in part:—

"In presenting the annual report of the Department of Trade and Commerce last year the undersigned referred to the German Cartel System and also laid considerable stress upon the opinion that it was imperative that the various industries in Canada should organize upon such basis as would permit unity of effort in the prosecution of foreign trade. The undersigned is glad to be able to report that this suggestion has been received with marked favor and has led to active measures being taken by a considerable number of Canadian industries to combine for the prosecution of foreign trade.

"Events in the last few months have but tended to accentuate the importance of this suggestion. Information has been received from many countries that industries generally have formed themselves into permanent organizations for the purpose of vigorously prosecuting foreign trade. These associations have not only been formed to include manufacturers and exporters, but producers as well. The object of these associations has not in any way been political or general, but economic, and confined within the limits of their particular industry. Their functions are not altogether to produce, that remaining with the individual, but to consider and advise among themselves as to all questions affecting such industry, viz., production, finance, distribution, sale and export. Hence the action of Canadian firms is of the highest importance, for it will enable them to compete at least on equal terms with exporting associations of other countries.

The German Cartel System

"Such organizations were the basic factors in the extraordinary commercial success of Germany in pre-war days. The German Cartel was not a trust as we know it. The latter is the absorption into one great corporation of many smaller concerns. The cartel was a federated organization which each company or firm entered willingly and in which each was permitted to exist as a separate concern. The cartel was a co-operative organization for the purchase, sale, and distribution of output. The profits were distributed in proportion to output.

"But there were other more important functions of the cartels, which no doubt largely contributed to the expansion of Germany's trade. Many of them maintained institutions for apprentices, testing stations, and laboratories, and furnished sums of money to develop individual industries. Prizes were offered to working men for technical essays. Some of the larger cartels were formed for the purpose of making their industry felt in the preparation of commercial treaties. Many of them interested themselves in various economic reforms, others in foreign exhibitions. Confidential bulletins, in some cases, were distributed among the members, and many maintained departments to assist members with credits. Thus, in all matters affecting the internal and external trade of Germany, the various industries were in a position to furnish the government promptly with any information it desired with respect to such industries, whereas in Canada, unfortunately, the Department of Trade and Commerce, when it desires any special information, has to resort largely to circulars, which take much time, and the results are frequently disappointing.

United States Webb Act

"The necessity for organizing for the purpose of meeting foreign competition abroad has been promptly recognized in the United States in the passage last April of what was known as the 'Webb Act.' This Act permits associations of firms or corporations to engage in United States export trade. It is entitled 'An Act to permit Export Trade and for other Purposes.' It applies solely to trade and commerce in goods, wares, or merchandise exported, or in the course of being exported from the United States or any territory of the United States to any foreign nation. 'Association' is defined in the Act as meaning any corporation or combination, by contract or otherwise, of two or more persons, partnerships, or corporations.

"It is clearly provided that any associations formed under the Act shall not enter into any agreement, understanding, or conspiracy, or do any act which artificially or intentionally depresses prices in the United States, or which lessens competition within the United States, or otherwise restrains trade therein.

"Every export association is required to register with the Federal Trade Commission, setting forth the location of the offices and the names and addresses of its officers and stockholders or members, and, if a corporation, a copy of its certificate or articles of incorporation and by-laws, and, if unincorporated, a copy of its articles or contract of association. On the first day of January of each year thereafter the same information must be filed with the Federal Trade Commission, as well as any further information which the commission may require.

"It has been said that the passage of this Act has been followed by considerable activity among manufacturers of importance in the United States, and a great deal of interest has been manifested in the scope and provisions of the law. A number of associations have been formed quietly so as not to hasten similar action on the part of rival groups of manufacturers. These export associations or organizations were put into readiness to take immediate advantage of the world trade situation the moment peace was in sight.

Export Trade Backed by Financial Strength

"The passage of this Act means that great organizations will now go after foreign business with strong financial backing without having to meet the competition from other United States exporters, which cannot be escaped by individual exporters under the old export practice. Such organizations will permit United States exporters to undertake the development of foreign markets with a more intelligent understanding of those markets and their needs than they have ever possessed before.

"These organizations immediately began gathering information as to the industrial needs of the markets of the world. The most effective methods of concentrated development of markets are employed, rather than firms relying on their individual effort to obtain commercial information abroad and find a market for their goods. These associations will undoubtedly wield a powerful influence in the exploitations of United States goods.

"One advantage possible with such organizations, which is of paramount importance, is that the government would thereby be enabled to obtain any information desired respecting the output and capacity of a whole industry upon the despatch of a telegram to its central office instead of a delay of many weeks which is necessary to communicate with many separate concerns scattered all over Canada.

"Experience of the war has shown conclusively that much valuable time was consumed in trying to obtain the names of manufacturers and others who might be able to supply a certain article, and at times some firms were missed owing to their not having been long in business.

"Before the war German firms were required by law to register with the Chamber of Commerce within their district, and the government, by means of the Cartel System, or through the respective Chambers of Commerce, could quickly get any information desired with respect to a whole industry; and where German foreign trade agents reported contracts to be let or goods required, the government was in a position to place expeditiously before all firms interested, through such central channels, all information as to goods required abroad.

Individual Effort

"While the organization of many industries will result in great advantages in the prosecution of export trade, there are certain lines of manufacture and production which, for various reasons, cannot be said to lend themselves so advantageously to the co-operative idea. Such organization

Booze Costs Years of Life

Insurance Records Prove Moderate Drinking Increases Death-rate 35%

LIFE Insurance figures prove that the excess of deaths among moderate drinkers over abstainers runs from 11% to 74%. It is the business of Life Insurance Companies to know the risks a man takes when he uses liquor. These Insurance men have no theories to prove and no doctrine to preach. Their figures are as cold as ice, and they make you pay for the risks you run. To them it is simply business—a matter of dollars and cents. But to you it is a matter of life and death.

Actuarial Comparison of Death Records

Ages	Total Abstainers	Moderate Drinkers	Excess Deaths Among Moderate Drinkers
20-30	4,221	4,617	11%
30-40	4,201	7,041	68%
40-50	6,246	10,861	74%
50-60	13,056	18,524	42%
60-70	29,078	34,568	19%

From tables prepared by R. H. Moore, Actuary of the United Kingdom Temperance and General Insurance Company, based on Records of over 60 years' experience.

Are You Willing to Die Before Your Time for Sake of Booze?

THE number of deaths among moderate drinkers averages 35% higher than among abstainers.

If you have habitually taken two glasses of whiskey per day or the alcoholic equivalent in beer, your chances of dying before your time are double those of total abstainers.

It has been costing total abstainers yearly millions of dollars in premiums to help to pay for excessive deaths among drinkers! Can we afford such waste of life and money in the face of the war losses of money and men?

Vote "No" to repealing the Ontario Temperance Act, and "No" to rendering it practically worthless by the proposed amendments.

"No!"—Four Times—"No!"

Answer every question on the Referendum Ballot with an X under the heading "No," and herein fail not, or your vote is lost to Temperance Progress.

Ontario Referendum Committee

may be thought unnecessary by reason of the financial strength of a company, or possibly impracticable for other reasons peculiar to itself. Such interests may doubtless successfully prosecute an export trade. To such firms, as well as to export associations, the undersigned, after mature consideration, desires to express the opinion that it is of the most urgent importance that they should immediately prepare for the competition which is to come in foreign fields by personally visiting the foreign markets. Not only the heads of such companies, but the most responsible members of their companies, should go abroad, backed with letters of introduction and bankers' references, and personally meet their future customers. Such responsible representatives should be in a position to discuss future business first-hand and not be required to get cable authority from their principals in Canada for every move they make.

"Exporters should not expect too much of the government in the matter of assistance to them in prosecuting export trade. German exporters did not wait for the government to do everything for them, but they went after foreign trade actively for themselves, and the government, as government should, assisted such private efforts.

German Methods

"German manufacturers did not build up their vast foreign trade by staying at home and quoting prices 'F.O.B. Hamburg,' and just as certain is it that Canadian manufacturers cannot increase their foreign trade by staying at home and quoting 'F.O.B. Atlantic port' or 'F.O.B. Pacific port,' while a quotation 'F.O.B. Factory' will be waste of postage. There may be exceptions, but only in cases of there being an element of luck present, and they will require more than an element of luck to hold their foreign trade in the future, to say nothing of increasing it in the days of the competition to come.

"German exporters did not wait government declarations of policy regarding export trade; they did not ask what government assistance they might expect, they went after foreign trade individually, by associations, and by organizations of every conceivable description, with all their financial and commercial might, intelligence, and resources. In forty years Germany rose from an obscure commercial nation to the second position among the great overseas trading nations of the world.

Credits

"The establishment of branches of Canadian banks abroad is regarded as a most necessary step in the promotion of Canadian foreign trade. German branch banks in many parts of the world before the war constituted the most important trade link which contributed largely to Germany's commercial success.

"One of the prime factors prior to the war in the German method of capturing and holding foreign markets was the system of granting credit. The German banks had become deposit banks, credit banks, and financing companies, or, as one writer described them, 'banks of all trades'; even they, by mobilizing into species of cartels, further increased the power of German finance. Such cartels were associated with the Reichsbank, which, as far as its policy was concerned, was synonymous with the German government.

"Within the space of a very few years, German banks were to be found in all the great markets of the world, frequently under a name which in no way identified them with the Fatherland. 'Every foreign bank created abroad,' as one German writer stated, 'is the pioneer of national industry and the initial step in uninterrupted commercial relations between the foreign country in question and Germany.' Such banks participated in and carefully nourished German trade in every part of the world. German trade was their first purpose. As collectors of commercial information, financial ratings, trade possibilities, their value was inestimable.

"Can it be expected that a Canadian exporter to South America, dealing through a Canadian bank which in turn has to depend on a foreign banking agency in South America, can reap the same advantages as did the German exporter who deposited his bill of lading with a Hamburg bank which in turn forwarded it to its branch in Buenos Aires? Not infrequently was it found that the German banker abroad made offers of his services gratis to foreign houses solely in order to learn their ways of manufacture and their clientele, and then, thanks to German organizations, transmitted the information to his parent bank in Germany.

"Thus was the chain between the German exporter and the foreign importer made complete."

The report also gives a detailed account of the work of the department, and of its various branches such as the Dominion Bureau of Statistics, Trade Commissioner Service, Board of Grain Commissioners, etc.

NEW INCORPORATIONS

Canadian Fabrikoid, Ltd.—Northern Quebec Co.—Bruce Consolidated Gold Mines—Libert Oil Refining Co., Ltd.

The Spanish River Pulp & Paper Mills, Limited

ANNUAL REPORT, 1919

DIRECTORS:—GEO. H. MEAD, *President.* P. B. WILSON, *Vice-President.* T. GIBSON, *Vice-President*
C. E. READ, T. WATSON SIME, G. R. GRAY, T. H. WATSON. J. G. GIBSON, *Secretary.*

TORONTO, ONTARIO,
25th August, 1919.

TO THE SHAREHOLDERS OF
THE SPANISH RIVER PULP AND PAPER MILLS, LIMITED.

Your Directors submit the following report of the operations of the Spanish River Pulp and Paper Mills, Limited, including the Lake Superior Paper Company, Limited, for the year ending 30th June, 1919.

TOTAL NET REVENUE FOR THE YEAR	$2,757,964
LESS RESERVED FOR DEPRECIATION	501,068
	$2,256,896
LESS INTEREST ON FUNDED DEBTS AND OTHER LOANS	799,975
TOTAL NET SURPLUS FOR THE YEAR	$1,456,921
Less Appropriation for Contingencies and Government Taxes	160,000
	$1,296,921
Balance of the Consolidated Profit and Loss Account as at 30th June, 1918	$1,071,301
Leaving to be carried forward	$2,368,222

The completion of construction work and proper balancing of the plants as referred to in the Report of last year has given the first annual opportunity to the Company for demonstrating its earning ability. The result of the past twelve months' operation, while showing substantial increase over the previous year, does not, however, in the opinion of your Directors, yet represent an adequate return upon the very valuable resources of the Company or the large amount of capital invested.

The year's available water supply was particularly good and the Company consequently had a large production of Groundwood. With the exception of Sulphite (the market for which has been somewhat limited in recent months) the output of all products of the Company has nearly approximated capacity.

As there were no Sinking Fund requirements during the past fiscal year, the Company, having paid no dividends upon its Capital Stock, has been able to materially reduce its bank indebtedness and therefore finds itself in a strong cash position.

Your Directors have determined that it is in the best interests of all security holders to pay the Deferred Interest on Bonds and Notes due in 1922, and redeem the Second Mortgage Debentures, due in 1924. To provide the necessary funds they have arranged the sale of $3,500,000 new 6% Serial Mortgage Lien Ten Year Notes, part of an authorized issue of $5,000,000.

Because of the increasing demands of regular customers of the Company, the installation of two additional paper machines at Espanola with a capacity of 100 tons per day, has become necessary. It is proposed to pay for this installation out of the proceeds of the sale of the $3,500,000 of Notes and the earnings of the ensuing year.

Approval by the Stock Holders of the $5,000,000 Note Issue, as well as the sale of the above-mentioned portion of the Notes, is being asked at a General Meeting which has been called for the same date as the Annual Meeting.

In anticipation of the payment of Deferred Interest and Second Mortgage Debentures, a call has been issued by the Directors as of August 1st, upon the Talons and Notes representing the Deferred Interest, and a call will be made upon September 1st, for the Second Mortgage Debentures. In each case six months' notice must be given to Holders, therefore payment will be made on February 1st, and March 1st, 1920, respectively.

With the foregoing obligations disposed of, the Company will be free to consider the payment of dividends upon its Preferred Stock and your Directors propose in the near future to submit for consideration a plan for funding accumulated dividends thereon.

In January last the Company suffered a great loss in the death of Mr. B. Tooke, of Montreal. Mr. Tooke had been a member of the Board for several years as the nominee of the Bond Holders of the Ontario Pulp & Paper Company, Limited, and during the time he was associated with the Company rendered yeoman service taking at all times a keen interest in its affairs. At a recent meeting of the Ontario Bond Holders Mr. George R. Gray was nominated to fill the vacancy on the Board, and was subsequently duly elected.

Owing to the interregnum caused by Mr. Tooke's death and the absence in England of two of the Directors on war service, it seemed desirable to temporarily appoint another Director in Canada, and upon Sir William Stavert resigning, the vacancy was filled by the appointment of Mr. J. G. Gibson to the Board.

The Directors have particular pleasure on the conclusion of peace in thanking those of the organization who took part in the war and welcoming them back to their duties. They also wish to thank those who carried on at home for the increased effort put forth, which has contributed so materially to the success of the year's operations.

By Order of the Board.
GEO. H. MEAD, President.

TRUSTEES, EXECUTORS AND AGENCY COMPANY

The report of the Trustees, Executors and Agency Co., Ltd., of Melbourne, Australia, for the half-year ended June 30th, 1919, shows a total of £13,353,987 at the credit of estates, trusts and clients. Funds administered total £31,000,000. The capital is £150,000 subscribed and £90,000 paid up. There is a further reserve liability of £150,000, and reserve funds and undivided profits totalling £75,483. This is the first trust company founded in Australasia, and is now in its eighty-fourth year of business.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended September 18th, 1919, compared with the corresponding week last year:—

	Week ended Sept. 18, '19.	Week ended Sept. 19, '18.		Changes.
Montreal	$119,762,786	$ 90,064,434	+	$29,698,352
Toronto	86,825,974	61,827,129	+	24,998,845
Winnipeg	54,287,775	29,731,296	+	24,556,479
Vancouver	14,614,165	12,834,418	+	1,779,747
Ottawa	8,422,239	7,806,619	+	615,620

LETTER TO THE EDITOR

BUYING "MADE IN CANADA" INSURANCE

Sir,—In your issue of September 12th I note an article entitled "Unlicensed Insurance Drains Canada." I wish to say the writer is quite in sympathy with the gentleman who wrote this article, and I do not think there is any place where we feel this more than in western Canada. In so far as the manufacturers are concerned, especially the eastern manufacturers, these people, during the war, have been waving their flags and shouting of their loyalty to the country, telling the Canadian citizens that they should buy made in Canada goods and have been supporting exhibitions and displays of "Made in Canada" articles, and of course they expect Canadian citizens to buy their goods. Any who go outside of Canada to purchase necessities which they can buy cheaper—in spite of the tariff—than they can from Canadian manufacturers, the latter look upon them as almost traitors to their country.

When it comes to placing insurance, were an investigation made, it would be discovered that a considerable majority of the manufacturers place their insurance mostly with United States concerns, in the United States, simply because they get a slight reduction in premium or because some American firm of insurance brokers offers them some inducement, which a Canadian concern, owing to the present laws of the country, are not in a position to offer. The manufacturers, when it effects their own pockets, appear to forget about patronizing home industry, or to reciprocate with those who buy their goods, or endeavour to keep their money in the country. The one great thing which looms before their eyes is that by dealing with an outside firm they are saving a few dollars.

This same thing applies to American concerns doing business in Canada. We have in western Canada a branch of nearly every machine firm manufacturing in the United States, they do not manufacture here, but they erect large warehouses, keep a very heavy stock and sell thousands of dollars worth of machinery and farm necessities to our farmers every year. The insurance on their buildings and stock in Canada would run into several million dollars, yet we do not know of one dollar's worth of this insurance being placed in Canada. These concerns all have their head offices in some city in the United States, they drain western Canada of thousands of dollars every year which is sent to their head office and for which Canada gets no return, this is something that the government of the country should look into in order to save our money situation.

The writer is advised that in some states in the country south of us, insurance cannot be placed outside of the state, and I believe that were the same laws in effect here so far as the provinces are concerned, that it would be a great financial benefit to the country as a whole and the provinces in particular. When the writer of the article mentioned the premiums of insurance placed outside of Canada at $2,366,234.55, I think he put on a very low estimate as the premiums in western Canada alone, placed in United States would amount to this much. These are matters which should be looked into by the superintendent of insurance of the Dominion of Canada, and they might also interest the minister of finance. There is no doubt that legislation could be arranged whereby this money could be kept in the country much to the benefit of the citizens who are paying for the upkeep of the Dominion.

Insurance Agent.

Saskatoon, Sask.

A meeting of the Toronto branch of the Canadian Manufacturers' Association is to be held to-day (September 26th), for the purpose of discussing the findings of the National Industrial Conference.

VALUE OF THE COST SYSTEM

Now Being Adapted to Small Business, and Bankers Should Encourage its Use

IN the fifth of a series of articles on the problems of manufacturers, the "Teller," issued by the Sterling Bank, urges branch managers to advocate the use of cost accounting. The article says:—

"Cost systems are an essential part of modern scientific business management. For the capital invested in a business proves just as efficient as are the brains employed to handle it; and the best guide for brains is analysis. That is the function of a cost system—to give the manufacturer a detailed knowledge of his business—and to give him this detailed information regularly and automatically. Through efficient cost systems, concerns which have been operating at a loss or finding it hard to break even, have been placed on a sound profit-producing basis.

"Business men are therefore becoming awake to the value and need of a cost system. In the small town, manufacturers are now beginning to learn more about cost systems and to adopt them. Soon the concern will be rare which does not use a cost system of some kind or other. This has special interest for bank managers. For the small-town business man is as a rule a production man, a man who has developed his business from small beginnings largely through his own work. He is a good craftsman rather than a good business man—a manufacturer rather than a manager. What more natural than that he should go to the banker for information when he thinks of installing a cost system—or than that he should give careful hearing to a banker's suggestion that he should adopt a cost system?

"Again, what better qualification can a manufacturer offer when asking for a loan than that he uses a cost system which gives him a complete control of his business—which details every item of cost from raw material and labor to overhead or selling expenses?

"In view of these two facts, it is surprising that bank managers have taken so little interest in the matter of systematic cost-keeping. Very few of the men in charge of branch banks anywhere can talk intelligently and helpfully on cost systems. Yet such knowledge is one of the best means he has at his command for getting and keeping business. He can use the cost system idea not only in interesting the manufacturer, but the farmer, the merchant or the wholesale house.

"As you go into this question of a cost system with manufacturers, you will find that some, no doubt, have long intended to keep costs, but have never found the time or had the required knowledge and expert help to get started on a working basis. Others, perhaps, have been afraid of the expense entailed by extra clerks, etc. But it has been amply proven that complete records of the use of material, labor and expense, can be gathered without any great expenditure for clerical help and the economy affected has been very great.

How the Bank Benefits

"Remember this point: $1,000 invested in improvements or analysis that creates a saving of $3,000 in five years pays a dividend of 60 per cent. per annum. And that is but a reasonable estimate of the saving effected by a cost system. Too much attention cannot be paid to the manner in which the data obtained from the cost sheets is presented in the form of reports. Failure to have the resultant facts clearly presented and the consequent inability of executives to interpret and act on the information given, is the chief reason for curtailment in benefits resulting.

"Many plants have found on analysing the report after the starting of cost keeping, that some of the products, instead of being a source of revenue, are actually showing a loss; and if the selling price cannot be raised, it is better to stop their manufacture and concentrate on products which show the best net result.

"Besides the direct results obtained by keeping systematic records, there is an indirect benefit of no small value in the responsibility felt immediately by the foreman for supplies, repairs, etc., charged to his department, an excess in which might show to his detriment in the office. Even the operators will greatly improve the quantity and quality of their work, once they learn that the result of each job is a matter of record.

"Cost reports should show a complete detailed picture of the whole business. They should show how much money is tied up in fixed assets, inventories and accounts receivable. In this way, they will show whether the inventory carried is too much as compared with the turnover—will show whether all the possible capital is working.

"The cost of material, labor and selling should all be known to the executive. With a cost system a close account can at all times be kept. If one becomes inproportionately large, it is at once noticed and the reason ascertained, the fault remedied. All overhead cost, too, is included with a cost system and this is an item that no executive can afford to overlook. Selling costs are looked after by a cost system, not only in general, but in every way. The cost of selling so much of a certain product in any locality is always available.

"The bank manager who is really ambitious, who wants to get new business and to get it on the right basis—of confidence and service—will do well to give some study to cost-keeping methods. He can learn much from talks with clients who already use a cost system. He can learn a lot from business magazines. He can learn a lot from his personal examination of his customers' problems."

EMPLOYMENT CONDITIONS IN CANADA

Weekly reports from employers to the Dominion headquarters of the Employment Service of Canada, Department of Labor, indicate that, apart from unemployment due to strikes, there was an appreciable increase in the volume of employment during the week ended September 6th. Returns have been tabulated from a greater number of firms than hitherto and the number of persons on payroll of the firms reporting is now well over the half-million mark.

Returns for the week ended September 6th show that 3,874 regular firms—firms which had reported for that and the preceding week—reported to the Employment Service of the Department of Labor as compared with 3,595 for the preceding week and 3,623 for the week ended August 23rd, the greatest number previously tabulated. Of those reporting, 296 were in the Maritime Provinces, 1,966 in Ontario, 815 in Quebec, 484 in the Prairie Provinces, and 313 in British Columbia. The number of persons employed by these firms on September 6th was 530,848, as compared with 526,318 by the same firms during the preceding week, an increase of 4,530 persons, or .86 per cent. A further increase of 3,218 persons or .6 per cent. was anticipated for the week ending September 13th.

The plus industries—those that registered net increases in the number of persons employed—were: Commercial and mercantile, which registered an increase of .89 per cent.; clay, glass and stone products, 1.6 per cent.; food, drink and tobacco, .41 per cent.; metals, .89 per cent.; textiles, .75 per cent.; vehicles, 2.5 per cent.; quarrying and mining, .38 per cent. and railway operation 2.9 per cent. With the exception of the vehicles and commercial and mercantile groups, all the plus industries anticipated further appreciable gains during the week ending September 13th. Textiles expecting an increase of 1.95 per cent.; railway operation, 1.1 per cent.; food, drink and tobacco, .71 per cent.; metals, .33 per cent.; clay, glass and stone products, 2.9 per cent. and quarrying and mining, .39 per cent. Vehicles anticipated a decrease of 1.1 per cent.

The minus industries—those that registered net decreases in the number of persons employed—were: Building and construction with a decrease of .53 per cent.; lumbering, .25 per cent.; chemicals, .9 per cent.; leather and leather products, .37 per cent.; pulp, paper and printing, .07 per cent.; woodworking, .52 per cent.; railway construction, .79 per cent.; and miscellaneous, .64 per cent. Compensating increases in all groups were anticipated for the week ending September 13th, lumbering expecting the greatest gain of 2.12 per cent.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Stewart, B.C.	Bank of Montreal
*Williams Lake, B.C.	Bank of Montreal
*Mikado, Sask.	Bank of Montreal
Berwick, N.S.	Union Bank of Canada
Burritt's Rapids, Ont.	Union Bank of Canada
Clearwater, Man.	Union Bank of Canada
Keystone, Sask.	Union Bank of Canada
Mantario, Sask.	Union Bank of Canada
North Edmonton, Alta.	Union Bank of Canada
Rimbey, Alta.	Union Bank of Canada

*Sub-agencies.

Mr. W. H. Monk, assistant manager of the Royal Bank of Canada at Hamilton, Ont., left last week for New York to manage one of the branches of the foreign department of the bank there.

The Bank of Toronto has awarded a contract for the erection of a new branch at Galt, Ont.

The Canadian Bank of Commerce is building a new branch at Star City, Sask.

Mr. T. S. Leitch, manager Canadian Bank of Commerce at Dawson, Man., has been appointed manager at Mexico,, in place of Mr. D. Muirhead, who has resigned from the service. Mr. D. C. Thomson, who has recently returned from military service, has been appointed manager at Dawson.

Mr. Allan C. Fraser, manager of the Merchants Bank of Canada at Vancouver, B.C., has been made superintendent of all the bank's interests in British Columbia. Mr. Fraser went to Vancouver in March of this year, but has had twenty-nine years' experience in the banking business in Canada.

The following staff changes have been announced by the Bank of Montreal: Mr. F. C. Ridley, appointed acting manager at Edmonton, Alta.; Mr. H. G. McCullough, manager at Port Haney, appointed manager at Ladner, B.C.; Mr. D. W. Oliver, sub-agent at Waterloo Place, London, Eng., appointed associate manager at Ottawa, Ont.; Mr. G. Lawson, appointed assistant manager at Quebec, Que.; Mr. G. A. C. Weir, appointed assistant manager at Winnipeg, Man.

With the addition of the branches of the Union Bank of Canada, mentioned above, the total of its system is brought up to 375 branches. In connection with this further expansion, Ph. Vibert, chief inspector, drew an interesting historical comparison. "Twenty-nine years ago," he said, "I went from Quebec city to Lethbridge, Alta., and at that time the Union Bank of Canada was a small affair, with only thirteen branches. The Union Bank of Canada is now represented at 69 points in the province of Alberta and at 112 in Saskatchewan. Very few men in the bank could tell you that the Union was the first bank to become established in the province of Alberta, and that our Lethbridge branch was opened by J. G. Billett as far back as February, 1886—over thirty-three years ago. It was the first branch of our bank west of Winnipeg. Lethbridge continued to be the only office of the bank west of Winnipeg until December, 1890, when Carberry and Moosomin were opened; then in February, 1891, Boissevain was added to the list, followed by Neepawa, Souris, and so on, until to-day we have some 260 branches west of the Great Lakes. As you know, the opening of branches was suspended during the war, but since the signing of the armistice all of the large banks have been active in extending, and the Union Bank of Canada has not by any means lagged behind. In fact, our progress has been pronounced. We have opened more than 75 new branches so far this year in an effort to extend the fullest possible banking accommodation."

As mentioned in *The Monetary Times* last week, two representatives of the Union Bank of Canada, Mr. John Galt, president, and Mr. H. B. Shaw, general manager, go to attend the formal opening of the Park-Union Foreign Banking Corporation in Paris, France. The Paris branch will be opened under the chairmanship of Viscount de Breteuil, who was the laisson officer between General Foch and the French War Office, a man of wide financial influence in his own country. Mr. Carrere, formerly general manager for the Far East of the Russo-Asiatique Bank, will be manager of the Paris office.

President Galt and General Manager Shaw in London will meet the members of the new formed advisory committee which was appointed under the direction of Mr. F. W. Ashe, assistant general manager, resident in London, Messrs. A. E. Harris, C. W. Small, J. C. Blair and Sir Keith Price, make up the personnel of the London committee.

ANOTHER NEWSPRINT SESSION

On September 17th another session of the newsprint enquiry was held by Commissioner Pringle, but further sittings were postponed until the second week in October. The commissioner stated, however, that some Canadian papers were having difficulty in getting a supply, but that, so long as he was paper controller, he was going to see the Canadian press supplied with paper. Each manufacturer will be asked, he said, for a statement of the amount of newsprint being exported and the amount supplied to Canadian buyers. Some companies are called upon to sell a large portion of their supply in Canada, while others export practically all.

The commissioner then passed on to the business for which the session was called, namely, consideration of the paper control tribunals reduction of the price of newsprint by $3 per ton for the five months beginning July 1st, 1918, and its effect upon the prices Mr. Pringle had fixed for other periods. He said he had hoped that the manufacturers and publishers could get together and agree on the price for subsequent periods. The other point was the price for periods earlier than that dealt with by the tribunal. He had been informed by a member of the latter body that its judgment had not made allowances for any inadequacy of price prior to July 1st. Then there was a still earlier period, March 1st to November 20th, 1917, when orders had been made, not by Mr. Pringle, but by order-in-council, and it might be that the responsibility of revising prices for that period rested with the government.

COLLECTION OF THE INCOME TAX

On September 18th Sir Henry Drayton, minister of finance, stated that there would be no laxness in the collection of the income tax. Referring to actions which are being taken against delinquents, he said: "The instructions under which the department is working were necessary, as some people, at any rate, have looked upon the provisions of the income tax as a polite invitation that the payment of income taxes would be gladly received. All notices when required to be given by the Act before action could be taken against defaulters were, under the instructions, to be at once given, and that unless within the time fixed by the Act after the receipt of notice the default was made good the appropriate proceedings should be immediately taken.

"So soon as the statutory time has elapsed and default continues, proceedings in each case will be taken. The reason that proceedings at present have been taken only in Halifax and Toronto is that the cases in those cities happen to be ripe first. The instructions are general and cover the whole country, and similar notices have been given affecting defaulters in other places, and if necessary similar proceedings will be instituted. It is hoped that it will be unnecessary to continue proceedings, and that in the future prompt, satisfactory returns will be made."

A convention of the Bread and Cake Manufacturers' Association of Canada was held in Toronto, September 16th and 17th.

PUBLICATIONS RECEIVED

Public Service Properties, 1919.—Published by W. S. Barstow and Co., Inc., New York.

This little volume presents in convenient form general data regarding public utility companies with yearly gross earnings of approximately $9,400,000. The information is based upon official statements and staistics. About fifty companies are described and their properties illustrated by maps

Annual Financial Review, 1919. Published by Houston's Standard Publications, Toronto. 741 pages; $8.

This volume has been issued for eighteen consecutive years and has proved an invaluable reference book. It gives the latest financial statements of all important Canadian companies and also the market quotations of their stocks and bonds for a five-year period. Another feature is the stock exchange record giving the quotations by months of all securities listed on the Toronto and Montreal exchanges.

British Columbia Directory. Published at $10, by Wrigley Directories, Ltd., Vancouver, B.C.—The second (1919) edition Wrigley's B.C. Directory has just been issued. The past year has seen an increase of 32 places in the province that last year were not on the map. In all 2,042 cities, towns and settlements are described, giving a geographical location, local resources, population, etc., followed by a list of business firms, residents and farmers. The Directory is an index of the whole province, and in addition to the description of 2,042 places, contains a classified business directory under 446 headings, a trade name and brand section, and also gives a 100-page year book containing not only a list of all provincial government ministers and departmental officials, but also a synopsis of the jurisdiction of each department, of the functions of nearly every important official, and a summary of important legislation. There is also a concise history of the province, illustrated.

The Solution. By Paul G. Lewis. C. N. Caspar Co. 454 East Water St., Milwaukee, Wisc. 174 pp.; $4.

Applying the theory that labor is the source of value, to the monetary problem, the author proposes that the government (United States) should immediately pass an Act of Congress authorizing the issue of labor notes to a value of six billion dollars. These notes, he says, should be issued in exchange for services, or as pensions, and would circulate along with the regular currency. In contrast to this radical proposal, he has nothing but praise for banking institutions, recognizing the essential part they play in development. The purpose of this new currency would be to relieve unemployment which he finds exists, and create a new demand for goods, thereby stimulating the whole economic system. He does not pursue to a conclusion the effects of such a measure, however, nor does he show that a further expansion of the existing credit system would not do equally well.

Production and Taxation in Canada. By W. C. Good. J. M. Dent and Sons, Ltd., Toronto, 133 pages; $1.

In this brief volume the author sets forth the farmer's viewpoint on the relation of agriculture to Canadian industry as a whole. Mr. Good has a clear knowledge of fundamental principles and his arguments carry weight. In addition to being a free trader he is also a believer in the socialization of ground rents, and it is in the substitution of income from this source in place of the present revenue from import duties that he makes his free trade policy practical, at least from the fiscal point of view. It is fortunate that farmers of Canada have such a fair-minded leader: nevertheless, the average farmer being both a landlord, capitalist and worker, is prepared to recognize the claim of all these elements for a reward in return for the essential part they play in production. Only by co-operation with agriculture can industrial interests hope to combat the more radical influences that are seeking to destroy the basis of the present economic system.

G. H. Smith, assistant general manager of the Canada Permanent Mortgage Corporation, is visiting the west.

WESTERN CONDITIONS AS VIEWED BY EASTERNERS

D. C. Macarow, general manager of the Merchants Bank, who has just returned from the Canadian west, expresses himself as satisfied with conditions there. "We have just completed a brief, but comprehensive trip through the western provinces and return with confidence undiminished in the great future of that vast country, the diversified resources of which are will-nigh boundless," said Mr. Macarow in an interview. "Upon all sides we saw palpable evidences of continuous and satisfactory development, along sound and progressive lines, auguring well for the great future which all are looking towards with confidence and enthusiasm."

Regarding the crops, he said: "The period of dry weather, which extended over a portion of the months of June and July, materially reduced the yield of all crops, particularly in the southern sections of Alberta and Saskatchewan. About the middle of August, however, a welcome, though belated rainfall, was general throughout the whole of the dry area, and one must have actually visited the territory to realize the country's truly wonderful responsive and recuperative powers The resultant improvement in conditions, to put it in a word, was marvellous. While the dry weather was too prolonged to permit of an average yield throughout the whole of these provinces, yet even the most optimistic are surprised at the amount of grain which will be thrashed, and it may now be said with confidence that the outturn expressed in dollars will measure up to every reasonable expectation. In the central and northern portions of Alberta, conditions are exceptionally satisfactory and record yields are assured. From thrashing reports already in, the quality of the grain will be excellent.

"There is a steady stream of new settlers flowing in to the country, especially heading for the fertile Peace River district. The large majority of these settlers are American farmers backed with brains, experience and ample capital, and altogether throughout the great prairie provinces all lines of business are active and prospering, with a spirit of healthy optimism spreading its cheery influence broadcast. Even in the drought-stricken areas the discouraging troubles of to-day are forgotten in a spirit of courageous optimism for to-morrow. A pessimist in the west is indeed a 'rara avis.'

"In British Columbia conditions are no less encouraging. The lumber industry in its various forms has now developed into probably one of the most important in the province. It is in thriving and healthy shape, with a wide lucrative and expanding market greedily absorbing the product of the mills, all of which are working to capacity, and there is no indication that the market is of an ephemeral nature. The demand for standing timber is equally good. British Columbia appears to be coming into its own, and the right spirit to build for the future on the experiences of the past is all-pervading. The correlated pulp and paper industry has made rapid strides in recent years. Five large plants are now operating in the province and another is in course of construction—the somewhat unsatisfactory transportation situation and more or less acute labor difficulties of the moment being the only retarding elements in the situation.

During the course of our visit we had the opportunity of meeting many prominent, influential and representative men in various walks of activity, and we were gratified to gather that a realization of the necessity for fair, reasonable and intelligent co-operation, so vitally essential to the whole country's development, if it is to be along sound and enduring lines, is not lacking in the west. Nor is there any absence of the right underlying spirit. Our trip was indeed illuminating and inspiring."

While in British Columbia, E. L. Pease, managing director of the Royal Bank, intimated the willingness of that institution to extend still further its operations in South America. "If British Columbia will persuade the government of Canada to allocate a number of the carriers in her mercantile marine to do business between Vancouver and the west coast of South America," he said, "the Royal Bank of Canada will establish branches of the bank in the different ports of the west front of South America just as soon as as it is possible to do so." Regarding the Orient he thought that the exchange situation made it difficult to establish satisfactory branch relations.

Conservation of Life Insurance

Life insurance is of supreme value in these uncertain times Life insurance should not only be jealously guarded and kept in full force, but it should be increased if at all possible. It is a well-known fact that the dollar has greatly diminished in value, so that a given income will not purchase much more than one half the amount that it would have yielded in pre-war days. Not only therefore should we resist every inducement to relinquish our insurance; we should rather increase our protection to the limit of our ability. There is nothing else to be compared with a life insurance policy as a protection for the home. During the policyholder's life it is an asset of ever-increasing value: at death it is the financial anchor of one's dependents. Do not allow your "best friend" to induce you to give up a policy in a sound company. Take a new policy if you can, but never give up the old!

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

THIS FALL

will probably see more persons apply for Life Insurance than ever before.

The reason is clear. During the past few months thousands have had it brought forcibly home to them that the wise course is, in years of prosperity to set aside a sufficient portion of their gains in the safest of all investments—an investment that attains its greatest value at the time of greatest need—LIFE INSURANCE. A Life Policy offers the one sure way of making certain provision for an uncertain future.

Full particulars of the Company's Policies will be mailed on request. State age.

PULP AND PAPER INDUSTRY EXPANDING

Many New Developments During Past Year—Other Industrial Activity

CANADA'S pulp and paper industry during the past year has expanded rapidly. An indication of this growth is the fact that since the beginning of January this year, bond issues have been floated to the amount of $17,550,000, for the purpose of building new pulp and paper plants, and for extending the existing mills. That greater part of these issues has been taken up, showing that the pulp and paper industry is looked forward to as one of the leading industries of the Dominion.

One of the most recent developments in this line, is the construction of a bleached sulphite pulp mill at Timiskaming, Que., by the Kipawa Co., Ltd., which is controlled by the Riordon Pulp and Paper Co., Ltd. In January last a bond issue of $4,000,000 was floated to finance the construction and equipment of this mill, and now the first portion of the program is rapidly nearing completion.

Situated on the Ottawa River, at the outlet of Gordon Creek and adjacent to the Dominion government dams forming the toe of Lake Timiskaming, the site of this new pulp mill is ideal. Pulpwood may be obtained from any or all of four distinct sources of supply: (1) From the northern end of Lake Timiskaming by towing; (2) from the Kipawa Lake district through Kipawa River and chutes to Lake Timiskaming, and thence to plant by towing; (3) from the Kipawa Lake district through Gordon Creek, which is an improved creek for lumber interests; and (4) from the south by rail over the Mattawa-Timiskaming branch of the Canadian Pacific Railway.

Upon completion of the full program of construction at Timiskaming, the Riordon Pulp and Paper Co., Ltd., which Controls the Kipawa Company, Ltd., will have three largo plants supplying material for the pulp and paper industry, the existing plants being at Merritton, Ont., and Hawkesburg, Ont.

The new plant is being developed under a charter obtained from the province of Quebec, which has leased from the federal government all water rights in connection with the Kipawa Lakes for power development or logging on either the Kipawa River or Gordon Creek. The estimated capacity of the mill is 30,000 tons of pulp per annum.

The International Paper Company, Limited, of Three Rivers, Que., is erecting a plant that will comprise all told a chain of eighteen individual units of buildings. Already a number of these are under way. One of these, the power plant, will cost $15,000. Already more than two hundred men are working on the building of the plants, which will cost in all six million dollars.

Other Industrial Activity

Several of the large factories in London, Ont., are enlarging, and many others are erecting new plants altogether. Some of the latter are just commencing on an extensive building program which will take three or four years to be fully carried out. At present there is more than $760,000 worth of building being done in the commercial section of the city. This includes the following buildings: Loew's Theatre, $210,000; Allen Bros. theatre, $100,000; Holeproof Hosiery new factory, $200,000; an additional wing to Hyman's tannery, $100,000; new store for Kingsmill's, $50,000, plant for the Canada Oil Company, and additions to the Greene-Swift plant, $50,000.

The Renfrew Refrigerator Company, Renfew, Ont., will construct immediately new additions to the plant, which will double the present floor space.

The announcement has been made that the Ingersoll, Ont., branch of the Ingersoll Machine Company, of Montreal, will resume manufacturing at an early date. Since the signing of the armistice the plant has been idle, prior to which time it was turning out large quantities of munitions.

Hitch Bros., formerly of Windsor, manufacturers of a patented device for cutting and hanging wall paper, are moving to St. Thomas. The Border Cities Chamber of Commerce endeavored to induce the company to locate at Windsor, permanently, but no financial support was offered and the company decided to accept the offer from St. Thomas. The stock in the new company has been practically all taken by St. Thomas investors, it is reported.

Instead of a moderate sized industry, Oshawa, Ont., may secure a large new factory as a result of the passing the steel products by-law a few months ago, and of the fire at the works of the Dowsley Spring and Axle Company, Chatham, Ont., recently. The company is building a branch at Oshawa, but as a result of the fire, the Chatham business may be transferred to Oshawa.

The Ames-Holden Tire Company, has awarded a contract for the construction of a two-storey felt factory at Kitchener, Ont., and the Lang Tanning Company, will erect two warehouses in that city.

The Denby Motor Company, at Chatham, Ont., manufacturers of motor trucks, will utilize the local factory for the manufacture of touring cars.

By a vote of 434 to 35 Cobourg, Ont., decided to grant a bonus of $5,000 to the Douglas Packing Company, to locate in the town. They are to erect a modern fire-proof factory.

Hamilton, Ont., can add a desirable wood working industry to its manufacturing district if accommodation can be found. C. W. Kirkpatrick, commissioner of industries, has received a request from a Canadian firm for a factory there, with railroad facilities. The owners are willing to locate in Hamilton, and will purchase, if a suitable plant is available.

The mill of Messrs. Gillies Bros., Ltd., which was recently destroyed by fire, will be rebuilt on a more extensive plan near Braeside, Ont.

A statement is received from Woodstock, Ont., of the intention of two of the city's enterprising textile factories to make substantial additions to their present plants. The names mentioned are Hosier's, Limited, and the Harvey Knitting Company.

New Industry for Pembroke

Through the efforts of J. F. Munroe, and with the assistance of the municipality of Pembroke, Ont., the owners of the old Pembroke Iron Works plant, will probably utilize the buildings for a new industry. Definite details are not yet available, but if the plans of Mr. Munroe are approved by the council, Pembroke will have a fine new industrial plant. At the meeting of the council Mr. Munroe asked that the town grant the new company, which would be composed of members of the Iron Works Company and others, a fixed assessment of $40,000 on the property of The Pembroke Iron Works, Limited; also that a deed of the Garry-Brock property should be given, that a new water main should be put down for increased fire protection and a loan of $41,000 be granted, the industry to employ at least seventy-five hands. The council will consider the plan.

Western Industries

The $50,000 elevator of the Portage Milling and Transfer Company, east of the Seine River, St. Boniface, Man., is nearly completed, and will be in operation shortly.

Work is progressing rapidly on the new factory for the Sanitary Baker's, being constructed on Scarth Street, North, Regina, Sask. The building which will be one of the finest bakeries in the west, will cost, with equipment, close to $100,000.

The Red River Paper Mills, Ltd., Winnipeg, Man., have been granted a charter by the provincial government, and will probably erect a new mill soon.

One of the many new industries which are locating in Edmonton, Alta., is a $50,000 candy company, which has erected a new three-storey building at Namayo Ave. and Clara St., and intends manufacturing Penalta Chocolates. The parties interested are Messrs. G. and T. Plasteras and Dr. McCormick.

It is understood that a plant to manufacture and assemble marine machinery will be located on Burrard Inlet, British Columbia, on water frontage adjoining P. Burns' packing plant. Estimated cost, $1,000,000.

"Like a dull Actor
I have forgot my part, and I am out,
Even to a full disgrace."
—Shakespeare.

Are you "Like a Dull Actor"?
Do You Forget?
PELMANIZE!

REMEMBER, "I FORGOT to enter it," was what the salesman said when he lost the order.

"I FORGOT to take the siding," said the engineer after the wreck.

"I FORGOT an important question" was the lawyer's reason for losing the case.

"I FORGOT the doctor's instructions," said the nurse at the inquest.

"I FORGOT to lock the safe," the clerk confessed after the robbery.

"I FORGOT an appointment," said a business man who failed to close a big deal.

"I FORGOT to use my brakes," was the motorist's excuse for the accident.

"I FORGOT to turn off the gas," was the cook's explanation of the fire.

"I FORGOT the points I wanted to make," said the speaker who had faltered in his address.

"I FORGOT" has caused tragedies, losses, disappointments and "full disgrace."

If you would avoid the penalties of that phrase, commence now to train your memory! Let us send you free the book that describes the famous Pelman Course "MIND AND MEMORY TRAINING." Just send this coupon to

CHARTERED TRUST AMALGAMATION

The amalgamation of the Chartered Trust and Executor Co. and the Guardian Trust Co., Ltd., has been completed, the provisional agreement having been approved by the Dominion Government Treasury Board and by Order-in-Council of the Ontario government. W. S. Morden, K.C. and William Crocker, two members of the board of the Guardian Trust Co., Limited, have been added to the board of the Chartered Trust and Executor Co. Mr. Morden has been elected a vice-president of the company, and will be in charge of the company's estates and trusts department.

BANKING CONNECTIONS WITH SOUTH AFRICA

Wm. Logan, New York agent of the African Banking Corporation, Ltd., of London, Eng., is a visitor in Toronto and Hamilton this week. For twenty-three years this bank has maintained an office in New York, and Mr. Logan's visit to Canada is in connection with the further development of Canadian business. Transactions can be carried out much more quickly through this office than by way of London, said Mr. Logan, especially since a direct steamship service has been established from New York to Cape Town. The African Banking Corporation has an extensive organization throughout South Africa.

Referring to trade relations, in an interview with *The Monetary Times*, Mr. Logan said that Canada supplied about $10,000,000 of the $250,000,000 of goods imported annually by South Africa; our imports on the other hand, are small, being only $568,000 for the fiscal year 1918. United States trade with South Africa also shows a favorable balance. This excess of imports from this continent is, of course, offset by shipments of products of the mine and other raw materials, from South Africa to Great Britain.

MUNICIPAL FINANCE

Quebec City Has Surplus—Montreal Wants Change in City Government—Port Arthur's Finances Need Readjustment

Levis, Que.—According to a report for the fiscal year 1919-20, from the treasurer, real taxable property amounts to $3,910,280; annual value of rents, $149,595; value of business premises, $58,029; annual assessment on rent for aqueduct, $265,320.

Chatham, Ont.—The city of Chatham will take over the electrical business of the Chatham Gas Co. at an early date. The deal has been pending for some time between the Public Utilities Commission and the Gas Co., and has been recommended by the Ontario Hydro Commission. The City Council approved of the deal at a recent meeting.

Stratford, Ont.—The total assessment for the year, according to returns made by City Assessor Ruston, has amounted to $11,686,955, which is an increase over last year of $363,980. The land is valued at $3,482,150, an increase of $195,265, and the buildings at $8,204,805, an increase of $168,715. The amount which is taxable for schools is $10,399,795, an increase of $496,724.

Petrolia, Ont.—The tax rate for the municipality has been struck at 38½ mills. The total assessment for the town is $1,528,724, an increase over last year of $298,799. It is estimated that 38½ mills will produce a current income of $60,000, which will provide for all current expenditure and wipe out $7,000 on the deficit carried over from last year. There will still remain a deficit of $4,000 to be carried over to another year.

Windsor, Ont.—The city solicitor has been ordered to prepare notice of Windsor's intention to purchase the Sandwich, Windsor and Amherstburg Railway Co.'s lines, the order being issued as a result of the meeting of the civic industrial and transportation committee. Under the Municipal Act, the city must give notice of its intention within one year of the expiration of the company's franchise on its streets, otherwise the company automatically acquires the right to continue in business on Windsor's streets for five years.

Winnipeg, Man.—Representatives of life insurance companies and banks were the only persons who attended the first open sitting of the city's legislation committee on income tax last week. C. C. Ferguson, M. D. Grant and G. W. W. Stewart spoke for the life insurance men, urging that it would be extremely difficult to determine exactly what percentage of the revenue of their companies was earned in Winnipeg, also pointing out that in most cases the business or property tax would outweigh the amount to be levied for income tax. Thus it would be very expensive both for the city and the companies to determine such amounts. It was pointed out that a clause in the city's proposed Act covered the appointment of a commission to deal with such cases. Isaac Campbell, K.C., and W. A. Weir, representing the bankers, urged that men all over the country did their banking through Winnipeg offices and, as in the case of the insurance companies, it would be most difficult to determine just what portion of the bank earnings were made in the city. It was also pointed out that both insurance companies and banks paid taxes under the Corporations Taxation Act.

Toronto, Ont.—In a report to the board of control on the financial obligations for the current year, Finance Commissioner Bradshaw said:—

"The alarming extent of the overdrafts which have thus far been permitted, when practically only two-thirds of the year have passed, is such as to cause the greatest uneasiness as to the consequences, and again compel me to urge that under no circumstances shall your board sanction the expenditure of further moneys which were not provided in the estimates of the year. The aggregate of the overdrafts at the present time is practically $400,000, and represents, apart from any increase in the 1920 estimates, an addition of about two-thirds of a mill on the assessment. At the same time, it must be remembered that the 1920 tax rate will also be increased, as has been previously pointed out, through debt charges resulting from the large authorized capital expenditures for which by-laws were passed at a recent meeting of council. The taxpayer of 1920, even at the present time, cannot but entertain a most uncomfortable feeling as to what the tax rate of that year will probably be."

The treasurer's warning, of course, applies directly to the Rosedale stadium project, the whole cost of which would have to come out of the 1920 tax rate, being carried as an overdraft along with $392,918 already authorized, which the treasurer sets forth in detail in his letter.

Quebec, Que.—The financial report of the city for the year 1918-19, for the first time in years, shows a surplus of $20,459. City treasurer Verge, in prefacing his report, said:—

"In the course of the year I have been called to reimburse a sum of $11,059, being for the 2 per cent. tax. I also paid out of ordinary receipts an amount of $5,627, being the balance of the expenditures caused by the epidemic. Also an amount of $11,000, which you voted in excess of the first budget for the increase of salaries granted to the firemen and policemen. The perception of the taxes for the year 1918-19 has been 81¼ per cent. of the real revenue, not including school taxes, compared with the year 1917-18, 76 per cent. of the real revenue, leaving an increase of 5 per cent. in the percentage of the collection between the two years. The debt of the city on the last of May, 1915, including Belvedere ward, $13,533,168. The redeeming of debentures, permanent stock, etc., amounted to $291,520, and since that period three new issues were sold, amounting to $1,734,000, leaving a debt on May 1st, 1919, $14,975,647. In this amount of bonds redeemed is included debentures maturing on January 1st, 1918, to the amount of $79,813, and also the redeeming of a mortgage $5,000, making a total fo $84,813, which was borrowed again and included in the loan 8 Geo. V.

"I would also state that the redeeming of those debentures, etc., occasioned a decrease of approximately $3,000 in the interest required annually.

The debt of the city is now..........	$14,975,647
Less sinking fund	325,303
Leaving a net debt of	$14,650,344

and besides that we have made a temporary borrowing from the Bank of Montreal, St. Roch, to the amount of $58,107, in anticipation of the issue of the debentures authorized by the statute 9 Geo. V. I beg to inform you that there is an amount of $42,990 still outstanding on the tax imposed to cover the deficits of the year 1917-18."

The ordinary receipts for the year 1918-19 were $1,707,436, while the expenditures were $1,686,977, leaving a surplus of $20,459.

Montreal, Que.—A notice of motion was submitted at the city council meeting last week by Ald. Creelman, proposing that the council petition the legislature to suspend its functions until such time as the legislature may restore to Montreal a responsible government by elected representatives. The motion reads as follows:—

"Whereas the Administrative Commission, since its creation, has, generally speaking, administered the affairs of the city of Montreal in a manner which has been acceptable and pleasing to the great majority of the citizens, and

"Whereas the City Council, since the creation of the Administrative Commission, has devoted most of its time to blocking the efforts of the Administrative Commission and to passing resolutions upon subjects which are not its concern, and as a result has properly forfeited the confidence of the public, and

"Whereas the present form of civic government is unsatisfactory and so long as the Administrative Commission is in existence the city of Montreal will be better governed if there be no City Council.

"Whereas the Mayor of Montreal is in receipt of an annual salary of $10,000 and twenty aldermen each receive $1,500 per annum, a total of $30,000, which salaries under existing circumstances are not earned, and

"Whereas the expenses which are incidental to the City Council amount to many thousands of dollars each year, and

Russian Govt. Ext. 5½% (Dec. 1, 1921)	36	39
Russian Govt. Ext. 6½% (July 10, 1919)	35	40
Swedish Govt. 6% (June 15, 1939)	97½	98

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Three Rivers, Que. .	$ 80,000	6	30-years	Sept. 29
Coronation, Alta. ..	3,000	6	5-instal.	Sept. 29
Granby, Que.	30,000	5½	30-years	Oct. 11

Escott, Ont.—By-law to raise loan of $4,000 for road purposes has been passed by the council.

Roblin R.M., Man.—The council has passed a by-law authorizing the borrowing of $6,000 by way of debentures.

Barrie, Ont.—A by-law authorizing the issue of debentures to the amount of $77,000, has been passed and registered.

New Glasgow, N.S.—Ratepayers have authorized the issuance of bonds to the amount of $18,300 for sidewalk purposes.

St. Anne R.M., Man.—The council has passed a by-law authorizing the borrowing of the sum of $61,495 by way of debentures.

Vancouver, B.C.—Ratepayers will vote this month on a by-law providing for the expenditure of $200,000 on a technical college.

Glenboro, Man.—The municipality will borrow $4,000 by way of 20-year debentures, and loan the money to the Glenboro Rink Co.

Dundas, Ont.—The issue of $55,995 5½ per cent. 30-instalment sewerage disposal works debentures, offered on August 2, has not as yet been sold.

Winnipeg, Man.—On November 28 next, ratepayers will be asked to vote on a by-law authorizing the expenditure of $600,000 on a municipal milk scheme.

Dunnville, Ont.—The issue of $12,500 6 per cent. hydro-electric extension debentures, recently authorized, will not be placed on the market for some months to come.

1203 McARTHUR BLDG., WINNIPEG, MAN.

SALESMEN WANTED IN EVERY TOWN IN CANADA AND THE U.S.A.

Brandon, Man.—Ratepayers have passed two by-laws, one for the raising of $400,000 by debentures, and the other for raising of $50,000 by way of debenture issue.

Vermilion, Alta.—A bill authorizing the town council to borrow $29,000 for the purpose of erecting a new fire hall and purchasing other equipment, has been passed.

Ingersoll, Ont.—On October 17th next a by-law for the borrowing of $120,000 by debenture issue for the proposed new centre school will be voted on by ratepayers.

Peterborough, Ont.—A by-law authorizing the expenditure of $240,000 for the Board of Education's Memorial School in the south-west of the city, has been passed.

Guelph, Ont.—A by-law will be submitted to ratepayers next January for the purpose of voting on the expenditure of about $50,000 for the completion of Royal City Park.

Granby, Que.—Tenders will be received by A. Monty, secretary-treasurer, until October 11 next, for the purchase of $30,000 5½ per cent. 30-year debentures. Interest payable semi-annually.

Port Coquitlam, B.C.—The municipality will raise $40,000 by 20-year bonds, to pay bonus to Gregory Tire and Rubber Co., Ltd., for opening of new plant, following the approval of the ratepayers.

Alberta.—A report from the Board of Public Utilities Commission shows that permission has been granted to fifteen school boards in different parts of the province to borrow money amounting to $56,300.

Fort William, Ont.—Two money by-laws, one for $230,000 for public school purposes by way of debenture issue, and one for $87,000 for collegiate institute purposes by way of debenture issue, have been passed and registered.

Windsor, Ont.—Two out of three municipal money by-laws have been passed by ratepayers. One was for the expending of $15,000 for a new motor fire engine, and the other for the expending of $30,000 for new sidewalks. The by-law for the expenditure of $20,000 for street flushers, was defeated.

Port Arthur, Ont.—The city will have to borrow over $300,000 by bond issue as soon as the market is favorable. City Treasurer Gurney stated that next January would be the earliest possible time for such action, on account of the pending domestic loan.

Toronto, Ont.—The Hydro-Electric Power Commission will construct the hydro-radial from Toronto to Pickering, as soon as the township of Scarboro guarantees bonds to the extent of $900,000, and the township of Pickering bonds to the extent of $300,000.

Windsor, Ont.—Windsor's board of education may be obliged to take the initiative and borrow money from the banks to complete the purchase of the Tecumseh Ave. school site, where it is planned to build two temporary schools to take care of the congestion in that rapidly growing district. At a recent meeting the board was advised that the Windsor city council is unable to sell debentures for this purpose, owing to the new regulations of the government, which prohibit bond brokers from putting such debentures on the market until December 1, when the Victory loan will be over.

Trail, B.C.—The Spokane and Eastern Trust Co., per Wm. K. Esling, Rossland, B.C., has been awarded an issue of $15,500 7 per cent. 20-year debentures at 100.22. The following is a list of tenders:—

Spokane and Eastern Trust Co., per Wm. K. Esling, Rossland, B.C.	100.22
A. F. Carrothers, Edmonton, Alta.	98.75
J. D. Anderson, Trail, B.C.	98.50
Waghorn, Gwynn and Co., Vancouver, B.C.	98.06
National Bond Corporation, Vancouver	90.10

Manitoba.—The Hon. Edward Brown informs *The Monetary Times* that the issue of $750,000 treasury bills, maturing February 1st, 1920, particulars of which were given in these columns last week, has been disposed of in Canada. Hon. Edward Brown paid a visit to Eastern Canada and New York last week when he completed the negotiations for the sale of the treasury bills. In a statement Mr. Brown declared that the capital expenditures outlined at the last session of the provincial legislature would not be fully expended. This is due to the government being unable to proceed with the erection of public buildings during the recent strike.

MUNICIPAL FINANCE

(Continued from page 38)

"Whereas civic elections, if held next spring, will impose a burden of at least $50,000 upon the city, and

"Whereas it is expedient in the interest of good and economical municipal government that the City Council should be discontinued during the existence of the Administrative Commission and that the position of mayor should be made a purely honorary one.

"That the Council of the city of Montreal petition the Legislature of the Province of Quebec at its next session to suspend the functions of the Council, and to make the position of mayor an honorary one, until such time as the Legislature in its wisdom may restore to the city of Montreal a form of responsible government by the elected representatives of the citizens."

Port Arthur, Ont.—At the last regular meeting of the city council, the auditors' report of the city's finances was presented. The total outstanding debenture debt of the city at 31st December, 1918, was $7,452,531, made up as follows:—

General purposes (including schools)	$2,418,290
Local improvements, (owners' portion)	1,727,245
Public utilities	3,306,995
	$7,452,531

With regard to the issue of the consolidated debentures under By-law No. 770, the council by resolution has decided to apply for special legislation to enable the rate of interest upon these debentures to be changed from time to time as issues are made in order that advantage may be taken of the prevailing market rates at the time of issue. This has not yet been obtained and the auditors urge that no time should be lost in getting the matter settled, in order that the city will be ready at the end of 1920 to meet the old consolidated debentures amounting to $111,000 then falling due.

The total of all the sinking fund and other reserve accounts, (including those of the Public Utilities Commission) amounts to $1,517,888, against which the actual improvements held at cost price amount to $1,102,276, showing a shortage of $415,612. This shortage at 31st December, 1917, was $332,709, at 31st December, 1916, $202,736, and at 31st December, 1915, $93,053.

In addition to the shortage of investments for regular reserves, there is another very important shortage to be met, namely, that of the unexpended portions of debentures. At 31st December, 1918, this amounted to $640,228. If this is added to the shortage already mentioned, the total cash shortage amounts to $1,055,840. The auditors in their examination show that this deficit could have been turned into a surplus as follows: spent in capital expenditure not covered by debentures, $405,000; not collected from taxes, $685,000; accumulated deficits in the Public Utilities Department which should have been added to the taxes year by year, $178,000; total, $1,266,000. Deduct from this the balance of other current liabilities and assets, $184,000, leaving a total of $1,082,000, which gives a surplus of $27,000.

But all of this amount of $1,082,000 cannot be realized into cash for deposit into the sinking fund and a considerable portion of it will have to be carried for some years before it can be turned into cash, in fact a large part will never be realized at all.

The immediately available assets to meet the shortage of $1,055,840.40 are approximately as follows:—

New debentures to be issued	$ 350,000
Taxes outstanding	683,000
Balance due on old car barn site	109,000
	$1,142,000
Less balance of sundry current liabilities and assets, say	184,000
	$ 958,000
Shortage as above	$1,055,800
Net shortage of immediately available assets	$ 97,800

INVESTMENTS AND THE MARKET

Canadian Locomotive Has Larger Profits—Quebec Electric Railway Appealing for Higher Rates

Abitibi Power Co.—Directors of the company have announced the decision to wipe out dividend arrears on the 7 per cent., cumulative preferred stock of the enterprise, and to place common shares on a 6 per cent., dividend basis. The preferred arrears amounting to 19¼ per cent., and involving the payment of $192,500, together with the dividend of 1¾ per cent. for the current quarter, or 21 per cent., will go forward to shareholders of record as at September 27th on October 1st next. The initial distribution of 1½ per cent. among holders of junior securities of the company will be made on the same date and of the same record.

Quebec Railway, Light, Heat and Power Co., Ltd.—The company is again before the Quebec city council, asking for permission to increase the rates of fare on the street car service to enable them to cope with the increased cost of material and operation, and permit the present rate paid for service to remain. The company requests that the following tariff be authorized:—Seven cent cash fare. Seventeen (17) tickets for one dollar ($1.00). Eleven tickets for fifty cents (workmen's tickets); good between the hours of 6 and 8 a.m., and 5 and 7 p.m.; not good on Sundays; rules at present in force. Two cent transfers. School children and children same fare as at present in effect. Fare after midnight, same as at present, namely, ten cents cash fare. Also, that the payment to the city of Quebec of 4 per cent. on gross earnings of city street railway be discontinued.

Southern Canada Power Co., Ltd.—It is announced that the company has about completed its high tension transmission system extending over about 240 miles, connecting up its new hydro-electric development at Drummondville, Que., with the various cities and towns now supplied by the company, including Richmond, Sherbrooke, St. Hyacinthe, St. John's, Granby, etc., Que.

The following are the gross and net earnings of the company and its subsidiaries for the eleven months ending August 31st, 1919, as compared with the same period of last year:—

Gross	$538,966	$439,150	$99,815
Operat. exp. and purchased power	286,619	242,682	43,937
Net earnings	$252,346	$196,468	$55,878

Western Homes, Ltd.—An allotment has been made of 1,315 shares of capital stock for which applications were on hand. There were also applications for the transfer of 108 shares. Western Homes is a combined mortgage and building company, and was capitalized originally at $500,000. This stock was all taken at Winnipeg, and an increase was made to $1,000,000. Of the second $500,000, about one-half has been sold. In the beginning most of this stock was placed in the city. Latterly, more has been taken in the country. The loans are also now being distributed between the city and the country. The stock is being sold at a premium of $10 a share. The company had a number of orders for the erection of houses this year, but did not proceed owing to disturbed labor conditions. The president, Willis Argue, looks forward to an active season in 1920, when the company will enter in a larger way on the discharge of its function as a building concern. Preparation for a period of active construction of homes has been made through the period of the war. With reference to immigration from the United States, Mr. Argue states that his office has had more enquiries with reference to Manitoba land in the last few months than in any similar period in its history.

Canadian Locomotive Co., Ltd.—In the annual statement of the company for the year ended June 30th last, presented to shareholders, a record showing was made, and larger profits were revealed.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

INVESTMENTS AND THE MARKET

(Continued from page 32)

Operating profits last year were $848,683, and when to this is added $44,292 interest from investments there is a total of $892,976 for fixed charges, dividends, surplus, etc. The company has considerably improved its position during the year, as in addition to the increased profits its cash position is much better. Current assets have increased from $2,148,112 to $2,298,430, while current liabilities have been reduced from $1,037,620 to $633,754. The company's holdings in Canadian war and Victory bonds have been increased from $247,769 to $1,348,400. The interest on the present war bond investments, $75,000 per year, alone nearly meets the payment of interest on first mortgage bonds, amounting to $90,000.

The directors were re-elected as follows:—Æmilius Jarvis, Robert Hobson, Warren Y. Soper, John L. Whiting, James Carruthers, M. J. Haney, F. G. Wallace. The shareholders approved the company's course in connection with the strike, and the directors later left the conduct of the strike entirely in the hands of President Wallace.

United Cigar Stores, Ltd.—The gross sales of the company for period ended June 30th last, amounted to $1,958,844, as compared with $1,556,493 in the previous fiscal year, being an increase of $392,351, equal to 25 per cent. The operations for the year resulted in a loss of $642, as compared with a net profit of $49,285 in the previous year. The loss is entirely due to the increased cost of merchandise, and inability to obtain higher prices. The cost of merchandise sold was 3¼ per cent. higher during the period under review as compared with the previous year.

The president in his report to shareholders, says:—"Your directors regret to have to report another year of unprofitable business in spite of the continued expansion of our operations. The adverse conditions reported in our last annual report have not been mitigated during the year under review, but have, on the contrary, been accentuated. Cost of labor, rentals and taxes have steadily increased in Canada since the armistice was signed, and these are not only reflected in our own increased operating expense, but also in the cost of merchandise. These conditions have applied throughout the year to all our subsidiary companies.

"It will be seen that our business has been developed during the year. This development has resulted in greatly increased sales, as a policy of steady expansion is being followed by your directors, it is to be hoped that an adjustment of selling price in proportion to increased cost may be effected, which will result in our securing for our shareholders the larger profits which our increased business should earn."

Carter-Crume Co.—The shareholders, at the annual meeting in Toronto this week, approved the plan submitted by the directors for the exchange of shares with the American Salesbook Co. and for the winding up of the Carter-Crume. In 1911 the Carter-Crume Co. sold its salesbook business to the American Salesbook Co., Ltd., which company acquired the business of three companies, including that of the Carter-Crume. Since that time the Carter-Crume Co. has been a holding company, being an owner of the majority of the shares of the American Salesbook Co.

According to the report presented to the shareholders, covering the two and a half years' period ending June 30th last, the company had liabilities to the public of $142,584, against which there were sundry assets amounting to $63,818, leaving a net amount of $78,765 to be provided for. The capital stock was $927,700 preference and $1,250,000 common, or $2,177,700 in all. The company's position, it was shown by President S. J. Moore's report, had materially improved during the period covered, as at the end of December, 1916, the net excess of liabilities had been $264,560 as compared with $78,765 at the end of that period.

The plan of exchange of stock provides that for each share of preference stock of Carter-Crume there will be given (a) one and one-tenth shares of 7 per cent. cumulative preference stock of American Salesbook Co., Ltd., carrying accumulated dividends of 12¼ per cent., and (b) one-half share of common stock of American Salesbook Co., Ltd., of par value of $20. For each share of common stock there will be given (a) one-fourth share of 7 per cent. cumulative preference stock of American Salesbook Co., carrying accumulated dividends of 12¼ per cent., and (b) one share of common stock of American Salesbook Co. of par value of $20.

Ogilvie Flour Mills.—The company has declared besides the regular dividend of 3 per cent., on the common stock, a bonus of 15 per cent., both payable on October 1st to shareholders of record September. This, it is understood, does not come out of the earnings of the company's flour business, but out of dividends derived from lucrative investments of its surplus funds.

In the previous last annual statement issued by the company it was shown that the large increase in business over the preceding year was made up of about 20 per cent. in milling profits and about 80 per cent. in other profits, including investments, the whole statement being the best in the company's history, showing earnings equal to 72 per cent on the common stock, against 48.7 the previous year.

At the presentation of that annual statement to shareholders the managing director, W. A. Black, stated with reference to the present year and to the future that the outlook was not so promising as the one past.

DIVIDENDS AND NOTICES

INTERNATIONAL PETROLEUM COMPANY, LIMITED

NOTICE OF DIVIDEND No. 1

Notice is hereby given that a dividend of 50 cents per share has been declared by the Directors of the International Petroleum Co., Ltd., and that the same will be payable on or after the 1st day of October, 1919, in respect of the shares specified in any Bearer Share Warrants of the Company upon presentation and delivery of coupons No. 4, attached to the said Bearer Shares Warrants at the following Banks:—

Vancouver, B.C.—September 13—Sawdust building of the Vancouver Lumber Co. was destroyed. Estimated loss, $10,000.

September 20—Shaughnessy Military Convalescent Hospital wes destroyed.

Virden, Man.—September 17—Barn of James Stinson, six miles north of the town, was destroyed. Estimated loss, $3,500, with very little insurance.

ADDITIONAL INFORMATION CONCERNING FIRES

Collingwood, Ont.—September 16—At an enquiry here to-day an investigation was held in regard to two fires. Evidence was brought in against M. J Johnston for collecting dual insurance on a building burned on October 25, 1918, in which he had no interest, and that he also was attempting to collect insurance from two companies on a property burned on May 29 last. The companies interested are the Acadia of Halifax and the Dominion of Canada Guarantee and Accident Insurance Co.

Manitoba.—The following is a statement of fire losses and insurance in the province of Manitoba for July as reported by the Provincial Fire Commissioner: Number of fires reported, 160; estimated value, $1,614,992; amount of insurance, $1,284,961; estimated loss, $188,023; loss ratio per capita, $0.3067; fatalities reported, nil. For the year to July 31st: Number of fires reported, 879; estimated value, $18,454,760; amount of insurance, $13,929,385; estimated loss, $911,239; loss ratio per capita, 1.4865; fatalities reported, 7.

A wire just received from our Winnipeg representative states that the report of the commissioner for the month of August shows a total of 155 fires, involving property loss of $115,195. Of this amount the city of Winnipeg contributed 58 fires, with a comparatively small loss of $17,210, or 15 per cent. of the total loss of the province. Of the total number of fires, 42 were in dwellings, with a loss of $13,840, or 12 per cent. of the total. Thirty-two farm fires were responsible for a loss of $24,593, being 21 per cent. of the total loss of the province. Fires in frame buildings keep increasing—89 fires, or 60 per cent. of the total, occurred in this class of structure, with a loss of $94,110, or 85 per cent. of the total loss of the province. While 19 fires occuring in the province, and reported as of "unknown" origin, caused a loss of $19,453, it is worthy of mention that a cause was found for every fire which happened in Winnipeg during the month.

COMPANIES OPPOSE JUDSON CLAIM

The Winnipeg implement plant of the C. F. Judson plant, which was badly damaged by fire on September 28th, 1918, was insured in thirteen companies. The amount of damage was claimed by the company as being $160,000. The insurance companies refused to pay, however, alleging that the origin of the fire was suspicious. The fire commissioner for the province accordingly made an investigation, but placed no blame. Upon being ordered to make a second investigation, he did so, but still reported that nothing criminal was found.

The owners are now entering suit for $130,000 in the Manitoba Court of King's Bench. A test case will be made against the North British and Mercantile Insurance Co., and whether further actions will be taken will depend on the result of this case. The thirteen insurance companies, and the amount involved in each case, are as follows:—

North British and Mercantile	$13,000
Norwich Union Fire	3,500
L'Union Fire	10,000
London and Lancashire Fire	21,000
Phœnix Fire	18,500
Royal Insurance Co.	5,000
North Empire Fire	12,500
Caledonian Insurance Co.	11,500
Nationale Fire	5,000
Law, Union and Rock	5,000
Hudson Bay Insurance Co.	5,500
Royal Insurance Co.	20,000
Mount Royal Assurance Co.	15,000

Current Loans Outside of Canada Show Large Increase for Month and for Year—Circulation Drops—Substantial Increase in Loans to Municipalities—Decline in Call Loans Outside Canada

	August, 1918.	July, 1919.	August, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 554,906,517	$ 584,176,765	$ 584,300,855	+ 5.5	+ .02
Deposits after notice	1,014,711,865	1,175.092,155	1,196,632,931	+17.9	+1.8
Current loans in Canada	920,775,269	1,014,387,206	1,011,785,424	+ 9.9	— .3
Current loans elsewhere	101.551,546	138,217,957	146,964,315	+44.5	+5.8
Loans to municipalities	56,662.931	54,455,738	57,536,867	+ 1.8	+5.5
Call loans in Canada	73,509,571	93,587.497	95,899,836	+30.1	+2.1
Call loans elsewhere	160,544,990	178,098,434	174,176.578	+ 8.8	—2.2
Circulation	202,489,039	223,662,648	223,454,556	+10.4	— .04

THE above are the more important changes as shown by the summary of chartered banks' statements as at August 31st, issued by the Department of Finance. While demand deposits are practically unchanged, savings deposits increased by over $20,000,000. The imminence of the Victory loan has increased bank loans to municipalities rather more than usual. Advances to the provincial governments are also higher than at any time, excepting one or two previous occasions. Deposits outside of Canada are $238,363,859, compared with $294,650,777, which was an unusual figure for July. Holding of current gold and subsidiary coin are slightly less than for July.

Just how long the upward trend of savings deposits will continue is a matter of conjecture, but many bankers anticipate a reversal of the movement, or at least a cessation of the increase, at an early date. The only setback encountered during the past year was on account of the last Victory loan, as is shown by the following table:—

	Deposits payable on demand.	Deposits payable after notice.
1918—August	$554,906,517	$1,014,711.865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072
June	605,927.027	1,139,569,570
July	584,176,765	1,175,092,155
August	584,300,855	1,196,632,931

The course of the deposits account during the past six years is shown in the following table:—

August.	On demand.	After notice.	Total.
1914	$338,984,418	$ 659,399,151	$ 998,383,569
1915	334,022,174	692,580,626	1,026,602,800
1916	443,317,275	806,774,687	1,250,091,962
1917	439,995,259	952,591,821	1,392,587,080
1918	554,906,517	1,014,711,865	1,569,618,382
1919	584,300,855	1,196,632,931	1,780,933,786

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—August	$ 920,775,269	$73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136
November	1,082,709,655	85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427
February	1,095,301,791	79,154,121
March	1,117,197,446	87,601,337
April	1,107,986,523	86,091,844
May	1,071,447,686	89,187,032
June	1,043,712,932	95,852,728
July	1,014,387,206	93,587,497
August	1,011,785,424	95,899,836

The following table shows the call loans abroad in August, as compared with previous returns:—

	1916. $	1917. $	1918. $	1919. $
January	134,248,552	155,747,476	132,687,066	140,819,656
February	139,138,651	162,344,556	160,239,494	155,983,681
March	141,889,989	161,616,735	167,296,701	160,116,443
April	147,146,443	159,156,054	179,818,531	155,533,666
May	163,400,659	168,692,675	172,259,879	157,176,325
June	182,757,015	159,309,133	170,034,476	167,236,045
July	177,121,733	151,875,676	167,112,836	178,098,434
August	171,380,353	176,610.625	160,544,990	174,176,578
September	173,877,586	166,480,004	159,680,810	....
October	189,346,216	151,018,747	157,040,858	....
November	183,250,389	139,832,552	171,035,732	....
December	173,878,134	134,483,482	150,248,322	....

The following table shows the course of the principal loan accounts during recent years:—

August.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 836,574,099	$ 47,314,832	$69,229,045	$ 96,495,473
1915	758,342,735	44,968,445	71,855,565	120,607,677
1916	739,938,513	66,556,371	86,351,216	171,380,353
1917	836,429,670	87,082,849	71,204,351	178,610,625
1918	920,775,269	101,551,546	73,509,571	160,544,990
1919	1,011,785,424	146,964,315	95,899,836	174,176,578

ALBERTA HAIL INSURANCE RATE

The Alberta municipal hail insurance board has struck the tax rate for the year, at 6 per cent. The losses totalled $506,000, and they carried $16,000,000 in insurance for the season. Withdrawals after June 15th, however, reduced this amount to about $12,000,000. The rate fixed for withdrawals was on the following scale: From June 15th to June 29th, 4 cents per acre; from June 29th to July 6th, 8 cents per acre; from July 6th to July 13th, 12 cents per acre; from July 13th to July 20th, 16 cents per acre. According to the act, no withdrawals were permitted after July 20th. About 95 per cent. of all insurance carried was at $8.

AGRICULTURAL INSURANCE CO.

The Agricultural Insurance Company has been incorporated by special act of the Saskatchewan Legislature, with authorized capital of $500,000, and will shortly commence business with head office in Regina. Only farmers can be shareholders, and the amount that can be held by any person is limited; over 500 shareholders have already subscribed for $200,000 of stock. The company has authority to write all classes of insurance except life. The provisional directors are Geo. M. Bell, Regina; Hugo E. Meilicke, Saskatoon; R. E. Drennan, Canora; Christopher Lee, Forward; A. C. Moynes, Lampman, and C. B. Angus, Francis.

Of the deposit in Central Gold Reserves $10,500,000 is in gold coin; the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

ANOTHER DOMINION PERMANENT ACTION

Action has been entered in the Ontario courts for the recovery of $30,000, with interest at five per cent. for 17 years, from directors of the Provincial Building and Loan Association, who are alleged to have accepted this sum in return for their assent to the purchase of the assets of the company by the Dominion Permanent Loan Corporation. The statement of claim, which is entered on behalf of the shareholders of the Provincial Association, says:—

"The Dominion Permanent Loan Corporation agreed to purchase the assets of the Provincial Building and Loan Association, and the Dominion Permanent Loan Corporation agreed to pay and subsequently did pay to the defendants $30,000 as a bribe for approving of the said purchase as directors of the Provincial Building and Loan Association. The said money was paid by the Dominion Permanent Loan Company as a bribe to the said directors, and was wrongfully accepted by the said directors as a bribe and in breach of their fiduciary relations to the Provincial Building and Loan Association. The fact of the payment of the said bribe was concealed by the directors of the Provincial Building and Loan Association from its shareholders until the Dominion Permanent Loan Company was wound up, and the facts in connection with the matter were ascertained by the liquidator."

PERSONAL NOTES

Sir Donald Mann, for many years vice-president of the Canadian Northern Railway, has returned to Toronto from the west.

Mr. E. L. Pease, general manager of the Royal Bank of Canada, has returned to Montreal after touring the four western provinces.

Mr. E. M. Saunders, treasurer of the Canada Life Assurance Co., is now in the Canadian west in connection with the company's investments there.

Mr. M. C. Ross, loan inspector at Regina, Sask., for the Mutual Life of Canada, has been promoted to the managership of the new office at Saskatoon.

Mr. John. R. Lamb, assistant general manager of the Bank of Toronto, is spending a short time in Winnipeg. He was formerly manager of the bank there.

Mr. O. Asselin, who has just recently returned from overseas, has joined the Montreal firm of Versailles, Vidricaire, Boulais, Ltée., as publicity manager.

Mr. James Murdock, Toronto, has been appointed to take the place on the Dominion Board of Commerce, temporarily filled by Mr. F. A. Acland, deputy minister of labor.

Mr. J. W. Yuile, who has been elected a member of the Montreal Stock Exchange, has formed a partnership with Mr. Robert Hickson, son of the late Sir Thomas Hickson.

Lieut.-Col. A. A. Corrigan, M.B.E., of Wellington, New Zealand, is in Canada to make trade connections. It is his opinion that Canada's chances with that country are good.

Mr. E. Roger Owen, general manager of the Commercial Union Assurance Co., of London, England, is in Canada. He will visit Vancouver, and from there he will go to San Francisco

Mr. Charles Q. Parker, for many years secretary--treasurer of the Excelsior Life Insurance Co., has been appointed western manager of the company, with headquarters at Winnipeg, Man.

Mr. W. Watkins, of London, England, was tendered a luncheon this week in Montreal by the members of the Chartered Institute of Secretaries of Joint Stock Companies, of which he was former president.

Mr. William F. Irwin, who for a number of years has been a prominent Vancouver stock broker, and associated with Toronto and Montreal financial houses, has become a member of the Vancouver Stock Exchange.

Mr. F. E. Meredith, K.C., of the law firm of Meredith, Holden, Hague, Shaughnessy and Heward, Montreal, has been elected a director of the Bankers Trust Company, Limited, at a meeting of the board of the institution this week.

Mr. A. E. Parker, C.A., B.Sc.Ac., has been appointed managing editor of "Canadian Finance," Winnipeg. He has been a contributor to "Canadian Finance" in the past, and is also the author of a number of books on business subjects.

Mr. W. B. Sterling, who is secretary of the Winnipeg Stock Exchange, and active in the general bond and stock business at Winnipeg, has left for Great Britain, and will spend a couple of months in that country and on the continent.

Mr. W. H. Carter, president of the Winnipeg Board of Trade, has sent in his resignation. He states that the council would have to accept his decision as his business demands prevented him from giving as much attention to the board of trade as he felt was necessary.

Mr. T. A. Dark, F.A.S., actuary of the Excelsior Life Insurance Co., has assumed the duties of secretary, and will now hold the dual position of secretary and actuary. Mr. Charles P. Muckle, A.A.S., has been appointed treasurer of the company.

Mr. A. L. Dawe, secretary of the Canadian Pulp and Paper Association, has returned to Canada, after three months' sojourn in Great Britain making a survey of the market possibilities. Mr. Dawe states that there is an increasing demand for Canadian made paper, and publishers, box makers, and other users of paper products, are eager to get their supplies from Canada.

Sir Herbert Holt, president of the Royal Bank of Canada, who just recently returned to Canada from the United Kingdom, views the situation over there as critical. He states that there is plenty of money among the classes who have benefited by the war, and that there is a veritable frenzy for spending. Everybody is thinking of themselves and the present, and failing to look into the future.

Mr. J. H. Parkhill, the president of the Parkhill Bedding Co., which was recently formed in Winnipeg, was for fourteen years the president and general manager of the Alaska Bedding Company. A. B. Jones, who is the vice-president and sales manager of the new company, was formerly the sales representative of the Alaska Bedding Company; R. C. Young, who is a director of the new company, and who will be the superintendent, was also with the Alaska Company. The company is erecting a new factory on Notre Dame Ave.

OBITUARIES

Mr. Charles W. Chadwick, president and manager of the Colonial Realty and Securities Corp., Toronto, passed away this week.

Mr. E. F. Hebden, a leading figure in the Canadian banking world, and general manager of the Merchants Bank of Canada, Montreal until physical infirmities forced him to retire, died this week. The late Mr. Hebden was born April 29th, 1851, at Hamilton, Ont., son of the late Rev. Canon Hebden, M.A., of English parentage. After preliminary education at Hamilton, he completed his university course at Heidelburg and Geneva. Returning to Canada he entered the service of the Merchants Bank as junior clerk in June, 1871. He made rapid progress, working his way through the various grades until in 1896 he was sent to Montreal as superintendent of branches, and in 1905 was appointed general manager, and managing director in July, 1916. During his period of office as general manager he was responsible in large measure for the extension of the work of the Merchants Bank in western Canada.

Mr. A. L. Eastmure passed away in Toronto this week. Having been a reporter for the "Montreal Star" he, at 23, joined the Citizens' Insurance Co., under the presidency of the late Sir Hugh Allan, drafting the first policy and tariff of rates for liability insurance issued on this continent. In 1887 he was appointed general superintendent of the Citizens' Co. for Ontario, with headquarters in Toronto. Three years later the firm of Eastmure and Lightbourn was formed. In 1911 he organized the Casualty Company of Canada, becoming its president and managing director. He was senior member of the firm of A. L. Eastmure and Son.

THE BOARD OF COMMERCE ORDERS

THE Board of Commerce during its brief career up to the present time has investigated numerous industries and has already issued three orders. The first, dealing with sugar prices, was practically ineffective. The second, fixing the retail price of milk, was so favorable to the producers that it met with little objection from them. The third order, aimed at the packers, without regard to costs or the market conditions, promises to be the most interesting. This order, issued a few days ago, says:—

"It is ordered and declared that on, from and after the fifteenth day of October, 1919, pork and the products of hogs shall be sold by the owners or operators of packing houses at prices substantially the same as those which prevailed on the tenth day of March, 1919, and it is declared that on and after the said fifteenth day of October, 1919, any such person, firm or corporation within Canada being an owner or operator as aforesaid who sells any such pork or products of hogs for consumption within Canada at a price greater than those of said tenth day of March, 1919, shall be deemed to have sold same at a price which is unreasonable and unjust and at an excessive profit.

"And it is further ordered and declared that notwithstanding this order all sales of pork and products of hogs shall be made after the date of this order and until and after said fifteenth day of October, 1919, at prices which shall in relation to the cost of such goods be reasonable and just and not greater than those at this date prevailing, and always with relation to any descending cost of live hogs from time to time.

"Without prejudice to applications by any of said owners or operators of said packing houses for reconsideration and without prejudice to applications by any other persons for further reductions.

"And it appearing that excessive retail prices have been charged, that this inquiry do proceed further with regard to the same with a view to a like declaration affecting retail dealers.

"This order is not to preclude any further action or proceeding by this board or any other authority or person in the premises.

"And that this order be served as provided by the Board of Commerce Act upon all persons, firms and corporations engaged in the business of packers of pork or pork products in Canada, and in each case shall thereupon bind and affect the persons, firms or corporations so served."

In explanation of this order it was pointed out that the fixing of a maximum would not interfere with any downward movement, and also that if retailers did not lower prices to a corresponding degree, a similar order would be directed at them.

Following the receipt of this order, packers in the city of Toronto held a conference and issued the following statement:—

"The order of the Board of Commerce promulgated today is, on the face of it, impracticable. The implication of it is: (a) That packers are at present selling product at prices which would permit of reduction of two cents to 15 cents per pound without loss; or, (b) That the board, without regard to the actual cost of the product, arbitrarily imposes the reduction.

"Meats now being sold are the product of hogs bought in the past two months during which live hog prices advanced throughout the world to the highest level in history. At present prices these meats are showing heavy loss. In regard to this loss packers desire no sympathy. It is a phase of the business which they meet in every year's operations. The actual facts are that in its most prosperous year the profits of the packing industry in Canada were less than one-half cent per pound of product sold. The order assumes to fix selling prices of products on the basis of market prices March, regardless of and ignorant as to whether these prices will return cost or not.

"The action of the board has been taken after a superficial enquiry without conference with the trade, and without any opportunity being afforded of presenting the packers' case. Not only does the order assume to fix present prices on an unfair basis, but it enacts a basis of continued fixing of prices which is unscientific and unsound, and would necessitate the operation of all plants at a continual loss. If left to take a normal course, prices of product will decline in keeping with the lower tendency of live hogs, but without the demoralization of the trade and of the live hog industry to the detriment of the entire country, which must inevitably result from the enforcement of such ill-advised regulations."

CANADIAN ADVANCES TO FOREIGN PURCHASERS

CANADA has already advanced $106,003,391 on account of the five credits of $25,000,000 each to Roumania, Greece, France, Belgium and Italy, according to a statement made by Sir James Lougheed in the Senate on September 25th. Italy has used up the entire amount allotted to her, Belgium has used her allocation to the extent of $1,008,021, and Roumania up to $5,053,655. No advances have been made to France as yet, that country being true to her policy of buying just as little as possible outside of her own frontiers. To Greece no amount has been advanced as yet, but contracts have been entered into for amounts totalling $9,653,054, for which advances will have to be made shortly. That means practically an amount of $21,718,033. All advances are covered by treasury bills deposited to the credit of the Minister of Finance in London. These treasury bills of Roumania, France, Belgium and Italy are repayable in five years from December 31st, 1919, and they carry interest, payable half-yearly, at the rate of 5½ per cent.

So far as Greece is concerned, twenty of the twenty five millions of credit opened for her is on the same terms for purchases made in Canada by the Greek government. The purchases are made direct by the Greek government, and consist mainly of military stores to outfit her army. The other five million dollars' credit is for civilian purchases, and it represents the best business now offering from European countries. The terms of payment are forty per cent. cash, twenty per cent. in six months, twenty per cent. in nine months, and the remaining twenty per cent. in twelve months. It is believed most of the goods thus purchased by the Greeks will be sold in Roumania or other countries where the Greeks, being near at hand, can judge of the reliability of the buyers. Belgium and Roumania each can buy foodstuffs to the extent of five million dollars, raw materials worth the same amount, and manufactured articles valued at fifteen million dollars. France, however, can devote ten million dollars of the credit to the purchase of foodstuffs, five million dollars to buying raw materials and ten million dollars to getting manufactured products.

FIRE LOSSES AND NATIONAL WEALTH

FIRE losses in Canada are undoubtedly heavy, in fact they figure out to a larger sum per capita per annum than in the case of any other country for which statistics are available. A comparison of this kind, however, overlooks certain fundamental differences, some of which have been already mentioned, and some of which have been overlooked.

In Canada, as with most new countries, there is much building of a cheap and temporary character, which is very subject to destruction by fire. This is especially true of the prairie provinces and of some other parts where wood is the most easily available and most economical material for construction. Cities and towns which have a local supply of brick and stone generally have a good fire record. This is one reason why the cities of western Europe, which erect buildings of stone to last for centuries, have such a low per capita fire loss. Again, as was pointed out by A. R. Small in addressing the recent Fire Marshal's convention in Toronto, our industrial conditions have been changing so rapidly that the erection of buildings of too permanent a character is not commercially feasible.

Fire destroys property, and a fair comparison of national fire losses should therefore be figured in proportion to the value of buildings rather than in proportion to population. It is not an accident that the countries which have the largest per capita wealth have also the largest per capita fire loss, and considering the large proportion of buildings in Canada per head of population, our losses do not seem nearly so bad. Estimates of national wealth are not available for all countries, and where they are available they are not compiled at the same time nor by the same methods. Reasonably close estimates have been prepared in the case of the countries given below, the date in some cases being indicated. These are worked out on a per capita basis, and the fire losses in each case, as given by the Commission of Conservation in its recent report on fire losses in Canada, are inserted for purposes of comparison.

Country.	Wealth per cap.	Fire loss per cap.
Canada (1917)	$2,377	$2.96
United States (1916) ...	2,200	2.26
United Kingdom (1908) ..	1,988	1.95 (Scotland) .64 (England) .45 (Ireland)
Germany (1908)	1,224	.28
France (1908)	1,130	.74
Austria Hungary	1,100	.32
Italy	548	.53

The fire losses, it will be noticed, range almost in the same order as the wealth Even in proportion to wealth, however, our fire losses in Canada would still head the list; this loss is an item in the cost of production, and in spite of the fact that we are handicapped through our methods of building, a further effort should be made to reduce it.

THE UNEMPLOYMENT OUTLOOK

UNEMPLOYMENT in Canada will be worse in this winter than in any year since 1915, according to the opinion of the most competent authorities. This opinion is confirmed by the evidence given to the soldiers' re-establishment committee of the House of Commons by Bryce M. Stewart, director of the Employment Service of the Department of Labor, who estimated that present number of unemployed in Canada at 50,000.

The initial cause of this change was the cessation of war business. Our speeding up process of the past few years was the result of war demands, and every industry is feeling the depressing effects of the return to peace conditions. A lessening of orders means less and lower prices, and the prices of fundamental commodities have with very few exceptions fallen off since the armistice was signed. It also means lower wages, which again bring lower production costs. The fact that most of the large strikes during the past summer have failed is an indication of the correctness of this view. Some time ago there was much talk of the demands for after the war reconstruction, but the predictions of the optimists who looked for renewed activity have not been carried out. This was the case with preceding wars, and will be so in the case of this one, exaggerated in proportion to the magnitude of the struggle.

The railway strike in England illustrates the fact that public ownership, or operation, is an aggravation, not a solution, of industrial difficulties. Public control, such as is carried out in Canada through the Board of Railway commissioners and the arbitration system of the labor department, enables the government to step in as an independent party and adjust a dispute. W. A. Appleton, secretary of the General Federation of Trades Unions in Great Britain, says: "At the beginning of the war, when the government began to interfere in industry, I warned our own people and the government of the consequences. If the government undertook to run industry, they undertook all the responsibilities and all the liabilities, and one liability was that the animus which had been directed against capital would be directed against the government the moment the government stepped in between labor and capital. Whatever is done for the railwaymen must come out of the pockets of the people. I am anxious that everyone should be paid not only at a fair rate, but at a generous rate, for everything he does, but you cannot continuously pay men for work they don't do."

PROGRESS IN VICTORY LOAN ORGANIZATION

Publicity Work Along Last Year's Lines—Local Organization in Nova Scotia

JUST three weeks now elapse before the Third Victory Loan campaign opens, and general preparations, such as the organization of Dominion, provincial and local committees, are practically complete. The publicity work has already commenced, the material having been prepared during the past few weeks. The Dominion Publicity Committee is constituted as follows: W. N. McIlwraith (chairman), E. M. Emory (vice-chairman), C. H. Rankin (secretary), T. H. Andison, F. J. Coombs, J. A. Eccles, A. D. Emory, C. P. Fell, H. B. Housser, F. W. Kerr, A. L. Lewis, L. Lorrain, D. I. McLeod, T. H. Roadhouse, M. E. Williams, L. Trepanier.

Some of the booklets being issued for publicity purposes are entitled: "The 1919 War Year," "How the Money Was Spent," "Why the 1919 Victory Loan," "What You Want to Know About the Victory Loan," "An Appeal to the Farmer."

Nova Scotia

The loan organization in Nova Scotia is now completed, and on September 16th, the first meeting of the organizers and the county chairmen was held in Halifax, at which objectives and other topics were discussed. The Nova Scotia organization is as follows: Provincial Executive Committee. G. S. Campbell (chairman), S. A. Howard (secretary), National City Co.; R. H. Metzler, F. B. McCurdy and Co.; P. R. Jack, A. M. Jack and Son; W. B. Milner, Royal Securities Corp.; A. F. Mackintosh, J. C. Mackintosh and Co.; H. M. Bradford, H. M. Bradford; R. W. Elliott, Nova Scotia Trust Co.; B. G. Burrill, Standard Bond Corp.; W. F. Mahon, W. F. Mahon and Co.; W. I. MacDougall, Eastern Securities Co.; H. C. Coughtry, McDougall and Cowans.

Bankers' Committee, D. MacGillivray (chairman), F. St. C. Harris, F. O. Robertson, H. A. Fleming, A. E. Nash. Publicity Committee, chairman, J. R. McLeod (F. B. McCurdy and Co.). Special Names Committee, chairman, B. G. Burrill (Standard Bond Corporation). Provincial Press Committee, chairman, Dr. J. D. Logan.

The following is a list of county chairmen and organizers for the various counties: Annapolis, chairman, Hon. S. W. W. Pickup; organizer, L. F. Gibbons. Antigonish, organizer, P. R. Jack. Cape Breton, chairman, Major Walter Crowe; organizers, R. W. Elliott and Colonel Parsons. Colchester, chairman, A. J. Campbell, K.C.; organizer, H. F. Bethel; Cumberland, chairman, George T. Douglas; organizers, W. I. MacDougall, F. J. Brennan. Clare, chairman, E. L. Comeau; organizer, C. Blackie. Digby, chairman, H. B. Short; organizer, C. Blackie. Guysboro, chairman, E. C. Whitman; organizers, W. B. Milner and H. G. Wood. Hants, chairman, Dr. T. S. Boyle; organizer, W. F. Mahon. Inverness, chairman, Rev. A. L. McDonald; organizer, J. C. Bourinot. Kings, chairman, George E. Graham; organizer, S. E. Thompson. Lunanburg, chairman, J. J. Kinley, M.P.P.; organizer, A. S. Mahon. Pictou, organizers, H. M. Bradford, Messrs. Fraser and Hoyt. Queens, chairman, George S. McClearn; organizer, Percy Strong. Richmond, chairman, D. H. Campbell; organizer, H. M. Bradford. Shelburne, chairman, R. Irwin, M.P.P.; organizers, P. C. Pope and J. E. Barss. Victoria, chairman, Hon. W. F. McCurdy; organizer, Lieut. Angus McLean. Yarmouth, chairman, E. K. Spinney, M.P.; organizer, A. P. Stoneman. Halifax County, chairman, Hon. George E. Faulkner; organizers, R. H. Metzler and W. E. Mitchell. Halifax City, chairman, W. A. Black; organizers, A. F. Mackintosh, H. C. Coughtry.

Nova Scotia's objective will be $17,145,000. according to a statement made at the meeting on the 16th ult., the 1918 Victory Loan figures for Nova Scotia were, official objective, $20,130,000, unofficial objective, $25,485,000, subscribed, $33,207,850. The chairman, G. S. Campbell, said that canvassers should remove the impression that because the bonds were taxable all would pay taxes on them. The large majority would not, because their incomes were within the minimum exempted. The local objectives within the province are to be as follows, compared with last year's figures:—

County.	Official objective, 1918.	Unofficial objective, 1918.	Subscribed, 1918.	Proposed objective, 1919.
Annapolis ..	$ 500,000	$ 600,000	$ 630,250	$ 350,000
Antigonish ..	430,000	500,000	553,050	300,000

Yarmouth ..	600,000	725,000	767,750	450,000
Halifax County	615,000	750,000	1,034,700	475,000
Haifax City	5,000,000	6,250,000	9,314,050	4,750,000
	$20,130,000	$25,485,000	$33,207,850	$17,145,000

BUSINESS CONDITIONS IN THE WEST

"Threshing operations have been delayed a good deal in Manitoba by rain and bad weather in the past few weeks," says a wire from our Winnipeg correspondent. "As a consequence wholesale houses in Winnipeg report that collections are a little slow at the present time. This is a change from the conditions which have obtained for several years. For the past three years at least business in the prairie provinces has been good. Trading in the country stores was put on a better basis in the first two years of the war and has been done in a better way ever since, resulting in more cash sales and less extended credit. The reason given for slow collections just now is the delay in threshing and in the delivery of grain."

INDUSTRIAL ACCIDENT BOARDS' CONVENTION

Officers Elected—Next Meeting Will be in California—Industrial Relations Discussed

AT the last session of the convention of the International Association of Industrial Accident Boards and Commissions, held in Toronto, September 23rd to 26th, the following officers were elected for 1919-20: President, Will J. French, Industrial Accident Commission, California; vice-president, Charles S. Andrus, Illinois; secretary-treasurer, Royal Meeker, United States Commissioner of Labor Statistics, Washington, D.C. The new executive committee elected includes Messrs. T. J. Duffy, Ohio; W. W. Kennard, Massachusetts; W. A. Marshall, Washington, and C. H. Verrill, Washington, D.C.

The next convention is to be held in San Francisco. The newly-elected president, Mr. French, in extending a cordial welcome to the members, and promising them California hospitality, declared that, while promising them something good, he could not promise to exceed the hospitality of Ontario and Toronto, as expressed to the association during this convention by the retiring president, George A. Kingston. The re-election of secretary-treasurer Royal A. Meeker was accompanied by more than one expression of cordial appreciation of the secretary's work, and an honorarium of $300 for the past year's services and partly to cover out-of-pocket expenses was voted. The auditing committee reported the balance sheet as presented by the treasurer early in the convention as accurate, and indicating funds in hand amounting to a little over $1,500, of which $700 was invested in Liberty bonds. A number of resolutions affecting technical matters of compensation administration were referred to the executive committee for consideration.

Industrial Relations

At a meeting, held on the evening of September 25th, A. H. Young, industrial relations manager of the International Harvester Co., gave an address on co-operation in industrial relations as a means towards better understanding, better relations between employer and employed, and eventually better production. The establishment of relations between employers' representatives and the representatives of employees which would conduce to perfectly frank, free and friendly discussion of all needs and problems of mutual importance was the ideal indicated by the speaker, and he explained the application of the system in practice at the plants of the Harvester company as exemplary of the good results obtainable. "A written covenant is hardly necessary," said Mr Young, "when once a group of fairly-selected employee representatives is invited to sit with the management of a firm, and join with it in determining the firm's policies in matters of mutual interest, and the constructive activities of such a council are limited only by the extent to which frankness and fairness are missing from the deliberations."

Another speaker was W. E. Segsworth, of the Soldiers' Civil Re-establishment Department. He spoke on the training of disabled soldiers, and especially of the system by which vocational training is given men with special aptitudes in regular industrial plants. In every case, he said, the men are added to the pay-rolls of the plants where they gain their special training. The fact points to the value of similar training for the industrially disabled.

Col. Carnegie, formerly of the British Munitions Board, referred with seriousness to the peril facing countries where industrial relations had been upset and strained to the point of industrial non-productiveness. He instanced the Whitley plan of employee representation as the only one by which production had been increased and labor disputes decreased in British industries.

Sir John Willison, as chairman, made reference to the good feeling growing into strength between Britain and the United States, and also the evident unanimity existing as to the matter of workmen's compensation. He prophesied before long unanimity as great on the questions of old-age pensions, insurance for sickness and compensation for invalidity.

EXPENDITURE TO RE-ESTABLISH SOLDIERS

Large Payments for Pensions, Gratuities, Soldiers Settlement, Vocational Training, and other Items

AT a meeting of the special committee of the House of Commons on Soldiers' Civil Re-establishment, held on September 23rd, evidence was received regarding work already done. Col. J. W. Margeson, a member of the Board of Pension Commissioners, gave the committee the records of his department to July 31st, of this year. Pensions paid to that date were: Dependents, 17,135, yearly liability $10,051,559; disabilities, 56,794, yearly liability $8,293,721. This brought the total number of pensions to 73,929, and the total yearly liability to $18,345,280. Of the dependents 10,791 are widows, and the annual liability for them is $5,473,784. Nursing Sisters disabled total 68. The Pension Act of 1919 increased the liabilities by $3,750,000. Pensions paid in the United States number 2,951, and in Great Britain 7,524.

Expenditures to July 31st, were $31,311,145, of which $2,725,353 was for administration. Estimates for the fiscal year 1919-20 were given as $30,000,000, and at the peak load the expenditure for a fiscal year would be $33,584,283. Of the staff, there were 488 males and 744 females in Canada, and 110 males in Great Britain. Of the 488 male members of the staff 352 were former members of the C.E.F., and it was hoped to reduce the staff by the end of the fiscal year from a total of 1,342 to 900. A gradual reduction of the staff was now being made in every case possible.

Pensions at about the rate of 25 per day were being transferred to Great Britain at present, and it is estimated that it will be necessary to maintain a staff there for a year or so. The charges in all cases are paid by the Pensions Board, so that the pensioner does not lose. Very few of the doctors employed by the Pensions Board are civilians, and these are being discharged, except in the case of specialists on certain cases and treatments.

The advisability of commuting pensions, and paying a man the whole sum in cash, was broached. Col. Margeson did not favor the plan, for he thought many men would invest their money, lose it, and then come back for more. There had been no great migration of disabled men to the United States, he said in answer to a question. The Pensions Board took every precaution against fraudulent practices and made frequent investigations into various cases. In regard to the scheme of commuting small pensions into life insurance for pensioners, Col. Margeson thought the scheme a good one, but did not think many soldiers would go into it.

Mr. S. Maber, secretary of the Department of Soldiers' Civil Re-establishment, stated that the number of applications for loans approved to August 30th, was 23,896 and the amount of loans approved $30,906,130. There were 10,293 loans at an average of $3,002. The total loans estimated to March 31st, 1920, are $46,906,130. The largest amount of loans approved in one week since operations began was in the week ended August 23rd, when the total was $2,271,591. The number of applicants recommended for agricultural training was 2,876 and the number training 642. It was estimated that if 50,000 soldiers were settled by the department the total amount placed out on loan by the board would reach $150,000,000 Estimated total requirements to March 31st, 1920, were $1,775,278, for which $928,070 was for salaries. There were 613 male and 301 female employees, and 95 per cent. of the males were returned soldiers.

On September 24th, T. O. Cox, officer in charge of gratuities, department of militia and defence, said the amount paid in gratuities was $75,179,396 to August 31. About $45,000,000 was yet needed, the total being estimated at $120,000,000. The amount paid for separation allowance was $104,291,440 and the estimated further expenditure, $1,500,000. Some revision in these estimates may be necessary, and the total gratuities may increase to $125,000,000. The gratuity was paid to every man having served more than twelve months. Nursing sisters have the status of lieutenants, while a matron ranks as captain. A nursing sister with three years' service overseas would receive six months' gratuity at $90 a month and a matron would receive $733. V.A.D.'s and other volunteer workers get no gratuity.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:

Kimberly, B.C.	Bank of Montreal.
Goderich, Ont.	Bank of Hamilton.
Underwood, Ont. (Port Elgin)	Bank of Hamilton.
Lake Valley, Sask.	Bank of Hamilton.
Stoney Beach, Sask.	Bank of Hamilton.
Brownlee, Sask.	Merchants Bank of Canada.
Estbank, Sask.	Merchnants Bank of Canada.
Lake Valley, Sask.	Merchants Bank of Canada.
New Toronto, Ont.	Canadian Bank of Commerce.
Beaverton, Ont.	Sterling Bank of Canada.

*Sub-branch.

To avoid confusion with the main office at Vancouver, B.C., the Bank of Montreal has changed the name of the "Main Street Branch, Vancouver," to "Cordova Street East Branch, Vancouver."

The Bank of Toronto has purchased the block at the south-east corner of George and Hunter Sts., Peterborough, Ont., where the banking office has been situated for many years, and it is the intention of the bank to enlarge and remodel the present premises.

The Royal Bank of Canada will open a branch office in the building on the south-west corner of George and Townsend Sts., Sydney, N.S., in the near future. The site is known as the Imperial Building. The bank has also purchased a site in Galt, Ont., known as the old Central Hotel, and next spring a new building will be erected.

Mr. C. A. Norsworthy, former accountant of the Merchants Bank of Canada at Wallaceburg, Ont., has been promoted to manager of the bank's new branch at Flesherton, Ont., with a sub-agency at Ceylon.

Mr. Dudley Oliver, formerly manager of the Waterloo Place branch of the Bank of Montreal in London, England, who returned to Canada some weeks ago, has been appointed associate manager of the Ottawa branch of the bank.

Mr. W. S. Darling, western inspector for the Dominion Bank, is on the Pacific Coast in connection with the work of the institution.

Mr. G. S. Henley, manager of the Edmonton branch of the Bank of Montreal; president of the Edmonton Board of Trade, and prominent in city affairs, has been appointed to the foreign office of the Bank of Montreal, and will take up residence shortly in Montreal. Mr. Henley is succeeded here by F. S. Ridley, inspector of the western division of the bank, with headquarters in Winnipeg.

The Merchants Bank of Canada intends erecting a new four story building at 12 King St. W., Toronto, on the site of the former Dominion Permanent Loan building. The estimated cost is $180,000.

The Sterling Bank is erecting a new building at Keswick, Ont.

The Home Bank of Canada has secured a location at the south-west corner of Danforth Avenue and Main Street, Toronto, and a new branch will be opened there about the beginning of the year.

Mr. J. F. McCallum, formerly manager at Cabri, Sask., of the Home Bank of Canada, is now in charge of the Moose Jaw branch. Mr. G. W. Brown, who returned from overseas in May, 1919, is head of the bank's statistical department at the head office, Toronto, succeeding Mr. W. K. L. Creig, supervisor of western branches at Winnipeg. Mr. G. H. Shipman, formerly manager at Cannington, Ont., has been appointed to take charge of the London, Ont., office. Mr. G. H. Brabazon goes to Cannington, and Mr. A. B. Brown to Coboconk.

There are now fourteen sub-branches of the Home Bank of Canada, the two last being subs to Weyburn, Sask., Khedive, open on Tuesdays and Thursdays, and Amulet, open on Mondays, Wednesdays and Fridays.

The Montreal Fire Chief has issued a warning about the danger of fires in the winter, because of defective heating apparatus and carelessness in the use of such apparatus.

MONEY MARKETS

Messrs. Glazebrook & Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	3 31-32 pm	4 1-64 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	4.36	4.37	....
Cable transfers	4.37	4.38	....

Rate in New York—Sterling demand, 4.19¾.

Bank of England rate, 5 per cent.

WINNIPEG STOCK EXCHANGE ANNUAL

"The annual meeting of the Winnipeg stock exchange was held on September 30th," says a wire from the Winnipeg correspondent of *The Monetary Times*. "Altered conditions in the financial world render the need for a local exchange more pressing. The chief new factor is the widespread distribution of Victory bonds for which there are always sellers and buyers. The by-laws of the exchange were revised at the meeting and a number of minor changes were made. The review of the year showed that there had been a marked increase in the daily business.

"Officers for the exchange for the year were elected as follows: president, W. T. Kirby, of Oldfield, Kirby and Gardner; vice-president, Fred. H. Stewart; honorary secretary-treasurer, W. B. Sterling; committee of management, the officers as above stated and Sir Augustus Nanton, E. E. Hall and T. R. Billett. John Connor, formerly of the Merchants Bank, has been the manager of the exchange during the past year, and continues in this position."

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended October 2, 1919, compared with the corresponding week last year:—

	Week ended Oct. 2, '19.	Week ended Oct. 3, '18.		Changes.

How Fire Prevention Day Is To Be Observed

Ontario Educational Program Is Extensive — Manitoba and British Columbia Also Are Active—Quebec Legislation To Prevent Fires — Observance of October 9th Will Be Nation Wide

OCTOBER 9th has been declared a "fire prevention day" throughout Canada by proclamation of the Governor-General-in-Council. Those provinces which have special officers to promote fire prevention will be specially active in trying to remove conditions which encourage fire waste. Ontario has a fire marshal, while in the other provinces officers, usually entitled a "fire commissioner" or "insurance commissioner," look after this work. Ontario and British Columbia now have fire prevention leagues.

In a letter addressed to mayors and town clerks, J. Grove Smith, Dominion fire commissioner, suggests that a permanent fire committee be appointed in every city and town in the Dominion. These committees, it is suggested, should consist of eight or ten members, representative of the city government, the chamber of commerce, the fire department, the school board and the women's clubs. Public inspection of property by members of the fire department, boy scouts and others and the observance of fire prevention day by proper exercises in the schools are to be urged as part of general plan for the Dominion-wide celebration.

In describing Ontario's program to *The Monetary Times*, Geo. F. Lewis, deputy fire marshal, said:—

"A sixteen page prospectus was published by the Ontario Fire Prevention League, Inc., for the purpose of giving information and suggestions regarding the celebration of October ninth as Fire Prevention Day. Helpful ideas were made to mayors and other civic officials and particularly the fire chiefs in connection with the work that they may accomplish. Merchants, manufacturers, women and children as well as the principles and teachers of schools were especially taken care of in suggestive paragraphs.

"One thousand ormolu gold plated and enamel medals will be presented as prizes to the pupils in the third and fourth grades of public, private and separate schools by the Ontario Fire Prevention League, Inc., for the best essays on the subject—'Prevention of fire in home and factory.' In addition to these prizes a solid gold and two solid silver medals will be given for the three best essays written by students in Colleges and universities in Ontario. The school principals in the various districts will act as judges in the third and fourth grade competitions and the judges in the college and university contest will be W. H. Shapley, Esq., president of the Dominion Fire Prevention Association; Arthur Hewitt, Esq., president, Ontario Fire Prevention League, Inc., and John B. Laidlaw, Esq., president, Canadian Fire Underwriter's Association. A statement showing the allotment of medals to each city, town, village and county is given in the prospectus. Sunday school superintendents, presidents of social, labor, public and private organizations are also told in this booklet how they can help in the work of fire prevention, in fact, nobody seems to be forgotten.

"The publicity campaign was planned on broad, practical lines with the primary thought of reaching every individual in the province and putting the question of personal responsibility in the reduction of the fire waste, especially as regards preventable fires, squarely up to each. The daily and weekly newspapers as well as the trade, labor, social and religious magazines have been carrying these advertisements and giving liberally in addition much valuable space in their editorial and news columns which will be of inestimable benefit to the country."

British Columbia

In a letter to *The Monetary Times*, H. G. Garrett, Superintendent of Insurance for British Columbia, describes the viewpoint held there as follows:—

"The question of fire waste and how to deal with the problem has passed through the stage of adolescence and is now squarely in the arena of practical politics. Its national significance is undeniable. It has further become palpable that no mere machinery of government can cope with the situation as it exists.

"The angle of approach will be vastly important, because to shout 'carelessness' and harp on that as the cause of 75 per cent. of the fires is akin to indicting a nation. The censure, expressed or implied, must be founded on sanity and common sense. If the blame is not placed where it belongs, all efforts to persuade the 'common people' that it is in the wrong will be like tilting at a windmill. It is imperative, therefore, to begin at the right point and in the right way.

"Now we are all of us in many respects like sheep—we follow a leader, and if he is a good leader and sets a good example, he is followed eagerly. If that is true, what is needed here is a good lead, a good, substantial example. It is not the 75 per cent. of the statistics that is damaging the country, but a far smaller percentage than 25. There is, to my mind, the weak spot, the strategic point for attack. Put up properly-constructed factories, fit them with appliances against fire, keep them clean and in repair, allow no insurance unless these conditions are complied with, charge the occupier who does not live up to his duty, and you will have an outstanding model for all to follow—the thousands of workmen, for instance, who all live in homes somewhere. The losses by fire would fall in a striking fashion, and the lesson could be driven home. But suppose you attack the 75 per cent. How much are you going to save, how many fires are you going to prevent? It is notorious that insurance on dwelling-houses (the main part of the 75 per cent.) is real, profitable business; the residence may even be paying for part of the protection of the business property. The loss per fire is trivial comparatively. And by no stretch of imagination can all fires be stopped; life is too full of accidents and mechanical devices.

"A large number of so-called preventable fires are due to ignorance, not carelessness. It may be freely admitted that carelessness is too prevalent, but why arraign it only in regard to fires? Think of the industrial and pleasure accidents, or the figures of disease, and the carelessness they reveal. It is a habit of mind in modern society, and should be attacked in that way. The man who is careful with a gun will in all likelihood be careful with his cigarette ends.

"It seems to me that Fire Prevention Day should be rechristened 'Conservation Day,' and the country brought face to face with the tremendous 'waste' that goes on in every shape and form.

"I am sure that every campaign for fire prevention will produce some results. But it is doubtful if some of the methods employed have been worth while—worth the expense and labor involved. The heart of the problem must be attacked if we are to be successful, and it must be a case of all hands helping to pull."

Alberta Also Makes Preparations

R. S. Nicolson, deputy fire commissioner for the province of Alberta, says:—

"Our Fire Prevention Act was only put in force lately, and the organization of our fire prevention office is still going forward. We have an inspection crew on the road who will visit and inspect every town and village in the province with the object of enforcing cleaning up and the elimination of bad hazards, etc. I believe this will have good effects, as in the west the great majority of our towns and villages are all frame construction, and many fires are

caused by accumulation of rubbish, defective flues, careless disposition of ashes and other easily preventible causes. In many cases the residents and business men of the town only need to have their attention called to the gravity of the danger to put their premises in good shape. In this province last year seventy-four deaths were caused by fire, and the property loss was well on to two million dollars, a large part of which was uninsured.

"These facts show how great is the need of some concerted action to reduce this great waste of life and property, and the department is endeavoring, through the agency of the press, the distribution of bulletins, etc., to arouse and inform the public on this question."

Manitoba

Manitoba has made careful plans for the observance of Fire Prevention Day, and has adopted as its slogan, "Inspection is the best means of fire prevention." Citizens are being urged to inspect their premises, and numerous organizations are being utilized. The plans have been outlined to *The Monetary Times* by Charles Heath, Fire Commissioner, as follows:—

"As a preparatory means of securing an effective and successful organization in fire prevention, the Fire Commissioner's Department of the province of Manitoba have solicited the co-operation of the mayors of cities and towns and the reeves of municipalities throughout the province in advocating the necessity of individual responsibility of the citizens in suppressing the unwarranted fire waste.

"The conclusion arrived at by the department is that inspection of properties is the best means of fire prevention, and they feel sure that a concentrated effort along this line during the week commencing Monday, October the 6th, and ending Saturday, October, the 11th, 1919, by fire departments, police departments, health departments, and all other civic departments whose ordinary duties take them in and around buildings, also by fire insurance inspectors, fire insurance agents, Boy Scouts' organization, Community Clubs, trade organizations and Social Service Clubs, would bring about the desired results.

Machinery Adopted

"With this end in view, they have provided machinery for this work in the form of inspection blanks in triplicate, specially prepared by them, each book containing twenty-five inspection report forms; in all, nearly 10,000 inspection books, or a total of nearly 250,000 blanks. With this immense corps of inspectors concentrating their efforts during this week of fire prevention they expect to check the preventable fire menace.

"In order that the greatest benefits may accrue, they suggest that a report be made on each property inspected, whether defects are found or not, so that prompt action may be taken by the citizens of the province to have any dangerous conditions disclosed either remedied or removed, and in an endeavor to arouse the public to their individual responsibility in the suppression of the fire waste.

"A copy of the inspection report will be handed to the owner or occupant of the premises inspected, a copy remaining in the inspector's book for reinspection purposes, and a copy mailed to the Fire Commissioner's office the day the inspection is made for checking and filing, and they hope that with this co-operative inspection they will obtain a removal of all hazards which cause or promote fires.

Farmers and Teachers to Help

"Arrangements have been made with the Department of Education to announce to the teachers in the October number of the Western School Journal that a Dominion-wide Fire Prevention Day will be held on Thursday, the 9th of October. Instruction in fire prevention, prepared by the Fire Commissioner's Department, will be included in this issue; also a suitable inspection blank for the use of pupils will form a part of the publication, with a request from the Department of Education that the safeguarding of the homes from fire be given special attention. Through this medium the teachers and pupils of 1,800 schools in the province will be reached.

"A special appeal is being made to five thousand farmers in Manitoba, through the Grain Trade News and Live Stock Journal, to assist in the prevention of fire by making a thorough inspection of their properties on Fire Prevention Day, using for this purpose a suitable inspection blank, which will be made part of this publication, with a request that they return same to the Fire Commissioner's office for checking and filing.

"The aid of the public press of the province has also been solicited by them in bringing the matter of fire prevention to the notice of the citizens, and in drawing attention to their individual responsibility for preventable fires.

"They expect that, with the liberal distribution by the Dominion government of fire prevention literature, giving wide publicity to the campaign, combined with this concentrated inspection, invaluable services will be accomplished."

Quebec

Legislation to prevent fires in the province of Quebec is found in an Act passed in 1912 (3 Geo. V., cap. 38), as amended by an Act of 1916 (6 Geo. V., cap. 26), and by an Act of 1918 (8 Geo. V., cap. 52). The Lieutenant-Governor in-Council is empowered to appoint a Fire Commissioner for the province, and other officers as required, who are to be under the Department of Public Works. This commissioner is to investigate suspicious fires, and for this purpose has all the powers of a "judge of the sessions, of a recorder, or of a coroner." These officers, and heads of fire departments and mayors of municipalities which have no fire departments, are also empowered to enter and inspect premises.

The government is also empowered to expend $10,000 per annum in order to give small municipalities assistance in the purchase of apparatus. The Fire Commissioner's office is supported by an annual tax of one-fourth of 1 per cent. of gross fire premiums or assessments collected in the province.

GUARANTY TRUST ASSETS GROW

Total assets of the Guaranty Trust Co. on September 12th were $833,901,642, compared with $821,084,399 on June 30th. Details of the resources and liabilities are given elsewhere in this issue. A comparison with the previous statement shows that other securities have increased by over $3,000,000, loans and bills purchased by over $33,000,000, foreign exchange by $1,500,000, and cash on hand and in banks by $43,000,000, while holdings of public securities, including British and French treasury bills, have decreased by $13,000,000, exchanges for clearing house by $45,000,000, and accrued interest and accounts receivable by over $3,000,000. The liabilities' statement shows an increase of $22,100,000 in deposits, and of almost $5,000,000 in foreign accounts.

HELP FOR MANITOBA MUNICIPALITIES

The Manitoba government has passed an order-in-council providing for relief, for feed purposes, to six municipalities which have suffered severely from grasshoppers and dry weather. These municipalities are Cameron, Brena, Arthur, Edward, Alberta and Winchester. The order-in-council provides that each of the municipalities—the number is not given—shall receive money up to $30,000 for the purchase of feed for stock. This money will be loaned to the farmers by the municipalities at the lowest possible rate of interest, to be determined by the amount which the province pays when the government raises the money. The money will be loaned to the farmers according to the amount of land that they are farming. A farmer with 320 acres will be eligible for a maximum loan of $600, and a farmer with one section or more, $1,000. The government and the municipality will bear any loss that may be entailed in equal portions. As the need for feed will be felt in the immediate future, the order-in-council will be put in operation as soon as possible.

OUR CHARGES

Our charges for the management of an estate are no more and often less than those of a private executor. They are fixed by the Surrogate Court Judge when he audits the estate accounts. The amount which he allows, as the Order of the Court reads, is "a fair and reasonable allowance for our care, pains, trouble, and time and personal disbursements expended in and about the administering, arranging and settling the affairs of the said estate."

Our State Merchant Fleet and its Work

Many Voyages Already Made by a Dozen Vessels—Relieving the Sugar Famine—Ship Deliveries This Autumn—The Outlook as to Earnings and Comparison of Costs—Trade Opportunities Awaiting Tonnage to Exploit Them — Tonnage now Larger, but Still Insufficient

By G. W. AUSTEN

FROM time to time newspaper items tell of the coming and going of freight vessels belonging to the Canadian government merchant marine. There are eleven of them now in commission, and within a week or two, will be about thirteen. Recently some of these ships brought 12,000 tons of sugar from the West Indies, helping to relieve the sugar shortage in Canada. These ships have taken cargoes to and from Buenos Ayres, Montevideo, Barbadoes, Trinidad, Havana, Kingston and Liverpool, and are busily employed. The shortage of tonnage on the Atlantic is still very great, and rates, though reduced several times from war levels, are high and very profitable.

Thus it would seem as if the government freighters are likely to have a profitable season. The manager of the line, R. B. Teakle, says that the operation so far has been very satisfactory, financially. Under the conditions existing, it would be surprising if that were not so. Trans-Atlantic rates on many commodities are still five and six times what they were before the war, and perhaps for several years, the rates will continue to show easy profits. So far as cargoes to Britain at present are concerned, the difficulty is to get sufficient return cargo. Britain is not exporting much to this country or the United States, because costs there are yet too high to allow of putting manufactures in here with the duty to be overcome. However, the development of Canada's trade with the West Indies and South America is a big task in itself, and this trading fits in splendidly with the general needs of Canadian trade.

Added to the eleven freighters now in commission, or ready to load, will be another fourteen or fifteen before the end of the year. The earliest vessels were the "Canadian Voyageur," the "Canadian Pioneer," the "Canadian Warrior," the "Canadian Volunteer," the "Canadian Recruit," and the "Canadian Seigneur" and "Canadian Sailor." The "Seigneur" and "Sailor" are 8,500 ton vessels. The list of deliveries to come, with the yards building the vessels, is:—

Canadian Vickers, one each in September, October, and two in November, 1919.

Collingwood Shipbuilding Co., one in November, 1919.

Wallace Shipyards, Vancouver, one in November, one in December, 1919.

Tidewater Shipbuilders, two in November, 1919, and two at opening of navigation, 1920.

Davie Shipbuilding Co., two in spring of 1920.

Port Arthur Shipbuilding Co., two in October, 1919, and two at opening of navigation, 1920.

Halifax Shipyards, one in March, one in August, 1920, one in January, 1921, one in June, 1921.

Victoria Machinery Depot Co., one in May, one in July, 1920.

Kingston Shipbuilding Co., one in November, 1919.

J. Coughlan and Sons, Vancouver, one in December, one in January, one in February, one in April, 1920.

Nova Scotia Steel and Coal, one in November, one at opening of navigation, 1920.

Prince Rupert Drydock Co., one in June, one in July, 1920.

British-American Shipbuilding Co., two at opening of navigation, 1920.

This makes a total of 34 ships still awaiting completion. But as the bulk of the deliveries are scheduled for this autumn, the winter and spring should see Canada well served on the ocean. The intention of the government has been to use the ships as an ocean feeder to the National Railways, which will have both Atlantic and Pacific terminii. With the acquisition of the Grand Trunk Railway, and the Grand Trunk Pacific, as well as the Canadian Northern, the fleet of cargo boats will round off a gigantic national transportation undertaking. The amount of money invested in the fleet of 45 or 47 vessels, comprising about 275,000 tons, will be about $55,000,000. That this average cost of something under $200 a ton is not excessive, is shown by the fact that the United States Shipping Board is disposing of government steel freighters at a rate of about $225 a ton. The British government recently sold to France forty steel freight vessels, many of them built in Canada for the Imperial Munitions Board, at an average rate of $185 a ton. Steel vessels now cost, in Japanese yards, $187 a ton. It is said by Mr. Isherwood, naval construction authority, that British tonnage is selling at $140 a ton for the larger vessels, and $190 a ton for the smaller. By larger vessels, he means 8,000-ton boats, and by "smaller," 3,000 and 4,000-ton boats. As the majority of the freighters being built for the Canadian government are about 3,500 or 4,000 tons, the cost of the ships compares favorably with the selling values even in Britain.

Plenty of Business Yet

Before the cost of steel, of labor and other important items in the making of a ship went up so greatly in British yards, it was feared that the Canadian government fleet, built after the war emergency had passed, would have an excessive cost. It was feared that many millions would have to be written off the cost, in order to bring down rates to meet competition, and still maintain earnings sufficient to meet expenses. But the way conditions have been going in shipyards generally, our fleet will not be specially handicapped in this way. Indeed, two years of high rates will pile up a reserve against depreciation in the day when competition waxes furious. That it is not very keen just now is shown by the fact that Australia has 3,500,000 tons of wheat awaiting shipment to Britain, hundreds of thousands of bales of wool that are badly needed, and immense quantities of meat, foodstuffs and other materials. Australia has a state merchant marine consisting chiefly of about a dozen vessels bought in Britain in 1916 by Premier Hughes for $10,500,000. He bought fifteen, but several were sunk by submarines, and about half a dozen ships have been built or are building in Australia for the government. But a four-months' seamen strike tied up this Australian marine, and other vessels were too busy on short hauls to go to Australia for the cargoes there waiting. By spring, Canada will have state freighters plying regularly across the Pacific to China, Japan, India and Australia.

The opportunity ahead of our ships in this field is shown by the figures relating to the world's marine. According to Lloyd's, the steam tonnage of Britain for June, 1919, was 2,547,000 tons less than in June, 1914, but the United States showed an ocean tonnage 7,746,000 tons larger. The world's tonnage is stated to have been last June 47,897,000 tons, an increase of 2,493,000 tons. But while already the world has overtaken the losses incurred during the war, and has 2,500,000 tons more of vessels, the natural growth of tonnage, had there been no war, would have been 7,700,000 tons more. The quantity of materials to be moved, because of the tie-up of so much shipping for military purposes, is so vast that an ordinary quantity of tonnage is insufficient. Even if the world now has about 3,000,000 tons more of shipping than it had before the war, it would need 10,000,000 tons additional for several years to bring the distribution of products back to a more normal basis.

May be Over-Supply Later On

There is no getting away from the fact that perhaps within another year or two, big breaks in ocean rates are bound to occur. Tonnage is constantly piling up, while—after nearly a year of "reconstruction" extraordinary traffic is steadily being cleaned up. Perhaps in several years we shall see a glut of ocean shipping, and severe competition

for cargoes. This will be the testing time, and one which will prove the mettle of the managers of Canada's state fleet. British costs of operating vessels are said to be 30 per cent. lower than American, and the Norwegian, Dutch, Japanese and other owners are able to compete with the British. If these, with cheap operating cost, are able to bid under the ships owned and operated from this continent, what follows? The United States Shipping Board, at any rate, foresees the risk of owning a bigger tonnage than it can hope to operate, and it is selling its vessels to private owners on easy terms. The British government is doing likewise. It is worth noting that whereas before the war, United States vessels carried only about 14 per cent. of American cargoes across the Atlantic, they are now carrying about 25 per cent. In the year ended June 30, 1919, they carried 25½ per cent., compared with nearly 40 per cent. by British vessels. In June, the United States proportion had increased to 33 per cent. This should indicate that the United States seven million tons of merchant vessels is able to hold its own, but, as has been said, rates still are from three to ten times what they used to be, and any vessel can get cargoes at a good profit.

Canada is going to face a business competition for world markets far, far keener than any known for many years. United States producers are invading new fields. They are becoming accustomed to exporting manufactures and materials to South American and other countries that used to buy from Europe. Britain, at present, is swamped with business from other parts of Europe, and from the Near East. Perhaps, the education that South Americans and others get from dealing with the United States will enable Canadian manufacturers to get a good hold there also, especially as ships will be available for regular cargo runs. But we shall have to be skilful and energetic. The tightening of the bonds of Imperial feeling, as between the various parts of the Empire, should give us a special field in Australia, India and South Africa, and the shipping service should promote the trade wonderfully. Even now India is considering a preference to Britain and the Dominions on hides and skins—a matter of great importance to our shoe industry.

No mistake was made by the Dominion minister of marine and fisheries, Hon. Mr. Ballantyne, when he got the Cabinet to agree to the construction of a Canadian merchant marine. This 250,000 tons of cargo vessels may be our salvation in the export market, when the crush of real competition commences. In any case, the foreign trade of Canada is bound to grow, because the country and its products are known to countless millions who, before the war, did not even know it was on the map. We are spreading ourselves as a commercial people, and it behooves us to look well to our means of transportation in trading with the outside world.

WANT MORE MONEY FROM PROVINCE

On September 25th the executive of the Union of Saskatchewan Municipalities (urban) met the provincial government and discussed some 36 resolutions in connection with legislation. The requests made were that the creation of hospital districts be made compulsory; that cities and towns be given power to levy an amusement tax; and that the government assist urban municipalities by making grants to erect houses for working men.

AFRICAN BANKING CORPORATION

The operations of the corporation for the year ended September 30th, 1918, resulted in gross profits of £378,988, of which £28,740 had been brought forward from the previous year. From this was deducted £192,416 for rent, taxes, salaries, etc., dividends at the rate of 8 per cent. per annum were paid, and a balance of £60,013 was carried forward to 1919.

The assets of the corporation total £9,688,615, of which £7,888,686 represents current accounts and deposits, and £400,116 represents circulation. The subscribed capital is £1,200,000, of which £600,000 is issued. The head office is in London, Eng. There are about fifty branches in South Africa, and an agency in New York.

NOT LIABLE FOR EXPLOSION LOSS

The insurance companies concerned in the Curtis and Harvey case appealed against the judgment issued some time ago by the Quebec Superior Report., Judgment has now been given by the Quebec Court of Appeal reversing the former decision. It will be remembered that the plant of the Curtis and Harvey Company, situated near Rigaud, Quebec, was practically destroyed by an explosion on August 18th, 1917. The company thereafter went into liquidation; and the liquidator claimed from the twenty-eight insurance companies, which has issued policies covering the property, the sum of $622,000, which was the amount fixed by the adjustors. It was found that the policies issued by the Guardian Assurance Co. and the North British Maritime Assurance Co. were typical of the others, and these companies defended in the action.

On the back of the policies were printed the statutory conditions of the Quebec Insurance Act, one clause of which reads as follows:—"The company shall make good loss caused by the explosion of gas in a buildding not forming part of the gas works, and all other loss caused by any explosion causing a fire, and all loss caused by lightning even if it does not set fire."

The policy of the Guardian Assurance Co. did not contain any variations of this statutory condition, but that of the North British & Mercantile Co. contained one to the effect that the company would not be obliged to pay loss caused by an explosion unless fire ensued, and would then be liable for the fire loss only. The companies in their defence maintained that they had no right to enter into a contract of explosion, that they had not asked or received any premium for the same, and had not even entered into such a contract.

In the case of the North British and Mercantile policy the Court of Appeal found that the variations of the statutory conditions was quite in accordance with law. Curtis and Harvey Company, the court said, had asked for insurance against fire and had undertaken that they would not claim for loss caused by explosion. The statutory conditions were intended only to prevent insuring companies from imposing conditions which had not been assented to by the assured, but once an assured had made his own conditions, he could not be taken by surprise and was bound by the contract which he asked the insuring company to enter into.

"The insurance companies should be condemned to pay such damages as were caused by fire," the judgment concludes, "but not the damages resulting from explosions. The parties have committed a common error in submitting that the actions should be maintained or dismissed in toto, and consequently the proof made does not sufficiently distinguish between the damages which were caused by fire and those resulting from explosions. Considering that it is impossible to render judgment without this proof being made, the judgment of February 13th, 1919, is reversed, as well as the interlocutory judgments of April 26th and December 2nd, 1919. *Preuve avant faire droit* is ordered on the inscription-in-law, and the motion for permission to amend the defence is accorded without costs (with right reserved to respondent to reply to the amended plea); and it is further ordered that the records shall be sent back to the Superior Court for completion of the proof. Costs in the Superior Court are reserved, but respondent is condemned to pay the costs of the appeal."

ORIENTAL BANK MAY OPEN HERE

Hon. Hsu Un Yuon, president of the Bank of China, Pekin, is a visitor in America at present, having arrived in Vancouver on September 23rd. His business is partly in connection with the organization of the Sino-American Bank, which is capitalized at $10,000,000, one-half held in China and the other half on this continent. The capital is all subscribed and the charter granted. A branch will likely be located in Vancouver, and possibly in other parts of Canada also.

SOME FEATURES OF WORKMEN'S COMPENSATION

Part of An Address Before the International Association of Industrial Accident Boards and Commissions, Toronto, September 25th, 1919

By Samuel Price
Chairman, Workmen's Compensation Board, Ontario

WHAT I have to offer as a contribution to the program of the association will have to do chiefly with the practical aspects of workmen's compensation law and its administration, and will be to a very great extent from the point of view of our Ontario Act, with which I have been in very close communion for the past five years, and for the administration of which, up to the present time, I have been largely responsible. I may confess my bigotry at once by saying that I am a great believer in the virtues of our Act and in the methods adopted in its administration, though we are always looking to further improvement and hoping for nearer perfection.

The Ontario Act

The Ontario Act in relation to most of the industries to which it applies is a compulsory and exclusive collective liability or mutual insurance system, administered by a government-appointed board without any resort to the courts. A few of the industries under it are, however, upon the individual instead of the collective liability plan, so that there is opportunity to compare the working of the two systems side by side.

All personal injuries resulting from accident arising out of and in the course of the employment are compensated, except only where the accident is attributable solely to the workman's serious and wilful misconduct and does not result in serious disablement. The benefits, in total, are probably now as liberal as under any existing compensation law. The general basis of allowance is 55 per cent. of the lost earnings, payments being continued as long as the disability lasts, being limited only by the life of the workman and a maximum wage of $2,000 a year.

The form of payment for all permanent disabilities, partial as well as total, is a monthly pension for life, except where the impairment does not exceed 10 per cent. of total disability, the healing period being first taken care of by bi-weekly payments. Compensation dates from the commencement of disability, but no compensation is paid when the disability lasts less than seven calendar days. In death cases flat monthly pension allowances are fixed for the widow and children, the widow receiving $30 a month and each child under 16, $7.50 where there is a widow and $10 where there is no widow, but not exceeding $60 a month in all, so far as the 55 per cent. of average earnings will permit these payments. All necessary medical, surgical, hospital and skilled nursing services are now provided without limitation. The benefits are in lieu of action at law for damages, and the employer is entirely free from such actions in matters covered by the Act. The greater part of the administration expense is paid by the province.

I feel that the strong points in our law and its administration are simplicity of procedure, expeditious payment of benefits, elimination of litigation and expense and limitation of the employers' burden as nearly as possible to what the workmen and their dependants actually receive. Perhaps most important of all is the speedy payment of compensation. Nothing is more appreciated by the injured workman. The absence of appeal and the methods of administration adopted conduce to celerity in the disposition of claims as well as saving expense to all parties.

Procedure Very Informal

Our procedure is very informal and summary. Reports from the workman, from the employer and from the doctor, upon forms carefully designed for the purpose, usually suffice for the settlement of cases. These are examined and checked and the amount of compensation computed by our claims and medical staffs. Recommendations from the medical and claims officers and approval of a member of the board, without which no claim is allowed or rejected, pass the claim, and order is issued and payment made without further formality. If the information in the reports is not complete or satisfactory further information is requested, and when it seems desirable investigation is made on the ground by an officer of the board or examination and report made by a medical referee. Doubtful cases are considered by the board in session, but it is very rarely that the board has anything in the nature of a formal hearing.

In ordinary cases the first cheque is forwarded within a few days after the reports are all received; our average for all cases is about five calendar days. Subsequent bi-weekly payments go out on the day they fall due if the information on file warrants it.

Special reports are obtained from the doctor, the workman and the employer in all permanent-disability cases, examination also being made by a medical referee or the medical officers of the board and by other officers and by members of the board wherever deemed best; and after a specially qualified officer, with the help of a disability-rating schedule, makes a recommendation as to the allowance, the board in session considers the case and makes the award. Reconsideration of any case is freely given, the more so because of there being no appeal. The workman has absolutely no need of a solicitor or agent or of paying solicitor or agency fees. The rule is that all communications as far as possible shall be with the workman himself and that all cheques shall be made payable to him and delivered to his own address.

Decisions and Appeal

The framer of the Act, the present chief justice of Ontario, said that one of the chief purposes was "to get rid of the nuisance of litigation," and "to have swift justice meted out to the great body of the men," even though some mistakes might be made. A man less eminent in law and in the affairs of the country might hardly have ventured on legislation so radical or drastic, especially as to the absence of appeal. In this respect we are perhaps free from some of the constitutional difficulties existing in the United States. Our Act also now expressly provides that the decisions of the board shall be upon the real merits and justice of the case and that the board shall not be bound to follow strict legal precedent. The chief justice expressed himself as "shocked" by some of the English cases in which the workman had failed to recover, though, as he said, the court decisions might, from a legal point of view, be technically sound.

In conformity with the provisions and the spirit and intention of the Act we endeavor to adopt a liberal and commonsense but consistent and not too loose an interpretation, and in a number of matters have departed from English decisions. Instances of departure are: A broader interpretation as to what arises out of and in the course of the employment; allowance of compensation for street and railway accidents even though the workman is not specially exposed to these risks; compensating innocent victims of other workmen's pranks or misconduct; and compensating children employed in contravention of the child-labor Act.

What a court of appeal would do in some of these matters, if an appeal were allowed, may be doubtful. In the case of street and railway accidents a long line of prior decisions were reversed a couple of years ago by the English court of last resort. The child-workman's decision has been reversed by legislation. An appeal would, of course, in many respects seem desirable if it did not take away other advantages. The appeal usually allowed under such Acts, however, is upon questions of law and not upon the facts or general merits of the case, and still leaves the party open to injustice, if injustice is going to be done, and such an appeal seems incompatible with the spirit and intention of the Act, which is to get rid of legal technicality.

Collective Liability System

One of the most important matters in connection with a workman's compensation law is whether it should be an individual or a collective liability system and whether there should be private or state administered insurance. I think the answer depends largely upon the character of the ad-

The Why? of Another Victory Loan

WHEN, on the morning of November 11th, 1918, the guns were hushed and glad tidings flashed across the world, there followed with the Nation's Prayer of Thanksgiving, one yearning query, which found echo in the faster-beating hearts of wives, mothers, fathers, brothers, sisters and sweethearts.

THAT query was, "How soon will our boy be home?"

AND, from France and Flanders, from Italy and Egypt, from Palestine and from far-off Siberia, there came an answering echo, "How soon, how soon, may we go home?"

CANADA caught the spirit of these longings, and at once resolved to satisfy them.

IT was an appalling task. Shipping was tragically scarce. The composition of the Army of Occupation had not then been settled. And other parts of the Empire as well as Canada were looking for the speedy return of their men.

THE problem was this. The half-million men that Canada had overseas had taken more than four years to transport to the field of battle.

TO bring them home in a few months was a gigantic undertaking—one to tax all Canada's ingenuity and resources.

CANADA solved the problem, but it meant crowding into a few short months, an expense for demobilization which it was impossible to foresee.

THEN, too, besides the sentimental aspect of the necessity for bringing the men home quickly, the economic side could not be overlooked.

THAT was, to transform efficiently and speedily the nation's army of fighters into a national army of workers.

* * * * *

Need Divides Itself in Two Parts The answer to the question "Why does Canada need another Victory Loan?" divides itself into two parts.

(a) To finish paying the expenses of demobilization, and the obligations we still owe to our soldiers.

(b) To provide national working capital.

* * * * *

Obligations to Soldiers The obligations to soldiers include:
That already incurred cost of bringing home troops from overseas.

The payment of all soldiers still undemobilized. This includes more than 20,000 sick and wounded who are still in hospital, and who of course remain on the Army payroll till discharged.
The upkeep of hospitals, and their medical and nursing staffs, until the need for them is ended.

These three items alone will use up at least $200,000,000 of the Victory Loan 1919.

* * * * *

Land Settlement Furthermore, soldiers who desire to become farmers may, under the Soldiers' Land Settlement Act, be loaned money by Canada with which to purchase land, stock and implements. The money so advanced will be paid back; meantime each loan is secured by a first mortgage. Up to August 15th, 29,495 soldiers had applied for land under the terms of this Act; and 22,281 applications had been investigated, and the qualifications of the applicant approved. For this purpose Canada this year requires $24,000,000.

* * * * *

Gratuities There is also the gratuity which has been authorized, and has been and is being paid to assist soldiers to tide over the period between discharge and their re-adjustment to civil life. For this purpose alone, $61,000,000 must be provided out of the Victory Loan 1919, in addition to the $59,000,000 already paid out of the proceeds of the Victory Loan 1918.

* * * * *

Vocational Training For this work which, with the Vocational Training and Soldiers' Service Departments, embraces the major activities of the Department of Soldiers' Civil Re-establishment, an appropriation of $57,000,000 is necessary.
These national expenditures are war expenses. They will be accepted readily by every citizen who gives thought to the task which Canada faced following the Armistice, and to the success with which she has met it.

* * * * *

National Working Capital Canada needs national working capital, so that she may be able to sell on credit to Great Britain and our Allies the products of our farms, forests, fisheries, mines and factories.
You may ask "Why sell to them if they can't pay cash?" The answer is, "Their orders are absolutely essential to the continuance of our agricultural and industrial prosperity."

The magnitude of these orders and the amount of employment thus created, will depend upon the success of the Victory Loan 1919.

* * * * *

The "Why" of Credit Loans Farmers and manufacturers (and that includes the workers on these orders) must be paid cash for their products. Therefore, Canada must borrow money from her citizens to give credit, temporarily, to Great Britain and our Allies. Actually, no money will pass out of Canada.

If Canada does not give credit, other countries will; and they will get the trade, and have the employment that should be ours, to distribute amongst their workers. And remember, we absolutely need these orders to maintain employment. If we don't finance them business will feel the depression, employment will not be as plentiful, and conditions everywhere will be adversely affected.

* * * * *

For Transportation Money must also be available to carry on the nation's shipbuilding programme, and other transportation development work.
For loans to Provincial Housing Commissions who are building moderate priced houses.

These, then, are some of the things for which Canada needs national working capital. She is in the position of a great trading company, and her citizens who buy Victory Bonds are the shareholders.

Victory Loan 1919

"Every Dollar Spent in Canada"

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

ministration. While not altogether subscribing to the maxim: "That which is best administered is best," I believe that the administration of any workman's compensation law is in many aspects quite as vital as the nature of the law itself. This is especially true of a collective liability or state insurance system. It needs careful and efficient handling. But I feel there are great advantages in such a system.

We are told, I believe, on good authority, that from 40 to 60 per cent. of the premiums paid to private insurance companies is consumed in expenses and profits, and that less than 25 per cent. of the premiums paid under the old employers' liability insurance actually reached the hands of the workman or his dependants. Under laws in which court procedure, representation by lawyers and rights of appeal prevail, this figure is still probably not far from the truth. How wasteful this seems—$4 collected from the employer in order that the workman may receive $1. Can this waste not be avoided? I think the nearly five years' experience we have now had in Ontario, and similar experiences elsewhere, shows that it can.

Last year in Ontario only 1½ per cent. of all the assessments paid by employers (exclusive of the amount expended by themselves in safety work) went toward expenses. The other 98½ per cent. was for actual benefits to the workmen, and none of it was needed for litigation or legal fees. When everything that is collected from the employer goes for the benefit of the workman we have compensation at cost in its strictest and truest sense.

The rates of assessment prevailing in different jurisdictions, I think, very clearly reflect the saving effected by the collective or state insurance system, especially where it is an exclusive one. A comparison of the tables of rates shows striking contrasts. Our rates in Ontario average less than half what is usually charged for the same amount of benefit under private or mixed insurance systems. With the general movement now against profiteering, why should unnecessary profits not be eliminated from workmen's compensation cost? At a time when expenses of every kind were constantly soaring the rates in Ontario were reduced from an average of $1.64, as originally fixed, and $1.27, as finally adjusted for 1915, to an average of $1.09 for 1918, though limited medical aid was added to the Act in 1917.

The objection that under the compulsory and exclusive state system the careful employer has to contribute for the accidents of the careless one, can be at least largely met by a reasonable system of merit rating and by inspection and accident-prevention work, which with us is carried on by associations of employers organized under the Act, and our Act also provides for special assessment upon the careless employer, which we have not hesitated to put into effect in flagrant cases. And when the rates are so much lower than under the other system the objection at all events loses most of its force.

We have found we can settle and pay compensation more promptly and with less trouble under the collective system than under the individual liability system, though in the latter much depends upon the attitude of the employer or the insurance company. Workmen prefer the collective plan, because they know that under it the employer is less likely to oppose compensation or seek reduction of the amount and because the workman is less likely to be under constraint in seeking what he is entitled to. The avoidance of friction between employer and employee is also a very important feature, especially in the present time of industrial unrest.

The question of direct settlements between the parties, or with the insurance company, which, even from our limited experience of it in Ontario, I feel is highly objectionable and liable to gross abuse, does not arise in the collective liability system. Under the latter there is no motive to pay the workmen less than he should receive and no motive to charge the employer more than he should pay.

The collective system largely solves the difficulties of aggravation of injuries and increased compensation by prior injury or impairment, the burden being upon the class and not upon the individual employer. It also simplifies the question of choice of doctor, taking away the direct motive of the employer to seek a doctor who is prejudiced in his favor, and leaving it to the workman and the employer jointly or to the administering board that is paying the doctor to choose only from the point of view of efficiency and reliability.

Needs Efficient Administration

The collective liability system undoubtedly has many and very great advantages, but if it is to be a success it must be conducted strictly upon business principles and with efficiency, fearlessness and impartiality. This is true in respect to public ownership or publicly administered utilities of any kind. Our Ontario hydro-electric system, of which we are very proud, has demonstrated how public ownership and public administration of utilities can be made a success. Energy, determination, disinterestedness and a passionate devotion to the cause on the part of the head of the hydro-electric have made it the success it is. Other examples could be quoted where public administration of utilities has not been a success. Such administration is beset with dangers and difficulties. Looseness, extravagance and indirect influences are too apt to creep in. A high sense of public duty and courage and determination on the part of the administering body, as well as integrity and capability, are needed to steer a straight and even course, and barnacles must not be permitted to impede or encumber the ship.

The Politician

One of the pitfalls is party favoritism. Some of the politicians think the Act should be administered for the benefit of themselves and their friends rather than in the interest of the workman and employer or of the community at large. We are sometimes self-complacent enough to claim that in this respect we are not like others across the border, but turning public administration to partisan uses is not a thing unheard of here. Not long after our board was organized demands were made that appointments to the staff should be upon political considerations. This was refused, the Act leaving the appointments in the discretion of the board itself. Many political recommendations to appointments are scarcely better than applications for pensions for political services, with little or no regard to fitness for the work. Merit should be the sole requisite for appointment and the only basis of promotion.

Far worse are attempts to influence the board's awards and decisions in favor of political friends or for the exploitation of a political representative. Some one wants more compensation or a reduction of assessment and political reasons are urged for granting it, or the good offices of a member of the House are sought to intercede with the board. Sometimes persuasion is tried, sometimes threats. Often the gross impropriety, if not criminality, of such actions is not realized. The board should be as absolutely bound by the merits and justice of the cases with which it has to deal as any court and should equally with such a court resent any attempt at coercion or personal or partisan influence. When this position comes to be understood there is usually little trouble.

In regard to the attitude of the political parties of the province in general, it is a matter for congratulation that neither has shown a disposition to attack or criticize the work of the board, and both have endeavored to assist in improveing the Act and making its administration a success.

STANDARD RELIANCE INVESTIGATION POSTPONED

The court investigation into the affairs of the Standard Reliance Mortgage Co. commenced on September 25th, but was immediately postponed owing to the illness of counsel for W. S. Dinnick, the principal witness. It will be resumed on October 9th.

A branch of the Royal Securities Corporation will shortly be opened in Winnipeg. The corporation already has offices in Montreal, Toronto, Halifax, St. John, and London, England.

HYDRO ELECTRIC POWER COMMISSION OF ONTARIO

DAYLIGHT THROUGH THE PLANT

YOU flood the factory with the most brilliant artificial light when you use HYDRO Gas Filled Lamps. The worker in the middle of the room, away from all windows, turns out as good work and as much of it as the worker right by a window.

HYDRO Gas Filled Lamps are as great an improvement over vacuum lamps, for factory light, as the tungsten is over the carbon filament lamp. That's why factory hands work so efficiently by the light of HYDRO.

The guarantee and endorsement of the Hydro-Electric Power Commission of Ontario are behind every HYDRO Gas Filled Lamp. Every shipment is tested by experts in the laboratories of the Commission. The tests are for brilliancy, current consumption, life and mechanical perfection.

Will you call at the Hydro Shop and let us give you a practical demonstration of the HYDRO Gas Filled Lamp?

How to say "No!"

Mark Your Ballot with an X after Each Question under the word "No"

1	Are you in favour of the repeal of the Ontario Temperance Act?	YES	NO X
2	Are you in favour of the sale of light beer containing not more than two and fifty-one one-hundredths per cent. alcohol weight measure through Government agencies and amendments to The Ontario Temperance Act to permit such sale?	YES	NO X
3	Are you in favour of the sale of light beer containing not more than two and fifty-one one-hundredths per cent. alcohol weight measure in standard hotels in local municipalities that by a majority vote favour such sale and amendments to The Ontario Temperance Act to permit such sale?	YES	NO X
4	Are you in favour of the sale of spirituous and malt liquors through Government agencies and amendments to The Ontario Temperance Act to permit such sale?	YES	NO X

Above is an exact reproduction of the Referendum ballot, showing the correct way to Vote in order to sustain the Ontario Temperance Act as it stands.

Everybody should study the four questions and realize exactly what they mean. Do not be misled by the insidious demand for "light" beer.

The beer of the ballot is 118% stronger than the Ontario Temperance Act now allows, and over five times as strong as the limit allowed for beer defined as non-intoxicating in Great Britain and the United States.

Answer Each Question

1. Unless you vote on every question your ballot is spoiled.
2. You must mark your answer to each question with an "X" only. Anything else would spoil your ballot.
3. Unless a majority vote "No" on question 1 the bars will be restored and the sale of all kinds of intoxicants permitted.
4. Unless a majority vote "No" on questions 2, 3 and 4 the Ontario Temperance Act will become almost worthless.
5. The only SAFE course is to mark your ballot as shown above.

"No!"—Four Times—"No!"

No repeal; No government beer shops; No beer saloons; No government whiskey shops.—Four **X**'s, each under the word "No."

Ontario Referendum Committee

INDEX NUMBER OF COMMODITIES

In wholesale prices the index number rose to 301.1 for August as compared with 294.0 in July and 284.3 in August, 1918. The chief increases for the month were in potatoes, in hides, leather and boots, in metals and in raw furs, but there were lesser increases in grains and fodder, fish, fuel, building materials and the miscellaneous group. There were decreases in cattle and beef, fruits and cotton. The following are the figures for August:—

(DEPARTMENT OF LABOUR FIGURES)	No. of Commodities	Index Numbers		
		*Aug. 1919	*July 1919	*Aug. 1918
I. Grains and Fodders:

BUILDING PERMITS FOR JULY

Building permits in thirty-five cities rose from $6,470,215 in June to $8,174,869 in July, an increase of $1,704,654, or 26.4 per cent. All the provinces except Saskatchewan and Alberta reported increases in this comparison. As compared with the corresponding month in 1918, there was an increase of 39.7 per cent., the value for July, 1918, being $5,852,493. In this comparison Nova Scotia and Saskatchewan were the only provinces to record declines, while substantial increases were reported in British Columbia, New Brunswick and Alberta. The decline in Nova Scotia was from the high level caused by the increased activity following the disaster of December, 1917. Details are as follows:—

DEPARTMENT OF LABOUR FIGURES	June 1919	July 1919	July 1918	July 1919, compared with July, 1918. Increase+ Decrease−

A national convention of the Farm Mortgage Bankers' Association of America was held in Chicago, September 23rd and 24th.

More than 12,000,000 feet of the British order of 70,500,000 feet of British Columbia lumber is now en route to England. The representative of the British government hopes to have 40,000,000 feet on the way over by the end of the year.

SOME OPENINGS IN SOUTH AMERICA

Countries on North-West of Continent Offer Good Field for Canadian Business

IN looking abroad for foreign markets, Canada has devoted due attention to Brazil and Argentina, on the east coast of South America. There is now a Canadian trade commissioner in each of these countries. There are also trade possibilities on the western coast, now that the Panama Canal makes communication easier. This has been pointed out by E. C. Austin, who has spent twelve years in South America, in an interview with *The Monetary Times*. Three years of this time were spent in Colombia and Venezuela, and Mr. Austin expects to make another business trip to these countries at an early date. "South America," he says, "is so frequently referred to as though it were one country, that, in any remarks about it, it is necessary to draw attention to its political division into ten independent states, each with a republican form of government, and all occupying large territory, with immense undeveloped natural resources. Spanish is the language of all of these countries, with the exception of Brazil, where Portuguese is spoken. A good deal has been said and written about Brazil and the Argentine, situated farthest from Canada, and the two most progressive states, but it now seems opportune to draw attention to countries nearer to the Dominion, less developed, but offering important trade advantages and opportunities.

"Venezuela and Colombia come foremost in order of proximity, while Ecuador, Perú, Bolivia, and Chile have been made much more accessible by the opening of the Panama Canal. Venezuela has a peculiarly advantageous geographic position as regards nearness to both Europe and North America, while the neighboring republic of Colombia is in the line of both Atlantic and Pacific steamer traffic, being also immediately adjacent to the Panama Canal. Venezuela has an area about equal to that of British Columbia, with a population of two and a half millions, and Colombia, with a territory of 440,000 square miles, is rather larger than Ontario, and has a population of five millions. Thus in a bee-line distance from eastern Canada of about 2,500 miles, markets exist for Canadian manufactures, in two only of the ten South American states, having a combined population equal to that of the whole Dominion.

Trade Conditions Reversed

"World events have stirred these countries into unusual activity, and, in 1917, Venezuela became, for the first time in its history, an exporting country. The combined annual imports of Venezuela and Colombia are in the neighborhood of $33,000,000 (from statistics 1914-15), of which the principal items are: Cotton textiles, machinery, flour, agricultural implements, mining tools, paper, drugs and chemical products, canned goods, rubber goods, glass, porcelain, china, vehicles and accessories. Of export trade, the main items are coffee, cocoa, bananas, hides, petroleum, asphalt, rubber, gold, silver, copper ore, vegetable ivory, fustic, divi divi pods (used for tanning), tobacco, hats, platinum and pearls.

"Of late there has been considerable progress in road building in Venezuela, and automobile service is now available from the principal port, La Guaira, almost to the Colombian border, a distance of five or six hundred miles. Caràcas, the capital, with a population of 100,000, has (in 1917) 600 automobiles, and the number is constantly increasing. The building of bridges in mountainous districts calls for a large quantity of structural iron and cement. There is a great field, both in Colombia and Venezuela, for electrical development in towns and villages yet without lighting systems, and small independent plants are much in demand.

"Small steamers and motor launches are needed for coastwise and river traffic, and that the latter is not inconsiderable may be gathered from the fact that in Venezuela there are 60 rivers with a total navigable distance of over 10,000 miles, while in Colombia the Magdalena River in its course of about 1,060 miles (of which 930 are navigable), traverses nearly three-fourths of the central part of the republic, and by means of its tributaries taps many of the most thickly populated of the agricultural and industrial regions. Windmills and machines for drilling artesian wells enter Venezuela free of duty. In view of the frequent difficulty in securing uncontaminated surface water, there should always be a steady demand for these goods.

Inland Transportation

"In regard to railways, Venezuela and Colombia have each a total railway mileage of only about 600 miles. That this is a serious handicap to agricultural and industrial development can easily be understood. In Colombia considerable extension work has been undertaken, which, however, has been much retarded by restrictions imposed by the war. New locomotives and general rolling stock are needed for the replenishing of existing material, and for the new lines in course of construction. The most important new line is that which will connect the capital, Bogotá, with Buenaventura, the principal port on the Pacific coast. When that is completed, there will be direct communication by river and railway, from the Atlantic to the Pacific, through the heart of the country.

"These and other projected lines will require rails and rolling stock that Canada should be as well able to supply as any other country. In both countries there is a great demand for drugs and medicines, the value of the combined imports of these goods at the commencement of the war being in the neighborhood of $1,500,000 (1913-14). Other articles which Canada could supply are ironware for household use, enamelled ware, provisions as tea, biscuits, and canned fruits, also toilet requisites as perfumery, for which there is a great sale, soap, dentifrice, creams, hair oil, etc.

"Attention should be drawn to the opportunities for cattle ranching in the lower Magdalena valley in Colombia, as also in the 'Llanos' (plains) of the Orinoco region in Venezuela. As regards the former country, Mr. Milne, a British consular agent, reporting in 1914, said: 'In view of the constant reclamation of grazing areas for agricultural purposes in the United States and other countries, the land suitable for cattle breeding around the Caribbean sea will probably be developed in the next decade. An up-to-date refrigerating plant has been established at Puerto Cabello, Venezuela, and the first shipment took place in 1910. Packing houses are also being established on the Atlantic and Pacific coasts in Colombia.'

"In conclusion it is important to notice the various factors favorable to the development of Canadian trade with the countries under consideration. First may be mentioned the friendly feeling existing towards Great Britain and her colonies. This is especially noticeable in Colombia, which has not forgotten the valuable help given by the British legion, at the close of the Napoleonic wars, in gaining their independence from Spain. While British business methods have been somewhat slow and archaic in comparison with other countries, there is, throughout the whole of South America, absolute faith in the word of the Englishman, which is a solid foundation for the building up of new enterprise on the part of Britain's premier 'colony.'

"It should be further noted that Latin Americans are not wholly satisfied with a Pan-American idea which excludes Canada. 'La Nacion' of Buenos Aires, as reported in the 'Literary Digest' of June 30, 1917, said: 'When the present war is over there can be no Pan-Americanism which will not include Canada and the other foreign territorial possessions existing on the American continent.' Another factor favoring trade between Canada and Venezuela and Colombia is that these, together with the Argentine Republic, are the three South American countries accorded most favored nation treatment in tariff matters by Canada. A further factor is the establishment of a branch of the Royal Bank of Canada at Caràcas, Venezuela.

"Finally, and most noteworthy, are the recently improved transportation facilities provided by the Canadian Government Merchant Marine, operated by the Canadian National Railway Board. Two years ago, in an interview with the editor of *The Monetary Times* (published June 22, 1917) the writer advocated a 'triangle route' from Halifax or St. John to the countries around the Caribbean sea. Cuba and Jamaica might provide ports of call on the west side of

the triangle, while Trinidad, Barbadoes and other West India Islands make a well filled east line. The base, which hitherto has been neglected by steamers from Canada, provides ports of call in Colombia and Venezuela, as Cartagena, Puerto, Colombia, Santa Marta, Curacao (a Dutch Island off the coast of Venezuela, called ('the Hong Kong of the Caribbean'), Puerto Cabello, and La Guaira. It would seem that a route, somewhat similar to that advocated, is now to be followed by steamers of the Canadian Merchant Marine.

"Canada is but little known there as yet, and there is much spade work to be done, which, however, should prove very profitable if undertaken effectively and persistently. Latin America (including South and Central America, and the Spanish-speaking islands of the Caribbean sea) with its 80 million people, and a territory two million square miles larger than Anglo-Saxon America, offers unlimited possibilities for trade development, and markets for goods 'made in Canada' which are well able to reach and maintain a foremost place in world competition in that territory."

By way of comparison, Mr. Austin points out that our exports to British Guiana, British Honduras, and the British West Indies, which altogether have a population of 1,122,500, amounted to $8,830,354 for the year ended March 31st, 1918, while our exports for the same year to all the Spanish speaking countries, excepting the Phillipine Islands, which have a population of 80,000,000, were only $7,502,806. That United States firms are watching the South American field is indicated by a news item in "The Public," New York, of September 13th, stating that representatives of 300 establishments in the Mississippi valley will visit Central and South America this fall and winter.

COMMERCIAL LIFE ASSURANCE COMPANY

The Commercial Life Assurance Co. of Canada is the new name of the Alberta Saskatchewan Life Assurance Co. The latter name was discarded because it was cumbersome and too local, the new one indicating the fact that the company is licensed to do business throughout the Dominion. Although the change involved considerable trouble, the manager, J. W. Glenwright, in a letter to *The Monetary Times*, states that they are already feeling the benefit. The name, "Commercial Life," was selected from several which were under consideration.

FINANCIAL ADVERTISERS' CONVENTION

Most of the papers which were read at the convention of the Financial Advertisers' Association, held in New Orleans last week, have already been reviewed in these columns. Among those who attended the convention were D. McEachern, secretary of the Huron and Erie Corporation, and John Cowan, publicity officer of the Toronto General Trusts Corporation. Writing to *The Monetary Times* from New Orleans, Mr. Cowan states that the papers read and the discussions which followed were of high order. One of the meetings of the Associated Advertisers' Clubs of the World, with which the Financial Advertisers' Association is affiliated, was addressed by Hon. Champ Clark, who laid special emphasis on the need for expansion of American foreign trade, especially with the Latin countries of the south.

GRAIN YIELDS AND THEIR VALUES

According to the official estimates at the end of July, the yield of wheat this year will be 248,000,000 bushels, as compared with 189,075,350 bushels last year. "From recent thrashing returns from the west," says the September letter of the Canadian Bank of Commerce, "it is evident that the official estimates are approximately 10 per cent. over the actual yields, but even making due allowance for this, the crop for the whole Dominion will be slightly in excess of that of last year as shown in the graph below. There is a small falling off in the yield of other grains, but their value on the basis of present prices will be greater than that of last year. The value of the chief cereal products, wheat, oats and barley, on the basis of last year's prices is $829,479,950 for this year's crop as compared with $790,413,770 for last year's. So far this year oats and barley are higher in price, while the price of wheat is likely to be fixed at about the same level as a year ago. Taking the grain crop as a whole, the realizable value to the producer will be considerably in excess of that of a year ago. The graph below shows that although the quantity of grain produced in Canada this year is considerably less than in the year 1915, the value has increased very largely.

"Root crops during August and the early part of September have improved very substantially, and will be much above the average. Other fodder crops, such as corn, hay and clover, will yield more than in any previous year since the war began, and prices at present are high. On August 1st they were about 5 per cent. higher than at the same period a year ago.

"The increase in the volume of tobacco, fibre flax and linseed grown in Canada, which will add substantially this year to the value of field crops, is important, as it indicates that a greater variety of products, for which there is a good market at home as well as abroad, is being grown by our farmers."

Conservation of Life Insurance

Life insurance is of supreme value in these uncertain times. Life insurance should not only be jealously guarded and kept in full force, but it should be increased if at all possible. It is a well-known fact that the dollar has greatly diminished in value, so that a given income will not purchase much more than one half the amount that it would have yielded in pre-war days. Not only therefore should we resist every inducement to relinquish our insurance; we should rather increase our protection to the limit of our ability. There is nothing else to be compared with a life insurance policy as a protection for the home. During the policyholder's life it is an asset of ever-increasing value: at death it is the financial anchor of one's dependents. Do not allow your "best friend" to induce you to give up a policy in a sound company. Take a new policy if you can, but never give up the old!

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

THE FALL BUSINESS OF THE GREAT-WEST LIFE

is excellent, denoting a generally receptive attitude towards Life Insurance, the soundest of investments—and a wide recognition of the advantages The Great-West plans provide.

The sum of these advantages is—Life Insurance, participating and non-participating at ***lowest net cost.***

NEW DEPARTURE BY DOMINION BRIDGE

To Manufacture Pulp and Paper Machinery—Other Industrial Activity

ANOTHER important announcement in connection with the development of the pulp and paper industry in Canada is that the Dominion Bridge Co. has completed arrangements for the establishment of plants for the manufacture of newsprint machinery and accessories. Great strides have been made by the pulp and paper trade during the past few years, particularly since the signing of the armistice, and it has been recognized that it would not be possible for the mills to go on securing all their machinery requirements from England and the United States, and that there would be a big market for the Canadian company that would be able to undertake the designing and manufacture of machinery required in the various paper plants. The Dominion Bridge Co. for some time past has had success in the manufacture of special engines and machinery, and the decision has been reached by the management to establish a special plant, which will be devoted entirely to the manufacture of the newsprint machines.

The company has already closed contracts with different Canadian companies, and in connection with them all the designs have been worked out by the company's own engineers. Negotiations are now under way with one of Canada's largest pulp and paper concerns for a contract to supply a complete set of newsprint machinery, representing a cost of about $1,000,000. This indicates about how far the company is prepared to go into this new venture.

Maritime Factories Extending

The Dominion Iron and Steel Co. contemplate enlarging the capacity of the open hearth at Sydney, N.S., by addition of newer and larger furnaces which will cost several million dollars.

Messrs. Jones and Davis, of St. John, N.B., have purchased a lot below the present location of the Havelock Mineral Springs factory, Moncton, N.B., and intend erecting a building which will be used for the carrying on of a pork-packing business. The company will draw its supply from the local markets, and if necessary will also bring in sufficient pork to fill shipment orders.

The John Palmer Co., Ltd., Fredericton, N.B., have awarded a contract at about $25,000 for the addition to their factory on Argyle Street, which will give an additional 15,000 feet of floor space for their oil-tanned footwear plant.

The Clark Brothers shoe factory at St. Stephen, N.B., is to be extended owing to the large increase of business.

Central Ontario Maintains Record

The Brockville Paper Manufacturing Company, Brockville, Ont., will erect a factory on a free site provided by the municipality. immediately.

The Dominion Canners Company have purchased a site in the industrial section of Hamilton, Ont., and will erect a $1,000,000 plant.

In Peterborough, Ont., the Canadian Woollens, Limited, have begun the erection of a French worsted factory and a general office building on the former Bonner-Worth property, and are preparing plans for a twenty loom extension to the weaving plant at Auburn Woollen Mills. The Western Clock Company, La Salle, Ill., have decided to locate in Peterborough, and have purchased the building now occupied by the Canadian Chile Company, on south George Street.

A new firm is locating at St. Thomas, Ont., under the name of St. Thomas Cabinets, Limited. The company will manufacture gramophone cabinets, and will be financed by St. Thomas business men with a capital of $100,000.

The latest Brantford, Ont., industry to announce an extension is the Brantford Oven and Rack Company, which will double its plant owing to increased demands for its output. Almost every factory in the city has either extended this year or is working on plans for such extension.

A warehouse will be erected in Hamilton, Ont., at a cost of $200,000 by the plow department of the International Harvester Company, which took over the Oliver Chilled Plow Company several months ago. Plans have been prepared in connection with the new addition, according to A. C. Dann, superintendent of the company, and work will be commenced this fall, if it is found that labor conditions are favorable for a start being made.

Welland, Ont., is considering having the American City Bureau reorganize its Board of Trade, and the proposal will be considered at a meeting this month. An annual budget of $7,500 to $10,000 is contemplated. An annual City Bureau has already completed campaigns for trade organizations in the following Ontario cities, resulting in membership and annual revenue as indicated: London, 800, $20,000; Brantford, 502, $12,550; Guelph, 385, $9,625; Stratford, 285, $7,125; Chatham, 430, $10,750; Sarnia, 606, $15,150.

At a recent meeting of the executive of the Board of Trade of Belleville, Ont., the approval of the proposal of D. M. Merry, of the Mortimer Company, to link the municipality directly with 10,000 reputable American industries. Every man, woman and child in the city will be given an opportunity to help by purchasing publicity stamps. It is expected that $10,000 will be raised and devoted to bringing Belleville to the attention of industries that are best adapted to the locality, and which are contemplating coming to Canada.

Large Investments at the Border

More than $75,000,000 will be spent in building mills and laying out improvements at Ojibway, Ont., the Canadian Steel Corporation's projected city on Detroit River, below the county town of Sandwich.

The Brunner-Mond plant at Amherstburg, Ont., is opening for the making of soda, and will run full blast from now on. A large production is looked for, and the industry will be a benefit to the municipality.

Through the medium of the Border Chamber of Commerce the International Business Machines Co., of Toronto, has opened a branch factory at 44 Lincoln Road, Walkerville, Ont., where it will continue its own special line of work. F. Maclure Sclanders, industrial commissioner, has been in touch with the company for some time, and has urged them to locate in this community. The new plant is under the management of H. C. Lukens, who will soon be in a position to begin operation. He is already engaging the necessary help.

New Concerns for Prairie Provinces

Industrial activity is still continuing in the western provinces. The Tavani Electric Steel Co., Belleville, Ont., is contemplating construction of a steel iron foundry in Winnipeg at an estimated cost of $5,000,000.

In Regina, Sask., the Canadian Consolidated Rubber Co. is to extend the present building on Broad Street North at the cost of about $40,000. A new wholesale hardware industry is also going to locate in that city, the firm of Lynch, Parker and Plews having taken over the Smeed warehouse on the North Side, and intend carrying a stock of $200,000.

Saskatoon is likely to have an oil refining plant in the not distant future, as the North Star Oil and Refining Co., Ltd., has purchased the property adjacent to that of A. Stanley Jones and intends to erect a plant there. Their decision to establish their head office for western Canada in Saskatoon is a direct result of the trip made by Mayor F. R. MacMillan, City Commissioner C. J. Yorath and W. P. Kirkpatrick, president of the Saskatoon Board of Trade, to Chicago last spring.

Plans for the construction of drydocks on the lower mainland of British Columbia. by various shipbuilding companies, have been announced. J. Coughlan and Sons, Vancouver, B.C., intend erecting a dock at the cost of $3,750,000. The Pacific Construction Company plans the construction of a dock at the estimated cost of $5,500,000. The Wallace Shipbuilding Company plans for a floating dock at an

Hon. GEORGE P. GRAHAM, *President.*

estimated cost of $2,500,000. No bonds, debentures or other securities shall be issued with respect to and as a charge upon any dock until it has been established to the satisfaction of the minister that not less than one-half million dollars have been spent on the work, and the material upon, or for such dock. At no time must the bonds exceed 75 per cent. of the amount expended on the work. No bonds for a drydock built under the subsidy can be issued without the consent of the minister. No bonus is to be paid until at least $500,000 has been expended on the work. It is understood that the department at Ottawa has conceded that the installation of a large shipbuilding plant such as the plant now in the Coughlan yards or the Wallace yards should be given credit on the initial sheet of expense. Such being the case the government bonus would commence from the day of signing the contract.

On the Western Coast

The Western Box and Shingle Mills, Ltd., of Nelson, B.C., intend to log their limits on Grohman Creek, to extend their present working plant to include a sawmill, and to saw for the market. The limits to be logged are estimated to contain about 50,000,000 feet of lumber.

The Canada Western Woollen Mills, Ltd., have chosen a site on Industrial Island, Vancouver, B.C., and will erect a plant. The company is capitalized at $200,000.

Under a by-law which was submitted to the ratepayers of Port Coquitlam, British Columbia, on September 25th, the municipality will pay a bonus of $40,000 and give a flat rate of taxation of $200 per year for ten years, exclusive of school taxes, to the Gregory Tire and Rubber Company, of Akron, Ohio, in consideration of the company establishing a plant which will cost $175,000 and will have a capacity of 250 tires per day. The city will raise the money by an issue of 20-year bonds. The company, of which Mr. J. A. Cunningham, of New Westminster, B.C., is president and Mr. Frank Parsons is secretary, is incorporated to manufacture, in addition to tires, other varieties of rubber goods.

NEW INCORPORATIONS

Canadian Paramount Corporation—Lumber and Pulpwood, of British Columbia—Triangle Lumber Company

The following is a list of companies incorporated recently with authorized capital and names of provisional directors:—

Other Money By-laws

Kitchener, Ont.—The city will have to raise the amount of $50,000 for the construction of an additional water gas plant.

London, Ont.—The city council for 1920 will be asked to prepare a by-law for the raising of $250,000 for a new collegiate institute.

Winnipeg, Man.—The city council has passed a by-law to provide for borrowing $1,000,000 from the province to be loaned to citizens for the construction of houses.

St. James S.D., Man.—Ratepayers have defeated a by-law authorizing the expenditure of $250,000 for the erection of a new school and for the purchase of two sites.

Carleton County, Ont.—At a recent meeting of the county council a by-law calling for the raising of $75,000 for the erection of a new bridge was given first reading.

Truro, N.S.—Ratepayers have endorsed the borrowing of $50,000 in connection with the installation of additional machinery at the electric lighting plant of the municipality.

St. John, N.B.—At a meeting of the council last week the proposal to spend about $800,000 on a permanent pavement program extending over a period of four years, and issuing debentures for that amount, was discussed.

Hanover, Ont.—Ratepayers will be asked to vote on a by-law granting loan of $30,000 for reconstruction of the flour mill of E. Knetchel, recently destroyed by fire. A second by-law will provide $10,000 for the building of a park.

London, Ont.—At a meeting of the London and Port Stanley Railway Commission last week it was decided to ask the city council to apply to the legislature for permission to issue debentures to the value of $200,000 for improvements to the railway line.

Wingham, Ont.—At a special meeting of the town council last week a by-law providing for the issuance of debentures to the amount of $40,000, covering a period of thirty years, for the purpose of the installation of a hydro power plant was given its second reading.

Saskatchewan.—The following is a list of authorizations granted by the local government board from September 1st to September 20th, 1919:—

Rural Telephone Companies—For 15 years, not exceeding 8 per cent. per annum.—City View, $680; Radant, $3,000; Mikado, $17,500; Herschel, $5,000; Togo, $6,800; Bow Valley, $25,000; Beaver, $29,000; Wartime, $7,800; Eastern Edam, $8,500; Western Edam, $10,400; Punnichy, $21,000; Ruddell, $5,850; St. Louis, $20,000; Eagle Hill, $6,400; Glen Morris, $2,700; Keddleston, $2,200; Leslie, $15,800; Avonlea, $4,000; Success, $21,300; Linden Valley, $17,300; Frobisher, $9,000; East Flaxcombe, $4,900; Oronoco, $1,700; Marquis, $1,500; Blackley, $2,400; Holyrod, $3,485; Last Chance, $1,800; Wawota, $4,300; Yarbo, $400; Graham-Chatsworth, $3,800; Pinto Creek, $1,850; Fiske, $13,500; South Melville, $14,000; Bromhead South, $11,600; Sunnyside, $6,000; North Cupar, $31,800; Elkhead, $5,200; Speers, $2,950; Harder, $18,200; Donwell-Canora, $18,500; Three Rivers, $4,750; Colonsay, $6,500; Smiley Western, $650; Invermay, $23,100; Starrs' Point, $2,500; Jesmond, $600; Tableland, $7,550; St. Leonards, $11,600; Noaldale, $7,600; Atwater, $500.

NEWS OF MUNICIPAL FINANCE

Hamilton's Assessment Increased—Moose Jaw Finances in Good Shape—Saskatoon Considers Exchange of Investments

Calgary, Alta.—For the discount period ending last week, the city took in approximately $1,000,000 in taxes.

Marmora, Ont.—The tax rate for the year has been struck at 45 mills. The assessment is lower than last year which makes nearly a mill difference in the levy.

St. Catharines, Ont.—The assessment of the city is $16,043,000, an increase of over half a million dollars compared with last year. The income tax assessment has decreased $290,000.

Hawkesbury, Ont.—The assessment roll has been completed, and the rates struck for the current year. The total assessment is $1,976,133, with $64,184 to be collected. The rate for public school supporters is 28.7, and that for separate school supporters 34.7.

South Vancouver, B.C.—Collections from all sources in the municipality reached last week a total of $1,109,312, this figure being far in advance of the amounts for the past four years. The sum includes the money secured through the tax sale and is for eight and a half months of this year.

Montreal, Que.—For the first time in twenty years, the city will this year be in a position to collect interest on unpaid property taxes from October 1, which is a month ahead of former years, when the interest ran from November 1. The effect is the city will have an additional month's interest, which will represent a considerable amount on what is due after October 1.

London, Ont.—London assessment for this year is likely to be reduced by one-half million dollars as a result of the changes in the income assessment act which were made in June. Where the exemption for non-householders was formerly $600, it is now $700, and the exemption for householders is now $1,700 instead of $1,500 as formerly.

The assessment has been made on the old Act and until Saturday night last there was no idea of any change being made. The court referred a case to City Solicitor T. G. Meredith for a decision, and it is intimated that he has ruled that an appeal must be allowed. If this is done, the whole income assessment in the city will be opened up, with the result that the total assessment will be reduced by at least one-half million.

Edmonton, Alta.—The statement of revenue and expenditure of civic utilities shows that the net result of operations for the month of August, is a surplus, inclusive of capital and depreciation charges, of $7,974, as compared with a deficit of $5,593 for the same month of last year, an improvement of $13,567. The gross earnings for the eight months ended August 31st, were $1,311,875, while operation and maintenance amounted to $711,007, showing a surplus on operation of $600,867, as against $525,755 for the same period of last year, and after deducting capital and depreciation charges, there is a net surplus on all the utilities, inclusive of the deficit on the street railway for the eight months, of $93,120, as against $22,082 for the corresponding period of 1918.

Moose Jaw, Sask.—The financial statement for the year ended December 31st, 1918, shows a population of 20,500, area of 9,760 acres, gross debt of $5,754,990 (an increase for the year of $20,987) a net debt of $246.69 per capita, compared with $275.52 last year, and a net assessment of $1,193 per capita, compared with $1,384 last year. Taxes were as follows: Levy, $835,217 (including business license); arrears paid, $191,473; current taxes paid, $551,005, a total of $742,478 paid. The total income was $1,081,954, including the revenue from the waterworks and electric light systems. The surplus from 1917 was $15,950, and a surplus of $70,279 is carried forward into 1919.

The city's tax rate for 1918 was 28 mills, the highest in its history, although for 1917 it was 27.70 mills. Total taxes reached the maximum of $937,792 in 1913, however, compared with which the 1918 total was $791,523. A comparative statement of net assessment shows that land reached its maximum of $44,037,931 in 1913, being now assessed at $17,961,260; improvements (assessed at 45 per cent.), are now higher than ever before, while the business and income assessment is $24,459,930, compared with a record of $51,997,286 in 1913.

Hamilton, Ont.—According to a statement by Assessment Commissioner Macleod, the total increase in assessment this year is $5,415,645. Last year's total assessment was $88,267,195, compared to the 1920 total of $93,682,840, an increase of $5,415,645. The tax rate is likely to be 31 mills, but will not be struck until January. If the council decide on a 31-mills rate, the total revenue will be $2,904,168. The increase in assessment means $16,788.49 in taxes to the city. The total actual value of land is given at $43,855,490, an increase of $2,114,305 over last year's total of $41,741,185. Buildings in Hamilton are worth $48,838,430. Last year's total was $47,239,430, an increase of $1,599,000. The total actual value of lands and buildings is $92,693,920, compared with $88,980,615 for last year, an increase of $3,713,305. The taxable value of land totals $37,619,660, an increase of $1,851,885. An increase of $1,434,660 is shown in the taxable value of buildings. The total taxable value is $40,218,270, and was $38,783,610 in 1919. The taxable value of real property is $77,837,930. In 1919 the total was $74,551,385, an increase of $3,286,545. Business assessment is $9,319,960, which is an increase of $1,076,990 on the 1919 figures of $8,242,970. Incomes amounting to $6,524,950 are liable for income tax. Here another increase is noted, last year's total being $5,472,840, or $1,052,110 less. The total amount of taxable real property, business assessment and income is $93,682,840, an increase of $5,415,645 on last year's total of $88,267,195.

Winnipeg, Man.—The annual report of the city hydro-electric system for the year ended April 30th, 1919, shows that a surplus of $52,881 was earned, which is just a little less than the surplus of $54,740 earned during the preceding year. Total assets have increased in value from $6,623,663 in 1913 to $10,243,773 in 1919. The number of consumers served has also increased materially, the figures being as follows: 1913, 22,015; 1919, 37,809. Gross earnings, which increase every year, have now reached the sum of $1,097,198. Since war broke out over $600,000 has been expended on extensions to the plant—all of which has been financed from the reserve fund. Comparative figures for the past seven years are shown hereunder:—

For year ending Apr. 30	Total Assets	Total Reserve	Gross Earnings	Surplus for Year	Units Generated
1913	$ 6,623,663.56	$ 20,436.52	$ 545,644.18	$83,432.90*	38,704,220
1914	7,847,501.39	360,901.50	867,621.47	81,897.96	60,337,635
1915	8,181,372.78	640,213.72	976,347.50	78,684.72	70,654,360
1916	8,630,710.80	928,914.92	995,511.37	79,729.67	75,634,750
1917	9,070,627.51	1,273,714.41	1,020,480.25	84,574.53	82,278,970
1918	9,535,173.11	1,615,618.68	1,056,281.88	54,740.06	85,336,830
1919	10,243,773.63	1,996,604.79	1,097,196.99	52,881.00	88,947,190

*Deficit.

Saskatoon, Sask.—In a recent report to the city council, Commissioner Yorath said that a letter had been received from A. E. Ames and Co., Toronto, suggesting that the city should sell its Dominion of Canada bonds and re-invest in its own bonds, which could be advantageously purchased now in England because of the sterling discount. The present holdings of the city sinking fund include the following war bonds: $108,000 due 1927, bought at 100, now worth about 102; $322,000 due 1937, bought at 100, now worth about 104⅞; $70,000 due 1933, bought at 100 and now worth about 103⅞. He said that this exchange would result in a profit of about $20,547 on the Dominion bonds, and the investment in Saskatoon bonds would yield about 6.80 per cent. The local government board, however, was strongly opposed to a municipality investing its sinking funds in its own bonds.

Appearing in the report was the following statement, which met with the approval of the finance committee:—

The accounts of bank loan, cash in debenture and sinking fund accounts are as follows:—

Bank loan—	
1918 loan	$ 85,000.00
1919 loan	324,550.25
Total	$409,550.25
Cash in sinking fund account	66,889.00
Cash in debenture account	22,686.39

INVESTMENTS AND THE MARKET

Montreal Tramways Report—Appeal to Quebec Utilities Commission—City of Winnipeg Fights Increase in Street Railway Fares

Consolidated Mining and Smelting Co. of Canada, Ltd.—The head office of the company is to be moved from Toronto. After October 6th the head office and general sales office will be located in the Drummond Building, Montreal. The Ontario sales office will be continued in the Canadian Pacific Railway Building, Toronto.

Montreal and Southern Counties Railway.—The annual meeting of the company was held last week, and the following directors were elected: Howard G. Kelley, president; Frank Scott, vice-president and treasurer; J. E. Dalrymple, vice-president; W. H. Biggar, W. D. Robb, and J. A. Yates, secretary. J. M. Rosevear was named general auditor, and W. P. Powell, general manager.

Cuba Railroad Co.—Gross earnings of the company for the year ended June 30th last, amounted to $12,236,245. After deducting operating expenses of $8,926,014, the net earnings stood at $3,310,231. The gross income for the year was $3,466,960. Total assets now amount to $59,927,119. The balance carried from the profit and loss account was $5,501,145.

Dominion Iron and Steel Co.—Operation of the Sydney, N.S., plant has been partially resumed after it had been completely shut down for about one month. With the present high costs of operation it is impossible to run it at full capacity. It has been rumored recently that important extensions are contemplated, but no announcement has as yet been made.

Western Power Co. of Canada, Ltd.—Reports from Vancouver, B.C., state that operating revenues of $40,598, an increase of 2.9 per cent. compared with July, 1918, and net earnings of $25,298, an increase of 5.5 per cent. compared with July, 1918, were results of July business. There were included in operating expenses for depreciation during July, 1919, the sum of $1,702.

For the twelve months ended July 31st, 1919, the company shows operating revenues of $458,375, an increase of 1.6 per cent. over the same period in 1918, and net earnings of $292,391, a decrease of 6.6 per cent. compared with the same period of 1918, after making allowance for depreciation of $20,665.

Cape Breton Electric Co., Ltd.—For the twelve months ended July 31st last, the company presents the following comparative earnings statement:—

	July 31, 1919.	July 31, 1918.	Increase.
Gross earnings	$560,707.43	$490,079.96	$70,627.47
Operating expenses and taxes	431,847.30	348,958.14	82,889.16
Net earnings	$128,860.13	$141,121.82	*$12,261.69
Interest charges	64,282.50	63,039.57	1,242.93
Balance for reserves, replacements and dividends	$ 64,577.63	$ 78,082.25	*$13,504.62

*Decrease.

Nova Scotia Steel and Coal Co.—In a letter to *The Monetary Times*, Thos. Cantley, chairman of the board of directors, denies recent reports to the effect that important extensions are to be made shortly. "The Scotia company," he says, "for some time have had under consideration a program calling for a considerable expansion in connection with the iron and steel-producing end of our business at Sydney Mines. If conditions were normal this would have been proceeded with ere now, but in view of the fact that we are only able to get about forty cents value for any money spent, either in connection with labor or material, at the present time, we do not feel justified in proceeding with any large scheme of construction while conditions remain so abnormal. Wages and costs must come down to a reasonable basis before business can run along in normal channels. As soon as the conditions warrant it Scotia will proceed with large extensions. Just when this time will arrive it is quite impossible to say."

Maple Leaf Milling Co., Ltd.—At the special general meeting of the company this week power was granted to purchase a controlling interest, approximately 11,000 shares, in the Campbell Flour Mills, Ltd., to increase the capital stock by an additional issue of $1,000,000 preferred, to fix the quorum at meetings of the directors at less than a majority, and to pay dividends in specie. The capital of the Campbell Flour Mills, $650,000 preferred and $650,000 common stock, and 80 per cent. of both the securities, are in the hands of the estate of the late Senator Campbell. The terms of purchase are par for the preference stock and 90 for the common. The capital of the Maple Leaf Milling Co. will now aggregate $6,000,000, divided between $2,500,000 common and $3,500,000 preferred.

By the merger just consummated the Maple Leaf Milling Co. will become stronger in its Canadian connections, the Campbell Milling Co. having done most of its business in the Dominion, while the first-mentioned concern has sent most of its products abroad. The total milling capacity of the Maple Leaf Milling Co. will be 18,200 barrels a day. Its six mills—at Port Colborne, Kenora, Thorold, Welland, Dresden and Brandon—have produced 15,000 barrels per day, while the Campbell mills have produced 3,200 barrels per day, 2,200 at West Toronto, 800 at Peterboro' and 200 at Pickering.

Winnipeg Electric Railway Co.—The company's application to the Provincial Public Utilities Commission was heard on September 25th, but was on the same day adjourned until October 1st. At a meeting of the city council, held on the preceding day, it had been decided to oppose the company's application for higher fares. Some time ago John Scott and Co., chartered accountants, had been instructed by the commission to make an investigation into the company's financial affairs. On the basis of this report the city solicitor alleged before a meeting of the transportation committee of the city council that the capitalization had been inflated to the extent of over $3,000,000, that melon-cutting in the year 1913 cost it $3,450,000, and that there was an issue of $2,000,000 of bonds of which no record could be found. He also asked that in the event of the application being granted, he should be authorized to apply for an injunction to prevent the company from putting the increase into effect on the ground that the Public Utilities Act was unconstitutional. Other items were quoted from the report to the effect that between 1905 and 1915 the company had paid over $7,500,000 in dividends, some of the later ones being met by overdraft at the bank. The earnings of the company since it obtained the increase in fares last winter showed that for the first seven months of 1919 it was $95,000 to the good, compared with the first seven months of 1918. With reference to the bond issue, he said that when the Winnipeg Electric and the Winnipeg General Power Co. were amalgamated in 1904 the debts of the latter were assumed by the new company, which made a bond issue of $5,000,000, of which $2,000,000 was to take up a similar amount of bonds of the power company, but the Scott report stated that no evidence is found of the existence of the $2,000,000 of power bonds. In 1912, $3,000,000 of stock was sold to shareholders at $100 per share when it was worth $215 per share, and subsequently sold up to $265.

When the sitting of the Public Utilities Commission opened, counsel for the company pointed out the Mathers award had meant an increase of $367,230 in the wage bill, and he also filed a statement, showing a deficit of $122,439 for the ten months ended August 31st, 1919. He also refuted the statements that had been made by the city solicitor before the council, pointing out that the dividend payments did not amount to more than 7 per cent. on the assets invested, nor to more than 8 per cent. if the cash investments

DIVIDENDS AND NOTICES

NOVA SCOTIA STEEL & COAL CO., LTD.

DIVIDEND NOTICE

A dividend of two per cent. (2%) on the preferred stock, and one and one-quarter per cent. (1¼%) on the ordinary stock of the company for quarter ending September 30th, 1919, has been declared payable on the 15th of October, 1919, to shareholders of record at the close of business on September 30th, 1919.

By Order of the Board.
THOMAS GREEN,
Cashier.
New Glasgow, N.S., September 20th, 1919.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Preferred Stock of the **Dominion Textile Company, Limited**, has been declared for the quarter ending 30th **September, 1919**, payable **October 15th**, to shareholders of record **September 30th, 1919.**

By Order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.
Montreal, 22nd September, 1919.

MARCUS LOEW'S THEATRES, LIMITED

Notice is hereby given that a dividend of 1¾ per cent., for the quarter ending 30th September, 1919, being at the rate of seven per cent. per annum, on the preference and common shares of Marcus Loew's Theatres, Limited, has been declared payable on 15th October, 1919, to shareholders of record on 30th September, 1919.

By order of the Board,
SAMUEL D. FOWLER,
Secretary.
Toronto, 30th September, 1919.

TO SHAREHOLDERS OF THE IMPERIAL OIL COMPANY, LIMITED

In accordance with the provisions of By-law No. 174, passed and enacted June 19th, 1919, and approved and confirmed by Shareholders at the Special General Meeting of July 2nd, 1919, the par value of the outstanding shares of the Company has been changed from $100.00 per share to $25.00 per share, and certificates for four shares will be issued for each share of the $100.00 par value of the outstanding stock.

Pursuant to a Resolution and Supplementary Letters Patent, the name of the Company has been changed from The Imperial Oil Company, Limited, to "Imperial Oil, Limited"; therefore the certificates you will receive in lieu of the certificates that you surrender to us will go forward to you under the name of "Imperial Oil, Limited."

Kindly, therefore, send by registered mail, on or before October 1st, 1919, addressed to the undersigned, or to James H. Archbold, Assistant Secretary-Treasurer, Room No. 807, No. 56 Church Street, Toronto, Ontario, your registered stock certificates or bearer share warrants, listing same on the forms which are being mailed to all registered shareholders—and in the case of holders of bearer share warrants only, listing same in the letter with which the warrants are enclosed. The full name and address to which the new issue is to be forwarded should in each case be given.

W. T. McKEE,
Secretary.

LA BANQUE NATIONALE

On and after Monday, the 3rd day of November next, this Bank will pay to its shareholders a dividend of two and a half per cent. (being at the rate of ten per cent. per annum) upon its paid-up capital, for the quarter ending on the 31st October next.

This dividend will be paid according to the list of shareholders of record on the 15th October next.

By order of the Board of Directors.
N. LAVOIE,
General Manager.
Quebec, 16th September, 1919.

DEBENTURES FOR SALE

SPIRIT RIVER, ALTA.

Tenders will be accepted up to October 25th, by the Secretary of the Rural Municipality of Spirit River No. 829, at Spirit River Station, Alberta, for the sale of $30,000.00 worth of fifteen years debentures bearing 6% interest.

A. INNES,
Secretary.
Rural Municipality of S. R. No. 829.

CARDSTON, ALTA.

The Cardston Municipal Hospital District Number Five of the Province of Alberta offer $12,500.00 worth of seven per cent. debentures for sale. Principal repayable in ten equal annual instalments. Excellent security. Legal requirements fully met. Board reserves right to reject any or all bids. Wire or write the Secretary, H. E. Kelley, Spring Coulee, Alberta, before October 10th, 1919.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance. 50 per cent extra if charged

TRAINED EXECUTIVE, experienced, to assume large responsibility for executive functions, desires connection. Several years as secretary-treasurer, manager, etc. Special training as comptroller and internal auditor, coupled with latest accounting practice, graphic presentations, satistics and production, makes services especially valuable. Age 34, Canadian, active, character and references of the best. Executive ability guaranteed. Box 225, *Monetary Times*, Toronto.

RETURNED SOLDIER, twenty years' thorough experience Agency and Head Office Fire Insurance, desires immediate position. Previous to going overseas own business was Fire, Life, Accident, Marine and Plate Glass. All-round inside or outside man, capable managing office and accounting, but prefer Inspector's work. Reply Box 227, *Monetary Times*, Toronto.

RETURNED SOLDIER, 1916 R.C.R. man, desires immediate position. Thoroughly experienced in Fire Insurance or any accountant's work. Prefer Toronto, but would go to good outside town. Reply Box 229, *Monetary Times*, Toronto.

alone were considered. This was for a period of twenty-seven years, and certainly was not an exorbitant return.

The company in its application asks for a straight six-cent fare, eliminating all special fares except those for school children, and counsel said it was obliged to obtain relief by higher fares, by cutting down service, or by borrowing from the bank. The bank indebtedness is $2,000,000 already, however, and he did not think more could be borrowed there.

Montreal Tramways Co.—The report for the year ended June 30th was submitted at the annual meeting held on September 25th, and shows a gross income of $2,303,783, and expenses of $1,800,537, leaving a balance of $503,246. This, with $536,571, brought forward from the previous year, made a total of $1,039,817, after some small deductions had been made. The gross earnings during the seventeen months that the "service at cost" agreement has been in force were $11,572,210, of which operating expenses, etc., took $8,784,763, leaving $2,787,446. There are, however, allowances due to the company under the 1918 contract, allowances, rentals due the city, and contingent reserve according to the contract, which turn this surplus into a debit balance of $1,364,111.

The balance sheet shows total assets of $44,678,404, compared with $43,098,820 last year. The cost of road and new construction increased from $40,999,552 to $41,980,353, value of stores from $814,440 to $1,004,972, and accounts receivable from $311,237 to $595,289. The liability side shows stock outstanding to the amount of $3,861,070, compared with $3,403,330 last year, and debentures of $17,000,000, an increase of $1,000,000. The amount of first mortgage bonds and of underlying bonds is the same, being $16,335,000 and $3,237,153, respectively.

The hearing of the appeal to the Quebec Public Utilities Commission regarding the company's fares commenced on September 23rd. The city of Montreal and other interested municipalities are appealing against the award made a few weeks ago by the Montreal Tramways Commission, and the company is also entering its appeal, maintaining that the award was in some ways inadequate. The municipalities requested an eight-day adjournment, which was granted. This adjournment is to enable the city to have an expert, B. J. Arnold, of Chicago, examine the figures submitted by the company. At the first sitting of the Utilities Commission, R. A. Ross, a member of the Montreal Administrative Commission, pointed out that he nor the other members of the latter body, had no way of knowing if the company was being managed in the most efficient manner. J. L. Perron, K.C., representing the company, said in reply, that this question was beyond the scope of the investigation, which was limited to determining what rates were required. If the tramways commission doubted the management, it could engage experts to investigate.

RECENT FIRES

Loss for Past Week Exceeds that for Three Previous Weeks of the Month

Aylmer, Que.—September 24—Bakery of W. J. Sayer, Charles Street, was destroyed. Estimated loss, $2,500. The building, which is owned by J. K. Neil, is covered by insurance.

Antigonish, N.S.—September 25—St. Francis Xavier College was damaged. Cause, incendiarism. Estimated loss, $15,000.

Brussels, Ont.—September 27—Dry kiln of Philip Ament at his planing mill was destroyed.

Bayfield, Ont.—September 26—Summer home of Mrs. Spott, of Detroit, was destroyed. Estimated loss, $5,000.

Brantford, Ont.—September 25—Premises of the Brantford Roofing Co. were damaged. Cause, overheated tanks. Estimated loss, $5,000.

Courtland, Ont.—September 29—Barn of Chas. Graydon was destroyed with contents.

Cargill, Ont.—September 25—Residence of W. D. Cargill, M.P., was destroyed. Cause, defective chimney. Estimated loss, $30,000.

Dundas, Ont.—September 27—Home of Geo. Bailey, Baldwin Street, was damaged. Estimated loss, $300.

Granby, Que.—September 20—The sash and door factory of the Kent Lumber Co. was destroyed. Estimated loss, $12,000.

Halifax, N.S.—September 25—The Camp Hill Military Hospital was damaged.

Ingersoll, Ont.—September 25—Plant of T. E. Bissell Co. was damaged. Estimated loss, $5,000.

Lutes Mountain, N.B.—September 25—Two barns, sixty tons of hay and other farm equipment of A. Trites were destroyed. Estimated loss, $8,000. Insurance carried, $1,200.

London, Ont. — September 20 — Garage, motor car, chicken coop and a quantity of lumber of R. A. Somers, located at the rear of 694 Colborne Street, were destroyed. Estimated loss, $2,000.

Montreal, Que.—October 2—The building at 11 St. Theresa Street, one of the city's oldest buildings, used as an oil warehouse, was destroyed.

Newtonbrook, Ont.—September 30—Farm buildings of W. M. Robinson and the nearby Humberstone Pottery Works were destroyed. Estimated loss, $40,000.

Oromocto, N.B.—September 30—The town was almost destroyed. The fire started in the River Valley Lumber Co.'s sawmill, destroying about 4,000,000 feet lumber, causing a loss to that company of about $200,000. The total damage is estimated at $500,000. Places of business which were burned were: Harry Cannon's store, Leo Higgins' barber shop, T. J. McElroy's store and Mrs. William Cogswell's ice cream parlor. The blacksmith shops burned belonged to Adolphus Armstrong and W. R. Wield. The hotel was conducted by James Kelly and the mill boarding-house by Frank Cogswell. The public hall was owned by A. D. Burnett. Owners and tenants of dwellings and other buildings burned were: Harry Cannon, house and barn; Leo Higgins, house and barn; Adolphus Armstrong, house and barn; Edward Currie, house and barn; John Malone, house and barn; James Kelly, house and barn; T. J. McElroy, house, barn and warehouse; Charles Ward, house and barn; John W. Gilmour, house and barn; Mrs. Rowan, house; Mrs. Blanche McCafferty, house; Robert Brennan, house and barn; John McPherson, house; Felix McGarr, house and barn; Arthur White, barn and another building; Miss Eliza Currie, house and barn; Mrs. George Holden, house; Frank Cogswell, two houses; Misses Kenneth Wells, house, owned by T. J. McElroy; Mrs. Walter McRae, house and barn; Frank Mason, house; George Wood, house and barn; Frank Gilles, barn; J. E. Kelly, barn.

Prince Albert, Sask.—September 22—Stable at the rear of Rev. Sherstone, Twenty-first Street, was destroyed. Cause, children playing with matches. Estimated loss, $250.

Quebec, Que.—September 23—Residence of Mrs. N. Dubeau was destroyed. Cause, defecive oil stove. Estimated loss, $3,000.

Sussex, N.B.—September 25—The Sussex manufacturing warehouse was destroyed and the property of the Wallace Machine Works, Ltd., was damaged. Estimated loss, $20,000. Insurance carried by Sussex Co., $7,000; by Wallace Co., $500.

St. Mary's, Ont.—September 21—Barn of J. Fraser, 6th concession of West Missouri Township, with contents, was destroyed by lightning.

Thorold, Ont.—September 26—Constable Brothers' garage was destroyed with contents. Estimated loss, $20,000. Insurance carried on building, $1,500; on contents, nil. Two new cars and a truck were destroyed.

Toronto, Ont.—September 27—The Perkins-Ince building, 41 Front Street East, was damaged. Estimated loss by fire, $25; by water, $30,000.

Wiarton, Ont.—October 1—The chair factory of the Canada Furniture Manufacturers' Co., Ltd., was destroyed. Estimated loss, $75,000.

Mobilizing Canada's Economic Reserves

Unless Europe Can Buy, Our Exports Cannot Be Large — We Must Do Our Part, Therefore, in Finance, But Public Credits Not Essential — Deficits from Operation of Government Industry Should Not Be Added to Burden of Taxation

By W. W. SWANSON

THE industrial and social crisis through which the world is at present passing demands, if it is to be successfully overcome, efforts no less great than those put forth during the period of war. It will not suffice merely to restore the machinery and conditions of pre-war days, either in the field of finance or labor. Immediately prior to the outbreak of hostilities the United Kingdom and Germany, as well as Belgium and France, were deeply disturbed by industrial disputes and were on the verge of far-reaching readjustments in their economic life. So difficult and dangerous has the task since become that, to some of the sanest and shrewdest observers—among them Mr. Frank Vanderlip—the possibilities for its quick accomplishment are far from bright. Any fundamental change in the social and economic life of Europe is inevitably destined to make its effects felt in Canada and the United States, and it is imperative that careful consideration be given to the problem by all those who do not seek to escape the responsibilities of leadership and the obligations of citizenship.

Neither Canada nor the United States has been confronted with the anticipated difficulties of providing employment for the demobilized troops; but nevertheless there is grave danger of lack of work for the future, with the consequent menace of labor unrest, unless the European markets regain their former buying power. To maintain industrial stability in the Dominion and keep the national credit unimpaired it is requisite that exports be held at a high level. This cannot be accomplished if Europe remains in a state of economic chaos, its industry paralyzed and its labor power idle for lack of capital and markets. It is certain that unless the 450,000,000 people of Europe find work at living wages Bolshevism will spread until its virus infects the entire world. As Mr. Vanderlip has said, the capitalistic system is on trial; and it remains to be seen whether it can measure up to the task that has been set before it. We are persuaded that it can; but it will require concerted action on the part of the leaders of finance on this continent, and business ability of the highest order.

Before discussing this phase of the question it may be well to consider the indictment brought against the capitalistic system by the Bolshevists and their sympathizers everywhere. This centres chiefly around profits, wages, and the institution of private property, all of which are said to have served their day and to have become obsolete. It is common fashion these days to assail profit-takers on the score that they are without conscience, and make their chief gains by defrauding labor. The fact remains, nevertheless, that in those localities and countries where profits are high, wages are also high and employment steadiest. That in itself, however, would not be a sufficient justification of the capitalistic system if some other force superior to the driving power of profits had been found ready to take its place; but although an attempt has been made to make much of the altruistic motive, it has not hitherto shown the potency of self-interest in promoting the general welfare. The wages system has its defects, no doubt; but it is only fair to point out that wages have advanced with the general increase in wealth and that labor has shared in the common gains made by society. Certainly, the communistic organization of industry, however beautiful it may appear to the uninitiated at a distance, offers labor far less freedom, and far fewer alternative opportunities of employment, than the much abused wages system obtaining in the industrial countries of western civilization.

Private Property Subject to Public Control

As far as private ownership of proptrey is concerned, experience has demonstrated that, in general, better service at lower cost is secured than under public ownership and control. The state must, and does, interfere in the management and control of private property; for the welfare of the community at large is paramount. An example of the kind of public control of private property that may be expected in the future is found in the policies of the National Transportation Conference recently held in the United States. The conference provided for the creation of a federal transportation board to promote the development of rail, water, and highway transportation; to consider the necessity of making further capital expenditures; to regulate security issues; to consider ways and means for strengthening railroad credit; and to determine the grouping or consolidation of railways engaged in inter-state commerce, in such a manner as will carry out the decrees of Congress and give the public strong competitive railway systems. Mr. Paul M. Warburg in commenting on the problem of credit after the close of the conference, said: "The problem of raising through taxation the gigantic sums required by the country for interest charges and other matters affecting the national welfare is perplexing enough in itself, and I believe the conference made no mistake in assuming that the public interest will best be served by not unnecessarily increasing the burden of taxation by arbitrarily adding to it the losses caused by transportation furnished below cost." This statement of the case should be carefully considered by those who imagine that in some occult manner or other public ownership lessens the cost of service and commodities and reduces the burden of taxation.

The competitive system and individual enterprise in the control of property are adequate to the needs of the nations to-day provided that the instruments at hand are properly utilized. Those who most bitterly assail the present system and arraign its waste and inefficiency have little or nothing to replace it, save ideals and sentiment. Business men are only too aware of the defects and deficiencies of the present economic order, but have at least this to their credit, that industry has been brought to a pitch of efficiency never before achieved in history; while at the same time wages and the standard of living have never been so high, even if these are not yet adequate. To better conditions in the sphere of labor and industry it is essential to increase the supply of consumers' goods by utilizing capital to enlarge our economic equipment. Only in this manner can real wages, as distinct from money wages, be increased.

Mr. Vanderlip, after a survey at first hand of the situation in Europe, reports that the world has never witnessed anything that approaches the wreck and ruin of the industry and agriculture of continental Europe; and that no one need expect the quick recovery and revival of business that followed other wars. In the Franco-Prussian war, and the American civil war, the conflict was confined to enclosed territories, and aid could be secured from contiguous states. With the exception of this continent the entire western world is threatened with industrial and commercial stagnation, or worse. Quick recovery is impossible unless aid comes from those nations that have suffered least, in a material way, from the effects of the war. That aid can come best in the form of goods or credit.

Europe Affects our Prosperity

It is a platitude that needs repeating, nevertheless, that unless goods are bought from the nations to which goods are exported the markets in question will disappear. It is of urgent importance, therefore, that the trade of continental Europe be quickly restored. The United Kingdom and the United States have advanced vast sums to the nations with which they were associated during the war, and on the lowest material grounds alone should be anxious to aid in their rehabilitation. That is one compelling motive for striving to promote peace, order, and good government throughout the world. But aside from the natural desire to protect investments there is the hard fact facing the more fortunate countries that bankrupt neighbors do not make good customers. It is essential, therefore, for social safety and economic progress to restore the credit and trade of Europe as soon as our resources can be mobilized to that end.

Canada has already arranged to grant public credits to Belgium, Greece, and Roumania for the purchase of the products of this country. It may be necessary to co-operate with the United States and Great Britain in supplying additional credit of this nature, although the best results will be secured by permitting private enterprise to resume its former functions in the sphere of finance. In any event, the European nations must be granted sufficient time to rebuild their industrial mechanism before being called upon to make money payments for the supplies they receive. This can be accomplished by making a more extensive use of credit. In the last analysis, credit is merely the coining of future goods into a present means of payment. France, Belgium, and the other European nations that have suffered so heavily, must be given the opportunity to produce the commodities with which payments will ultimately be made. It is idle to suppose that they can discharge their obligations either now or in the future by the use of money alone.

In Mr. Vanderlip's judgment it is the duty of this continent, and notably of the United States, to supply Europe with the goods and credit essential for its rehabilitation. All the European nations require foodstuffs and raw materials, for which they are at present unable to pay in any form, either in money or goods. The European markets are starving for cotton, woollen, iron, pottery, leather and other wares, to set their own industries in motion. If foodstuffs and raw materials were supplied in sufficient volume, on credit, to the various countries concerned, first to the manufacturers and wholesalers, and then by these in turn to the retailers and the final consumers, it would be possible to set the wheels of industry in motion and provide work and wages to the population at large. Aid of this nature furnished to France alone would help to rebuild a market which, before the war, absorbed more than $100,000,000 worth of goods from Belgium, and $200,000,000 from the United Kingdom and Germany, respectively; while, with the revival of industry throughout the rest of Europe, it would restore to France a market in which was formerly sold $700,000,000 of its own commodities. To be sure, such credit must likewise be granted to the other European nations, or the scheme would otherwise break down. If, however, the United Kingdom and the United States were willing to assume such tremendous risks by way of providing materials and supplies, as well as capital, to their associates during the war, they must be equally prepared to run risks to help build that new world order for which the war was waged.

Facilitate Export Business

The United States Congress has adopted a measure by which, through amending section 25 of the Federal Reserve Act, it becomes possible for the national banks to invest up to five per cent. of their capital and surplus in concerns formed for the purpose of engaging in operations relating to the export business. This means that the American banks are preparing to do their part in not only pushing the export business of the United States but in providing the credit essential to carry it on. An important phase of the problem of rebuilding foreign trade is the matter of bringing exchange rates back to as near the normal as may be. In one sense the heavy discount on British and other European exchange protects the home markets; inasmuch as it discourages buying abroad; but at the same time it places obstacles in the way of the free flow of goods, and thus retards a return to healthy commercial conditions. As a result of embargoes and other restrictions, exchange rates have fluctuated in a way to seriously hamper trade, which cannot return to normal until a free gold market is again established under concerted international action. It must be kept in mind, also, that the European nations have little or no gold to spare, and that their already depreciated currencies need more support from the yellow metal if prices are to be controlled, and if these nations are to resume trade on the old lines. It will therefore be necessary on the part of the United States and the wealthier nations to accept securities as well as gold, and indeed to make large use of credit instruments in restoring international trade, until it is brought back to the point where the bulk of the transactions will be based upon an exchange of goods for goods.

It was discovered during the war that co-operation in the field of finance was imperative for success. In Canada, owing to our system of branch banking, there has been, for many years, a certain measure of unity in our financial affairs; although there was, and is, room for improvement. The United States, however, learned the lesson slowly, and only after bitter experience, that, however much the individual institution might depend upon its own resources and skill in management in ordinary times, it was a sheer necessity to co-operate in time of panic and crisis. Mr. Vanderlip has had wide experience in the banking world, and realizes therefore all the more that what the pressure of events compelled the United States to do in establishing the federal reserve system has now become necessary for the entire western world. If our present economic system is to survive the assaults of Bolshevism and the attacks of extremists who have nothing to lose and everything to gain, inasmuch as they care nothing for what may follow upon riot and license, there must be concerted action on the part of those who have the power to restore industry and promote progress. The Anglo-Saxon nations have the economic reserves to do this great work, if selfish and false political and economic shibboleths do not block the way of progress and social reconciliation.

MANITOBA COPPER PROPERTIES PURCHASED

Hayden Stone and Company of New York and Boston have arranged to purchase the Flin Flon low-grade copper mining properties in northern Manitoba. A railroad will probably be built to serve the district. Associated with the firm will be E. C. Jackling, of New York, well known as the engineer of the Utah Copper Company. Hayden Stone and Company control the Utah, the Nevada Consolidated, the Ray Consolidated, the Inspiration, and the Chino Copper companies. Only the final details of geological examination remain to be completed before the option is taken up and engineers are now doing this work.

The mines are at present owned by the six prospectors who discovered them, who own one-third, John E. Hammell of Toronto, who owns one-fourth, F. Currie of Toronto, who owns one-eighth, A. Fasken of Toronto, who owns one-eighth, and David Fasken of Toronto.

QUEBEC AND THE CANADIAN PACIFIC

Taxpayers of Canada Have Vital Interest in Railway Policy of Dominion, Says C.P.R. President

TRAFFIC possibilities in the province of Quebec was the theme of an address by E. W. Beatty, president of the Canadian Pacific Railway, at a meeting of the Quebec Board of Trade on October 1st. Incidentally he stated that the Chateau Frontenac Hotel in Quebec, which is owned by the C. P. R., would be enlarged by the expenditure of $2,000,000. Mr. Beatty said in part:—

"The Canadian Pacific Railway operates within the limits of your province slightly less than 1.900 miles of railway, being, I think, equal in mileage to any other system within the province. The possession of this extent of mileage gives in itself a reason why the company's interests and those of the province are closely related and inter-dependent. From a railway standpoint Quebec offers a great variety of railway traffic possibilities. You will appreciate this when you recall the extent of the productions of the province, which contribute to the support ofthe railway systems operating within it. In manufactured products its production is 27 per cent. of that of the whole of Canada; in wood pulp and paper 53 per cent. and 49 per cent. respectively; in dairy products 57 per cent. and in live stock varying from 11 per cent. to 35 per cent. The products of the farm are extensive and increasing, having now reached 13 per cent. of the total agricultural production of Canada. The future holds still more in the way of traffic and railway possibilities. The total railway mileage in Quebec is slightly less than 5,000 miles, or about two-fifths of that of the state of Pennsylvania, while its area is fifteen times as great. Quebec is likewise fifteen times as large as Ohio and its railway mileage about half that of the latter state.

"With increasing population and commercial expansion more mileage must be constructed and existing facilities increased. The C. P. R. has not reached the limit of its development within the province nor has any other railway company, if the future possibilities are as we have every ground for believing them to be. I believe that in the next few years a considerable extension of colonization railway construction will take place and while I am not unmindful of the hazard and the difficulty in building lines into undeveloped territories, if the work is undertaken prudently and gradually there is no doubt that the railway extensions will not only keep pace with settlement and production but will accelerate both.

Poor Roads Must be Utilized

"This is a prosperous country, whose future, if the commercial affairs of the nation are administered prudently and economically for the next few years, is probably as bright as any country on earth. The danger is that our development may be retarded by burdens imposed upon us before we are able to carry them. We have many miles of railway that represent a useless expenditure, but the money has been spent and the securities are in the hands, in most cases, of investors in foreign countries, who staked their money in good faith upon the development and future of Canada. Many of them were, we now know, misconceived and constructed at extravagant cost, and in default of any other available parents have been quietly laid on the door-step of the government of the country, or it would, perhaps, be more accurate to say, had been placed on that door-step which had a large 'Welcome' on the mat. They must be taken care of because they cannot be abandoned. It must be seen that they grow into healthy arteries of commerce and play their full share in the country's progression. The problem that confronts us now is how this can best be done, and if it is possible under any system yet evolved for their administration. The possession of a tremendous mileage by the Dominion with these periodical additions of unprofitable mileage makes the prospect a disheartening one, even though the most far-sighted and efficient men are placed in charge of the properties, and even if they were permitted to operate them to the best advantage in the interest first of the shippers and, secondly, of their owners.

"I am convinced that no administration which does not retain individual initiative and enterprise, pride in their work and adequate rewards for work well done, can possibly reduce the heavy annual deficits which are confronting the operators of most of Canada's railways. The question is one of such great magnitude and will have such far-reaching results that it should be determined without regard to the opinions of politicians, shareholders or any one set of men, but must be determined upon one ground only—what is best for the people of this country, and what will give them the most efficient railway service at the cheapest possible rates, and at the same time impose as little burden of taxation as is possible. These millions which have been unwisely and unprofitably spent have been spent, but the millions which may be wasted by the adoption of an improper system of operation can be saved, or partially saved, and this is the problem the working out of which will determine the future methods of operation which will prevail throughout Canada.

"There are advocates of both systems of administration, and while their views and the facts upon which they base them, are worthy of the greatest consideration, I am convinced that the people will only come to a realization of how serious the situation is and will themselves provide the remedy only when they see and weigh the tangible results. There are two important aids to the solution. The first is, that the problem should be discussed and agitated in order that the merits and demerits of the systems, which are suggested should be appreciated by the people as a whole. I do not know of any problem so vital to the interests of Canada in which there has been so much acquiescence and so little public discussion and education, as the subject of the future of the country's transportation systems. As a corollary to this and second only in importance is the necessity for accurate information as to administration and results of it, in order that the people may be in a position to judge whether they desire to adhere to the methods of administration from which these results flow. I do not mean financial results alone, but results in service, a most important factor from the standpoint of the public.

"To my mind the determination of the question will rest upon two factors, the extent of the burden cast upon the people and the character of the service given. The difference between a proper and an improper system represents the millions of additional burden to the taxpayer, which he may be called upon to bear and the high rates and poor service which are due to the inefficiency which any improper system must inevitably provoke."

LOANS FOR SOLDIER SETTLEMENT

Figures given out by the Soldier Settlement Board of Canada show that up to September 6th, the board has approved loans amounting to $32,648,017. The number of loans were 10,739, an average of $3,040. The total is made up as follows:—

On land purchase:	
For land	$17,842,608
For permanent improvements	2,246,573
For stock and equipment	6,083,625
On Dominion Lands:	
For equipment and improvement	3.388,091
On lands already owned by settlers:	
For mortgages and equipment	3,087,120
Total	$32,648,017

The Agricultural Training Branch statistics up to September 13th, show 34.315 applications, of which 25,549 have been approved by the Qualification Committee.

Messrs. Webb, Read & Company, and George A. Touche & Company, announce that their practices in Canada have been amalgamated and will be carried on in future under the firm name of George A. Touche & Company, chartered accountants.

PERSONAL NOTES

Mr. R. R. Farrow, for the past thirteen years assistant commissioner of customs, at Ottawa, has been appointed commissioner of customs and deputy minister of the Department of Inland Revenue.

Mr. J. W. W. Stewart, managing director of the Monarch Life Assurance Company, Winnipeg, is still suffering from ill-health and has been ordered away by his physicians for three months.

Mr. R. MacLaren, manager of Sterling Offices, Ltd., of London, Eng., is in Canada at present in connection with the company's business here. An office was some months ago opened in Toronto under the management of H. Marshal Robertson.

Mr. R. Hill Stewart, of Edinburgh, Scotland, general manager of the Caledonian Insurance Company is at present visiting this country and the United States. This is his first visit to America since his appointment to the position of general manager, about two years ago, on the retirement of Mr. Chapman on account of ill-health. Mr. Stewart expressed himself as favorably impressed with the city of Toronto, and was much interested in the harbor development, and the reclaimed land at Ashbridge's Bay.

Mr. Walter Leaf, chairman of the Board of Directors of the London County, Westminster and Parr's Bank, one of the great banks of the world, was in Winnipeg this week on his way back from the coast. Mr. Leaf was greatly impressed with the possibilities and future of western Canada. The London bank is specially interested in Canada owing to the fact that it owns a million dollars worth of the stock of the Royal Bank. The London bank has a great network of branches in Great Britain and important connections in Europe, as the Royal Bank has in Canada.

Mr. R. E. Jamieson, president of the Dominion Rubber System and a director of the Canadian Consolidated Rubber Co., spent a few days in Winnipeg this week. Their company, said Mr. Jamieson, is spending a million dollars erecting a tire plant at Kitchener, and is also offering to erect three hundred houses, to be sold on easy terms to their employees and workmen, the total amount involved in the housing scheme to be about a million and a quarter dollars. Regarding general business, Mr. Jamieson said that, in his opinion, conditions were better in Canada than in any other country in the world. There was less disturbance than in the United States. Regarding collections, he said that the situation was good. In all parts of Canada merchants were taking their cash discounts and doing business in a better way. Mr. Jamieson expressed the conviction that the tone of business has been improved in many ways in the war period. There is a better spirit and more co-operation. Prior to the war customers were inclined to look on the wholesale house as a partner in time of trouble, but there was now a tendency to continue the relationship when times were good. Reference was also made to a willingness on the part of manufacturers and large dealers to give some publicity to their affairs. There was not the same secrecy or the desire for secrecy.

OBITUARIES

Through an unfortunate error the photograph of Mr. Edwin Hanson of the well-known firm of Hanson Bros., bond dealers, Montreal, was inserted in the obituary notice of the late E. F. Hebden in these columns last week.

Mr. Alfred Baumgarten, who for many years past had been a leading figure in Montreal's business and financial life as president of the St. Lawrence Sugar Refining Company, director of the Bank of Montreal, and of other institutions, died last week.

PROGRESS IN VICTORY LOAN

Ontario Committee Personnel—West Expects to do its Part—Manitoba Local Organization

Publicity in connection with the 1919 Victory Loan campaign is now in full swing; the methods are similar to those used last year. Advertising is being carried in nearly all news and class papers, and the Canadian Press Association is co-operating by distributing short reading notices, through a Press News and Feature Service. Posters, etc., have been distributed throughout Canada. Meanwhile, the organization work is being completed, as has been regularly noted in these columns.

Ontario Committee and Local Organizers

The personnel of the Ontario committees has just been completed, the general organization for the province being as follows:—

Ontario General Committee:—G. H. Wood (chairman), Dr. A. H. Abbott, C. A. Bogert, W. C. Brent, J. E. Brethour, F. M. Chapman, F. J. Coombs, H. C. Cox, Major Hume Cronyn, M.P., Col. F. H. Deacon, W. A. Dryden, D. A. Dunlap, Sir Henry Egan, G. Tower Fergusson, Gordon T. Finch, Thomas Findley, C. W. Fleming, Brig.-Gen. J. A. Gunn, C.M.G., D.S.O., J. H. Gundy, H. J. Halford, Robert Hobson, H. V. F. Jones, J. B. Laidlaw, D. J. McDougald, W. A. Mackenzie, W. L. McKinnon, J. W. Mitchell, Tom Moore, J. J. Morrison, W. E. Rundle, F. D. L. Smith, Harry L. Stark, John A. Tory, H. R. Tudhope.

Ontario Executive Committee:—G. H. Wood, chairman; G. Tower Fergusson, vice-chairman; W. L. McKinnon, secretary; F. G. Lawson, assistant-secretary; Harry L. Stark, treasurer; G. Tower Fergusson, chairman, finance committee; Col. F. H. Deacon, chairman, employees' committee; Gordon T. Finch, vice-chairman, employees' committee; W. A. Mackenzie, chairman, organization committee; D. J. McDougald, vice-chairman, organization committee; C. W. Fleming, chairman, business committee; F. J. Coombs, chairman, publicity committee; W. C. Brent, vice-chairman, publicity committee; J. H. Gundy, chairman, special subscriptions committee; J. W. Mitchell; H. R. Tudhope.

Ontario Business Committee.—C. W. Fleming (chairman), Harold A. Greene (chief of staff), Harry L. Somers, W. S. Hodgens, A. G. Mackenzie.

Ontario Employees' Committee:—Col. F. H. Deacon (chairman), Gordon T. Finch (vice-chairman), F. E. Fisher (secretary), Isaac Bonner, Col. Harry Cockshutt, Thos. J. Dillon, Gordon C. Edwards, W. C. Franz, Brig.-Gen. J. A. Gunn, D.S.O., Robert Hobson, Gordon M. McGregor, R. O. McCulloch, R. S. McLaughlin, Tom Moore, Hon. Frederic Nicholls, J. F. Paige, J. E. L. Pangman, George M. Reid, George H. Ross, T. A. Russell, N. W. Tovell.

Ontario Finance Committee:—G. Tower Fergusson (chairman), Harry L. Stark (treasurer), W. A. Page (secretary), C. W. Fleming, E. Gordon Wills.

Ontario Organization Committee:—W. A. Mackenzie (chairman), D. J. McDougald (vice-chairman), W. L. McKinnon (secretary), F. G. Lawson (assistant secretary), W. C. Brent, F. J. Coombs, Gordon T. Finch, J. H. Gundy, G. H. Wood.

Ontario Publicity Committee:—F. J. Coombs (chairman), W. C. Brent (vice-chairman), F. R. Graham (secretary), Dr. A. H. Abbott, C. G. Blair, Gordon T. Finch, J. J. Gibbons, L. R. Greene, Major John Inwood, W. A. Mackenzie, J. E. Macpherson, W. L. McKinnon, T. H. Roadhouse, F. D. L. Smith, J. G. Watson, Mackenzie Williams, W. E. Wilder.

Ontario Special Subscriptions Committee:—J. H. Gundy (chairman), W. E. Wilder (secretary), R. A. Daly (secretary), A. H. C. Beairsto (assistant secretary), C. A. Abbs, A. E. Ames, R. M. Bird, Geo. W. Blaikie, C. H. Burgess, F. D. Chapman, Col. G. T. Chisholm, C. R. Clapp, J. A. G. Clarke, H. G. Cooper, Edward Cronyn, W. R. Fleming, C. E. A. Goldman, J. L. Graham, J. C. Hope, Morgan Jellett, F. W. Kerr, H. W. Lofft, A. G. MacKenzie, G. A. Macpherson,

LOAN TOTAL SHOULD BE ANNOUNCED

THE campaign period for the 1919 Victory Loan is near at hand, and one thing the people should know, and are entitled to ask, is how much the government is going to allot should the objective be oversubscribed. In view of recent events, it is not desirable that a large amount of money should be available for government purposes, lest radical elements should make use of this situation to strengthen their arguments for incurring further capital obligations. The final requirements can be closely calculated, and if the total to be allotted is not announced, it will militate against the success of the campaign.

The entire proceeds of our coming Victory loan are already mortgaged for expenditures required under existing legislation. Nevertheless, the Dominion government is still bombarded with demands for further capital outlays running up as high as $1,000,000,000. The effects of the issue of immense quantities of government securities, coupled with the currency inflation, have already placed a severe strain upon the country, by reason of the high prices and over-consumption which has been produced. The issue of a further amount of securities would postpone a return to normal conditions, and prolong unemployment, high prices, strikes and other industrial ills against which the country is contending. This situation is fully appreciated throughout Canada, and the government is fully aware that the vast majority of the people are anxious to help rather than to hinder the downward tendency in prices.

Giving evidence on October 7 before the Special Committee on Soldiers' Civil Re-establishment, T. C. Boville, Deputy Minister of Finance, stated that the national debt has increased from $335,996,000 before the war to an estimate of $1,950,000,000 for the fiscal year 1919-20. Pensions are estimated this year at $30,000,000; land settlement, $25,000,000; and soldiers' civil re-establishment, $10,000,000. Interest on the public debt has risen from $12,093,000 in 1913-14, to $102,767,000 this year. War expenditures for 1919-20 were estimated at $350,000,000, exclusive of pensions, and this year's consolidated revenue receipts were estimated at $244,000,000. Income tax had been levied on 51,588 people in 1917, and the amount of assessment was $12,221,669. Only 47,021 people paid, and the amount collected was just over ten million dollars. Only 32,668 persons paid on incomes between $1,500 and $6,000, and $1,469,000 was collected from them. Only 40 persons paid on incomes over $100,000, a total of $1,470,000.

Before the same committee on October 8th, Sir Thomas White, until recently Minister of Finance, stated that another loan in the fall of 1920, would be required, in addition to the one which is to be floated this year. This is news which will not be welcomed by the taxpayer. Another interesting statement made was that Canada cannot stand such a loan oftener than once in twelve months. Referring to the demands for larger gratuities, Sir Thomas White stated that the money could not be raised by taxation. He argued that the business profits tax should in the course of time be reduced or disappear in order that capital might not be frightened out of the country on the one side, and prevented from coming into it on the other, and that a federal land tax all over the Dominion might be considered unwise in a sparsely settled country like Canada, which needed immigration to help in the era of greater production needed to take care of the debt. The income tax, he said, had been put on all fours with that of the United States, and that all the revenue from all sources would hardly enable the government to pay more than the ordinary expenditures. Therefore, however estimable and desirable and worthy might be the schemes put forward, they all boiled down to the question of the impossibility of raising the money.

Regarding a proposal which had been made that the government should issue bonds to returned men, Sir Thomas said: "Let us assume that the government gives the soldiers one billion dollars' worth of bonds. Well, that finances the gratuity. The soldiers have the bonds. Some may keep them and others would sell them. The effect would be absolutely to demoralize the market for securities and bonds in Canada and the United States. It would affect most gravely and injuriously our credit. The market situation is nicely adjusted. The public does not begin to understand how much care has to be taken of the market to keep it right. Last year we had to take of the Victory Loan some sixty million dollars to stabilize it because of securities coming on the market. Take the effect on the loan this fall. If you hand out one or two billion dollars to be sold for any price an individual might be disposed to take, your securities on the market would go down at once. A reactionary effect would be felt in the United States, where we must keep up our credit. It would demoralize your market. Many times during the war people who wanted to get contracts would ask me to give them bonds instead of trying to find the cash. My reply always was that the proposal was absolutely unsound, and that the Dominion government must sell its own bonds and determine what was necessary to keep up its credit. This proposal violates every sound principle of marketing bonds. The bonds are debt. There would be a huge interest bill to pay on them annually. I can understand a man without a technical knowledge of finance putting forward a proposition of that kind. He is not considering it in the light of conditions under which governments carry on. It is of supreme importance that the country should maintain its credit. If the government doesn't do that how can it float another loan?"

Coming to an alternative suggestion that currency should be issued for the amount required, he pointed out the injurious results of money inflation. It would force Canadian exchange rates still lower. "There is only one nation now on the gold basis," he said, "and that is the United States. The inflation of currency at this time would be, in my opinion, the most ill-advised policy of which any government could be capable. Any financial man sound in his views will sustain that." The cost of living would go up still higher, because it is affected by money value. Concluding, he said that the country could go no further without consequences of the gravest kind.

DISADVANTAGES OF LOCALIZED BANKING

A RECENT issue of the "Grain Growers' Guide" contained the following item: "In response to a circular letter sent out on July 18 from the central office of the United Farmers of Alberta in regard to the seriousness of the situation created by the feed shortage in large areas of the west, the men at the head of the different banks have written letters giving every promise of sympathetic consideration to the needs of the farmers borne upon heavily by the calamitous conditions referred to."

Commenting on this, the September issue of the Home Bank Monthly, says: "If the 'unit' bank system were established in Alberta, the financial resources of the districts affected by the recent drought would be as seriously crippled as the grazing interests and a panic would be the result that would spread and provoke financial depression in sections not originally involved. Financial panics are invariably local in their origin. If they can be tided over at their inception, the financial balance may be restored without permitting conditions to adjust themselves in confusion. Where a section of the country stands isolated, with its own local financial institutions dependent entirely upon uniformly prosperous conditions, a setback in any department of industry, agriculture or development results in a maximum of disturbance among all interests of the community."

ONLY GRADUAL REFORM PRACTICABLE

THE cleavage which is now apparent in the ranks of labor is the result of a separation which has been taking place for many years past, between the conservative element, which seeks for gradual improvement in the condition of labor, on the one hand, and the radical element, which seeks to tear down the whole industrial system, on the other. The former section is represented, generally speaking, by the international unions whose jurisdiction extends to this country, and an individual example is the old and conservative International Typographical Union. The other group ranges all the way from the moderately radical to the frankly revolutionary. The fact that the most experienced and successful labor leaders are nearly all found in the ranks of the former, is an impressive argument, as to its inherent soundness of the principles for which it stands.

A casual glance at the disputes in industries in which labor is controlled by the international unions would seem to indicate that there is a wide difference in viewpoint. Compared with the projects of radical labor, however, the precise settling of wages and of hours of labor is merely a question of detail. The future stability of our economic system, in fact, depends upon sympathetic consideration of the moderate proposals, for the conservative element recognizes the essential part which capital and organizing ability plays in industry, and the fact that it must have a proportional reward. A policy of this kind will ensure that the revolutionary section will be left in a hopeless minority against the outbreaks of which there is no protection except in adequate machinery for the preservation of order.

Ontario has spent $499,537 during the past two years on Kapuskasing Camp, a soldier settlement in northern Ontario. The assets are valued at $201,426, showing a loss of $160,127, after deducting revenue received by the provincial treasurer and other assets created.

* * * * *

United States interests which have purchased the Flin Flon copper properties in northern Manitoba will probably build a railroad to serve the district. As usual, private incentive is quick to grasp the possibilities of a profitable line, while the "colonizing" and other non-paying roads are maintained by the taxpayer.

* * * * *

The Civic Legislation Committee of Toronto has been taking up the subject of rents. It was decided to memorialize the Dominion and Ontario governments to prohibit rentals exceeding ten per cent. net revenue on the actual valuation of property. By doing this the council was able to wash its hands of the subject, as one member put it.

* * * * *

In order to find out if Winnipeg packers were in a combine, the Board of Commerce wanted to "listen in" on their telephone lines; permission was refused, however, by the Manitoba Telephone Department. The Board of Commerce is possessed of very wide powers, and it has already engaged an extensive staff; cases of "profiteering" must be scarce, or the Board and its staff very inefficient, if such methods must be adopted so soon in its career.

* * * * *

Montreal is having difficulty in settling on a suitable form of municipal government. About two years ago a city Administrative Commission was established by provincial legislation, for a period of four years. This commission took over some of the functions of the city council. It is now suggested that this commission should be abolished. On the other hand, an alderman proposed a few days ago that it was the council that should be done away with.

* * * * *

The councils of Welland and Bridgeburg, Ont., have passed resolutions asking that the Dominion government grant a bonus to all shipbuilding concerns. The building of ships in Canada, especially wooden ships, to any extent, was a war-time mushroom growth; if a future could be foreseen for the industry, temporary assistance during a few years of stress might be permissible. This is not the case, however; we have had enough of infant industries which never grow up.

* * * * *

The packing houses of Canada are commonly accused of being in combination, and they have now concluded that they might as well have an association of some kind. As a result of a meeting held in Toronto on October 1st, the "Industrial and Development Council of Canadian Meat Packers" has been launched. An office will be opened in Toronto, and S. E. Todd, formerly secretary of the Canada Food Board, has been appointed secretary. The objects of the association will be to work in co-operation with the farmers and agricultural departments for the improvement of production on the one hand, and on the other to present to the public the true function of the packing industry.

Saskatchewan

An organization meeting for Saskatoon district was held on September 26th, and the following officers elected: President, Peter Gordon (manager of the Imperial Oil Co.); vice-president, A. H. Williamson (Wood, Gundy and Co.); executive committee, Major MacMillan, W. A. Porteous, J. F. Cairns, Dr. A. M. S. Young, J. M. McKay, C. D. Fisher, Harley Henry, B. T. Chappell, T. K. McCallum, L. M. Bidwell, A. H. Hanson, T. D. M. Osborne, T. A. Reynolds, Hugo Milicke, R. P. Strickland, Geo. Underwood, C. O. Smith, all of Saskatoon, S. Humphrey, of Unity, C. E. Mattenley, of Young, Judge J. O. Baldwin, of Kindersley, W. A. S. Fisher, of Dundurn, J. H. Beaton, of Langham, and A. E. Johanson, of Dundurn. The committee can add to its number. J. O. Hettle, vice-president of the Saskatchewan executive, was also present at the meeting.

Similar meetings for other divisions of the province have been held as follows: Prince Albert, September 25; North Battleford, Yorkton, Saskatoon, Weyburn, September 26; Moose Jaw, September 29; Swift Current, September 30; Regina, October 1. At the Yorkton meeting, F. J. Pilkington was elected chairman, Major Peaker honorary chairman, W. R. Parsons vice-chairman, and Thos. Whitby secretary.

SIR AUGUSTUS NANTON,
Vice-Chairman, Dominion Executive Committee, 1919 Victory Loan

At the Moose Jaw meeting, held on September 29th, J. H. Kern, Sr., who directed both previous Victory Loan campaigns in the Moose Jaw district, was again elected president, and E. J. McMillan was appointed secretary. The members of the executive are: W. G. Baker, J. G. Ogilvy, W. F. MacBean, G. L. Dewey, J. H. Kern, H. F. Stirk, G. S. Tuxford, A. Halkett, A. H. Dion and Thos. Miller, of Moose Jaw; J. F. Kennedy, of Outlook; Mr. Ritter, of Riverhurst; F. X. Bellefleur, of Willow Bunch; Fred Shanley, of Wood Mountain; Z. Battell, of Caron; A. D. Gallagher, for Moose Jaw district; B. McCormack, of Lawson; G. A. Turner, of Tugaske; N. J. McDonald, of Eyebrow; W. E. Richardson, of Brownlee; Thos. Weal, of Verwood; Dr. R. O. Coghlan, of Elbow; J. T. Turner, of Central Butte; W. A. Tripp, of Morse; C. C. Walker, of Chaplin; E. B. Tedford, of Mortlach; A. E. Westbrook, of Rouleau; A. McClelland, of Avonlea; D. E. Craig, of Mossbank; A. C. McNaughton, of Mazenod; J. A. Watt, of Kincaid; J. A. Forcier, of Gravelbourg; Thos. Murphy, of Lafleche; W. E. Dennison, of Assiniboia.

J. M. MACKIE,
Vice-Chairman, Dominion Executive Committee, 1919 Victory Loan

The objective for the district was voluntarily raised from $3,000,000 to $3,750,000. Several speakers addressed the meeting, including Hon. C. A. Dunning, provincial treasurer, W. E. Knowles, secretary of the Saskatchewan Loan Committee, General G. S. Tuxford, E. S. Miller and Major James.

Manitoba

The provincial committee for Manitoba is as follows: Sir Augustus Nanton, chairman; C. C. Ferguson, vice-chairman; Harry Ford, treasurer; J. A. Anderson, secretary; W. R. Allan, G. M. Black, J. M. Black, J. E. Botterell, Hon. Edward Brown, W. H. Gardner, Peter Lowe, Robert McKay, W. J. O'Neill, Lieut.-Col. C. S. Riley, R. T. Riley, D. L. Rossini, A. N. Strang, J. A. Thompson.

The territory outside of Greater Winnipeg has been divided into sixteen districts, each district consisting of from four to eight municipalities and organization work has been under way since September 22nd, under the leadership of the following gentlemen: District 1 and 2, supervisor, J. A. Thompson; organizers, J. C. Davis, A. B. Estlin. Districts 3 and 7, supervisor, G. M. Black. Districts 4 and 16, supervisor, W. J. O'Neill; organizer, J. H. O'Connor. Districts 5 and 6, supervisor, A. N. Strang; organizers, R. F. McMillan, Jos. Snowden. Districts 8 and 9, supervisor, Lt.-Col. A. L. Saunders; organizers, Major W. W. Stroyan, G. A. Powell. Districts 10 and 13, supervisor, D. L. Rossini; organizers, Major A. F. Brown, Lieut. J. A. McGill. District 11, supervisor, Capt. R. R. Pattinson. District 12, supervisor, Brigadier-Gen. R. W. Patterson. Districts 14 and 15, supervisor, J. E. Botterell; organizers, Capt. A. P. Cameron, C. W. Gifford. For the city organization, Mr. H. M. Agnew, of the Crane Co., and Mr. D. J. Scott, of the Sun Life Assurance Co., Ltd., have again been selected to manage the city canvass.

The head office address of the London and Lancashire Fire Insurance Company, has been changed from Liverpool, England, to 5 and 7 Chancery Lane, London, England.

WEST WILL REQUIRE MUCH MONEY

Mr. J. K. Macdonald, president of the Confederation Life Association, has just returned from an extensive trip in the Canadian west. In an interview a few days ago he said:—

"I have for many years followed the policy of gaining personal information with reference to conditions in this country. Each year I drove behind horses through the wheat fields, and got out to examine the grain as often as it seemed necessary. By doing so I was able to form a definite opinion with reference to the conditions in the country. This year the trip which we made was briefer and we were unable to secure the same data on our own account. From the slight information which I have, my general judgment is that the grain yield will be somewhat less than some of the estimates which I have seen. My chief business this year was to make new arrangements for the loaning of money and to increase the facilities of the company in this regard. There will be a considerable demand, part of it coming from those who have lost crops in whole or in part this year. The governments of the western provinces are loaning some money, but this element is not yet a large factor in the business, and very large sums are required. We think that the government plan is unwise, that this business might be left to the large companies which have been doing it in the past, and we anticipate that under any circumstances the large life insurance companies will continue in this field.

"The life insurance department of our business is naturally very heavy. It is greatly in excess of all our expectations, and it is a question with us whether we ought to accept all the business which is offering. What is true of the Confederation Life in this regard is, of course, true of all the companies. There is an enormously increased demand for insurance, due to several causes. One of these is the war, and one the 'flu' of last year. Another is the advance in the public understanding of the value of life insurance and the improvement in the policies which the companies are offering to the public. All of these factors have led to a most surprising gain in the placing of policies with the public this year."

MONTHLY BANK CLEARINGS

The following are the bank clearings for the month of September, 1919, compared with September, 1918:—

	Sept., 1919.	Sept., 1918.		Changes.
Montreal	$498,925,811	$ 388,004,868	+	$110,920,943
Toronto	358,890,250	260,979,193	+	97,911,057

BANK BRANCH NOTES

New Branches Opened and Personal Changes in Branches Throughout Canada—Royal Bank Expands in South America

The following is a list of branches of Canadian banks recently opened:—

Windsor, Ont.	Home Bank of Canada
North Edmonton, Alta.	Union Bank of Canada
Rimbey, Alta.	Union Bank of Canada
Redland, Alta.	Union Bank of Canada
Blenheim, Ont.	Union Bank of Canada
Eskbank, Sask.	Bank of Hamilton
*Esquimalt, B.C. (Victoria)	Canadian Bank of Commerce
Balcarres, Sask	Bank of Montreal
Williams Lake, B.C.	Bank of Montreal
Toronto, Ont. (Bloor & Spadina)	Bank of Montreal
Lumby, B.C.	Royal Bank of Canada

---

*Sub-agency.

The sub-branch of the Union Bank of Canada at Caledon, Ont., has been made an independent branch.

The Molsons Bank has received a permit to construct a bank building at Talbot and Flora Streets, St. Thomas, Ont.

Some time next week the Bank of Hamilton will open a branch in Winnipeg, Man., to be known as the "Portage and Carleton Branch."

The Dominion Bank is erecting a new branch at the corner of Hayden and Yonge Streets, Toronto. Work was commenced on the building a few years ago, but was stopped, war conditions presumed to be the cause, and a temporary branch was opened a few doors from the post office on Yonge and Charles Streets.

The property at the corner of Church and Queen Streets, Toronto, owned by Mr. B. Cairns, has been purchased by the Bank of Nova Scotia. The price is said to be about $100,000.

The Royal Bank of Canada has announced the opening of a branch at Port-au-Prince, Haiti. A branch has also been opened at Rio de Janeiro, Brazil, under the management of Mr. G. V. Long, formerly manager at San José, Costa Rica.

Relative to the establishment of a branch in Rio de Janeiro, Brazil, the Royal Bank announces that arrangements to open branches at Sao Paulo and Santos, Brazil, Buenos Aires, Argentine and Montevideo, Uruguay, are nearing completion, and are expected to open for business at these points within a few weeks.

Mr. C. C. Pineo, who was formerly manager of the bank in Havana, Cuba, and who, for the past four years occupied an important banking position in Brazil, has been appointed supervisor of branches in Brazil, Argentine and Uruguay, with headquarters at 68 William Street, New York. Mr. Pineo is at present in Rio de Janeiro, and will remain in South America for some months.

Mr. Joseph Anderson has been appointed eastern inspector of the Union Bank of Canada, with office in Toronto. He succeeds Mr. G. M. Upham, who, owing to ill-health, has asked for six months' leave. The following other appointments have been announced by the Union Bank:—

Mr. W. G. Thompson, recently returned from overseas, has been appointed manager of the newly opened branch at Blenheim, Ont.

The sub-branch of the Union Bank of Canada at Caledon, Ont., which has been under the Erin branch, became a separate branch this week with Mr. G. B. Clark, of Dundalk, as manager.

The newly opened branch at Redland, Alta., will be managed by Mr. H. H. McKinnon.

Mr. D. Dewar, manager at Englehart, Ont., has been transferred to Kinburn, Ont., as manager and Mr. J. J. Gallagher, Westport, Ont., promoted to Englehart.

Mr. J. N. Neilson, recently returned from military service, has been appointed acting manager at Westport, Ont.

Mr. C. A. Farrell, Stirling, Ont., has been appointed acting manager at Dundalk, Ont.

Mr. D. M. McGregor, Thornton, Ont., has been appointed manager at Wheatley, Ont., consequent upon the transfer of F. E. Page, to New Dundee, as manager.

Mr. L. E. McLellan, at present accountant of the Royal Bank of Canada in Sydney, N.S., will be manager of the new branch of the bank which will be opened shortly at the corner of George and Townsend Streets, Sydney, N.S.

Mr. Clarence R. Rhind has been appointed manager of the Royal Bank of Canada at Stewiacke, N.S., in succession to T. R. Hannington, who has been transferred to the St. John, N.B., office.

The Bank of Montreal announces the following staff changes:—

Balcarres, Sask., R. Bray, manager at Punnichy, appointed manager at Balcarres; Dauphin, Man., G. H. Crimes, appointed acting manager; Ituna, Sask., F. A. Pain, appointed acting manager; Kimberley, B.C., R. St. A. Shaw, appointed acting manager; Langley Prairie, B.C.; J. McD. Reid, appointed acting manager; Port Alberni, B.C., V. C. Brimacombe, appointed acting manager; Punnichy, Sask., S. Crabtree, appointed acting manager; Bloor Street and Spadina Avenue, Toronto, F. E. Fisher, manager at Tweed, appointed manager; Tweed, Ont., A. Yule, manager at Cainsville, appointed manager.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended October 9, 1919, compared with the corresponding week last year:—

	Week ended Oct., 9, '19.	Week ended Oct. 10, '18.		Changes.
Montreal	$143,282,538	$120,760,193	+	$22,522,345
Toronto	91,147,107	74,239,847	+	16,907,260
Winnipeg	64,606,018	61,728,371	+	2,877,647
Vancouver	14,738,459	11,397,564	+	3,340,895

Sherbrooke	1,039,676	702,730	+	336,946
Kitchener	1,185,231	807,735	+	377,496
Windsor	2,431,654	1,206,053	+	1,225,601
Totals	$388,566,588	$329,672.698	+	$58,893,890

Bank clearings for the week ended October 2, 1919, for Windsor, Ont., were $2,514,099, an increase of $1,533,799. Quebec reported clearings as $5,391,071, an increase of $450,204, and Fort William $999,466, an increase of $41,166.

LATEST CROP REPORTS ARE GOOD

Threshing has been completed in many parts of the west, says a wire from our Winnipeg correspondent, and the yields are frequently better than was anticipated. Good weather during the past week has made rapid progress in harvesting possible, and has also helped such late crops as are still in the ground.

AMERICAN BANKERS' ASSOCIATION CONVENTION

Praise for Federal Reserve System—Amortization Principle Approved—Membership has Increased Rapidly

THE 15th annual convention of the American Bankers' Association was held in St. Louis, Mo., September 29th, to October 2nd, 1919, with about 4,000 bankers in attendance. The annual sessions of the different sections of the association (National, State, Savings Bank and Trust Co.) were held at the same time. In his presidential address, Robert F. Maddox said in part:—

"In meeting the uncertain war conditions and the sudden expansion of business during the past few years, the Federal reserve banks have proved a splendid and even a surprising success, for they have demonstrated that our present banking system is the superior of any in the world. We shudder to think what might have happened if we had entered the war under the old régime of banking and are grateful to those who devised and co-operated in passing the measure and are under many obligations to the members of the Federal Reserve Board and the officers of the Federal reserve banks, who have so wisely directed their operations.

"The statement of the Federal reserve banks on September 5 showed that out of 2,200 millions of bills receivable, 1,635 million were secured by government war obligations, thus demonstrating their great value to the government in assisting the member banks to carry loans secured by war obligations, without retarding their commercial transactions. It is expected that in a reasonable time, these loans now carried by the banks of the country for their customers who subscribed for war obligations, will be paid, but considering the fact that out of government obligations now outstanding of approximately twenty-five billion dollars, the comparatively small amount of notes discounted by the Federal reserve banks, secured by these obligations, is very gratifying.

"When we consider that the cost of the war to the United States from April 6, 1917, to June 30, 1919, was 30,167 million dollars, and that we only issued 21,475 million dollars of bonds to meet this expenditure, relying upon taxes to make up the difference, a large part of which has already been paid; and that we now hold the obligations of our allies for approximately ten billion dollars, which in time will be paid; it would seem that, considering the magnitude of our engagements, the war has been most wisely financed and the burden of future government requirements can be easily borne.

"On June 30, 1914, the deposits of all the banks of this country were about twenty-one billion dollars. The deposits of the national banks on June 30, 1919, were approximately sixteen billion dollars and while the deposits of the state banks are not obtainable at this time, estimating their increase in the same proportion as that of the national banks, it is safe to assume that their deposits are now approximately eighteen billion of dollars, making a total for all banks of thirty-three billion dollars, or an increase for the war period of about twelve billion dollars. Our circulation has risen from 3,478 millions on September 1, 1914,, to 5,743 millions on September 1, 1919, or an increase of 2,265 million, more than $20 per capita. With bank deposits during the war period increasing 57 per cent., and our circulation increasing 65 per cent., it is not surprising that the Bureau of Labor at Washington has estimated the increased living cost at 70 per cent. That the peak of high prices has been passed seems to be indicated by Bradstreet and Dun's reports showing that their index number of commodity prices declined from August 1 to September 1.

"Our membership at the close of our fiscal year, September 1, was 20,214, the largest in our history and showing a net gain for the year of 1,171. In this connection it is interesting to note that in the past five years since the European war began, our membership has increased 5,502. We now have more than five-sevenths of all the banks in the country, and I believe that in a short time practically every bank in the United States will realize the value of membership and will co-operate with us in making our fraternity a still greater factor in the progress and development of our country.

"Our financial affairs are in excellent condition, as will be seen by the treasurer's report. The work of the various sections of our association, including the National Bank, Savings, State Bank, Trust companies, State secretaries and clearing house sections, having been especially satisfactory during the past year, as will be seen by the reports of their officers. The State Bank section, the youngest section, has now the largest membership and is proving of much value to its members.

"The American Institute of Banking has enjoyed a splendid year and the work of broadening its influence among the young bank men has been carried forward with great success by its present officers. This department is of great value in educating young bankers for the important work of the future and deserves our cordial and continued support. The "Bulletin," which is published by this section quarterly, is very interesting and is proving to be one of our most important publications."

Loans on the Amortization Plan

The bankers of the United States can do all that it is possible for the government itself to do in relieving the heavy shortage of dwellings and of small improved farms, was the conclusion arrived at by R. Ingalls, director of research in the Bankers' Statistics Corporation of New York, in addressing the meeting of the Savings Bank section. Speaking on the subject of "Amortization from the Economic Standpoint," Mr. Ingalls defined amortization as:—

"The gradual reduction of a loan by periodic and equal payments that include both interest and part of the principal. The advantages to the lenders are that it offsets depreciation of property values, constantly widens the margin of security, and permits a gain by compounding interest on money invested. The advantages to the borrower are that it enforces thrift, makes savings available for extinguishing debts, and renders foreclosure improbable. In one method of amortization the repayments, are, as soon as they are received, applied to reduce the borrower's loan. In another method the repayments are placed in a sinking fund; and when the borrower's account in this equals the loan, his debt is cancelled."

Mr. Ingalls compared the adequacy and efficiency of a private banking system operating on the amortization plan, with the various plans for having the government engage in banking operations. He said: "The constitution of nearly every state has a clause restricting to public and general uses any funds raised by taxation or upon the state's credit. These clauses were inserted as the result of the extravagance, favoritism and failures of public banks and subsidized development, colonization, canal and railway projects in the early part of the past century. The Federal constitution has a similar clause. Nevertheless, taxing and appropriation powers are now being exercised again to give special favors to sections, localities and classes. Furthermore, the nationalization of banking and of the land—the socialists' first aim—has made remarkable headway."

The Canadian banks were represented at the convention by the following delegates: Oliver A. Harper, manager, Sterling Bank of Canada, Winnipeg; P. C. Harrison, foreign department manager, Bank of Montreal; Baptist L. Johnstone, foreign department, Dominion Bank, Toronto; S. H. Logan, supervisor foreign department, the Canadian Bank of Commerce, Toronto; E. L. Stewart Patterson, superintendent, Canadian Bank of Commerce, Sherbrooke; C. W. Rowley, manager, Canadian Bank of Commerce, Winnipeg; J. W. Ruggles, department manager, Standard Bank of Canada, Toronto; W. W. Watson, secretary, Bank of Nova Scotia, Toronto.

In a petition designed to bring into the assets of the estate of Alvo von Alvensleben, Ltd., a certain piece of property in Alberta, R. Kerr Houlgate, liquidator of that famous company, informs the court that the company has liabilities of over $3,000,000, and assets on which he expects to realize no more than approximately $20,000. Alvensleben was the reputed representative of the Kaiser in British Columbia. He lost between seven and ten million dollars in investments in this province.

LAKE OF THE WOODS MILLING COMPANY

Report Shows Excellent Year

Brig.-Gen. Meighen Once More in Chair

Montreal, October 10.—At the Annual Meeting of the Lake of the Woods Milling Co., Limited, held in the Head Office of the Company at Montreal, on Wednesday, October 1st, an excellent report was presented to the shareholders.

It showed a total revenue for the year of $756,616.40, derived from the following:—

Milling profits	$547,152.79
Profits from sources other than milling proper,—including dividend from Sunset Manufacturing Company, Limited, (the subsidiary Company)	209,453.61
This amount ($756,616.40) has been apportioned as follows:—	
Interest on Company's Bonds	54,000.00
Dividend of 7% on $1,500,000.00 Preferred Shares	105,000.00
Dividend of 10% on $2,100,000.00 Common Stock	210,000.00
Bonus Dividend on Common Stock	42,000.00
Additional Dividend 2% on Common Stock (from Sunset Manufacturing Co., Limited)	42,000.00
Written off Property and Goodwill Accounts	100,000.00
	$553,000.00

The balance, amounting to $203,616.40 was carried to Surplus Account. The bonds of the Company, maturing in 1923, the Directors applied $200,000.00 to the Bond Redemption account. After providing for this and adding the surplus carried forward this year, the Surplus Account stands at $982,414.30.

Brig.-Gen. F. S. Meighen, President of the Company, occupied the chair again after his five-year absence on Military Service Overseas.

STABILIZING THE DOLLAR

An Address Before the Forty-Fifth Convention of the American Bankers' Association, St. Louis,

By Dr. Irving Fisher

It is a curious fact that bankers, just because they deal deal primarily in money, are often less interested in the fluctuations in the purchasing power of money than are ordinary merchants who daily watch the course of prices. Some banks have in past times too often dealt recklessly in their commodity, money, with little realization of the disastrous effects they thus produce on the price level and on business conditions. But to-day, more than ever before, bankers recognize that they perform a public function. No class of business men has tried more conscientiously during the war to render patriotic service; and few, if any, other classes in civil life have played a more indispensable part in winning the war.

Now that the war is over, the banker sees before him new fields of public usefulness. Besides shouldering a large part of the responsibility for financing the gigantic task of reconstruction throughout the world, he has another great task—namely, to help reconstruct the banking and monetary systems of the world. I wish to speak of one fundamental but neglected part of this great task. This is the problem of curing the instability of money so signally illustrated during the war. It is coming to be recognized that this problem of unstable money lies at the bottom of the problem of the high cost of living.

For many years the Bank of England, by regulating its discount rates and so controlling the volume of credit has, as Lord Cunliffe's committee recently noted, kept the price level of England in tune with the price levels of other countries. The time has now come when the price level of the world itself should be controlled.

The Advance in Prices

The war has thrust this problem upon us. The index number of wholesale prices of our Bureau of Labor Statistics rose 106 per cent. between 1914 before the war and November, 1918, the month of the armistice. In the same time the index number of the London Statist rose 122 per cent. Retail prices of food rose in the United States in the same period 79 per cent., in England 133 per cent., and in France approximately 140 per cent. It is fair to say that the war doubled prices in the United States and Canada and more than trebled them in western Europe, while in Russia it multiplied them by ten or twenty. The price level of the United States is now three-fold the level of 1896. Expressing the same fact in terms of the purchasing power of money, our dollar of to-day is worth only about thirty-five cents of the money of 1896. In modern slang, we may say almost literally that, as compared with the biggest dollar we ever had, our present dollar "looks like thirty cents."

We cannot get far in explaining this great rise in the price level and fall in the purchasing power of the dollar if we seek the explanation in the directions where it is usually sought. Profiteering is an effect rather than a cause of rising prices, while scarcity of goods cannot in this country be alleged as an important factor. For solving the riddle, we must look at the other side of the price equation—the money side. There is much significant evidence to point in that direction. We find that the great price movements correspond to monetary standards. Thus prices in all gold standard countries move alike and prices in all silver standard countries move alike, while there is a great contrast between the gold and silver countries in their price movements.

Again, we find that the ups and downs of prices correspond roughly to the ups and downs of the money supply. In August, 1915, the gold supply of our country began to increase rapidly, on account of the importation of bullion in payment for war supplies. One month later prices began to shoot upward. In February, 1916, money suddenly and temporarily stopped increasing, and there followed a corresponding jog in the course of prices. Following our entry into the war, the credit structure based on this gold also increased far faster than the customary rate, and faster than would have been necessary for *normal* business.

How Inflation has Come About

War finance is a prolific source of monetary and credit expansion. The war has exemplified this in many forms. Russia indulged in the simple crass inflation of paying government bills by printing irredeemable paper. Before the Bolshevist régime the Russian government printing presses turned out, according to reports, a million roubles an hour, day in and day out for over a year at a stretch. Under Bolshevism the output has been even greater, a total of eighty billion dollars in nominal value having been issued, which is more than the money of all the rest of the world put together.

Germany allowed the people, when a new loan was asked, to deposit the bonds of the previous loans at certain banks which were authorized to issue paper money to the depositor who then lent this paper money to the government. In the United States, Liberty bonds were likewise used as collateral at banks which, in turn, deposited them with Federal Reserve banks and received their notes.

War finance also brought us still another kind of inflation, the most modern and approved, due not to the increase of money proper but to the increased volume of bank deposits subject to cheque. Banks subscribed to Liberty loans simply by writing deposits on their books to the credit of the government, and individuals lent to the government by borrowing of the banks, the sums so borrowed being likewise created by the banks as deposits on their books.

All these methods of war finance may be defended on the plea of necessity, but they are inflation none the less, even when gold redemption has been maintained, and they therefore tend to add to the cost of living. As Dr. Miller, of the Federal Reserve Board, has said: "Inflation is no less inflation when gilded with gold." On the whole, the money in circulation in the United States rose from three and one-third billions in 1913 to five-and-a-half billions in 1918, and bank deposits from thirteen to twenty-five billions, both approximately corresponding to the rise in prices.

Taking a worldwide view, the money in circulation in the world outside of Russia has increased during the war from fifteen billions to forty-five billions and the bank deposits in fifteen principal countries from twenty-seven billions to seventy-five billions. That is, both money and deposits have trebled; and prices, on the average, have perhaps trebled also. The increase of over thirty billions in the money of the world (outside of Russia) is as Mr. O. P. Austin, statistician of the National City Bank, says, "more in its face value than all the gold and all the silver turned out by all the mines of all the world in 427 years since the discovery of America."

The secret of the high prices then lies not so much in scarcity of goods or profiteering in trade or in the other conditions usually supposed, as in our money and banking conditions. The great cause lies in the fact that the *world's war debts have been pulverized into circulating media.* This first occurred in Europe, but we in America felt its reflex long before we entered the war. The European inflation sent their gold to us in payment for war supplies. The billion dollars of new gold imported into the United States between August, 1915, and our entry into the war gave our price level its great war-time boost. That billion of gold and our twenty-two billions of Liberty loans after we entered the war explain more than nine-tenths of our high cost of living to-day. This rise of prices has hurt those with "fixed" incomes and helped those who take what is left —the so-called "profiteers." In spite of the general impression to the contrary, wages have not, *on the average,* kept up with the soaring cost of living.

Both the danger of incurring inflation and its evils are bound up with the fact that the public generally is ignorant and indifferent on the subject. The sound banker and the economist have always to fight against inflationistic fallacies and proposals. The average man persists in thinking that "a dollar is a dollar." As he cannot imagine having too

OUR CHARGES

Our charges for the management of an estate are no more and often less than those of a private executor. They are fixed by the Surrogate Court Judge when he audits the estate accounts. The amount which he allows, as the Order of the Court reads, is "a fair and reasonable allowance for our care, pains, trouble, and time and personal disbursements expended in and about the administering, arranging and settling the affairs of the said estate."

much money himself, he cannot imagine a country having too much money. He little dreams that his present difficulties with the high cost of living are due primarily to too much money and substitutes for money, or credits.

In the combination of irritation over high prices and ignorance of their *true* cause, we find the real danger in our present situation. Ignorant radicalism is using high prices as a lever for attacking our economic system. The incessant strikes and the difficulties of the railroads and other public utilities, two outstanding features of the papers every day, are not yet understood as due to inflation and the shrinking purchasing power of the dollar. This all points to the need for reaching a scientific solution of the problem before reckless radicalism has any further excuse for sweeping the country with some hastily conceived remedy such as would only leave things worse than they are.

When we were suffering from the opposite aberration of our unruly dollar, i.e., when we went through the drastic fall of prices, beginning with the close of the Civil War and ending in 1896, the evils of depression in trade, bankruptcies, and unemployment, very nearly led the country to adopt the desperate remedy of Mr. Bryan, a remedy which would have been worse than the disease. The radicalism of those days, expressed in "populisn," died out soon after prices stopped falling. The present radicalism will die out soon after prices stop rising. If only we could put a stop once and for all to these great swings of prices in either direction, we would escape a vast amount of social discontent which price movements always breed. To secure this result we need a stable price level, and to secure a stable price level we must stabilize the dollar, the aberrations of which disturb the price level.

Weight Can be Varied

Our present dollar is constant in weight. No matter what influx of gold may take place, or how much the value (purchasing power of gold is lessened by the increase of its paper and credit substitutes, the government must pay the same nominal price for it. In other words, fluctuations in the price of gold can not show themselves in the altered price of gold. They are, therefore, reflected in the prices of other things. Let us, therefore, vary the price of gold. In other words, let us *vary the weight of the dollar*, weighting it when the index number of prices is too high, and lightening it when the index number of prices is too low. This can easily be managed if we have gold circulate by means of paper representatives, redeemable in whatever amount of gold bullion may be, at that date, the dollar.

In this way, any change in the price level is always in process of being corrected, the gold bullion dollar is always being approximated to a constant purchasing power (i.e., a constant price level), the circulating dollar certificates are redeemable and hence equal in purchasing power to this amount of gold, and finally the credit structure (assuming a sound banking system) is also kept from fluctuating by its relation to this stabilized dollar.

As to the bankers' reserves, these would all be kept not in gold but in gold certificates redeemable at the sub-treasuries in gold bullion of whatever weight per dollar should be declared at any time. Thus the banker would not be concerned with fluctuations in the price of gold, but the government would assume this responsibility—as it should under our constitution provision to "regulate the value of money."

This question of the government gold reserve, and many other questions which will arise in every banker's mind, are discussed in my forthcoming book, "Stabilizing the Dollar." Suffice it to say that the plan has for several years run the gauntlet of questions and criticisms among economists and has now their almost unanimous support. It has also been studied carefully and approved by such bankers as Frank A. Vanderlip, formerly president of the National City Bank of New York, and John Perrin, Federal reserve agent of the Pacific Coast. It has been endorsed by numerous other bankers, business men, and business organizations such as the Bridgeport Chamber of Commerce and the New England Purchasing Agents' Association. A resolution has been introduced into Congress to investigate the subject. Before many more months are past it will, I believe, be an issue before the country which cannot be escaped.

BALANCE OF 1918 GRAIN CROP

The Dominion Bureau of Statistics reports that the following quantities of wheat, barley, oats, rye and flaxseed are estimated as being in stock in Canada on August 30th, 1919, these quantities representing the "carry over" into the crop year beginning on September 1st, 1919, and ending on August 31st, 1920. The figures placed within brackets represent the quantities in stock on the corresponding date of last year, viz., August 31st, 1918: Wheat, 5,454,000 bushels (3,983,000); barley, 3,345,000 bushels (1,453,000); oats, 19,280,000 bushels (14,969,000); rye, 159,000 bushels; flaxseed, 53,000 bushels.

Of the quantities of wheat in store on August 30th, 1919, 2,149,000 bushels are estimated as being in farmers' hands, 434,000 bushels in terminal elevators, 2,109,000 bushels in public elevators in the east, and 762,000 bushels in country elevators in the west. Of barley the total of 3,345,000 bushels include 1,437,000 bushels in farmers' hands, 245,000 bushels in termnial elevators, 1,388,000 bushels in public elevators, and 275,000 bushels in country elevators. The total quantities of oats include 16,137,000 bushels in farmers hands, 1,371,000 bushels in terminal elevators, 1,037,000 bushels in public elevators, and 735,000 bushels in country elevators. Of rye, 152,000 bushels were in terminal and 7,000 bushels in country elevators, and of flaxseed 38,000 bushels were in terminal and 15,000 bushels were in country elevators. The totals given are under rather than over the actual quantities, because account is not taken of grain in transit, of grain in country elevators, from which returns were not received, of grain in flour mills and of grain in retail hands.

EMPLOYMENT CONDITIONS IN CANADA

Reports from employers to the Dominion headquarters of the Employment Service of Canada, Department of Labor, indicate that, apart from unemployment due to strikes there was a further substantial increase in the volume of employment during the week ending September 20th. The returns show that 4,313 firms reported to the Employment Service of Canada, of which 324 were in the maritime provinces, 1,972 in Ontario, 988 in Quebec, 603 in the prairie provinces and 426 in British Columbia. These firms reported a payroll of 636,305 persons during the week ending September 20th as compared with a pay-roll of 632,551 during the week ending September 13th, an increase of 3,755 persons, or .6 per cent. An increase of 2,102 persons, or .3 per cent. was anticipated for the week ending September 27th.

Reports for the week ending September 13th showed that 4,050 firms with 594,605 persons on pay-roll reported to the Service, which firms showed an increase of 3,100 persons, or .5 per cent. These firms anticipated an increase of .5 per cent. during the week ending September 20th, which the actual figures for the week show to have been more than realized.

The plus industries—those that registered net increases in the number of persons employed, with their respective percentage increases, were:—Building and construction, 3.1 per cent.; commercial and mercantile, .3 per cent.; clay, glass and stone, .5 per cent.; chemicals, 1.6 per cent.; leather and leather products, .5 per cent.; metals, .5 per cent.; pulp, paper and printing, .5 per cent.; textiles, .5 per cent.; vehicles, .3 per cent.; woodworking, .1 per cent.; quarrying and mining, 2.7 per cent.; railway construction, .7 per cent., and railway operation, .2 per cent. Food, drink, and tobacco registered very little change. Quarrying and mining with an actual increase of 984 persons, made the greatest gain, while metals, textiles and building and construction made substantial numerical increases as well. With the exception of vehicles and food, drink and tobacco all groups anticipated further increases to their staffs during the week ending September 27th. Vehicles anticipated a decrease of .4 per cent.

The only minus groups—those that registered net decreases in the number of persons employed—during the week ending September 20th, with their percentage decreases, were: lumbering, .6 per cent., and miscellaneous, .7 per cent.

COMMISSION OR CITY MANAGER GOVERNMENT

Some of Efficiency and Permanence of Private Management May be Gained by Municipalities in This Way

A PAMPHLET just issued by the Bureau of Municipal Research, Toronto, discusses the administration of a city's affairs by a commission-manager or city manager. It says in part:—

"Although commission government must have been considered an improvement on the mayor-council type, inasmuch as no cities which adopted it ever reverted to the old method, yet it did not altogether bring the success expected. Many began to ask why, if this form was supposed to be analagous to a business organization, it did not place all the administration under one manager, with the commission or council in the position of the directors, elected by the people or shareholders. This scheme was tried in Staunton, Virginia, in 1908, and later in Lockport, N.Y., but had its first real trial in Dayton, Ohio, where it was adopted in 1913. It became known as the commission-manager or city-manager government and made great headway, being adopted by many cities previously operating under commission government, as well as many additional cities in the United States and Canada.

What the Comimssion-Manager Plan Is

"There is a single elective board, called a commission or council, representative, supervisory and legislative in function.

"(a) The members of the commission or council, ordinarily five in number, are usually elected at large, although they may also be chosen by wards. They give only part time to municipal work, receiving nominal salaries or none.

"(b) The term of office of the commissioners is, in the majority of cases, two years, although frequently provision is made for overlapping tenure, thus ensuring continuity.

"(c) The mayor is a member of the commission. He acts as chairman and is the official head of the city. He is usually elected to the office but, in some cases, the commissioner receiving the highest number of votes receives the office.

"There is a chief executive officer or city manager. He is appointed by the council or commission and holds office at their pleasure. This manager appoints and controls the remaining city employees, except such officials as the city clerk and city auditor, and is the responsible head of municipal administrative activities. Civil service provisions are usually made part of the city charter.

"(a) The city manager need not be a local resident, but should be selected on account of his peculiar fitness and ability to manage the affairs of the city. His salary is determined by the commission or council.

"(b) The departments of the city clerk and city auditor usually remain under direct control of the commission or council. The school board is also a separate organization elected by the people.

Advantages of the Commission-Manager Plan

"1. It creates a single-headed administrative establishment and thus permits expertness in administration in tho point where it is most valuable, i.e., the head.

"2. It permits comparative permanence in the office of chief executive.

"3. It abandons all attempt to choose administrators by popular election.

"4. It fixes absolute responsibility for every administrative act.

"5. It ensures team work among all departments.

"6. It makes possible effective co-operation between the civic government and all civic and philanthropic agencies.

Limitations of the Plan

"1. As all the administrative power is concentrated in the hands of one man, he could be used as a perfect "tool" for any "machine" or faction if it dominated the commission or council.

"2. Until the profession of city-manager becomes a universally recognized field of expert endeavor, there will be great difficulty in finding men of sufficient calibre and training to fill such positions for large cities.

"3. Large cities require strong heads for each department. It might be difficult to get satisfactory administrative heads willing to work under one manager unless much larger salaries were paid than could be obtained in the present state of public opinion."

FIRM TO RE-ESTABLISH BUSINESS

Business Builders, Limited, is the name of a new firm of financial advisors in Winnipeg. The new concern will make investigations, pay special attention to company organization and re-organization, and in the case of worthy propositions will undertake to secure capital and place the business on a sound basis. There is no doubt that many a good business goes under for lack of proper understanding or knowledge of where to turn, to seek advice and help. J. D. Reid, C.A., late of Henderson, Reid & Co., chartered accountants, is president; D. Cooper, C.A., of the Dominion School of Accountancy, is vice-president; and H. E. Swift, barrister, is secretary-treasurer. The company will also make appraisals, give expert advice on taxable profits, on business problems or investments, compile business facts and statistics for executives, etc.

THE SOLVENCY OF THE ALLIES

The Guarantee Trust Company of New York has issued a very instructive booklet dealing with the financial position of Great Britain, France, Belgium and Italy. The gross debt of the United Kingdom on March 31st, 1919, is stated to be $36,746,650,056, of which sum only $6,569,100,000 represented external obligations. While advances to allies and Dominions amounted to $8,580,000,000. The normal budget of the British government will be $3,700,000,000, of which the debt service including amortization of ½%, will constitute about 52%..

The debt of France in March, 1919, was approximately $34,908,000,000. About $1,388,600,000 has been advanced to allies. Paper money in circulation ,on June 5th, amounted to $6,628,905,000, which was backed by a gold reserve of 14.7% of the face value of the notes.

Belgium has a debt of approximately $2,000,000,000 exclusive of war loans from the United States and allies. Italy's debt on March 31st was $13,079,918,807, of which about three-quarters was internal.

ACCIDENT COMPANIES CONTEST CLAIM

Companies which carried accident policies on the life of the late John Lennox, who died in Hamilton, Ont., some weeks ago, will contest the claim. A jury which has been investigating his death, has just returned a verdict of accidental death through drowning. The companies, which are represented by Gideon Grant, will claim that he was stricken with apoplexy.

The late Mr. Lennox, who was a Hamilton wholesale merchant, carried insurance totalling $334,000, as follows:—Canada Life, $15,000; Federal Life, $10,000; Mutual Life (New York), $77,000; Mutual Life of Canada, $25,000; North American Life, $15,000; Sun Life, $47,000; Aetna Life, $10,000; Excelsior Life, $5,000; Imperial Life, $10,000; C.O.F., $1,000; I.O.F., $2,000; New York Life, $10,000; Employees Liability, $27,000; Dominion of Canada Guarantee and Accident, $15,000; Canadian Accident, $5,000; Imperial Guarantee and Accident, $7,000; North American Accident, $10,000; Law Union and Rock, $10,000; Travellers, $13,000; Fidelity and Casualty, $20,000.

Your Country's "Promise to Pay"

WHEN you buy Victory Bonds you hold Canada's solemn promise to repay you their full face value in money at the time stipulated in the bond with interest every six months.

THEREFORE, in point of security, Canada's Victory Bonds are in the first rank of the world's investments because—

—the principal and interest are as certain of payment as anything can be—backed by the whole assets of Canada—the pledge of honour of Her people—and all the assets of all the people of Canada.

—Victory Bonds are also the most "liquid" form of investment. Without trouble or delay they can be converted into cash at any time.

—Victory Bonds pay a good rate of interest—more than any other investment having equal security—nearly twice the interest paid by Savings Banks.

* * * *

FOR the investment of estate funds, trust funds, sinking funds and all other money which by law or other necessity must be placed only in unquestioned securities, Canada's Victory Bonds are the premier investment.

* * * *

EXECUTORS, trustees, municipalities, public service corporations, officers of lodges and fraternal societies, and all others with trust funds to invest, can further their own and their country's interest by investing their funds in Victory Bonds.

* * * *

AND because of the good rate of interest which Victory Bonds pay, together with the supreme security behind them, there is every reason to believe that Canada's Victory Bonds, 1919, will increase in value in the open market, as have Victory Bonds of all previous issues.

* * * *

BUT Victory Bonds, 1919, are much more than a sound money investment. They are vital to the continued prosperity of the country. The proceeds of the Victory Loan, 1919, will furnish the means of retaining our great export business, by bringing to Canada foreign orders for agricultural and industrial products, which mean the continued prosperity of every citizen. The Victory Loan, 1919, will also enable Canada to carry out her necessary plans of demobilization—fulfill her pledges to her fighting forces—and to readjust the country from War to Peace conditions.

IN HIS PERSONAL INTEREST—

—to obtain an investment of unrivalled security
—to secure an investment yielding a high interest return

AGAIN IN HIS OWN INTEREST AND THAT OF CANADA—

—to ensure the continued prosperity of the nation
—to enable Canada to discharge her duty to her soldiers
—in order to finance Canada's period of readjustment from War to Peace

EVERY CANADIAN WILL SUPPORT TO THE UTMOST THE

Victory Loan 1919

"Every dollar spent in Canada"

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

IMPORTANT ROLE OF THE BANK MANAGER

His Work Not Confined to Directly Creating Business, But Should Aim at Stability and Sound Thinking

ANOTHER bank publication, the "Union Bank of Canada Monthly," has just made its appearance. It will be distributed among the branches and employees of the bank. In the first issue the individual Canadian banker's relation to the country's business problems in the present era of reconstruction is forcibly driven home in a plea for community and national service by F. W. S. Crispo, assistant general manager. "We as bankers have exceptional opportunities for the rendering of community and national service," says Mr. Crispo. "And at no time in the history of our Dominion has it been more necessary that all classes should be united in working out the national problems which have come to us as a result of four years of abnormal conditions created by the war."

"It is obvious to a merely casual observe that there is a very deep feeling of unrest abroad. International exchanges are far from normal, political conditions are much disturbed and the economic situation is full of uncertainties. In the Dominion of Canada, where we are particularly concerned, there are many conflicting interests and the spirit of service and endeavor which was evident during the period of conflict seems to have been replaced very largely by a selfish demand for undue recognition of class interests without due regard for the rights of others.

"The branch bank managers in rural communities, more especially in western Canada, can do much to overcome the hostility which appears to exist by discussing in a sympathetic way with representatives of the agricultural organizations the quality of public service rendered by their banks, and by taking a personal interest in any movement for the good of the community. They can also, in an unobtrusive way, discuss our national problems, the relation of other necessary interests, and be helpful in developing a spirit of co-operation on an equitable basis. To the banker who comes in contact with manufacturers and large industrial corporations is given an opportunity of discussing the viewpoints of agriculture, labor and others, and endeavoring to bring about a better understanding. These are merely suggestions to illustrate the opportunities for useful service on broader lines than mere business for profit, and many others will no doubt present themselves.

"Bankers are trustees for the savings and idle money entrusted to their care by all classes. It is their function to employ the funds placed at their disposal—having due regard for safety—by rendering assistance to legitimate enterprises necessary for the life and welfare of the people—the whole people. They control the machinery by which the business of the country is conducted and in the performance of their duties acquire a more general knowledge of the operations and working conditions of the various interests than any other body of men. The time seems most opportune for us to take a larger view of our responsibilities and to be an important factor in bringing about a better understanding and in the development of a spirit of national co-operation.

"It is needless to point out to men who are in a more or less degree in touch with our national life that our problems can only be successfully met by unity of purpose in the best use of all our resources, and this can only be accomplished by the getting together of all interested parties and a frank discussion of their mutual interests. The practical working out of these problems must, of necessity, be left to those directly concerned, but in the creation of an atmosphere of mutual good will the bankers of Canada—more particularly the branch managers—can play a most important part."

On account of the interest payment, due November 1st, the transfer books of the 1918 Victory Loan are closed from October 1st to October 31st, inclusive. Bonds which are received for transfer after October 4th, will not be transferred until after the opening of the books.

The Solvency of the Allies

Great Britain — France
Belgium — Italy

THE RESOURCES and potential productive power of the principal European Allies as a basis for future credit are discussed in *The Solvency of the Allies*—a booklet which we have just issued.

This booklet, in considering the financial position of Great Britain, France, Belgium and Italy, takes account of their natural resources, economic possibilities and specific problems.

Investors, exporters, importers and others will find this booklet of especial interest, as it gives an estimate of the inherent economic strength of these countries in its bearing upon their credit position. The booklet is available at any of our offices.

Has Done Good Work

Ontario Temperance Act
A Great Benefit to Province

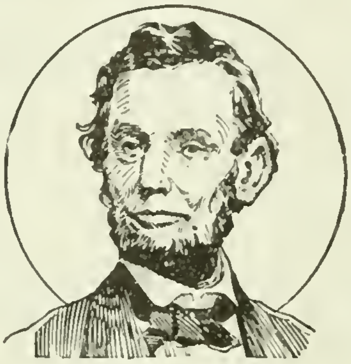
THE Ontario Temperance Act has reduced crime by over one-third and drunkenness in public has practically disappeared.

Alcoholic insanity has disappeared.

Gold cures and alcoholic institutes for treating alcoholism have been closed for lack of patients.

Ontario has been saved an annual drink bill of $36,000,000, enough to pay our share of interest on the War Debt.

Many victims of alcohol three years ago, thank God to-day for the Ontario Temperance Act.



Abraham Lincoln

"The Liquor traffic is a cancer in society, eating out the vitals and threatening destruction, and all attempts to regulate it will not only prove abortive but will aggravate the evil. It must be eradicated—not a root must be left behind."

To repeal the Ontario Temperance Act would be a calamity. The amendments would make it practically worthless. To every question on the Referendum vote NO.

Drink is a Cancer

Doctors, Alienists, Criminologists, Insurance Actuaries, Statesmen, Generals, Big Business Men, and Social Workers agree that alcohol as a beverage is a racial poison and a national curse.

British Columbia, Alberta, Saskatchewan, Manitoba, Quebec (excepting beer and wine), New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland have enacted prohibition.

The United States is permanently "dry."

France has abolished absinthe, Scotland has now a local option law, England is initiating a great campaign for temperance reform. The movement is world wide.

Ontario must go forward, or be left behind, but be careful

INSURANCE LIABILITY WHEN PROPERTY TRANSFERRED

Supreme Court of Ontario Rules that Failure to Have Consent of Company Where it is Required, Nullifies Liability

A RECENT appeal to the Supreme Court of Ontario concerned the liability of a company under a policy on property which had been transferred, without its consent, where such assent is required by the statutory conditions. This was the case of Staddon v. Liverpool-Manitoba Assurance Co., on appeal from Essex County Court. The facts, as reported in Dominion Law Reports, were as follows:—

By a policy of insurance, dated the 30th July, 1914, the defendant company insured one John Griffin, his heirs, executors or administrators, for three years, to the amount of $800, against loss or damage by fire on a frame dwelling situate on land owned by Griffin. After the issue of the policy, Griffin sold and conveyed the lands, including the building, in fee simple, to the Caskey-Kamer Realty Co., which reconveyed the same by mortgage to Griffin to secure payment of $850, part of the purchase-price. Thereafter the Caskey-Kamer Realty Co. sold and conveyed its equity of redemption in the lands to one Sova, and later Sova sold and conveyed the same to one Pulford. To none of these conveyances did the defendant company give its written permission. On October 27th, 1915, Griffin assigned to Pulford, the then owner of the equity of redemption, the policy of insurance and all benefits thereunder, by an assignment in writing endorsed on the policy and worded as follows:—

"For value received, I hereby transfer, assign, and set over unto Charles Pulford, of Sandwich West (the purchaser), all my right, title and interest in this policy of insurance and all benefits and advantages to be derived therefrom, with loss if any payable to me as my interest may appear.

"Witness my hand at Windsor, Ontario, this 27th day of October, 1915. John Griffin."

Beneath this assignment, the company, by its agent, consented to such assignment, by endorsement on the policy, in the following words:—

"The Liverpool-Manitoba Assurance Co. hereby consents to the above assignment, dated October 27th, 1915, by John Griffin, of Windsor, Ont., interest in this policy to Charles Pulford, present owner, subject nevertheless to all the terms and conditions herein contained, with loss if any payable to said John Griffin as his interest may appear.

"October 27th, 1915. P. Hangeld, manager."

Subsequently, Pulford conveyed the lands, subject to Griffin's mortgage, to Thomas and W. Affleck, and they conveyed the same to the plaintiff. The written consent of the defendant company was not given to either of the two last mentioned conveyances.

Third Statutory Condition

On October 12th, 1916, the building was totally destroyed by fire, and the plaintiff applied to the defendant company for payment of the loss, but the company refused payment, on the ground that the insured property had been assigned without the written consent of the company, and that therefore the policy had become void under the terms of the third statutory condition, which is as follows:—

"If the property insured is assigned without a written permission endorsed thereon by an agent of the company duty authorized for such purpose, the policy shall thereby become void; but this condition does not apply to change of title by succession or by the operation of the law, or by reason of death."

On the company's refusal to pay the insurance moneys, the plaintiff paid to Griffin the amount owing upon his mortgage, and obtained from him an assignment of his interest in the policy and in all moneys payable thereunder, and as all moneys payable thereunder, such assignee he now seeks to recover from the defendant company the sum of $800 mentioned in the policy.

In dismissing the appeal, Chief Justice Mulock said:—

"It is unnecessary to determine whether, in view of the consent given by the company to the assignment of the policy by Griffin to Pulford, the company's liability ceased upon the conveyance of the assured premises by Griffin to the Caskey-Kamer Realty Co. But for the subsequent assignment of the policy and the consent thereto of the company, the conveyance of the insured premises to the Caskey-Kamer Realty Co. terminated the insurance contract created by the policy. The view most favorable to the plaintiff is that the effect of the subsequent assignment of the policy and the company's consent thereto was to create an insurance contract with Pulford as the assured, with loss payable to Griffin as his interest might appear.

"With this as a starting point, the question is, what was the effect of the subsequent conveyance of the lands by Pulford to Thomas and W. Affleck subject to the mortgage to Griffin? By this conveyance Pulford denuded himself of all interest in the insured building. The company's contract was to the effect that the assured, to the extent of $800, should suffer no loss or damage, that is, the company would indemnify him in respect of loss or damage by fire to his building to the extent of $800. Having prior to the fire parted with all interest in the building, he suffered no loss or damage by its destruction, and therefore has no claim for indemnity, and is not entitled to maintain this action. Nor does the plaintiff stand in any better position than the assured. By the terms of the company's assent to the assignment of the policy to Pulford, with loss payable to Griffin, the latter became entitled simply to intercept for his own benefit moneys otherwise recoverable by Pulford; and, inasmuch as Pulford, having sustained no loss, cannot recover, neither can Griffin, whose title is derived from Pulford, nor can the plaintiff, whose title is derived from Griffin. For these reasons, I think this appeal should be dismissed with costs."

CHICAGO FINANCIAL INSTITUTIONS MERGE

On October 1st the earnings of the Illinois Trust & Savings Bank, the Merchants' Loan & Trust Company, and the Corn Exchange National Bank were pooled and the merger of these institutions became an accomplished fact so far as the common interests of the stockholders are concerned. Each bank retains its origin and identity for the time being pending completion of the details of the consolidation and erection of the new building which will be the home of the combined banks under the name of the North American Trust Company. The bank will be the second largest in Chicago, and have deposits of more than $300,000,000.

UNION INDEMNITY COMPANY

A declaration and charter to form a corporation to be known as the Norwich Union Indemnity Company has been approved by the Attorney General of the State of New York, and the company has secured offices at 45 John Street, New York City. It is intended that the capital stock of the company shall be $500,000 with a surplus of a like amount, making the initial funds $1,000,000. The company will transact personal accident, health, burglary, workmen's compensation, automobile, and other classes of business usually carried on by casualty insurance companies. While the management and control of the company will be independent, it is hoped that it will derive considerable support and benefit from the valuable and extensive connections throughout the United States of the Norwich Union Fire Insurance Society, Limited, of Norwich, England, with which it is closely associated.

It has been arranged that on the formation of the company being authorized, W. G. Falconer will act as president and general manager, and he has resigned his present position as assistant secretary of the Hartford Indemnity Company of Hartford, Conn., in order that he may commence his duties at the earliest possible moment.

SEPTEMBER BOND SALES

Very Little Permanent Financing, Owing to Imminence of Victory Loan—Advances From Banks Show Large Increase—One Provincial Issue

According to *The Monetary Times'* record, bond sales in September totalled $1,494,038, compared with $6,571,124 in August. The total last month is the lowest on record this year. The sale of Manitoba treasury notes to the amount of $750,000 was the only provincial issue on record, while no industrial bonds were floated at all. The municipal market was characterized by dullness, municipalities postponing or withdrawing their offerings until bond selling organizations were through with the coming domestic loan. Many offerings were made, but the majority of them were withdrawn, the only way of making a sale was through local investors, in the United States, or to insurance and other companies outside of the Bond Dealers' Association, the members of that organization being under promise to refuse all bond offerings and devote all their attention to the coming loan. A great number of money by-laws have been passed in readiness for after the loan. The following is the summary of bond sales in September:—

Provincial	$750,000
Municipal	744,038
Total	$1,494,038

Bank loans to municipalities for the month of August reached the highest level this year. Usually a decline is expected after midsummer when taxes begin to come in, but owing to the bond dealers' restriction on account of the coming loan, municipalities are obliged to borrow from the banks. The following table, compiled by *The Monetary Times*, shows bank loans to municipalities since January, 1916:—

	1916.	1917.	1918.	1919.
January	$32,015,371	$24,487,272	$40,015,466	$32,640,198
February	35,149,915	26,121,324	43,535,628	36,830,183
March	38,649,462	29,877,911	50,652,061	41,993,305
April	44,371,050	35,931,996	55,685,350	47,911,199
May	43,924,036	39,700,191	57,728,226	50,356,227
June	46,773,032	42,757,673	58,000,424	52,349,353
July	42,385,096	43,989,207	56,589,173	54,455,738
August	39,882,811	43,940,176	56,662,931	57,536,867
September	38,708,745	42,721,563	47,977,472	....
October	37,613,530	41,204,781	46,275,106	....
November	32,945,963	36,459,598	40,865,358	....
December	24,056,797	36,353,039	30,684,052	....

WILL INVESTIGATE STATES' INCOME TAX

Before a provincial income tax is adopted, it is the intention of the Manitoba government to carefully examine those in force in states across the border. On September 26th, Hon. Edward Brown, provincial treasurer, announced that Municipal Commissioner E. M. Wood and Winnipeg's assessment commissioner, L. W. Donnelly, would be sent to the United States for this purpose. Both are members of the Manitoba Assessment and Taxation Commission, which has just completed its sessions.

BRITISH COLUMBIA MUNICIPALITIES CONVENTION

The 16th annual convention of the Union of British Columbia Municipalities was held in North Vancouver, B.C., October 7th to 9th. The president of the Union is ex-reeve W. M. Fraser, of Burnaby; the vice-president, councillor J. Loutet, of North Vancouver District, and the secretary-treasurer, Mayor Gray, of New Westminster.

In addition to the usual business the following special addresses were on the program:—"Government of a Municipality by a Commissioner," by F. J. Gillespie; "Industrial Development of British Columbia," by D. B. Martyn, Industrial Commissioner for British Columbia; "The Hospital in its Relation to the Municipality," by Dr. M. T. MacEachern; "Government of a Municipality by Council and Manager," by J. J. Carment, city manager of Kamloops. The most important event of the convention, however, was the consideration of the draft of the new Municipal Act.

NEW ENGLISH RE-INSURANCE COMPANY

The Re-insurance Corporation, Ltd., has been organized in London, Eng., with a capital of £500,000. Applications were invited on August 13th, for 300,000 shares of £1 each, and applications for 4,000,000 shares received. Included on the board of directors are three directors of the Yorkshire Insurance Company, which will hold 120,000 of the 300,000 shares issued. The business of the Corporation will be reinsurance upon tariff lines. James Hamilton, general manager of the Yorkshire Insurance Company, and also a director of the Re-insurance Corporation, Ltd., has been in Canada during the past week, and is returning to England via. New York.

The "War Chariot," the last of the Imperial Munitions Board steamers to be built at Vancouver, was launched on September 24th.

SEPTEMBER FIRE LOSSES

Large Increase for the Month—Destructive Conflagration at Oromocto, N.B., Adds $100,000 to the Total

The Monetary Times' estimate of Canada's fire losses for the month of September is $1,940,272, compared with $1,374,495 in August, and $917,286 for September a year ago. The following is the estimate of the September losses:—

Fires exceeding $10,000	$1,539,000
Small fires reported	135,150
Estimate of unreported fires	266,122
Total	$1,940,272

A review of fire losses for the month of September, shows that the farmers of the country suffered a heavy loss. The destruction of thirty-five barns was reported to *The Monetary Times*, with a heavy loss, as in most cases the season's crop was stored away, with very little insurance.

Forest fires again did heavy damage in the western provinces, damage being done on the British Columbia coast and in Alberta to the amount of over $500,000. Although actual figures have not yet been compiled, it is estimated that loss from this source this year will exceed that of all previous years.

The most destructive fire during the month was that at Oromocto, N.B., when the town was nearly wiped out, with a loss of $500,000. Another village, Moose Horn, Man., was partially destroyed, with a loss of $100,000, the explosion of a gasoline lamp in a local creamery being the cause. Many other large fires were also reported.

The loss for the nine months of this year is estimated at $17,896,993, which is, however, considerably under the loss for the same period last year.

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February ..	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,460,437	1,317,714	3,240,187	1,080,070
May	1,850,205	1,163,110	3,570,014	1,785,030
June	494,557	1,184,627	3,080,982	3,337,530
July	3,039,634	1,101,734	3,369,684	1,118,377
August	1,057,109	1,230,183	3,110,445	1,374,495
September ..	981,703	1,301,700	917,286	1,940,272
October	1,077,815	704,605	5,119,145	....
November ..	923,235	959,049	1,059,580	....
December ..	3,271,496	5,144,100	1,733,917	....
Totals ..	$20,487,509	$20,086,085	$31,815,844	$17,796,993

$10,000 and Over

The following is a list of fires in September, at which the losses amounted to $10,000 and over:—

Vancouver, B.C., September 3, the Liberty Store, $10,000.

Halifax, N.S., September 7, stables at Exhibition grounds, $12,000.

Moose Horn, Man., September 11, half of the village, $100,000.

Cavendisle, Sask., September 10, Roetter hardware store and the stock of the Empress Lumber Co., $35,000.

Chatham, Ont., September 11, plant of the Dowsley Spring Co., $100,000.

Courtney, B.C., September 12, hardware store of C. H. Tarbell and Sons, $30,000.

Port Rowan, Ont., September 20, business block, $100,000.

Toronto, Ont., September 20, John Hallam building on Front St., $75,000.

Vancouver, B.C., September 13, sawdust building of the Vancouver Lumber Co., $10,000.

Vancouver, B.C., September 20, Shaughnessy Military Hospital, $50,000.

Granby, Que., September 20, sash and door factory of the Kent Lumber Co., $12,000.

Antigonish, N.S., September 25, St. Francis Xavier College, $15,000.

Cargill, Ont., September 25, residence of W. D. Cargill, M.P., $30,000.

Newtonbrook, Ont., September 30, Humberstone Pottery Works, and nearby farm buildings, $40,000.

Oromocto, N.B., September 30, town was almost destroyed, $400,000.

Vancouver, B.C., bush fires for latter part of month did damage to the amount of about $500,000.

Sussex, N.B., September 25, Sussex manufacturing warehouse, $20,000.

Destroyed or Damaged

Among the structures destroyed or damaged last month were: Business blocks, 2; village, 1; town, 1; barns, 35; residences, 20; stores, 7; granary, 1; business buildings, 2; bakeries, 2; college, 1; factories, 5; hospitals, 2; plants, 6; garages, 4; stables, 2; warehouses, 3; planing mills, 2; parliament buildings, hotels, 3; post offices, 2; homestead, 1.

Among the causes reported last month were: Lightning, 8; spontaneous combustion, 4; incendiarism, 3; explosion of lamps, 2; overheated tank, 1; defective chimney, 1; explosion of oil stove, 1; children playing with matches, 1; careless campers, 2; shot from gun, 1; spark from thrashing machine, 1; hot ashes, 1; explosion of oil stove, 1.

Many Fatalities

The following is a list of fires at which fatalities occurred last month:—

Driscoll Lake, Sask., September 1, trapped in burning house	6
Prince Albert, Sask., September 2, trapped in burning house	1
Kingston, Ont., September 3, explosion of pop-corn roaster	1
Toronto, Ont., September 3, playing with matches	1
Belleville, Ont., September 4, fire from stove	1
Vancouver, B.C., September 5, playing with matches....	1
Montreal, Que., September 6, playing with matches....	1
Plevna, Ont., September 13, trapped in burning house..	1

Ottawa, Ont., September 15, playing with matches	1
Thorah, Ont., September 17, trapped in burning house..	3
Point Edward, Ont., September 22, trapped in burning house	1
Battrum, Sask., September 23, trapped in burning shack	2
Montreal, Que., September 25—Explosion of gas	1
Orillia, Ont., September 28, lighting fire with coal oil...	1
Total	23

DUTCH LOOKING FOR CANADIAN INVESTMENTS

Holland is again looking towards Canada as a field for investment, according to a letter just received by *The Monetary Times* from an official of an institution which in the past has placed large amounts of Canadian securities there. "Lately," he says, "there has been much interest in the subject, the investing public in this country again turning to American railroad issues and realizing that Canada offers excellent opportunities in this respect. For instance, the present depreciation of the pound sterling makes it most attractive to buy Canadian railway bonds in London, and if only more was known about these enterprises this surely would be borne on a large scale, while new issues would derive much attention." He adds that they are particularly interested in Grand Trunk affairs, as considerable of the third preferred and common shares are held there.

R. V. Winch and Company, of Vancouver and Victoria, have been appointed British Columbia agents for the Scottish Metropolitan Assurance Company, Limited.

Life Insurance as Protection

The motive that prompted the inventors of Life Insurance was the desire to furnish protection. Savings and investment are invaluable accompaniments but the feature that sells Life Insurance is protection. That company confers the greatest benefit upon its members that gives "the greatest amount of genuine Life Insurance protection for the least possible outlay." This aim has ever been the guiding star of The Mutual Life Assurance Company. Following out the principle of co-operation as the Mutual has done means that the company allots the whole of its profit, from all sources whatsoever, to the policyholders thus reducing their expense for Insurance to actual cost—the only Canadian Company operating on this principle. The experience of the Mutual has fully justified the hopes of its founders who fifty years ago planned the institution on the basis of

INDUSTRIAL EVENTS OF THE WEEK

Ontario Strongly in Favor of Purchase from United Kingdom—Canadian Industries Expanding

THAT a substantial increase in Canadian imports from overseas may be expected as soon as industrial conditions in the United Kingdom have improved, is the opinion of Fred W. Field, British Trade Commissioner in Ontario. In an interview with *The Monetary Times* he said: "Great Britain's industrial machine has been entirely devoted to war for over four years, and it is not a small task to return to normal working conditions. The sentiment in Ontario is strongly in favor of the purchase of British goods, after everything possible has been bought in the home market. The present exchange situation is a factor which also tends to turn business to the old country. The reputation of British firms, especially in the matter of quality and fair dealing, is another factor which is fully appreciated in the Canadian market.

"A number of overseas manufacturers have under consideration the establishment of branch plants in Canada. It is unlikely for obvious reasons, that the number of such branches will begin to approach the number of United States branch industries in this country. At the same time, British manufacturers of certain lines will probably decide that the only way to meet foreign competition in this market is by means of branch factories. In the majority of lines, however, it will probably be found more advantageous to manufacture in the United Kingdom, and export to this and other markets.

"The British Trade Commissioners' offices in Canada are receiving a number of inquiries for the products of United Kingdom factories, including requests from Canadian manufacturers who require raw materials, special machinery, or equipment and semi-manufactured articles."

Belleville's Industrial Plans

Among important industrial events of the past week is the plan reached in Belleville, Ont., to bring the advantages of that city to the attention of manufacturers. A new organization, the Belleville Industrial Corporation, has been formed to reach out for new industries for the community, and has been capitalized at $200,000. R. J. Graham, one of the provisional directors, has offered to subscribe $100,000, representing the Graham Company, Limited, and the remainder of the stock is expected to be taken up by the citizens. A charter has been applied for.

Through the influence of Industrial Commissioner White and other companies of the city, many industries are to locate in Belleville, and it is for further development along this line that the new organization has been formed. Among the new companies to locate there are: Elliot Woodworking Company, Limited, of Toronto; Judge Jones Company, of Montreal; Eckenburg Company Limited, manufacturers of breakfast foods. A large English company has been made acquainted with the advantages of Belleville, and will locate there if suitable arrangements are made.

Goderich Steel Plant

Unless a decision is made by the town council of Goderich, Ont., quickly, the location of the plant of the Lake Huron Steel Corporation may not be within the corporate limits of the town. At a meeting of the town council recently, a letter was read from B. H. McCreath, promoter of the Lake Huron Steel Corporation, withdrawing the proposition of annexation of the 1,800 acres or more to the south of the town to the town municipality. Considerable discussion arose over this and a motion was made that the whole matter be dropped entirely. An amendment that the matter be referred to the special committee was made and carried. Some of the members of the council view the move of the Steel Corporation, asking for annexation to the town, with suspicion and want to see some work on the plant started before they grant any concession. Owing to the apparent deadlock between the town and the corporation it is stated that they will erect their plant in its present location and form a town of their own, the same as is done where other steel plants have started. However, a majority of the council have shown that they do not intend to let this opportunity slip through their fingers.

Other Erections and Extensions

The Goodyear Tire and Rubber Company, is making additions to the present factory at New Toronto, Ont., costing about $200,000.

The Ames-Holden Company, of Montreal, has purchased a large warehouse on Sault-au-Matelot Street, Quebec, with its adjoining storage properties in the rear, from the estate of the late T. Ledroit, and are now having the premises repaired for occupation. The price paid for the property is said to be $50,000, and the firm is spending approximately $10,000 extra on its refitting, etc. This building will be a branch for the storage and sale of boots and shoes, rubber goods and rubber tires.

Arrangements are under way for the opening of a plant at Owen Sound, Ont., for the manufacture of a special line of whitewear. It is expected that the operation of the firm under the management of R. McKnight and J. J. Kelley, will start in November, and provide employment for girls.

A new department has been added to the plant of the Canadian Products, Limited, Canadian subsidiary of the General Motors Corporation, at Walkerville, Ont. Transmissions will be manufactured, which is a big and important industry in itself.

Steel Industry in Nova Scotia

The huge plate mill of the Dominion Iron and Steel Company, Sydney, N.S., is now being rushed to completion, and some machinery has already been erected. The buildings when finished will cover an area of 240,000 square feet. The capacity will be 50,000 square feet of half-inch plate in 24 hours from the ingots. The ingots will be handled up to the weight of 10 tons. In order to supply electricity to drive this mill, and at the same time electrify some of the other mills, the company is building a large power station.

It has been announced that the mill of the Nova Scotia Steel and Coal Company, at Sydney, N.S., has again resumed operations. The announcement says:—

"After a shut down for several weeks, the blooming and billet mills of the steel company have resumed operations. For the present the mills will only be worked single shift. It was anticipated that one of the blast furances and several of the open hearth furnaces would be put in operation also, but none of these have been blown in or charged at present. There is a quantity of cold ingots on hand which will keep the blooming mill in operation single shift for a little time. The blooming mill and billet mill have undergone extensive repairs and they are now in a position to take care of any rush that may be required. With the exception of the pen hearth and blast furnaces all the others mill are in full operation."

Extensive Operations in the West

Among the announcements this week is that from St. Boniface, Man., that the Western Wheel and Foundries, Limited, has been formed to manufacture chilled car wheels and brake shoes to take care of the requirements of the railroads in the west, and will locate a plant which will occupy seventeen acres of land there. The capacity of the plant will be about 100,000 wheels a year, and it is expected that the first unit will be completed so that operations may be commenced early in 1920. There will be a working staff of about 200 men to initiate the enterprise. The Western Wheel and Foundries Company is a subsidiary of the Dominion Wheel and Foundries Limited, of Toronto, and the Albany Car Wheel Company.

A. J. Hamilton, of Toronto, is looking into the prospects of establishing a factory for the manufacture of motion picture films at Winnipeg. He considers that Winnipeg is an ideal position for the plant, and the requirements of the

west in the motion picture film business could be easily fed. The provincial government will be approached on the matter.

At the annual meeting of the Board of Trade at Carman, Man., it was decided to encourage manufacturing firms to locate in that municipality. It was announced that already several enquiries had been received from eastern manufacturers. Power can be supplied as the municipality has taken the necessary action to be connected with the hydro-electric system. There is $125,000 being expended in the erection of new buildings this year.

It is the intention of the Hon. A. P. McNab, president of the Regina Flour Mill to form a company to build a larger flour mill as soon as the people get behind the present enterprise.

NEW INCORPORATIONS

Miller Lake Enterprise, Ltd.—Robinson's Clothes, Ltd.—Standard Reliance Assets, Ltd.

The following is a list of companies incorporated recently, with list of directors:—

Hanna, Alta.—Hanna Homes, Limited, $20,000.

Cranbrook, B.C.—Achilles Mines, Ltd., $300,000.

Vernon, B.C.—Okanagan Vegetable Growers, Ltd., $10,000.

Kelowna, B.C.—Kelowna Veterans Bldg. Co., Ltd., $10,000.

Daysland, Alta.—The Daysland Community Hall, Limited, $20,000.

Lethbridge, Alta.—Irvine-Mann Live Stock Company, Limited, $100,000.

Smoky Lake, Alta.—Smoky Lake United Farmers' Company, Limited, $25,000.

Verdun, Que.—Chapman's, Limited, $100,000; B. C. Bellew, N. C. Bellew, M. Lawlor.

Gowganda, Ont.—The Miller Lake Enterprize, Limited, $1,000,000; T. J. Coulter, A. T. Forbes, A. Watters.

Montmagny, Que.—The National Farming Machinery, Limited, $40,000; R. Langlois, A. Lavergne, A. Langlois.

Sherbrooke, Que.—J. H. Bryant, Limited, $275,000; J. H. Bryant, A. E. Wiggett, J. P. Wells, W. H. Lynch, E. A. Hale.

Cobalt, Ont.—Croskery and Company, Limited, $40,000; B. Croskery, I. Croskery, J. H. Kelly, J. D. Seguin, J. B. Allen.

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Granby, Que.	$30,000	5½	30-years	Oct. 11
Pelee Township, Ont.	13,475	6	20-instal.	Oct. 18
Fitzroy Twp., Ont...	3,000	6	15-instal.	Oct. 25
Spirit River, Alta...	30,000	6	15-years	Oct. 25
Renfrew, Ont.	17,500	6	30-years	Nov. 24

Township of Pelee, Ont.—Tenders will be received until October 18th for the purchase of $13,475 6 per cent. 20-instalment drainage debentures.

Fitzroy Township, Ont.—Tenders will be received until October 24th for the purchase of $3,000 6 per cent. 15-instalment school debentures. (See advertisement elsewhere in this issue.)

Debenture Notes

Gladstone, Man.—The sum of $50,000 will be raised for the erection of a new school.

Oak Bay, B.C.—A by-law for the raising of $65,000 for the erection of a new school has been endorsed by ratepayers.

Grand' Mere, Que.—An application for authority to make a loan of $165,000 for local improvements is being renewed.

London, Ont.—A by-law for the raising of $100,000 by bonds for a new reservoir will be submitted to ratepayers next January.

London, Ont.—Ratepayers will, in January next, vote on the issuance of debentures to the amount of $50,000 for a new Ridout Street bridge.

Portage la Prairie, Man.—The finance committee has recommended that a by-law, authorizing the school board to borrow $25,000, be passed.

Esquimalt, B.C.—The following money by-laws will be voted on October 13th next: Municipal hall, $25,000; fire-fighting equipment, $20,000.

Hanover, Ont.—Ratepayers have approved of the following money by-laws: Loan to E. Knechtel for new flour mill, $30,000; drains, $3,500; park project, $10,000.

Vancouver, B.C.—Ratepayers have defeated by-laws for the raising of money for various purposes as follows: Schools, $253,000; streets, $110,000; school equipment, $102,300.

York Township, Ont.—A block of $15,000 6 per cent. 25-year bonds has been sold to the Toronto Mortgage Corporation at 100.50. Tenders were to be received until October 6th for many blocks of debentures totalling over $500,000, but owing to the pending loan and uncertain market conditions the sale has been postponed until the end of November or the beginning of December, while the small block mentioned above has been sold in the meantime.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from September 1st to September 20th, 1919:—

Rural Telephones.—Prairie Rose, $3,950, Verwood, $10,400, Wakaw Lake, $33,300, North Prairie, $6,550, Pinkham, $19,000, Richard, $4,000, Grayson Northern, $13,000, Grayson Southern, $12,500, Bow Valley, $25,000, Holyrood, $3,485, Silver Lake, $4,000; Harris, Read and Co. South LaFleche, $700, Bruce, $14,500, Fillmore, $5,600, N.E. Quill Lake, $1,000, Wauchope, $1,400, Southdale, $11,000, Ridgeway, $3,700, Bounty, $5,100, Spy Hill, $1,500, Strathcona and Devil's Lake, $11,800, Colfax, $2,650, Radant, $3,000, Eagle Hills, $6,400, Mayberry, $12,400, Togo, $6,800, Bench, $2,600; W. L. McKinnon and Co. Haldimand, $3,300, Glendale, $2,100, Kenaston, $5,500, Ibstone, $4,600; Wood, Gundy and Co. Kalamazoo, $1,800, Winter, $17,050; T. P. Taylor. Victory, $3,700, Elbow Lake, $39,000, Eastern Edam, $8,500, Western Edam, $10,400, Punnichy, $20,000; Goldman & Co. Brampton, $1,700, Wabash, $2,000; Nay and James. Beaver, $29,000; Pirt and Pirt. City View, $680; Regina Public School. Ernfold, $900; North Ernfold, $7,300; Bell and Mitchell. Ketterville, $1,950; Bond and Debenture Corporation of Canada.

School Districts.—Hayland, $3,000, Maidstone, $14,000, Atoimah, $2,800, Anemone, $5,000, Stratton, $3,400; Great-West Life Assurance Co. West Brook, $900, New Hastings, $3,800, Concord, $4,150; Cross, Jonah, Hugg and Forbes. Harriville, $2,600; Harris, Read and Co. Whoosier, $1,500, Manitou Hill, $3,500; Western Trust Co. Regina P.S.D., $139,000; Huron and Erie Loan Co. Aurora, $2,000, Amulet, $3,000, Northgate, $1,100; Canada Landed and National Investment Co. Manitou Hill, $3,500; Western Trust Co. Edenwold, $8,500; Regina Sinking Fund Trustees.

Rural Municipality.—Wellington, $10,000; H. J. Birkett and Co.

Village.—Ruddell, $2,000; Bond and Debenture Corporation of Canada.

Town.—Rosetown, $10,000, $850, $1,150, G. A. Stimson and Co.

City.—Moose Jaw, $45,000; Wood, Gundy and Co.

Alberta.—Many municipalities of the province are seeking power to borrow. The following are the names of some of the places and the amounts they intend to raise by debenture issue: Mundare, fire protection service, $8,000; Fort Saskatchewan, school, $11,000; Vegreville, school, $10,000; Vermilion, fire protection service, $20,000; Grande Prairie, town hall and waterworks, $10,500; Drumheller, waterworks, $21,000; Calgary, $210,000, school.

Whether the towns will be able to dispose of their debenture issues or not remains for the next few months to show. It is understood that during the Victory Loan campaign the local schemes will take second place, but in some cases favorable arrangements have already been made for floating the loans which the Utilities Commission has approved.

NEW PARTNERS IN HANSON BROS.

The Montreal financial house of Hanson Bros., announce that Lieut.-Col. E. Gerald Hanson, D.S.O., and Major W. G. Hanson, M.C., have been admitted to partnership in the firm, as from September 1 last. The business will be continued as before, with the name unchanged.

The business of T. A. Richardson and Company, dealers in bonds and stocks, Toronto, has been taken over by Richardson, Sheppard and Thorburn, Limited. This latter firm will carry on a general investment brokerage business at 1604 Royal Bank Building, Toronto.

Hickson and Yuile is the name of a new stock brokerage firm in Montreal. Robert N. Hickson has recently been overseas, but was formerly connected with brokerage firms in Montreal, while J. W. Yuile, who has just been elected a member of the Montreal Stock Exchange, was formerly with Oswald Bros.

NEWS OF MUNICIPAL FINANCE

Ottawa and Dominion Government Reach Agreement—Brantford, Peterborough and Sarnia Assessment

Winnipeg, Man.—At an informal meeting of the city council last week, it was decided that Mayor Gray and Alderman Fisher interview the provincial cabinet in regard to the municipal outstanding levy of $17,000.

Welland, Ont.—The city's assessment for 1919 is $8,180,730, compared with $7,638,110 in 1918, an increase of $542,520. The value of land has increased over $100,000, and business and income assessments have increased almost $80,000.

Brantford, Ont.—The population of the city is now 30,549, and the civic assessment $25,197,035, of which $20,962,475 is taxable. This is an increase in the total assessment of $805,230, and in the taxable assessment of $610,370. Such is the recorded progress of Brantford during the year as shown by the report of the assessment department.

Sarnia, Ont.—According to Assessor Robert Simpson, the total assessment as taken from the rolls is: 1919—Lands and buildings, $9,874,700; business tax, $780,407; income, $347,301; exempt, $860,659; total, $11,092,243. 1918—Lands and buildings, $9,719,361; business tax, $799,648; income, $260,326; exempt, $860,540. Total, $10,865,967.

Essex, Ont.—The town council at its last meeting struck the rates for the year as follows: Town rate, 5.7 mills; county rate, 5 mills, amount raised $3,414; water rates debentures, 5.3 mills, $3,619; general debentures, 1.2 mills, $819; public school rate, 10 mills, $7,160; public school debenture, 1.2 mills, $859; high school rate, 3.5 mills, $2,506; canning factory, .6 mills, $409; public library, .7 mills, $478; patriotic grant, 2.4 mills, $1,638; town's share of local improvement and drainage rates, 3 mills, $2,048; town rate, 5.1 mills, $3,469. This makes a total rate of 38 mills, as compared with 36 mills last year.

Regina, Sask.—The city council has been notified of the order-in-council passed by the Federal government, agreeing to make a donation to the city of $63,602, representing the difference between the sum paid by the insurance companies to cover the loss of the winter fair building and the appraised value of the destroyed building. The grant is being made on the condition that the city sign a bond indemnifying the government against the loss of this money in the event of the city bringing any action against the Crown or in the event of the insurance companies, in the exercise of subrogation rights, bringing an action against the government.

The three public utilities operated by the city showed an increase in net deficit of $4,335 at the end of August as compared with the preceding month, according to a statement which has been prepared by the city auditor and which was presented to the city council.

Peterborough, Ont.—According to the assessment rolls of City Assessor Henry, there is an increase in assessment, while taxable income is $53,911 less than last year.

The total assessment of the city is $19,326,515, as compared with $18,265,666 last year, an increase of $1,060,849. The rolls show a decrease of 170 in the number of taxable persons, the totals being 6,170 persons for 1918 and 6,000 this year. The business assessment is higher by $96,130, but the property exempt from taxation is reduced by $10,490, the totals being $2,448,345 for 1918 and $2,437,855 this year.

The total value of taxable property is $12,013,290 as compared with $11,489,370, but taxable income discloses a decline, the amounts being $524,486 for 1918 and $470,575 for this year. The decrease under this head is $53,911 and is probably explained by the passing of the munitions industry. The actual value of the real property is $16,482,925, as against $15,584,505, an increase of $898,420.

London, Ont.—A commission of local valuators to take up the question of assessment revision in the city has been advocated by Mayor Somerville. He stated that in that way the work would be done better than by engaging an outside valuator who was not acquainted with London values. In reference to the statements which are made from time to time regarding the inequality of the assessments in the city, the mayor states that there is some ground for the assertions. He points out that the situation can never be perfect. It may be improved to a considerable extent, however.

One of the reasons for the assessment being more nearly to the value on the lower priced houses, he says, is the ease with which the value of these houses may be determined. It is much more difficult to rightly value the dwellings of higher value.

Assessment Commissioner Stephen Grant states that while there are some inequalities in the assessment, the trouble is mainly with the selling values. The assessment is made on the normal value. It is his opinion that values at present in London, as instanced by sale prices, are abnormal. In many instances the selling price of the property does not represent the true value.

Montreal, Que.—Aldermen of the city have been studying the proposal of the Administration Commission to re-introduce the by-law making it compulsory for all landlords to hand over to the city once a year a copy of their leases, showing the rentals they are receiving for their property.

When the by-law was before the council last year they rejected it because there was a belief that it would mean that every time a landlord changed his tenant he would have to send a copy of his lease to the city hall and this might mean half a dozen times a year. To get over this difficulty the commissioners are going to change the proposed by-law in order to make the notification only once a year, believing that by so doing they would get for the assessors much valuable information as to values. It was stated that however well the assessors did their work there would be many landlords who would be getting much more revenue from their property than the assessors imagined, and consequently they would be under-assessed. The result of this is that other proprietors, who are not charging exorbitant rents, have to pay more taxes than they would if every landlord paid what he should. The honest landlord has no objection to letting the assessors know what rental he is receiving and therefore they have no objection to the proposed by-law.

It is anticipated that when this scheme is in operation it will increase the assessable value of some properties by hundreds of thousands of dollars, which will mean that a smaller realty tax will bring in more money than at present.

Ottawa, Ont.—The government has agreed to a five-year term for the agreement with the city, and once the decision of the cabinet is approved by parliament, the agreement will be executed. It will date from July 1st, the time the former agreement expired.

Under the ten-year agreement which expired in July, the city received $15,000 for services rendered in addition to the $100,000 a year given to the Ottawa Improvement Commission. Government buildings are exempt from taxation under the British North America Act, but the agreement provided that the city was to supply free water in return for the grants and that the incomes of civil servants were to be exempt from civic taxation.

The new agreement provides that the grant to the Ottawa Improvement Commission shall be increased to $150,000 per year and the grant to the city to $75,000 a year. The government also agrees to pay for water used by the government on a meter basis of 13 cents per thousand gallons for the first two hundred million and at the rate of 10 cents per thousand for any water used in excess of that amount. The city will install and maintain meters, but the government will pay 10 per cent. per year for the cost of installation. The city agrees to make no charge for water used for fire protection, street sprinkling or for water used in government parks and driveways, but the government agrees to use water for sprinkling only during the hours prescribed by the city by-law from 5 to 8 a.m., and from 5 to 8 p.m.

It is estimated that the revenue on income tax will be at least $60,000, and for water rates about $100,000. These sums mean that the city and the improvement commission will get a total of about $385,000 per year instead of $115,000, which both grants amounted to under the old agreement.

WINNIPEG HOUSING AND GUARANTEE ASSOCIATION, LTD.

A company with the above name has just been incorporated in Manitoba, says a wire from the Winnipeg correspondent of *The Monetary Times.* The incorporators are Sir Augustus Nanton, J. H. Ashdown, C. H. Enderton and W. H. Carter. The association is not for commercial purposes, but to co-operate with Winnipeg and other municipalities in putting the government housing scheme into effect. The capital authorized is $100,000.

A party of members of the Cleveland Chamber of Commerce visited Hamilton and Toronto, Ont., this week.

The Mutual Life and Citizen's Assurance Company of Australia has just subscribed for $2,500,000 of the Peace Loan just floated in Australia.

WANTED.—Office manager for brokerage house making a specialty of bonds and debentures. Apply, with references and salary expected, Box 233, *Monetary Times*, Toronto.

WINNIPEG LIFE UNDERWRITERS' ASSOCIATION

A special meeting of the Winnipeg Life Underwriters' Association was held at the Royal Alexandra Hotel on September 27th, with J. H. Baird, newly elected president, in the chair. After luncheon, Mayor Gray spoke very highly of the good work the insurance men were doing in the city. Dr. Fraser, provincial health officer, gave an eloquent and instructive discourse on the relations of the health department and health officials to the conservation of life. He referred to the economic waste to the state, and said there were many lives which might have been saved if proper methods had been taken. He also spoke at some length regarding the rejection system, and he thought that at different points, companies should have an independent referee who could pass on cases who had been marked as defective by some examiner, so that they would not be put on the library bureau rejection card.

On September 29th, a business session was held in the board room of the Board of Trade Building, when the question of publicity was discussed at some length and referred to the executive for further information.

At this meeting the secretary and treasurer reported that they closed the previous year with a surplus.

INVESTMENTS AND THE MARKET

Winnipeg Electric Railway Granted Increase in Fares—Lake of the Woods Milling Report

Winnipeg Electric Railway.—Six-cent fares are now in force in Winnipeg. On October 3, the Public Utilities Commissioner allowed the increase, but a temporary injunction was issued the following day, restraining the company from charging more than five cents for a single ticket. The company, however, won the case when, on October 8, the plea was made by the city for the continuation of the injunction.

This increase is good until the application for permanent rates is settled.

Imperial Oil, Ltd.—In their notice to shareholders of the change in the par value of stock from $100 to $25, the Imperial Oil Co. notes a slight change in the name of the company. Heretofore there have been two companies, in fact—The Imperial Oil Co., Ltd., and its subsidiary, Imperial Oil, Ltd. Under the new arrangement the first name ceases to exist, and business will be carried on under the name of Imperial Oil, Ltd. Victor Ross, who is a director of the company, has now returned to Canada to take up his duties as vice-president of the International Petroleum Co. He has given up his duties as assistant to the president of the Standard Oil Co. of New Jersey.

Cockshutt Plow Co.—The statement for the year ended June 30th was recently issued, and the annual meeting will be held on October 27th. The statement shows a net profit of $571,586, in addition to the balance brought forward from last year, $86,401. A dividend of 4 per cent. per annum was paid on the preference shares, and nothing on the common. The president states that it is the intention to continue such dividends until conditions become more settled, though if collections are good this year something may be paid on account of the arrears. The payment this year required $258,600, leaving a balance of $399,387 in the profit and loss account. The balance sheet now shows assets totalling $16,136,044, an increase of about $400,000, compared with last year. Stocks of raw materials have increased in value, but they have been kept as low as possible in view of a probable drop in prices.

Nova Scotia Steel and Coal Co.—Three officials of the company, D. H. McDougall (president), W. D. Ross (vice-president) and Thomas Cantley (chairman of the board of directors), sailed from Quebec on October 8, for England.

The principal object of the trip, Mr. McDougall said, is to endeavor to lay a solid foundation and make connections for future development of Scotia. The securing of more shipping will be one of their endeavors, so as to place the company in a position to regain markets that had to be abandoned during the war. Mr. McDougall warned against expectation of an immediate rush of orders as a result of their trip. They were looking ahead some years, he said, and if the foundation was laid for future trade, even without much business for the immediate future, it would be considered satisfactory.

Lake of the Woods Milling Co.—The annual meeting of the company was held on October 1, in Montreal. The statement presented showed that the company's profits declined about $101,000, or 11.8 per cent., from the profits a year ago, the profits this year being $756,616. Out of this, actual milling profits were down $54,000 to $547,152. After the usual deductions, there remained for disbursement on the common stock about $597,616, or 28.45 per cent., against 33.29 per cent. the previous year. After the dividend and bonus payments, there remained a balance of $203,616, of which $203,616 was added to surplus account, which now amounts to $982,414. In the balance sheet cash holdings are shown $800,000 lower, but working capital increased from $1,696,707 to $2,152,188. Stocks of flour and other mill supplies increased $400,000, and accounts receivable increased $1,000,000. Investment in Victory bonds increased $300,000. Accounts payable increased $579,000 to $695,474.

Two new directors, R. W. Reford, of Montreal, and W. R. Allan, of Winnipeg, were added to the board of directors. The other directors were elected without change in the personnel. A special meeting of the shareholders was held at the conclusion of the annual gathering and approval was given to the proposal to increase the capital stock of the company, the necessary legal steps to accomplish which will be taken at an early date. No announcement of the executive's plans in this respect was given out for publication.

Shawinigan Water and Power Co.—A meeting of shareholders of the company was held in Montreal on October 8, to ratify a new financial scheme announced some time ago. The scheme as outlined by J. E. Aldred, president, was approved. It provides that an amount not greater than $20,000,000 of the issue authorized is to be put out in the near future to retire the outstanding $5,000,000 first mortgage bonds, $5,476,261 of consolidated debenture stock and whatever balance of the $4,500,000 two-year 6 per cent. notes due next December has not been converted into common stock.

The new issue will bear interest at the rate of 5½ per cent. and will be divided into two or more series. Any balance remaining after the retirement of the maturing obligations will be devoted to the corporate needs of the Shawinigan enterprise. Additional issues may be made at the discretion of the board for the construction of additional plants or betterments, or for the purchase of the securities of companies identified with the main power undertaking.

Following this meeting, the president announced that a contract had been closed with the International Paper Co., to supply its new plant at Three Rivers, Que., with power. The International Paper Co., whose new plant is situated at the junction of the St. Maurice and the St. Lawrence Rivers, will need at the outset 20,000 h.p., which, in time, will be increased to 30,000, for the running of its newsprint mill. This mill when completed, will turn out 200 tons of newsprint daily. The contract is a long-term one.

Montreal Tramways Co.—Not only is there apparently no prospect of Montreal paying any lower fares than those fixed by the Montreal Tramways Commission, but there is a possibility of fares being placed higher than those fixed by the commission, following the representations by the company to that effect.

The appeal of the city of Montreal and other municipalities against the rates fixed by the commission as being too high, and the appeal of the company against the fares fixed by the commission as being not sufficiently high to per-

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

TRAINED EXECUTIVE, experienced, to assume large responsibility for executive functions, desires connection. Several years as secretary-treasurer, manager, etc. Special training as comptroller and internal auditor, coupled with latest accounting practice, graphic presentations, statistics and production, makes services especially valuable. Age 34, Canadian, active, character and references of the best. Executive ability guaranteed. Box 225, *Monetary Times*, Toronto.

DEMOBILIZED OFFICER RETURNED, thoroughly competent and expert accountant (C.A.), in business on own account before war, desires position as chief accountant, office manager or internal auditor, or would accept position leading up to same. Was previously chief accountant and office manager for corporation with office staff of sixty persons. Salary moderate. References. Box 231, *Monetary Times*, Toronto.

DIVIDENDS AND NOTICES

LA BANQUE NATIONALE

On and after Monday, the 3rd day of November next, this Bank will pay to its shareholders a dividend of two and a half per cent. (being at the rate of ten per cent. per annum) upon its paid-up capital, for the quarter ending on the 31st October next.

This dividend will be paid according to the list of shareholders of record on the 15th October next.

By order of the Board of Directors.

N. LAVOIE,
General Manager.

Quebec, 16th September, 1919.

THE CONSUMERS' GAS COMPANY OF TORONTO

NOTICE OF ANNUAL MEETING

The annual general meeting of the Shareholders of the Consumers' Gas Company of Toronto, to receive the report of the Directors and for the election of the Directors for the ensuing year, will be held in the Company's Board Room, 17 Toronto Street, Monday, the 27th day of October, 1919, at 12.00 o'clock noon.

ARTHUR HEWITT,
General Manager.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Preferred Stock of the **Dominion Textile Company, Limited.** has been declared for the quarter ending **30th September, 1919**, payable **October 15th**, to shareholders of record **September 30th, 1919.**

By Order of the Board.

JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 22nd September, 1919.

TO SHAREHOLDERS OF THE IMPERIAL OIL COMPANY, LIMITED

In accordance with the provisions of By-law No. 174, passed and enacted June 19th, 1919, and approved and confirmed by Shareholders at the Special General Meeting of July 2nd, 1919, the par value of the outstanding shares of the Company has been changed from $100.00 per share to $25.00 per share, and certificates for four shares will be issued for each share of the $100.00 par value of the outstanding stock.

Pursuant to a Resolution and Supplementary Letters Patent, the name of the Company has been changed from The Imperial Oil Company, Limited, to "Imperial Oil, Limited"; therefore the certificates you will receive in lieu of the certificates that you surrender to us will go forward to you under the name of "Imperial Oil, Limited."

Kindly, therefore, send by registered mail, on or after October 1st, 1919, addressed to the undersigned, or to James H. Archbold, Assistant Secretary-Treasurer, Room No. 807, No. 56 Church Street, Toronto, Ontario, your registered stock certificates or bearer share warrants, listing same on the forms which are being mailed to all registered shareholders—and in the case of holders of bearer share warrants only, listing same in the letter with which the warrants are enclosed. The full name and address to which the new issue is to be forwarded should in each case be given.

W. T. McKEE,
Secretary.

No. 8, Fitzroy Township.

WM. BOYLE,
Clerk,
Fitzroy Township, Kinburn, Ont.

VANCOUVER ADJUSTMENT BUREAU

Percy G. Shallcross, insurance adjuster, Vancouver, has announced the formation of an adjustment bureau for the adjustment of insurance losses against fire, marine, automobile and accident, and for appraisals of properties and goods as may be required prior to the writing of risks. With Mr. Shallcross has become associated Mr. M. E. Nasmyth, who has been attached to the staff of the Bank of Montreal in Vancouver.

The annual fees of the Montreal Chambre de Commerce are being raised from $5 to $10 for active members, and from $2 to $5 for corresponding members. The admission fee is also being raised from $5 to $10.

mit the receipts to balance expenditure for the year ending June 30th, 1920, were argued this week before the Quebec Public Utilities Commission. Decision was reserved.

The city of Montreal last week asked for delay in order to bring a Chicago expert to Montreal to study the matter. The expert arrived, Jas. R. Bibbins, assistant chief engineer of the firm of B. J. Arnold and Co., well-known traction experts. He had only a few days to go into the figures, and his evidence before the Utilities Commission was restrained because of that, he being unable to give answers in a definite way to many questions asked him because of lack of opportunity to study the whole matter, as he said on each occasion, but for the present year at least, he said, he could not see any chance in the way of reduction in the budget of estimates as laid down by the Tramways Commission, and, consequently no lessening of fares is fixed by that body.

RECENT FIRES

Loss this Week Lighter—Insurance on Oromocto Property

Belleville, Ont.—October 1—Barn of Mr. S. Kellar, Wellington Street, just south of the Agricultural Park, was destroyed. The loss is partially covered by insurance.

Brantford, Ont.—September 28—A firebug started fifteen fires within the past few days. The damage was small.

Kingston, Ont.—October 2—Homes of Mr. Whitehead and Mr. Vancoughnett, 110 and 112 St. Stephen Street, were damaged. Estimated loss, $1,200.

Moncton, N.B.—October 1—Residence on Dominion Street was damaged. Estimated loss, $1,000. Insurance was carried to the amount of $3,500. Insurance allowed, $950.

Montreal, Que.—October 2—Cheese factory of the J. J. Joubert Dairy Co., 975 St. Andre Street, was damaged. Estimated loss, $2,000.

October 4—Premises of the De Laval Co., Ltd., dealers in dairy supplies at 21 St. Peter Street, were destroyed. Estimated loss, $50,000.

New Westminster, B.C.—September 28—Residence of H. Boyle, 508 Royal Avenue, was damaged. Estimated loss, $1,500.

North Sydney, N.S.—October 1—The Western Union Telegraph office and the fruit store of A. Allan were destroyed. Estimated loss, $10,000.

Pasqua, Sask.—September 28—Barn and contents of Geo. Durie were destroyed. Estimated loss, $10,000, with no insurance.

Pembroke, Ont.—October 2—Stables at the Windsor Hotel, four horses, one calf and other contents were destroyed and an adjoining residence of I. Fortier was damaged. Estimated loss to stable and contents, $11,000; to residence, $2,000.

Point Grey, B.C.—September 30—The Dominion cedar shingle mill No. 2, across the second bridge on Lulu Island, was destroyed. Estimated loss, $100,000.

Quebec, Que.—October 8—The Le Mesurier tobacco factory, on St. Valier Street, was destroyed. Estimated loss, $17,000.

Rockhead, N.S.—October 2—The smallpox hospital was destroyed. Estimated loss, $7,000.

St. Leonards, N.B.—October 1—The Cyr Hotel, owned by Chas. Cyr, was destroyed. Estimated loss, $30,000.

Toronto, Ont.—October 7—Garage in the rear of the house on Baldwin Street, one touring car and a motor truck were destroyed. Estimated loss, $10,000.

October 8—Store of J. Hanna, 324 Queen Street West, was damaged. Estimated loss, $2,000.

Vancouver, B.C.—The estimated damage by bush fires along the British Columbia coast during the past week is $500,000. About $200,000 of this is represented in property and the balance in standing timber and logs ready for shipping.

ADDITIONAL INFORMATION CONCERNING FIRES

Brantford, Ont.—September 25—Factory of the Brantford Roofing Co. was damaged. Cause, overflowing of asphalt into fire. Estimated loss, $1,000 on building; on contents, $100. Insurance was carried to the amount of $40,000 on building and $100,000 on contents.

Brussels, Ont.—September 27—Dry kiln and contents of Philip Ament were damaged. Estimated loss on contents, $1,468; on building, $391. Insurance was carried to the amount of $8,000 as follows: Gore, $4,500; Economical, $2,000; Nationale, $1,500.

Cargill, Ont.—September 27—House and contents of W. D. Cargill were destroyed. Estimated loss to contents, $5,811; to building, $30,000. Insurance was carried to the amount of $15,000 in the following companies: Gore, $5,000; Perth, $5,000; Economical, $5,000.

Halifax, N.S.—September 10—The machine shop and contents of Moirs, Ltd., were damaged. Estimated damage on stock, $1,600; on building, $2,000. Insurance was carried to the amount of $5,000, $2,500 in the Palatine Insurance Co. and $2,500 in the Insurance Co. of North America.

London, Ont.—September 20—Garage and chicken-house of R. A. Somers, 694 Colborn Street, were damaged. Estimated loss, $750. Insurance carried, $450.

Manitoba.—The following is a report of fire losses, as submitted by the Fire Commissioner, for the month of August: Number of fires reported, 155; estimated value, $641,432; amount of insurance, $456,313; estimated loss $115,195; loss ratio per capita, 0.1879; fatalities reported, nil For the year: Number of fires reported, 1,034; estimated value, $19,096,192; amount of insurance, $14,385,698; estimated loss, $1,026,434; loss ratio per capita, 1.6744; fatalities reported, 7.

Ontario.—The report of the fire marshal for the month of July, 1919, shows losses to the amount of $793,796, with $548,233 insurance loss and $245,563 not covered by insurance. For the seven months of this year the loss is $5,249,764, compared with $8,661,281 for the first seven months of 1918, a decrease of over $3,000,000. The insurance loss for the seven months is $3,804,680, and the loss not covered by insurance is $1,445,084.

Oromocto, N.B.—September 30—A further estimate of the loss by fire which nearly destroyed the town brings the total to $400,000. The insurance carried amounted to a little over $100,000. The insurance carried on the mills of the River Valley Lumber Co. was $70,000 on contents and $11,000 on buildings. The following gives the amount of insurance on some of the property, with the names of companies interested: On the lumber destroyed, the property of the River Valley Lumber Co., $5,000 in the Sun and $5,000 in the Phœnix Fire Insurance companies; $2,000 on A. B. White's general stores; $3,000 on A. B. White's barn and contents; $1,000 on Arthur White's dwelling-house in the Sun; $700 on Rev. S. C. Gray's household furnishings in the Law, Union and Rock Insurance Co.; $1,750 on T. J. McElroy's store in the Royal; $3,000 on Mr. McElroy's residence in the Royal; $2,000 on the Methodist parsonage in the Royal; $2,000 on Felix McGarr's residence in the Royal; $1,000 on T. J. McElroy's store and stock in the Union of Paris.

Toronto, Ont.—An inquiry is being held regarding the fire at 46 Murray Street recently. The odor of coal oil and the finding of a cushion soaked in the oil was evidence brought in by the firemen. It was further said that there was but little clothing or provisions in the house. The contents were insured in July for $7,000, and a claim was made for $1,345, while the adjuster fixed the loss at $782, with a valuation of about $2,000 on all contents, excluding a player-piano.

Vancouver, B.C.—September 12—Fuel-house of the Vancouver Lumber Co. was damaged. Estimated loss on stock, $3,000; on building, $8,000. The total adjusted claim was for $11,000. The following companies are interested: Lumbermen's Indemnity Exchange, Lumbermen's Underwriting Alliance, Manufacturing Lumbermen's Underwriters and National Lumber Manufacturers.

Grand Trunk To Be Government Line

Government Proposals, However, Provide for Control of Company, Not Absolute Ownership—Value of Stock to be Fixed by Arbitration—Operation by Board of Five, in Harmony with Canadian National Railways

ON October 10th, a resolution was introduced into the House of Commons by Hon. Arthur Meighen, Minister of the Interior, providing for the acquisition by the government of the entire capital stock of the Grand Trunk Railway Co., excepting the four per cent. guaranteed stock. This is the result of negotiations extending over a period of eighteen months, and action along this line has been definitely anticipated since Sir Alfred Smithers, chairman of the Board of Directors of the Grand Trunk, came to Ottawa in August. The plan must be assented to by the parliament of Canada and by the shareholders of the road. The resolution, which gives a full statement of the proposal, is as follows:—

"Whereas the present capital stock of the Grand Trunk Railway Company of Canada consists of the following:—

Four per cent. guaranteed stock	£ 12,500,000
First preference five per cent. stock	3,420,000
Second preference five per cent. stock	2,530,000
Third preference four per cent. stock	7,168,055
Common stock	23,955,437
Total	£ 49,573,492

"And whereas the present outstanding debenture stocks of the Grand Trunk Railway Company of Canada, consisting of:—

Five per cent. Grand Trunk debenture stock	£ 4,270,375
Five per cent. Great Western debenture stock	2,723,080
Four per cent. Grand Trunk debenture stock .	24,624,455
Four per cent. Northern debenture stock	308,215
Total	£ 31,926,125

(hereinafter called the 'present debenture stocks') are entitled to certain voting powers at meetings of shareholders of the Grand Trunk Railway Company of Canada;

"And whereas, it is expedient that his Majesty should acquire the whole of the capital stock of the Grand Trunk Railway Company of Canada except the four per cent. guaranteed stock above referred to;

"It is therefore resolved that it is expedient to provide as follows:—

"(1) That, subject to the provisions of these resolutions, his Majesty the King, represented by the Minister of Railways and Canals of Canada, acting under the authority of the Governor-in-Council (hereinafter called the 'government'), may enter into an agreement (hereinafter called the 'said agreement') with the Grand Trunk Railway Company of Canada (hereinafter called the 'Grand Trunk') and with such other companies and interests as the government may think necessary for the acquisition by the government of the entire capital stock of the Grand Trunk, except the four per cent. guaranteed stock of the Grand Trunk, amounting to £12,500,000, the latter being hereinafter called the 'present guaranteed stock.'

"(2) That the said agreement shall contain provisions for the defining of the companies, properties and interests comprised in the Grand Trunk System, and, including the terms and provisions hereinafter set forth, may contain such other terms and conditions as the parties may agree upon.

"(3) That as part of the consideration for such acquisition the government may agree to guarantee the payment of:—

"(a) A dividend, payable half-yearly, at four per cent. per annum upon the present guaranteed stock.

"(b) The interest upon the present debenture stocks as and when payable, in accordance with the terms thereof. (These guarantees to take effect upon the date of the appointment of the committee of management hereinafter mentioned.)

"(c) Dividends payable half-yearly at four per cent. per annum from the date of the appointment of the committee of management hereinafter provided for, upon an issue which is hereby authorized by the Grank Trunk under the terms of the said agreement of non-voting capital stock (hereinafter called the 'new guaranteed stock') not exceeding the amount determined by the Board of Arbitration as hereinafter set forth.

"Provided that concurrently with such guarantee of dividends and interest upon the present guaranteed stock and the present debenture stock, respectively, the voting powers at meetings of shareholders of the Grand Trunk now vested in or exercised by the holders of the said stock, respectively, shall cease and determine absolutely.

"(4) That the present guaranteed stock and the new guaranteed stock or any part thereof may be called in or redeemed by the government at par, at any time after thirty years from the date of the appointment of the said committee of management, on six months' notice by advertisement to the holders thereof.

"(5) That the value of any of the first, second and third preference stocks and the common or ordinary stock of the Grand Trunk now issued and outstanding to the face values above mentioned (hereinafter together called the 'preference and common stock') shall be determined by a board of three arbitrators, one to be appointed by the government, one by the Grand Trunk and the third by the two so appointed or, failing agreement, by judges to be designated in the said agreement. New guaranteed stock to amounts not exceeding the value, if any, so determined, carrying a dividend as hereinbefore authorized, shall be distributed among the holders of the preference and common stock upon the transfer to or vesting in the government of such stock in proportions which shall be determined by the arbitrators.

"(6) That as soon as said agreement has been ratified by a majority of the holders of the stocks enumerated in the preamble to these resolutions, present in person or by proxy, and voting at a special general meeting of such stockholders duly called for the purpose of considering such agreement;

"(a) A committee of management shall be formed, consisting of five persons, two to be appointed by the Grand

Trunk, two by the government, and the fifth by the four so appointed, to insure the operation of the Grand Trunk System (in so far as it is possible so to do) in harmony with the Canadian National Railways, the two systems being treated in the public interest as nearly as possible as one system. The committee shall continue to act until the preference and common stocks are transferred to or vested in the government, when it shall be discharged.

"(b) The books, minutes, reports, documents and other records, and all the railways and properties of the companies comprised in the Grand Trunk System, shall at all times be accessible and open to inspection and examination by any person or persons named by the Minister of Railways and Canals of Canada, or by the board of arbitrators, and all proper aid and assistance shall, on request, be rendered to such person or persons by the committee of management and by the officers and employees of the Grand Trunk and its allied companies, including the making and giving of extract copies and statements.

"(7) That the government may lend to the said committee of management, upon the notes or other obligations of the Grand Trunk, such sums as the government may from time to time deem necessary for the carrying on of the operation or improvement of the Grand Trunk System.

"(8) That the said agreement shall provide among other necessary and usual provisions, for:—

"(a) The appointment of the arbitrators, the control of the arbitration proceedings, the administration of oaths, the procuring and admission of evidence, and the making of the award.

"(b) The transfer to or vesting in the government or its nominees of the preference and common stocks upon the issue of new guaranteed stock in exchange therefor.

"(c) The resignation or vacating the officers of the board of directors of the Grand Trunk and of each company comprised in the Grand Trunk System upon the preference and common stocks being transferred to or vested in the government.

"(d) The entrusting to the said committee of management by the minister of Railways and Canals as receiver of the Grand Trunk Pacific Railway System on terms to be approved by the governor-in-council, of the exercise of such of his powers as receiver as the governor-in-council may deem requisite in order that the operation and management of the said Grand Trunk Pacific Railway System may be conducted in harmony with the operation of other railways and properties under the control of the said committee.

"(e) The continuation and administration of the Grand Trunk Railway of Canada Superannuation and Provident Fund Association, the Grand Trunk Pension Fund and the Grand Trunk Railway Insurance and Provident Society in accordance with the terms to be set forth in said agreement.

"(9) That the government and the Grand Trunk and each company comprised in the Grand Trunk System and all persons interested therein be hereby respectively authorized and empowered to enter into the said agreement upon and subject to the terms therein set forth, and to do and perform all such acts and things as may be deemed necessary to observe, perform and comply fully with the terms and conditions of said agreement.

"(10) That any orders of the governor-in-council which the government may deem requisite, to vest in the government any of the preference or common stocks not transferred to the government or its nominees under the terms of these resolutions, or requisite to vacate any office of director, or otherwise to carry into effect the terms and provisions of the said agreement, may be made and passed with the effect specified in any such order in council.

"(11) That upon the transfer to or vesting in the government of the preference and common stock as herein provided for the government may, by order-in-council provide for the discharge of the receivership of the Grand Trunk Pacific Railway System and the termination and withdrawal of the proceedings in the Exchequer Court of Canada relating thereto."

In introducing the resolution, Hon. Mr. Meighen explained that while the plan had met the approval of Sir Alfred Smithers and would be recommended by him, the final decision on the Grand Trunk side lay with the shareholders. On the government side, a bill is to be introduced which, if passed, will enable the government to take over the road on the terms outlined, should the shareholders approve. He intimated that there was no disposition on the part of the government to "railroad" this legislation through the House. "Nothing is farther from the intention of the administration in this regard," he said. "This is one of the most important transactions that this country has had to consider or has ever been called to enter into, and now that it is before parliament it is hoped that the most careful and most attentive consideration will be given to it, and that every detail will be thrashed out. All papers that we have or that we can secure will be laid before parliament, and our only appeal is that there be no haste, but that the deliberation be careful, thorough and exacting."

Grand Trunk Pacific History

On October 15th, the resolution was discussed in the House, and then went into the committee stage. Hon. Dr. Reid, Minister of Railways, stated that the Canadian Pacific is opposing the nationalization of the Grand Trunk, and that if the latter is not taken over by the government it would shortly be absorbed by the Canadian Pacific Railway. He also reviewed the history of the Grand Trunk as follows:—

"The resolution which is now submitted to the committee contains the bill which I will introduce on the passing of the resolution. It may be well for me to state what has led up to the present position and the decision to take over the Grand Trunk Railway System. The committee will remember that the Grand Trunk Railway Company, under the management of the late Chas. M. Hayes, decided in the year 1903, that the Grand Trunk Railway Company, in order that it might be able to compete on an equal basis with the Canadian Pacific Railway, must extend its lines into the territory of the great Northwest. Accordingly, they applied to parliament for and received a charter to build a railway from Winnipeg to the British Coumbia coast. The government of the day decided that they would construct a road from Winnipeg to Moncton and hand it over to the Grand Trunk Railway Company under a lease. The facts in connection with this transaction have been discussed so often in the House that I do not intend going into any further details except to say this, that on the completion of the Grand Trunk Pacific Railway and the Transcontinental Railway, the Grand Trunk System, or what is known as the old Grand Trunk Railway Company, held themselves responsible for the cost of operation and all liabilities that might be incurred in connection therewith. They refused to take over the Transcontinental between Winnipeg and Moncton, and the government have been operating that railway since its completion at an annual loss of several million of dollars. On the completion of the Grand Trunk Pacific Railway, the Grand Trunk Railway Co. became responsible for the operation and fixed charges of the Grand Trunk Pacific. The Grand Trunk Railway Company in February last refused to continue paying interest on bonds guaranteed by them, and accordingly the road had to go into the hands of a receiver.

"Let us see what assistance the government of Canada had given to them up to that date over and above the agreement that was made in connection with this railway. These are the items: First, in 1909, a loan was made of $10,000,000; in 1913, a loan of $15,000,000; in 1914, a loan of $6,000,000; in 1914, a further guarantee of their bonds to the value of $16,000,000; in 1916, a loan of $8,000,000; in 1917, a loan of $7,500,000; in 1918, a loan of $7,500,000; or a total of $70,000,000 has been advanced to the Grand Trunk Pacific Railway Company over and above what was originally intended.

"Of course, mortgages were taken on the road, but what good was that security if the road was losing money? Was it not better either to take over the road or make some disposition of it that would stop further enormous yearly losses such as I have mentioned? Why did the government advance these loans to the Grand Trunk Pacific? It was because they believed it would be a national calamity to create a financial crisis while the war was on, and that so long as the road was able to meet, or nearly to meet, operating expenses it was better to defer final action until the war was over or the end in sight. However, when the government decided that they would not consider any further advances to the Grand Trunk Pacific, the whole railway question had to be considered. It was decided that the Grand Trunk Pacific could be operated under the direction of a receiver. The falling of the Grand Trunk Pacific into the hands of a receiver made the Grand Trunk System directly responsible for the securities guaranteed by them in respect of the Grand Trunk Pacific Railway. It was impossible for the government to assume the Grand Trunk Pacific liabilities and release the Grand Trunk from their obligations, and there was no question what would happen if the Grand Trunk were compelled to meet the obligations they had guaranteed; they could not possibly meet them.

Largest System on Continent

"For this reason the Grand Trunk Railway has been pressing that negotiations be continued until a final decision had been reached. The Minister of the Interior (Mr. Meighen) has already given the final results of the negotiations, and I wish now to refer a little more particularly to the position in which the government will be placed. When the Grand Trunk System is controlled by and included in the Canadian National Railway system we will have the following mileage owned, operated and controlled by the Dominion government: Grand Trunk Railway System, 5,357 miles; Grand Trunk Pacific Railway system, 2,816 miles; Canadian Northern Railway system, about 10,000 miles; National Transcontinental Railway system, 1,810 miles; Intercolonial Railway and branch lines attached thereto, 1,800 miles; or a total of 21,783 miles. That is 22,000 miles in round numbers will be owned and operated by the government of Canada. That constitutes the largest railway system owned or controlled by any one corporation on the American continent. It has always been practically understood by the people of Canada that if we wished to have a transcontinental system that could be operated economically, like the Canadian Pacific, it was necessary that the Canadian National Railway should be joined up with the Grand Trunk Railway in eastern Canada, and the two together would make a complete and economic railway system. The Canadian Northern had a splendid system from Port Arthur to Montreal, but without any branch lines or feeders in Ontario and Quebec.

"If we did not take over the Grand Trunk Railway, the government would have to spend, within the next three, four, or five years, between one hundred and two hundred million dollars in order to provide terminal facilities, branch lines and connections with other roads in the eastern provinces, and even then we would have as competitors the Canadian Pacific and the Grand Trunk. These expenditures will not be necessary if we take over the Grand Trunk. The interest charges alone on the cost of duplication of lines, construction of terminals and operating expenses would be five and a half million dollars annually if we did not acquire the Grand Trunk.

"The Canadian Pacific Railway is one of the best-managed systems in the world. It is operated on a purely business basis, and they will not allow their employees to remain in their service unless they work in the best interests of the company. That is the way the Canadian National Railways should be operated, and I have been carrying on that policy with the system we now have. I have had very little interference or requests from anyone, other than to carry out that policy with regard to the Canadian National Railways. I sometimes fear, however, that a little outside influence is being used when I see questions on the order paper of the House of Commons asking for information that will be of value to our competitors. The policy of absolute confidence in the management of the Canadian National Railways must be continued when we get the Grand Trunk Railway. We must run it on the same basis as the Canadian Pacific runs its lines. The C.P.R. has done a great work for Canada, and the fact of the government owning and operating a system competing with that of the C.P.R. should not allow of an unfair advantage being taken of the C.P.R. We must compete fairly for traffic, and must not use our influence unfairly against the C.P.R. All the railways in Canada will be under the jurisdiction of the Dominion Board of Railway Commissioners, and no preference will be given to the Canadian National. The Canadian Pacific are opposed to the government taking over the Grand Trunk. They fear complete public ownership. They opposed the acquisition by the government of the Canadian Northern, and they will oppose the taking over of the Grand Trunk much more strenuously. The only alternative would be to hand all railways of Canada over to the C.P.R., and the people would not stand for that."

The Minister estimated that the interest charges would amount to seven million dollars on the debenture stock and two and one-half millions on the guaranteed stock. Losses on the G.T.P. would be five or six million dollars annually for some years to come. On the other hand the acquisition of the Grand Trunk would save money by rendering unnecessary the erection of terminals for the National Railways.

During the subsequent discussion in the House it developed that the number of shareholders of the Grand Trunk is 180,000, and that though the government would own the stock it could still operate the leased roads in the United States, and use the Portland Terminal. Hon. N. W. Rowell, president of the Privy Council, expressed the opinion that the only hope of success was in developing the country and increasing the traffic. Referring to present negotiations, he said: "I know there are two classes of people opposed to this proposal to acquire the Grand Trunk. One of the opponents is the other great transportation system in this country, the C.P.R. I don't blame the C.P.R. for being opposed to it. They are within their rights, but I don't agree with their opposition. The men interested in the C.P.R. know that public ownership of railways in this country cannot be a success unless we have the Grand Trunk lines in eastern Canada and merge them with other Canadian National lines. The government's investment in the Canadian National system would not prove satisfactory without the acquisition of the G.T.R. and its branches in eastern Canada, but the opposition of the C.P.R. is no reason why the government should not go ahead and do what it believes to be in the best interests of the country. Quite apart from any principle of public ownership, it is a national necessity that if we want to make our national railways pay we should acquire the lines of the Grand Trunk, and opponents of public ownership should not allow their views to prejudice them against taking over the G.T.R. and imperilling the national system of railways. I know there are a group of Montreal men that are opposed to it, but west of the Ottawa River the people are three to one in favor of it, and I imagine that if you got a little east of Montreal you would find many more people in favor of it."

MORE HYDRO EXTENSIONS PLANNED

The Ontario Hydro-Electric Power Commission has made application to the provincial government for two orders-in-council to permit of further steps being taken in connection with the proposed system of radial railways in the province. The one order-in-council is to permit the commission to enter into negotiations with the Detroit United Railway for the acquiring of the properties of the Sandwich, Windsor and Amherstburg Railway Co. and the Windsor-Tecumseh Co., which also include the electric distribution systems in the municipalities of Windsor and Sandwich. The amount involved is over $2,000,000. The second order-in-council is to enable the commission to have by-laws submitted to the electors of the several municipalities on the line of the proposed railway from Hamilton to Elmira, via Galt, covering the estimates and agreements for the construction and operation of the line.

Organization and Progress of 1919 Victory Loan

Large Subscriptions Totalling over Fifty Millions Already Promised — General Organization of all Canadian Provinces—Finance Minister will Open Campaign in Winnipeg

OVER fifty millions in large subscriptions to the 1919 Victory loan have already been promised, according to a statement made by J. H. Gundy at a meeting of the Toronto Honorary Committee on October 15th. In all cases the amounts equalled or exceeded the subscriptions last year. The meeting was also addressed by J. W. Mitchell, chairman for Toronto; E. R. Wood, chairman of the Dominion Executive; Sir Edmund Walker and Brig.-Gen. John A. Gunn.

The heads of Victory Loan committees in the counties of Ontario were brought together at a meeting in Toronto on October 16th. G. H. Wood, chairman for Ontario, and other members of provincial committees led the discussions which took place.

Organization for all Provinces

The officers in charge of the loan in the various provinces are given below. In some cases the personnel of the general committees is given in full.

Province of Prince Edward Island.—Executive Committee—C. H. B. Longworth, chairman; J. O. Hyndman, Percy Pope; chairman finance, F. R. Heartz; chairman special subscriptions, W. F. Tidmarsh; chairman publicity, J. P. Gordon; chairman counties of King's and Queen's, W. R. Rogers; chairman Prince county, Neil McLeod, K.C. Headquarters, Eastern Trust Building, 156 Richmond Street, Charlottetown, P.E.I.

Province of Nova Scotia.—Executive Committee—G. S. Campbell, chairman; S. A. Howard, secretary (National City); R. H. Metzler (F. B. McCurdy Co.); P. R. Jack (A. M. Jack and Son); W. B. Miller (Royal Securities Corporation); H. M. Bradford; R. W. Elliott (Nova Scotia Trust Co.); B. G. Burrill (Standard Bond Corporation); W. F. Mahon (W. F. Mahon and Co.); W. I. McDougall (Eastern Securities Co.); H. C. Caughtry (McDougall and Cowans). Publicity Committee—J. R. McLeod, chairman (F. B. McCurdy Co.). Special Names Committee—B. G. Burrill, chairman (Standard Bond Co.). Finance Committee—G. S. Campbell, chairman; H. C. Caughtry, A. F. MacKintosh.

Province of New Brunswick.—General Committee—Chairman, T. H. Estabrooks, St. John; vice-chairman, Hon. P. J. Venoit, Fredericton; secretary, S. A. Thomas, St. John; C. H. Peters, J. M. Robinson, F. M. Keator, Senator W. H. Thorne, E. R. Machum, H. P. Robinson, F. B. Ellis, Hon. W. E. Foster, Jas. MacMurray, N. L. McGloan, R. D. Paterson, W. E. Anderson, S. E. Elkin, M.P., F. C. McNeill, A. R. Mackenzie, St. Stephen; W. B. Snowball, Chatham; Percy Burchill, Newcastle; N. A. Hanson, Perth; Capt. R. Bennett, Hopewell Cape; Hon. J. A. Murray, Sussex; F. O. Creighton, Woodstock; Dr. Puddington, Grand Falls; J. L. Hutchinson, Richibucto; Angus McLean, Bathurst; F. W. Sumner, Moncton; Hugh Carr, Campbellton.

Executive Committee—T. H. Estabrooks, C. H. Peters, S. A. Thomas, R. D. Paterson, J. M. Robinson, W. E. Anderson, Jas. MacMurray, F. M. Keator, N. L. McGloan, F. C. McNeill, H. P. Robinson.

Advertising Committee—H. P. Robinson, chairman; W. E. Anderson, secretary.

Finance Committee—T. H. Estabrooks, C. H. Peters, S. A. Thomas.

Special Subscriptions Committee—T. H. Estabrooks, S. A. Thomas and the District Chairman. Any three to constitute a quorum.

Auditor—P. F. Blanchet.

Province of Quebec.—Executive Committee—Joint chairmen, A. P. Frigon, F. G. Donaldson; joint secretary, J. P. L. Stewart.

Finance Committee—Chairman, A. P. Frigon.

Publicity Committee—Chairman, E. M. Emery.

Business Committee—F. G. Donaldson, chairman.

Island of Montreal.—Hon. chairman, Rt. Hon. Lord Shaughnessy, K.C.V.O.; hon. vice-chairman, E. W. Beatty, K.C.; Zeph. Hebert; J. W. McConnell; chairman, P. P. Cowans; vice-chairmen, J. W. Ross, Rene T. Leclerc; treasurer, A. D. Anderson; secretary, Rufus C. Holden.

Employees' Committee—Chairman, Lt.-Col. I. P. Rexford.

Publicity Committee—Chairman, J. N. McKim.

Features Committee—Chairman, F. W. Stewart.

News Service—Chairman, J. Murray Gibbon.

Finance Committee—Chairman, H. R. Drummond.

Speakers' Committee—Chairman, Geo. H. Montgomery, K.C.

Special Subscriptions Committee—P. P. Cowans, chairman; Robt. Adair, H. W. Beauclerk, A. J. Brown, K.C., F. G. Donaldson, A. P. Frigon, Zeph. Hebert, Rene T. Leclerc, Maj. H. B. MacDougall, J. W. McConnell, Jno. C. Newman, Jno. W. Ross, Lorne C. Webster, E. W. Beatty, K.C., W. E. Black, Jas. Carruthers, F. C. Fairbanks, Edwin Hanson, I. W. Killam, F. W. Molson, J. M. Mackie, Wm. M. Master, Maj. W. P. O'Brien, Hon. J. M. Wilson.

Province of Ontario.—Executive Committee—G. H. Wood, chairman; G. Tower Ferguson, vice-chairman and chairman finance committee; W. L. McKinnon, secretary; F. G. Lawson, assistant secretary; Harry L. Stark, treasurer; Col. F. H. Deacon, chairman employers' committee; Gordon T. Finch, vice-chairman employers' committee; W. A. MacKenzie, chairman organization committee; D. J. McDougald, vice-chairman, organization committee; C. W. Fleming, chairman business committee; F. J. Coombs, chairman publicity committee; W. C. Brent, vice-chairman publicity committee; J. H. Gundy, chairman special subscriptions committee; J. W. Mitchell, H. R. Tudhope.

Ex-Officio Members—E. R. Wood, chairman, Dominion Executive; A. E. Ames, chairman, Dominion Administration and Finance; J. H. Gundy, chairman, Dominion Special Subscriptions; W. N. McIlwraith, chairman, Dominion Publicity; W. S. Hodgens, chairman, Dominion Business.

Publicity Committee—F. J. Coombs, chairman; W. C. Brent, vice-chairman.

Employees' Committee—Col. F. H. Deacon, chairman; Gordon T. Finch, vice-chairman.

Special Subscriptions Committee—J. H. Gundy, chairman; W. E. Wilder, secretary; R. A. Daly, secretary.

Business Committee—C. W. Fleming, chairman.

Finance Commtitee—G. Tower Ferguson, chairman; Harry L. Stark, treasurer.

Organization Committee—W. A. MacKenzie, chairman; W. J. McDougald, vice-chairman.

Province of Manitoba.—Executive Committee—Sir Augustus Nanton, chairman; C. C. Ferguson, vice-chairman; Harry Ford, treasurer; J. A. Anderson, secretary; Hon. Edw. Brown, J. M. Black, Peter Lawe, W. H. McWilliams, R. T. Riley, Robt. McKay, G. M. Black, W. J. O'Neill, A. N. Strang, J. A. Thompson, W. R Allan, C. S. Riley, W. H. Gardner, D. L. Rossins.

Finance Committee—R. T. Riley, chairman; Hon. Edw. Brown, G. C. Wainwright, Sir A. M. Nanton (ex officio), Harry Ford (ex officio).

Nominating Committee—Sir A. M. Nanton, W. R. Allan, E. D. Martin, W. H. Gardner, G. M. Black, J. A. Anderson.

Propaganda Committee—J. E. Botterill, Hon. Edward Brown, W. H. McWilliams.

Publicity Committee—J. M. Black, chairman; C. C. Ferguson, Harry Ford, J. A. Anderson.

Province of Saskatchewan.—Provincial Executive—Hon. chairman, Hon. C. A. Dunning; chairman, D. M. Balfour;

FUEL SITUATION CRITICAL FOR CANADA

THE possibility of a widespread strike of coal miners in the United States, coupled with the fact that the supply of coal already is none too large, again brings home to us the unsatisfactory position of a large part of Canada as regards fuel supply. Thoughtful Canadians who have given this question consideration continually urge the necessity of developing all domestic resources; A. V. White, consulting engineer of the Commission of Conservation, has especially advocated the further use of the water powers of the St. Lawrence. Our large purchases of coal in the United States are one of the most important factors keeping New York exchange at a high premium.

A circular issued a few days ago by the Canadian Railway War Board advises that fuel stocks be laid in just as early as possible. The circular says in part:—

"Canada's main sources of coal supply are, roughly, four in number. The Pacific coast is supplied from Nanaimo, Washington, and, to some extent, Alberta; the prairie provinces receive their logical supply from the Alberta and British Columbia mines; sections of eastern Canada are taken care of by the Nova Scotia fields; but the chief supply, and almost the entire amount of anthracite coal, comes from the various mining regions of the United States. As it is in eastern Canada that the density of population and industrial development is highest, a coal shortage in the United States has very serious aspects for a great proportion of Canadians, and for a heavy percentage of their industries.

"The coal supply situation on the Pacific coast and in the maritime provinces may be dismissed as being reasonably satisfactory. On the prairies a serious shortage exists. The fuel year in the Alberta coal-fields commences on April first. Last year, which was by no means a record year for coal-producing efficiency in the west, there had been shipped between April first and the second week in September 1,313,421 tons of 'commercial' coal—as distinguished from coal for railway service. In the same period of the present year only 529,522 tons of 'commercial' coal had been shipped. The volume of railway coal shipped was equally low by comparison. This shortage on the prairies was, and is, extremely serious. In pre-war years a certain amount of anthracite found its way to the Canadian west, via Ontario, from the American fields. This movement was cut off by war conditions last year, and this to Canada was thus increased materially, so that to-day there are approximately 43,000 Canadian box-cars in the United States as against 19,000 American box-cars in Canada; a net balance of 24,000 cars due Canada and unlikely for some time to be available to this country. This figure, it should be observed, is equal to over 16 per cent. of the total Canadian box-car supply.

"While this loss of cars to the United States has been checked and will ultimately be rectified by the return of the Canadian cars, serious additions to the volume of traffic to be handled by the Canadian roads are imminent. The shipment of coal from the western Canadian mines since the beginning of the fuel year, on April 1st, is to date, only one-third of the amount forwarded in the same period year. Movement by rail is correspondingly delayed and cars will be detained in the west accordingly. More serious still is the prospect that American ports will be closed this winter to Canadian exports. Sixty per cent. of Canada's export grain usually passes out by American ports. This will remain to be handled across Canada to Montreal, St. John and Halifax in Canadian box-cars—adding one hundred and fifty per cent. to the volume of export grain now taken care of through the ports of the Dominion, and adding much more than 150 per cent. in terms of car-mileage.

"The seven thousand new freight cars built since last year are not one-third of the number now detained in the United States. The additional requirements for coal carrying and for the wheat trade—if the proposed American action is taken—will be extremely serious. At this time of year too, comes a heavy movement of perishable farm produce, moving before the cold weather will necessitate using special cars. Yet, in the face of these factors, the average load per car in Canada has fallen three tons!

"The very serious attention of all Canadian shippers is called to this fact. It means that where eight cars were formerly required, nine are now necessary! Where 160 tons of tare-weight were thrown upon an engine for every 216 net tons of freight, there are now 180 tons! Labor scarcity, once the excuse for the light loading, is no longer a fact. It is important in the interests of the country, that the heavier loading practices be restored. Railway efficiency is part of your factory, mine, mill or warehouse efficiency!"

RETRAINING THE SOLDIERS

CRITICS have said that the Canadian system of vocational training for returned soldiers might be broader and might touch a larger proportion of the men. At present some 12,000 veterans are taking the courses. It must be remembered that there is no compulsion in this matter. Only those who apply voluntarily receive the advantages. Great numbers of the returned men are efficient artisans. Others are good office men or experienced in salesmanship. Some belong to the liberal professions. A goodly proportion of the healthy veterans enter civil life by their own exertions and are "making good." There is a proportion of "drifters" also who, perhaps, do not realize the advantages of the special training courses offered.

Taking all these facts into consideration, and remembering that many veterans do not apply until they have had a few months' rest, or until the advantages gained by friends may give personal knowledge of the scope and the value of the training, the roster of 12,000 is large. The best proof of this assertion is found in a comparison with the situation in Great Britain. There about 4,000,000 men were enlisted, eight times as many as were in the Canadian Expeditionary Force. If the same proportion of applications were made in England as in Canada, there would be over 90,000 men under training. The actual number of veterans taking the English courses is only 15,000.

Much of the criticism of the work in Canada has been unsoundly based. Generally speaking, the Dominion has a better organized and more efficient plan of re-education than any other nation engaged in the war. It is supported by the proceeds of the Victory Loan. Every Canadian who buys Victory bonds may be assured, whatever his political opinions, that the work of re-establishment is a pressing need, and that it will be of the utmost advantage in the complete repatriation of returned men.

DWELLING HOUSE ASSESSMENTS IN ONTARIO

AT the last session of the Ontario Legislature an Act was passed providing that the assessment of small dwellings might be partially reduced. The amending Act says:—

"The council of a city, town or village may, with the assent of the electors qualified to vote on money by-laws, pass a by-law providing that taxes and rates, except for school purposes, on dwelling houses assessed for not more than $4,000, shall be levied and imposed on such percentage of the assessed value as may be thought proper, but not on a less percentage than the following:—

"(a) On dwelling houses assessed at not more than $2,000 on not less than 50 per cent. of the assessed value; (b) on dwelling houses assessed at not more than $2,500 on not less than 60 per cent. of the assessed value; (c) on dwelling houses assessed at not more than $3,000 on not less than 70 per cent. of the assessed value; (d) on dwelling houses assessed at not more than $3,500 on not less than 80 per cent. of the assessed value; (e) on dwelling houses assessed at not more than $4,000 on not less than 90 per cent. of the assessed value."

While no municipality has thus far availed itself of this power, yet such action has been considered by several. Such a system of exemptions would be a novelty and municipal councils are naturally cautious where important political considerations are involved. This legislation is, however, fundamentally unsound, because it does not recognize the fact that progressive taxation is essentially personal, and because it exceeds the limit of prudent social reform.

The principle of progressive taxation is now recognized in the levying of income taxes, but it cannot be applied to property taxes because the possession of land or of improved real estate, is no measure of ability to pay. Even if these exemptions, therefore, could be limited to those who actually occupied the houses in question, the increased tax rate which would have to be levied on other property would be an injustice to the man who chose to live in apartments or in a portion of a larger house. The exemption, it will be noted, does not apply to land, and taxes on improvements must ultimately be shifted to the consumer.

The efforts being made to increase the use of small dwellings, of which this legislation is one example, is an unwarranted inroad into the sphere of personal liberty. Minimum standards of cleanliness and sanitation should be strictly enforced in all classes of property, but there should be no dictation nor pressure as to what kind of a dwelling a man should occupy. The application of the legislation rests with the municipalities, and the effects should be carefully considered before action is taken.

In submitting a report on the effect which the application of this Act would probably have on Toronto, the City Assessment Commissioner stated that the exemptions would total $48,539,058, and the loss in taxes would amount to $999,904; this would require an increase of about one and three-quarter mills in the tax rate. The reductions would be approximately as follows:—

House assessment.	Number affected.	Present assessment.	About reduction.
$2,000 or less	64,093	$ 69,193,915	$34,596,894
$2,001-$2,500	8,764	20,285,760	8,114,296
$2,501-$3,000	4,479	12,670,295	3,801,088
$3,001-$3,500	2,229	7,271,075	1,454,215
$3,501-$4,000	1,385	5,725,650	572,565
	80,593	$115,146,695	$48,539,058

The Toronto municipal abattoir cost $450,000, and the city has already lost $236,000 on it during the few years of its operation. Finance Commissioner Bradshaw recommends that it be sold. "I cannot get away from the idea," he said at a meeting of the Board of Control on September 30th, "that it is an institution supported by the taxpayers for the benefit of eighteen to twenty people." And still public ownership advocates speak of operating public services for the benefit of the public.

* * * * *

Guelph, Ont., has for many years past been a centre for public ownership propaganda in Canada. So far as the Chamber of Commerce is concerned, however, public ownership should stand upon its feet. At a meeting held on October 10th, the Guelph Chamber of Commerce passed the following resolution: "That all property, real or personal, in the province of Ontario, owned by governments, municipalities, or commissioners, and operated as public utilities, should be subject to municipal assessment and taxation in the same manner as if the said property were owned by private persons."

* * * * *

Organization of labor commenced with highly skilled trades and gradually extended downwards. Now the clerical and professional workers threaten to organize, recognizing that the strength of the unions has during the past three years enabled them to secure, for organized labor, conditions relatively more favorable than those enjoyed by unorganized workers. In Japan even the beggars have formed a union. A New Jersey newspaper says: "There seems to be but one thing to do to complete the prevalent madness. Let's cap the climax by advising the children to organize against their parents, housewives to organize against their husbands, *paterfamilias* against the whole blooming household, and let lawyers, doctors, and members of the judiciary create unions and pin their faith to the walking delegate who will cheerfully tell them how much work they shall do in a day and in what manner they shall perform it. Let all of us, professional men as well as mechanical workers, throw our individuality into the maw of unionism and all hands become cogs in a gigantic machine guaranteed to kill natural incentive to excel in our particular line of endeavor." The difficulty is that when all classes have taken their turn at the hold-up process we will all be farther behind instead of ahead.

MUNICIPAL HAIL INSURANCE NOW UNPOPULAR

Saskatchewan Farmers Criticize System—Losses Heavy This Year, and Excess Tax Rate Necessary

THIS year farmers of Saskatchewan who entered into the Municipal Hail Insurance scheme must pay not only the four cents per acre levied in 1918, which was a year of moderate losses, but an additional levy on seeded acreage, as authorized by the legislature at its last sessions. This is bringing forth many objections, and petitions have been circulated for signatures, asking that votes be taken to decide on a repeal. This subject was taken up at a meeting of the Saskatchewan Municipal Hail Insurance Association, held early this month, and a review of the scheme has been issued by E. G. Hingley, secretary of the association. It says:—

"Municipal hail insurance was first asked for by the Grain Growers' Association. Resolutions asking the provincial government to provide legislation for such a system was passed at the annual conventions of the Saskatoon Grain Growers' Association in 1909 and 1910. After the 1910 convention had endorsed the principle of optional municipal hail insurance the provincial government passed the necessary Act and the request became law in 1912.

Rate Originally Four Cents Per Acre

"The original Act provided four main points—The tax could not exceed four cents per acre upon all assessable lands; the indemnity could not exceed $5.00 per acre for a total loss of $800 if 160 acres of crop was totally destroyed; the provisions for the 'pro rata' payment of claims if the revenue received was insufficient to pay the claims in full. A very limited provision permitted the withdrawal of certain lands (i.e. unpatented homesteads and fenced pasture land). Before any municipality could come under the provisions of the act a by-law had to be prepared and voted upon by the electors of the municipalities at the annual municipal election. The popularity of the system was evidenced when after the municipal elections of 1912, it was found that 115 rural municipalities had passed the necessary by-law to come under the provisions of the Act.

"The year 1913 saw the first attempt to provide municipal hail insurance against loss by hail which had been made in any province in Canada or in any state in the United States where the premium was collected as a tax and where the crop was automatically insured without any further action on the part of the farmer and where he was only required to notify the head office when any loss was sustained. The years 1913, 1914 and 1915, passed over more or less uneventfully, the taxes were collected and the claims amounting to $1,700,000 were paid, still leaving a surplus. The fact that the area under cultivation in these years upon lands held by resident owners was not so large as at present and that the tax paid by all land owners who had no land under cultivation helped very materially to swell the total revenue without increasing the risk, no doubt helped to place the scheme upon its feet so that all claims were paid 100 cents in the dollar and a surplus accumulated at the same time.

Could Not Meet Claims

"When the summer season of 1916 opened the municipal hail insurance was in the position that if there was an extraordinary loss from hail the claims could not be paid in full as no increase in the revenue had been provided to meet the big increase in the acreage under crop. In the fall of 1916, the worst fears were realized when it was found that municipal hail insurance could only pay 40 cents in the dollar. Had no reserve been on hand the year's revenue would have only permitted a payment of 25 cents in the dollar. Public meetings were held, petitions were circulated, councils were interviewed, members of the legislature were inundated with letters and requests to provide for 1916 loss in full, and to make the system safe for the future. After a thorough canvass of the whole situation it was found to be impossible to provide funds for the full payment of the 1916 losses and the claims were all paid at the rate of 40 cents in the dollar.

"1917 was fortunately a year of a light hail loss and the claimants again received 100 cents in the dollar from the four-cent tax. In 1918, the losses were heavier, probably about the average, but with a limited tax of four cents per acre and a further increase in the crop acreage, owing to the call for further production, the claimants were paid 80 cents in the dollar as full settlement of their claims. The 1918 hail insurance convention, recognizing that the four cents rate would not in future years provide sufficient revenue to pay all the losses in full, adopted the following resolution practically unanimously: 'That this convention is in favor of the revenue of the association being increased by the continuation of the present flat rate of four cents per acre, together with an automatic seeded acreage assessment.' The provincial government acceded to the request and in February, 1919, legislation was passed permitting the association to 'fix an additional rate per acre to be levied on all the land of an owner under cultivation in excess of forty acres, such rate to be collected in the same manner as the flat rate.'

"It may be well to point out here that the Act and the affairs of the municipalities operating under the Act are administered by a board of directors who are all elected by the representatives of the municipalities attending the annual convention. The board of directors did not decide to put into force the powers necessary without first getting instructions from the annual convention.

Provided for Excess Rate

"The annual convention held in Regina, March, 1919, debated the matter very fully and finally adopted the following resolution: 'That this convention recommend to the board of directors that provision be made to levy a seeded acreage assessment if necessary to meet the losses and the expenses in full for the year 1919, provided such assessment does not exceed 25 cents per acre.' In accordance with the wishes of the convention the board decided that if an additional rate was necessary this year the same would be levied.

"The principal features of the Act in the spring of 1919 were these: The flat rate of four cents per acre would still be collected; an additional rate upon the cropped land would also be collected; the indemnity would remain the same, $5 per acre for total loss. The withdrawal privileges were still further widened. Any farmer could withdraw his land, paying no hail insurance taxes whatsoever and date of withdrawal was extended to the 15th of June, so that any farmer that had his crop blown out before that date could withdraw his land and escape payment of the tax when it was levied. A considerable number of farmers in different municipalities did withdraw their lands, some for the full period of ninety-nine years.

"The year 1919 proved to be a very disastrous year for hail losses. The heaviest storm occurred on July 1st, this storm cost the association over $1,000,000, the losses in nine municipalities amounting to over $900,000. The municipalities suffering the heaviest losses this year are those which have not during the past seven years sustained serious loss before, and they have provided a large proportion of the moneys used to pay the losses in previous years to the farmers in other municipalities. The most unfortunate part of the situation has arisen through so much crop having been destroyed by wind, drought, grasshoppers, insects and gophers. Some farmers cannot see why they should be called upon to pay hail taxes when they have no crop themselves, so that some other farmer may be paid for his hail loss. No doubt it will be a serious hardship to some farmers to pay the tax imposed, but how can they now be relieved when they did not withdraw their lands at the proper season?

"The taxes which are now imposed cannot be cancelled by either the council of the municipality or the association. To do so would be a breach of faith as there would not be enough taxes collected to pay the farmers who have sustained actual hail loss. If any taxes are cancelled because the farmers have no crop, then the only logical conclusion would be to cancel all the taxes, which would leave the 1919 claimants with 35 cents in the dollar as a settlement of their claims.

Bankers in Great Britain: The London Joint City & Midland Bank, Limited The Royal Bank of Scotland

PERSONAL NOTES

Capt. J. G. A. Raymond, M.C., who recently returned from overseas, and Lieut. Guy S. Clarkson, M.C., who has also just returned, have been appointed to the staff of the Equitable Life Assurance Co. at Winnipeg.

Mr. S. S. Weaver, for some time past Ontario agency manager of the Continental Life Insurance Company, has been appointed eastern superintendent, with jurisdiction over all the company's agencies east of Fort William.

Mr. F. J. Buller, treasurer of the Canadian National Railways, has resigned to accept the position of vice-president and manager of the Canadian Steel Tire and Wheel Company. Mr. Buller has been connected with the Canadian Northern and Canadian National Railways for nearly twenty years.

Mr. T. Revillon, a director of the Canadian Mortgage Company, which is a French company doing business in Canada, with head office at Paris, France, is visiting the Canadian west and other parts of the Dominion to inspect the general business of the company, and to secure information for future guidance of the board.

Mr. H. A. Kenty, for several years past general superintendent of the Continental Life Insurance Company, has been appointed western manager of the company, with headquarters at Winnipeg. Owing to the steady growth of the company's business, a resident manager was considered necessary. Mr. Kenty was at one time provincial manager for Manitoba.

Mr. Thomas H. Bell joined the service of the Motor Union Insurance Company, Limited, on October 1st. Mr. Bell was for several years attached to the automobile department of the Employers' Liability Assurance Corporation, which latter position he resigned to take charge of the personal accident and sickness department of the London Guarantee and Accident Company.

Mr. J. E. Hall has been appointed general manager of the Vancouver Milling and Grain Company, in succession to Mr. H. T. Ceperley, who is retiring on account of ill-health. Mr. F. W. Rounsefell has been elected first vice-president, Mr. H. P. Chapman, of Seattle, second vice-president, Mr. Robert McKee appointed to the position of general manager, and Mr. John Cowan appointed secretary-treasurer.

OBITUARY

Mr. Alexander Dow, senior partner of the Dow, Fraser Trust Company, Vancouver, B.C., died last week.

Mr. George H. Lee, estate manager of the National Trust Company, died in Toronto last week. He was a barrister and 50 years of age.

Mr. Archibald Denny, Cornwall, Ont., manager of the Royal Bank of Canada until two years ago, when he was forced to resign on account of ill health, died there at his home last week.

Mr. John B. Ferguson, a well-known business man of Toronto, died this week. For the last ten years Mr. Ferguson was an investment broker in the city in partnership with J. Y. Ormsby. He was president of Canadian Woollens, Limited.

Mr. J. R. Genin, president of the Montreal Chambre de Commerce, died recently in that city. The late Mr. Genin came to Canada from France in early life, and was engaged continuously in mercantile life, taking an active part in the work of the Montreal Chambre de Commerce.

Mr. S. Bruce Harman, Toronto, resident manager of the London Fire Insurance Company, and the London Lancashire Life Assurance Company, passed away at his home in that city this week. He was prominent in mercantile and insurance circles in Toronto for over fifty years.

BANK BRANCH NOTES

Further Extension of Union Bank—Merchants Bank Erecting New Main Toronto Office

The following is a list of branches of Canadian banks recently opened:—

Hamilton, Ont. (Locke and Herkimer)	Bank of Hamilton
Fort William, Ont.	Bank of Toronto
Alcomdale, Alta.	Union Bank of Canada
Solsgirth, Man.	Union Bank of Canada
*Deepdale, Man. (Roblin)	Union Bank of Canada
*Margaret, Man. (Minto)	Union Bank of Canada
†Duchess, Alta.	Union Bank of Canada
†North Edmonton, Alta.	Union Bank of Canada
Summerland, B.C.	Dominion Bank
Port Rowan, Ont.	Sterling Bank of Canada

---

*Sub-branches.

†Formerly sub-agencies, now independent.

Bank Appointments

Mr. C. F. Gibson has been appointed manager of the Bank of Hamilton branch recently opened at Locke and Herkimer Streets, Hamilton, Ont.

The following appointments have been announced by the Union Bank of Canada: To be managers, W. R. Brown, at Montreal, Que. (St. Catherine Street); G. H. Campbell, at Ottawa (Bank Street); W. G. B. Clarke, Caledon, Ont.; J. A. Cuthbert, Orillia, Ont.; D. Dewar, Kinburn, Ont.; J. F. Freure, Roseneath, Ont.; J. Gallagher, Englehart, Ont.; H. L. Lee, Shelburne, Ont.; D. M. McGregor, Wheatley, Ont.; S. H. Neale, Campbellford, Ont.; F. E. Page, New Dundee, Ont.; H. R. Roach, Swalwell, Alta. To be acting managers, J. H. Burford, Laporte, Sask.; C. A. Farrell, Dundalk, Ont.; J. F. B. Gibb, Coleville, Sask.; G. T. Gregory, Rimbey, Alta.; A. J. Livingston, Winkler, Man.; H. H. McKinnon, Redland, Alta.; R. B. Robinson, Piapot, Sask.

Other Bank Notes

The Sterling Bank of Canada has taken over the business of C. S. Killmaster and Son, Port Rowan, Ont., one of the few private banking firms which have remained in business.

The Merchants Bank of Canada will erect a building at 12 King St. W., Toronto, at an estimated cost of about $200,000. The building will be for the Toronto main office of the bank.

The Canadian Bank of Commerce is erecting a new stone building on Portage Avenue, Winnipeg, opposite Eaton's store, at the cost of about $100,000. Other branches are being erected at Headingly and St. Norbert, Man.

The Bank of Toronto has purchased the north corner of the Borbidge block, next to the post office, Sudbury, Ont., and will build a new branch next spring.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week of October:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
October 7	$3,965,000	$3,458,000	+ $ 507,000

Grand Trunk Railway.

October 7	$1,611,553	$1,460,738	+ $ 150,815

Canadian National Railways.

October 7	$2,102,281	$1,789,180	+ $ 313,101

E. J. Thom, for many years inspector for the Union Assurance Society, of London, Toronto, has resigned to enter the adjusting business.

BRITISH COLUMBIA INSURANCE IN 1918

Fire Insurance Losses Over Five Dollars Per Capita—Practically All Lines Show Growth

DURING the year 1918 there were 109 companies doing fire insurance business in British Columbia, of which all but one had Dominion licenses, according to the report of W. G. Garrett, superintendent of insurance for British Columbia, which has just been issued. Seven fire companies entered the province during the year, and one withdrew. Both premiums and losses showed increases. The report refers to the fire prevention movement, and the formation of the B.C. Fire Prevention League. Work in the field of fire inquiry and inspection has been carried on by J. A. Thomas, who was appointed under the 1918 amendments to the B.C. Fire Insurance Act. Referring to fire insurance, Mr. Garrett says:—

"The fire statistics are not so satisfactory as during the past few years. There is a considerable increase in the number of fires and the amount of loss. The latter figures for the first time exceed $2,000,000, making an average loss per diem of over $5,000 and a per capita loss of $5.25, with 400,000 as a round estimate of population for the province. It should be observed that the losses shown comprise only losses covered by insurance. The difference between the two sets of figures, less the amount covered by unlicensed insurance, is absolute loss. The larger figures for 1918 I ascribe in part to a more complete series of reports and to the enhanced values of property destroyed. With regard to reports, I may remark that the persons and companies responsible are filing them more promptly and in better shape than in the past. It is hoped that the importance of keeping these comprehensive statistics will be fully realized in order that effective steps may be devised for a reduction of the fire waste. In particular, I should like to see a still further reduction in the number of fires of 'unknown' origin. Experience gained by investigation will, no doubt, tend to produce that result. It is hoped, moreover, that the campaign for thrift and conservation will bear fruit and the figures for 1919 show a distinct improvement. No one who examines the statistics can fail to be struck by the numerous instances where carelessness only was the reason for the fire. Many of these fires are no doubt insignificant in themselves, but reviewed in the aggregate and with a realization of the danger attaching to every fire they are extremely serious.

High Losses in Districts

"Analysing the figures and comparing them with 1917, we find that the losses in the district municipalities are mainly responsible for the increased loss. Burnaby, Delta, Maple Ridge, Point Grey, and Richmond show considerably higher figures; the last named due to the conflagration at Steveston. Among the cities Vancouver's fires and losses alike record increases, accounting for 75 per cent. of the total losses in city municipalities. Its per capita loss is higher than the average for the province. The showing of Victoria is highly creditable. In the table setting forth the causes of fires the increase in number of fires due to exposure is largely attributable to the Steveston fire. Sparks from different sources caused 25 per cent. of the total number of fires. There were four lives lost by fire during the year.

"Fires involving a loss of more than $30,000 numbered eleven, and their importance may be estimated by the fact that their total loss amounted to $1,296,000, or over 61 per cent. of the year's loss. The balance of 39 per cent. was caused by 933 fires. These figures are striking, but tell the same story as any similar statistics for Canada and the United States. The eleven fires occurred as follows: Six on lumber-mill premises, one each in a shipyard, a factory, a warehouse, and a store, and one at Steveston. The practical importance of proper inspection is well illustrated by the Steveston fire, which was due to a defective stove-pipe. But the moral of these figures as a whole is that primary and continuous attention should be directed by all parties to the necessity of keeping plants of all descriptions free from fire hazards.

"Five formal fire investigations were held under the 'British Columbia Fire Insurance Act' as amended in 1918, and although no case of arson came to light, there is no doubt that the inquiries were beneficial. Apart from these, Mr. Thomas has conducted numerous investigations with the aim of preventing fires, and in that field has achieved fine results."

Life and Other Lines

The number of insurance companies, other than fire, doing business was 107, of which 88 had Dominion licenses; 16 companies came in during the year, 2 withdrew, and 5 supplementary licenses were issued. There is now over $100,000,000 of life insurance in force in the province. Premiums for miscellaneous insurance showed an increase of $200,000; automobile, marine, sickness, and accident insurance all showed increases, while employers' liability showed a decline.

Mr. Garrett's report concludes as follows:—

"The legislature at its session this year carried into practice the principle of uniform legislation by enacting a new 'Fire-insurance Policy Act.' The statutory conditions contained in the act are practically identical with those in force in Alberta, Saskatchewan, Manitoba, and Ontario. The other amendments to the statutes relating to insurance do not call for special mention.

"Allusion should be made to the resolution of the legislature that 'early consideration by the government of legislation with respect to State Health Insurance . . . is desirable.' It is a matter fraught with great potentialities for both success and failure. State insurance of this kind has, of course, been in existence for many years in Germany and for some few years in England, but in America it is a novelty. There has been recently much debate and close investigation by our neighbors across the line, and in some states the question has been put to the vote of the people; for example, in California, where it was rejected. The arguments pro and con are naturally very numerous and the considerations involved of grave importance. It may be asserted that the experience of England and Germany is of little value in determining whether such proposals are practicable in this province. The conditions of the population and the area affected, both leading factors, are so different. There is a large body of opinion in the United States adverse to such state insurance, and the most notable element of the opposition is the American Federation of Labor, which is absolutely hostile. The public here seems to be little acquainted with the subject and its ramifications, and the hope may be expressed that the press will thoroughly investigate it before urging either its adoption or rejection.

"The losses by fire having during recent years grown to such perilous dimensions, legislation respecting prevention of fire was enacted in April last by Parliament. Provisions have been embodied in the criminal code, making negligence under certain circumstances a crime. The amendments are so important that I feel they should receive as much publicity as possible.

"Last year I ventured to suggest in my report that the insurance acts referred to should be consolidated, and the experience of another year has confirmed the view I then entertained.

"There is, too, an increasing number of insurance agents in favor of legislation which would make a license a necessary qualification before any one could act as such agent. Other provinces and many states have a law of this kind, and I believe I am correct in saying that everywhere it has proved of high value, not only to the public, but also to the insurance fraternity. The subject deserves early consideration.

"The importance of the insurance companies as investors in the province is pointed out in two tables furnished in the report. The life insurance companies as at the end of last year have invested $16,179,154.61, of which $6,826,824.75 is invested on mortgages and $9,352,329.86 is invested in other securities. While fire and miscellaneous insurance companies have invested $6,588,459.70 of which $3,201,399.01 are invested in mortgages and $3,387,060.69 are invested in other securities."

THE HUMAN ELEMENT IN BANKING*

Banker Should Show Personal Interest in Affairs of Depositor as Well as Those of Borrower

By J. S. Hiam
Superintendent of Branches, Union Bank of Canada

THE human element in banking is a matter of vital importance to us all and one to which we have not given sufficient thought in the daily performance of our duties as bankers of the present day. As bank managers you are all familiar with the fundamentals of sound banking; you know that it is the constant aim of every banker to increase his deposit business to the maximum, although it is in the discount department where profits are made.

You know when you receive an application from John Smith for a loan of $5,000 after an analysis of his financial statement and the security offered whether he is entitled to it on the basis submitted. You know that Thomas Brown who has just deposited $10,000 in your savings department is a valuable addition to your list of depositors, but do you know why either of these men or both of them, have come to your bank to do business? In the case of the borrower, John Smith, your answer would undoubtedly be "yes," but in the case of Thomas Brown, the depositor, the answer is not so certain unless you have instructed your staff on the paramount importance of the manager coming in personal contact with every customer of any importance on the bank's books, except in city branches where such duties are delegated to the assistant manager or to the accountant in accounts of minor importance.

Opportunities for personal contact of the manager with customers or prospective customers should be availed of at all times with a view to closer relations, and if necessary should be created by the manager with a view to keeping himself posted and showing a friendly interest in the business or hobbies of his customers. It is these little attentions—the human element—which make a satisfied customer. He feels that his business is appreciated and the time spent by you in this way in humanizing your business will return big dividends as a satisfied customer is the best advertisement the bank can have. Every man has friends, some of whom are possibly desirable in a business way, and your satisfied customer will take delight in bringing them to *his* bank.

To my mind there is no method which will produce results of substantial proportions within a reasonable time to better advantage than by your satisfied customers doing missionary work for you, and I have never known a case that did not produce good results when the subject was properly broached. A great many banks have an air of stiffness, aloofness and superiority that makes the average man doing business with them feel that he is undergoing an operation every time he discusses a loan or some other matter in connection with his business at the bank. They are your opportunities; study them but do not underrate them. Profit by your opportunity and let your watchword be—*Service.*

Knowledge an Asset

Remember the "Human element"—a display of personal interest or the granting of a trifling concession may result in securing an attractive account. The successful manager is the man who is a close student of nature. The depositor of to-day may be the borrower of to-morrow. Personal contact with him will probably reveal the fact that he will require a loan later on. What is the record? How about the human equation? In the meantime you can get a line on him, size up the proposition and give him valuable service as a result of your investigations and perhaps make a staunch friend. Of course it goes without saying that the branch manager who does not know all about his client's business is not in a position to discuss loans with that client.

This is the day of efficiency, and it is not only preached but practised in every walk of life, including banking. Old-fashioned banks used to have big fences hiding practically the entire organization, and while the modern bank to a great extent has gotten away from this fencing in of its employees a number of them have "atmospheric" fences. This is largely I think accounted for by bankers taking themselves and their work too seriously, which is something the public as a rule do not understand.

Character and Credit

I cannot help but feel that the younger managers are inclined to over-emphasize the value of financial statements without putting enough value on the character and integrity of the man. Morgan used to say that he would rather lend a man money on personal character than he would on a financial statement—one man with a million dollars in assets may be entitled to 100 per cent. more borrowing power than another man with the same amount of assets. If the granting of credit were always followed solely upon a man's financial statement there would be a great many wealthy manufacturers and business men who would never have been able to get a start.

In conclusion let me touch on the "atmosphere" of the bank. The successful bank manager must be a keen student of human nature, and the student of human nature knows that the atmosphere of his bank is all-important. It should be one of welcome and service to depositor and borrower alike. If the manager is affable and desirous of serving and instructs the individual members of his staff personally along the right lines, then the whole organization will reflect a spirit of welcome and service, as after all an organization is only the reflection of the attitude and policy of the man at its head. The tendency has been to neglect this all-important "human element" in banking, but you can rest assured that it is the one big factor in successful banking to-day and I ask you to prove it to your own satisfaction by putting it into effect to-day and you will find that the more consideration you show to the "human element" in your business the greater your success and the net results—a truly efficient service.

OGILVIE FLOUR MILLS, LTD.

The annual report for the year ended August 31st, 1919, showing profits somewhat lower than last year, was presented to the shareholders at the annual meeting last week. Flour milling profits were $649,777, compared with $832,910 in the previous year, while those "from other sources" were $982,738, against $1,122,504 a year ago. The total for 1918-19 amounted to $1,632,516, compared with $1,955,414 in the preceding period, a decrease of $322,898. After payment of preferred and common dividends of $815,000, surplus amounts to $817,516, against $1,140,414 last year and $593,847 in the preceding one. With the addition of surplus from 1917-18 there remained to be carried forward to profit and loss $2,148,108. From this was taken $903,592 to be applied to special contingent account, rounding out this to $2,500,000 in addition to the rest account of a similar amount.

Net earnings on the common stock outstanding were at the rate of 59.7 per cent., compared with 72.6 per cent. last year, 48.7 per cent. in 1917, 25.4 per cent. in 1916, and 55.1 per cent. in the excellent year of 1915. In the balance sheet, working capital (surplus current assets) was shown as $7,379,006, against $6,664,499 in 1918 and $3,684,800 in 1917. Investments are down $800,000, being $5,780,568 against $6,575,149. Holdings of wheat and flour are shown at $638,269 against $1,462,916, a substantial reduction. Cash, however, more than doubled, being $2,226,123 against $1,078,472.

At the annual meeting, R. R. Dobell, western manager of the company, was elected to the directorate, filling the vacancy created by the death of George E. Drummond. Other directors and officers were re-elected.

COMMUNITY TRADING

Failure of Many Schemes is Accounted For Largely by Resentment Towards Paternalism

By A. B. Barker

IT is reported that the experiment in Community Trading for its employees, inaugurated some years ago by the Interborough Rapid Transit Co., of New York, is about to be abandoned on account of lack of support from those it was intended to benefit. In view of a number of similar plans being put in operation in this country, it would be interesting to know the real reasons for the failure.

The company established a number of grocery stores at convenient points, for the purpose of furnishing its employees and their families with groceries at wholesale prices. Staples only were dealt in. Sales were for cash, and there were no deliveries, but passes were issued to the wives of employees to enable them to visit the shops without expense. The company paid the rent of the stores, clerk hire and other operating expenses, and also supplied the capital. It was estimated that this saved the patrons some 30 per cent. on purchases, and to restrict the privileges of the plan to employees and their families, a system of identification cards was in use. At first the patronage was large, but gradually it fell off, and now the company finds that the percentage of men availing themselves of the privilege does not warrant the plan being continued.

If the stores had been established and carried on for the owner's profit, like the old company stores, where the employees were forced to trade or lose their jobs, the lack of interest would be easily understood, but in this case the only object of the scheme was to benefit the employees.

With the high cost of living, one would have thought that the saving under the system would ensure support, and the failure may have been due not to any flaw in the conception of the plan, but to faults developed in putting it into actual practice. Unconsciously, the company may have run counter to some factors in human nature, possibly insignificant in themselves but which nevertheless were powerful enough to nullify a well-meant effort.

Men naturally resent any paternalism, no matter what material benefits are promised, and the suspicion of a "my man" attitude is fatal to the success of any scheme calling for co-operation.

In the mining sections of the west up to a few years ago the company store and the company boarding house were features of the working conditions, until compulsory trading with either was abolished by law. Many mines, however, after the passing of these laws, maintained boarding houses on their properties for such men as cared to use them, but they were as a rule found to be unsatisfactory for everybody, in spite of the fact that the service and food were usually better than in the independent boarding houses. Constant association above and below ground intensified any disputes and quarrels between the men and sapped discipline, and the presence of foremen and shiftbosses at all times was a source of irritation. On the other hand it was found that living away from the mine and its influence and mixing with the men from other properties, helped to create a certain clannishness among the men of any one mine. They might "grouse" among themselves, but, to an outsider their organization was the best, just because they belonged to it, and they were perfectly willing to back their opinions in any manner necessary.

It was simply one phase of that attitude of mind, known to military men as the regimental spirit, without which a battalion is merely a number of men dressed alike and nothing more.

Anyone experienced in handling men knows what it is, though it may not be explainable on logical grounds. It is, however, an element in human nature which can be relied on to show itself under certain conditions, and any scheme which involves dealing with men in a body, whether the object is welfare or exploitation, must adapt itself to it, in order to have any chance of success.

LIFE INSURANCE AGENTS OF QUEBEC

At the annual meeting of the Life Insurance Agents of Quebec, held on September 24th, the following officers were elected for the ensuing year:—President, Victor Lemieux; 1st vice-president, H. Morin; 2nd vice-president, E. Roy, Levis; secretary, P. H. Dubar; assistant secretary, L. H. Thibault; treasurer, L. Miville; executive committee, V. R. Lemieux, H. Morin, E. Roy, P. H. Dubar, L. Thibault, L. Miville, M. Monaghan, A. Lesage, P. H. Montreuil, D. Hurteau, W. Delaney.

A EULOGY OF CREDIT

"Some one has said 'credit is to business what mortar is to a wall; it is the adhesive material with which commerce is cemented,'" says the September "Teller," issued by the Sterling Bank of Canada. "The humblest citizen, as well as greatest manufacturer, feels the power and recognizes the influence of credit. It enters into the life of every business man in this country.

"Credit is indispensable; and whether it be given in the way of money or merchandise, it augments the public wealth, advances the prosperity of the country and insures progress so long as it is given judiciously and wisely. On the other hand if it be extended to persons who are unworthy or who become embarrassed because of their lack of character, ability, honesty or capital, the result is extremely detrimental.

"To extend credit properly and safely requires the highest exercise of mental powers, for many complex questions are to be solved and oftentimes the credit-man is called upon to make investigations which are both delicate and intricate in their nature. In considering the responsibility of a borrower, it would seem that his total net worth should be ascertained. If the amount of money which he has invested in the business is small and he is likely to be a large borrower, his crédit should be based proportionately.

"We should also consider his record and standing in the community as a merchant. Has he ever failed? If so, what were the circumstances? What are his habits in private life? What settlement did he make with his creditors? Is he extravagant—does he live beyond his means? Is he a gambler or speculator, or is there anything that would lead him to spend more money than he can safely take from his business. Look into his business record also. Does he pay his bills promptly, and how does he stand in the trade which he represents? These points, we believe, should define the line of credit to be granted.

"We should also consider his claims for credit. What are the characteristics of the borrower? Has he ability? Has he a reputation for honesty? Does he show that his business is prosperous? Is he up and abreast with the modern methods of doing his business, or is his business on the down grade? And, finally, what is his present financial condition? This should be gathered in a statement over his signature giving in detail his assets and liabilities.

"The credit-man's duties are arduous and exacting. He is not only called upon to perform considerable detail work, but his mind must be ever active and alert, in order not only to keep his files closely up to date, but also to be continually posted as to the present situation of his debtors. A credit-man should be of an investigating turn of mind, and should have an agreeable yet indomitable obstinacy; and when he has determined not to trust a man, he should strictly adhere to his conclusions. A credit-man should always endeavour to get the unfavorable information regarding his customer, as facts of favorable nature take care of themselves."

On October 2nd the North Dakota Banking Board ordered that the Scandinavian American Bank of Fargo, N.D., should be closed. Among its assets are items totalling $432,956, due from organizations connected with the Non-Partisan League.

VANCOUVER HARBOR COMMISSIONERS

The Vancouver Board of Harbor Commissioners has been reorganized with the appointment of Lieut.-Col. G. H. Kirkpatrick as chairman, Major A. R. Mackenzie and Mr. Samuel McClay. The first two mentioned are engineers and will take the places of Messrs. F. L. Carter-Cotton and James Fullerton, who retire. Mr. McClay continues on the board.

THE SOLDIERS' RE-ESTABLISHMENT COMMITTEE

Sir Thomas White, whose statements regarding the national finances before the Soldiers' Re-establishment Committee of the House of Commons were reported in *The Monetary Times* last week, also reviewed the position he, as Minister of Finance, had taken with reference to vocational training and other measures. "It seems to me," he said, "that the attitude of the government has been of a very generous character with regard to the matter of gratuities. I know I was desirous, and I think all the members of the government were desirous, that so far as pensions were concerned they should be placed upon as fair a basis as possible, that the disabled men should be well taken care of, and that every effort should be made by the government to re-establish in civil life the man who went overseas. With regard to the gratuity, when that matter came up, the amount being a very large one, naturally it was given very close attention by myself as well as by other members of the government. So far as I know it is the largest gratuity, by far, which has been given by any of the nations engaged in the war. Now, I am very glad of that. I think the country can afford not only to be just but to be generous in regard to the returned men. I have always held the view myself that to the extent that it is necessary the government should not hesitate to expend in this last year, which, as I have said, is a war-year, such amount as is necessary to prevent hardships and to enable the men to get re-established in civil life.

"The principle of the gratuity now asked for has not appealed to me. It is indiscriminate; it applies to all; and in my judgment—and I am only putting forward my own views—the amount is so great, having regard to the general financial condition of the treasury, that I was quite unable, as minister of finance and acting-premier at the time, to see that the government should consider it favorably. That was my view about it then, and it is my view now."

Following upon the statements of Sir Thomas White, R. W. Breadner, Commissioner of Taxation, gave evidence on October 9th, as to the possibilities of further taxation. He thought it would be better if the income tax rates were made lower in Canada than in the United States, because capital and immigration are essential to this country. Mr. Breadner stated his belief that if the income tax had been in effect from the beginning of the war the revenue would not have been increased by twenty million dollars. He also said that a wrong impression existed as to the number of really wealthy men in Canada, there being fewer than most people supposed.

Several witnesses were called from industrial concerns which had employed men taking vocational training. Among these witnesses were W. G. Ellis, general manager of P. W. Ellis & Co., Ltd., manufacturing jewellers, Toronto; G. M. Wilson, superintendent of motive power, Grand Trunk Railway; R. W. Gifford, superintendent of the Toronto works of the Massey-Harris Co.; C. Kyle, of the Angus shops of the C.P.R.; F. T. Downs, assistant to the general superintendent of the Toronto Carpet Co. In practically every case the Canadian system was highly approved.

The Quebec Court of Appeal a few days ago upheld a decision of the Superior Court against the General Fire Insurance Company of Paris, to the effect that the use of gasoline in a boathouse was not a violation of the clause which prohibited gasoline being taken into the insured premises. The court held that this was unavoidable.

NEWSPRINT PROBE AGAIN POSTPONED

The investigation of the paper controller, R. A. Pringle, K.C., into the price of newsprint was resumed on October 9th, but was immediately adjourned to a later date, probably about six weeks hence. The adjournment was on account of the official of the government, Geoffrey Clarkson, not having completed his re-examination of the books of the mills bringing the late costs up to date. It was stated that at least another six weeks would be required before these figures could be gathered and placed in presentable form. The reason for the re-examination of the books is to determine the manufacturing costs for different periods, other than that dealt with, from July 1st to November 30th, 1918, by the Judges of the Paper Control Tribunal, who fixed a price for that period at $66 per ton. A new order of the controller has ordered the continuation of the $69 price for the remainder of October. The adjournment was made with the consent of counsel for both sides. During the brief session it was intimated that in the event of A. E. Sharpe, auditor for the paper manufacturers being able to secure further figures, the case of the differentials between the mills will be dealt with during the interval.

MUST REIMBURSE MANITOBA GOVERNMENT

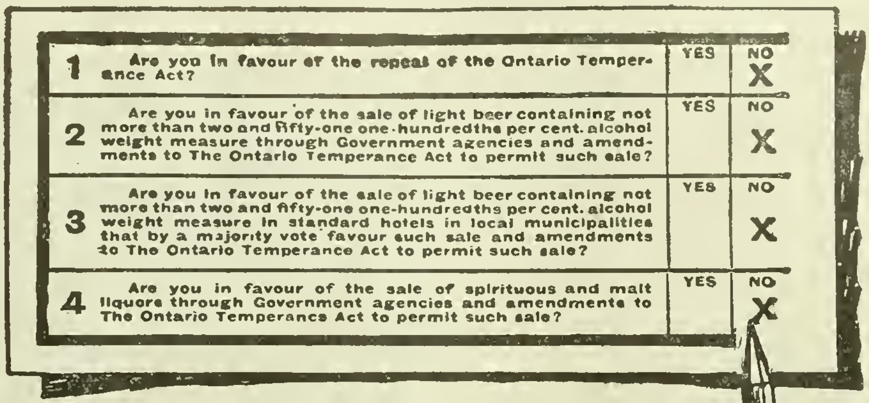
Thomas Kelly and Sons, contractors, must pay $1,207,351 to the Manitoba government, according to a decision of the Manitoba Court of King's Bench, issued on October 3rd. This is by way of refund for over-payments made on account of work done on the new legislative buildings. The history of the action brought against Thos. Kelly by the government dates back to the session of the public accounts committee in March, 1915, when the present government was in opposition. The opposition headed by Premier T. C. Norris and Hon. A. B. Hudson, demanded a Royal Commission to investigate the charges of graft made in connection with the construction of the buildings in the legislative chamber, and the latter staked his reputation that $800,000 had been wrongfully paid to Thos. Kelly. The day before prorogation the Roblin government announced the appointment of a Royal Commission to be headed by Chief Justice Mathers, and while the commission was in session the government resigned. The Norris administration assumed the reins of government in May, 1915. The Royal Commission found that Thos. Kelly had been overpaid, presumably some $800,000. There followed criminal suits against the ex-ministers and the civil action against Kelly for the recovery of the money.

The first hearing of the case resulted in a judgment that an appraisal board should be established to fix the amount of money that had been wrongfully paid. This board reported on May 25th, 1917, fixing the amount at $1,207,351. An application to appeal against the decision of this board was then made, and was denied in the judgment just issued. The board of appraisal appointed under the first judgment given by Justice Curran was composed of S. C. Oxton, deputy minister of public works, representing the provincial government; H. J. Burt, of Chicago, representing Thos. Kelly, and R. H. MacDonald, architect, of Montreal, as umpire. The purpose of the board was to come to an agreement as to the exact amount of money that had been wrongfully paid to Thos. Kelly, which decision under the judgment would form the amount that would have to be refunded by Kelly to the provincial government.

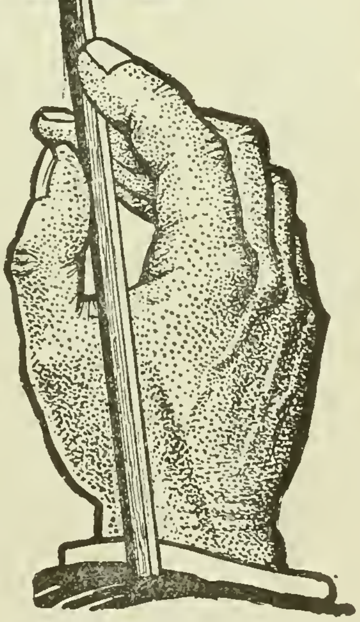
A transportation commission was a short time ago appointed in Toronto to consider taking over the street railway in 1921. It has now presented a report recommending the appointment of a committee of six members to formulate a policy for the purchase, and to run the railway when it is taken over. The members of the committee, the report states, should be the mayor, the finance commissioner, and representatives of labor, the Board of Trade, the Canadian Manufacturers' Association, and the Hydro-Electric Commission.

How to say "No!"

Mark Your Ballot with an X after Each Question under the word "No"



1	Are you in favour of the repeal of the Ontario Temperance Act?	YES	NO X
2	Are you in favour of the sale of light beer containing not more than two and fifty-one one-hundredths per cent. alcohol weight measure through Government agencies and amendments to The Ontario Temperance Act to permit such sale?	YES	NO X
3	Are you in favour of the sale of light beer containing not more than two and fifty-one one-hundredths per cent. alcohol weight measure in standard hotels in local municipalities that by a majority vote favour such sale and amendments to The Ontario Temperance Act to permit such sale?	YES	NO X
4	Are you in favour of the sale of spirituous and malt liquors through Government agencies and amendments to The Ontario Temperance Act to permit such sale?	YES	NO X



Above is an exact reproduction of the Referendum ballot, showing the correct way to Vote in order to sustain the Ontario Temperance Act as it stands.

Everybody should study the four questions and realize exactly what they mean. Do not be misled by the insidious demand for "light" beer.

The beer of the ballot is 118% stronger than the Ontario Temperance Act now allows, and over five times as strong as the limit allowed for beer defined as non-intoxicating in Great Britain and the United States.

Answer Each Question

1. Unless you vote on every question your ballot is spoiled.
2. You must mark your answer to each question with an "X" only. Anything else would spoil your ballot.
3. Unless a majority vote "No" on question 1 the bars will be restored and the sale of all kinds of intoxicants permitted.
4. Unless a majority vote "No" on questions 2, 3 and 4 the Ontario Temperance Act will become almost worthless.
5. The only SAFE course is to mark your ballot as shown above.

"No!"—Four Times—"No!"

No repeal; No government beer shops; No beer saloons; No government whiskey shops.—Four **X**'s, each under the word "No."

Comparative Income Tax Rates

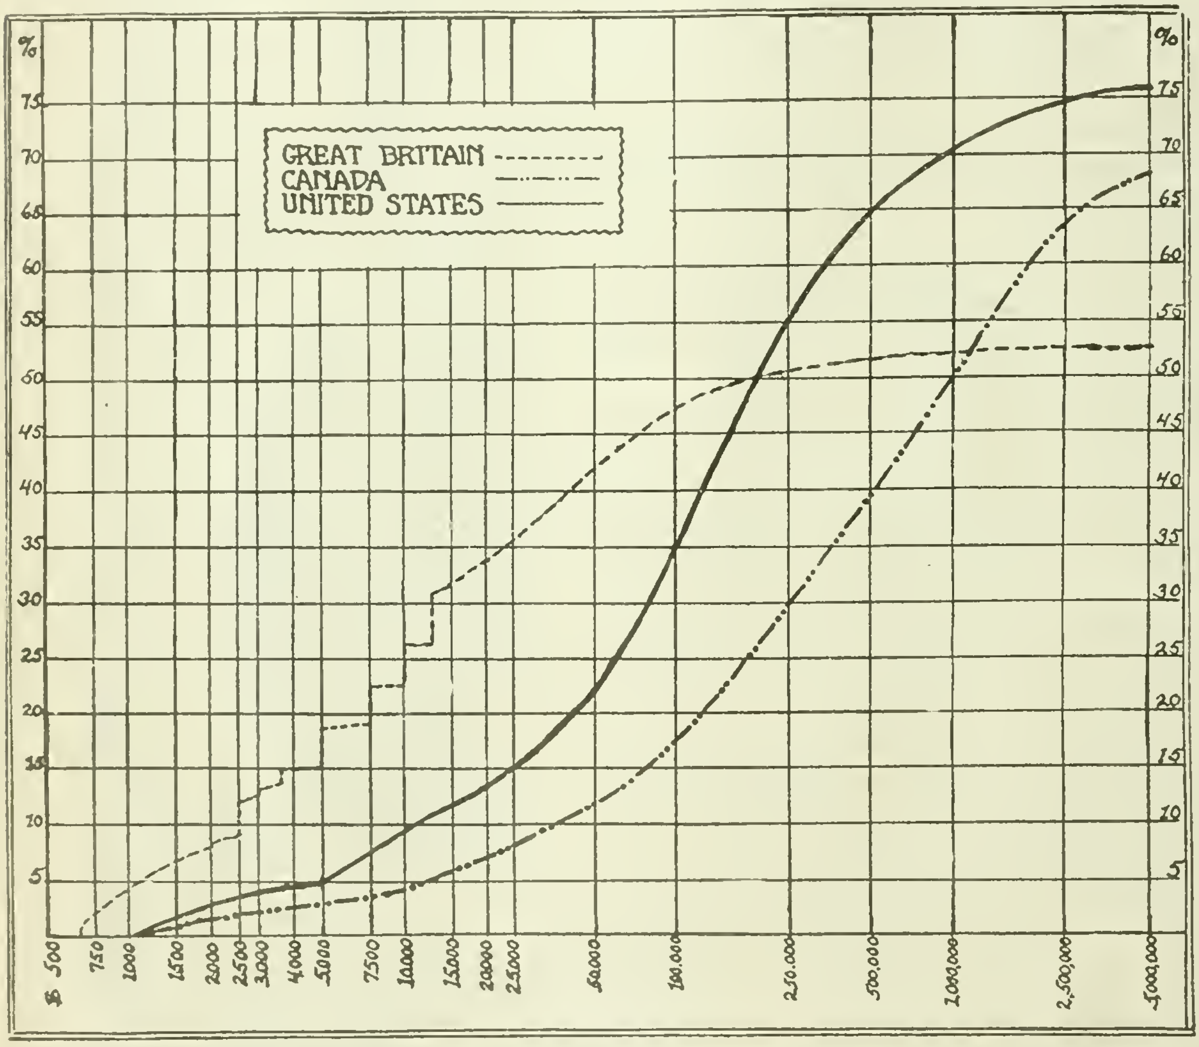
An interesting comparison of the effective rates of income tax imposed by Great Britain, United States and Canada is given in the October issue of "Commerce Monthly," issued by the National Bank of Commerce, New York. The chart illustrating the rates effective for 1918 in the United States and Canada, and for 1918-19 in Great Britain, is reproduced herewith. It is adapted from a report of the British Royal Commission on the income tax, and indicates the percentage of total income to which the tax on an unmarried individual with a given income amounted.

Discussing this comparison, "Commerce Monthly" says:—

"The contrast between the British and American income taxes is striking. Not only does the British tax become effective on much smaller incomes—at $650 in place of $1,000—but the standard rate, corresponding to our normal tax, is 30 per cent. The peculiar step-like progression evident in the British tax results from the graduation downward of this standard rate in the case of incomes amounting to less than $12,500. The American super-tax, which becomes effective on income in excess of $5,000, is graduated to a maximum rate of 65 per cent. on income in excess of $1,000,000. The British super-tax, on the other hand, becomes effective at $10,000 and reaches its maximum at 22½ per cent. of income in excess of $50,000. Consequently, for incomes below approximately $180,000, the percentage of tax to income is decidedly higher in Great Britain than in the United States, while the American tax is much more stringent than the British in the case of very large incomes.

"The Canadian income tax is more nearly like that of the United States than like that of Great Britain. The personal exemption is the same as in this country. The normal tax rate is four per cent. Super-taxes commence with income in excess of $6,000 and rise to a maximum rate of 50 per cent. of income in excess of $1,000,000. A unique feature of the Canadian income tax is the imposition of surtaxes in addition to the regular normal and super-taxes. These surtaxes are percentages of the total normal and super-taxes, graduated on the basis of the total income of the taxable person.

"Referring to the diagram, it should be noted that, in order to include a wide range of incomes within a reasonable compass, the divisions representing incomes are indicated on a logarithmic scale. This arrangement diminishes the spaces between the larger incomes, and its effect is to increase the steepness of the curves representing tax percentages. It does not, however, affect the validity of the comparison between the taxes imposed by the several countries."



RECIPROCITY NO LONGER OPEN TO CANADA

On October 9th the United States Congress repealed the Canadian Reciprocity Act, which had been passed in 1910, but had never come into operation. The reasons why the act was repealed were stated as follows:—

"First: Because the process by which it was prepared and enacted was unconstitutional. The president's power to negotiate with foreign governments exists nowhere outside of the treaty-making power and the treaty-making power does not extend to revenue measures. The action of President Taft was an encroachment on the constitutional prerogatives of the House to originate revenue legislation.

"Second: It violates the principles of uniformity in tariff legislation. It proposed to give Canada privileges denied to other countries. Such action carried to its legitimate conclusion with other countries would tend toward commercial wars, and perhaps even to wars by force of arms.

"Third: Even if it should be justified on other grounds, it was a terribly poor bargain which, had it gone into effect, would have injuriously affected the agricultural interests of our country."

DIRECTORS

President—Joseph Oliver, Pres. Oliver Lumber Co., Toronto, Ont.

Vice-Pres.—E. V. Tillson, Man.-Dir. The Tillson Co., Tillsonburg, Ont.; James A. Thomson, Gartshore-Thomson Co., Hamilton, Ont.; Geo. C. Goodfellow, Wholesale Lumber, Montreal, Que.

Sec.-Treas.—John W. Gordon, 120 Bay Street, Toronto, Ont.

ASSETS

49 Square Miles Standing Timber in British Columbia, having a stand, on a conservative estimate, of 500,000,000 ft. B. M., and 250,000 cords of Pulpwood. When manufactured the gross value of the lumber alone, at only $25 per M. ft. would be .... $12,500,000

LIABILITIES:

Capital Stock already Issued	$400,000	
Bonds Authorized and Issued	60,000	
		$ 460,000

This property was secured in 1908 by the Holding Company, and is turned over to this Operating Company at actual cost plus carrying charges in exchange for stock at par value. No cash is being paid. No commission or promotion expenses are paid or promised in connection with the transfer of this Property or the Organization of this Company. Shares paid for property are pooled for one year.

Entire proceeds of this offering will be used to equip a modern Sawmill Plant with a capacity of 100,000 ft. in 10 hours and to provide working capital.

Eighty per cent. of this timber is White Spruce, 10 per cent. each Jack Pine and Balsam. The cost to this company is only 75c. per 1,000 feet of lumber and 25c. per cord for pulpwood. 1" x 10" Mill-run Spruce wholesale, car lot price, in Toronto to-day is $46.00 per M. The last Government Sale in Northern Ontario brought as high as $22.50 per M. on the Stump.

Lumber and Timber values are soaring. Owing to lack of shipping, the world-wide demand for lumber is only beginning. THIS is your opportunity. NOW is the time to invest.

INVESTMENTS AND THE MARKET

British Columbia Electric Rates Investigation to be Handed Over to Railway Board —Kerr Lake Mines Report — Brazilian Earnings Up

Cape Breton Electric Co., Ltd.—A semi-annual dividend of $3 per share on the preferred capital stock and a dividend of $1.50 per share on the common capital stock of the company, have been declared, both payable November 1. 1919, to stockholders of record at the close of business October 15, 1919.

Trinidad Electric Co., Ltd.—The following is a statement of earnings of the company for the month of August, 1919:—

	Gross.	Net.
Railroad	$14,429.81	$3,116.20
Light and power	11,954.73	2,418.95
Ice and refrigeration	4,968.90	1,462.87
Total net		6,998.02

Demerara Electric Co., Ltd.—The following is a statement of earnings of the company for the month of August:—

	Gross.	Net.
Railroad	$7,553.43	$ 618.36
Light and power	8,582.28	4,256.96
Miscellaneous		314.23
Total net		5,189.55

Nova Scotia Steel and Coal Co.—After a shut-down of about 14 weeks, steel making at the company's plant at Sydney Mines, is once more in progress, and a portion of the open-hearth furnaces are producing ingots. Prospects for the winter are fairly bright. The company has some fairly large orders in view, but have not yet closed with them. Negotiations are in progress, however, and, providing no obstacles appear, contracts will shortly be completed.

Brazilian Traction, Light and Power Co., Ltd.—The statement of the company, in milreis, shows that the earnings in August, 1919, amounted to 9,734,000, compared with 9,491,000 for the same month last year. After deducting 4,849,000 for operating expenses, the net earnings stood at 4,885,000, compared with 5,210,000 last year. Aggregate net earnings from January 1st are 38,624,000, compared with 34,975,000 for the same period last year, an increase of 3,649,000.

Independent Quarries, Ltd.—The company, which has its office at Garson, Man., is offering for sale $30,000 of common stock. The authorized capital of the company is $250,000. Of this there is paid up $216,800. The company owns 205 acres 27 miles north-east of Winnipeg. This includes the townsite of Garson and one-half mile trackage on the main line of the C.P.R. Prospecting pits show this land to contain over 90 acres of stone. This has been tested and the engineer's report that it is 500 ft. to 600 ft. deep, sufficient to ensure a supply of stone for very many years.

Western Power Co. of Canada, Ltd.—August operating revenues of the company amounted to $42,108, an increase of 7.6 per cent., compared with August 20, 1918, and net earnings of $26,470, an increase of 7.7 per cent. There was included in operating expenses for depreciation in August the sum of $2,096. Twelve months ended August 31, operating revenues were $461,333, an increase of 1.8 per cent. over the same period in 1918, and net earnings of $294,285, a decrease of 5.7 per cent., compared with the same period of 1918, after making allowance for depreciation of $20,059.

Porto Rico Railways Co., Ltd.—The following is a comparative statement of earnings for the month of August, 1919:—

	1918.	1919.	Increase.
Gross	$ 92,945.22	$ 95,861.82	$ 2,916.60
Net	22,348.39	41,335.55	18,987.16
For eight months:			
Gross	$686,948.81	$750,327.87	$63,379.06
Net	293,713.41	285,424.54	*8,288.87

---

*Decrease.

Paton Manufacturing Co.—The company has given public notice that it will withdraw its shares from the official list of the Montreal Stock Exchange. The company, which is engaged in the manufacture of woolen goods, came into prominence some months ago during an investigation at Ottawa concerning the profits of corporations in relation to the high cost of living. No trading has been recorded for years. The shares listed total about 6,000 of the par value of $100, and are all closely held. The company has been on an 8 per cent. basis, and in the way of bonuses this year it declared a 2 per cent., paid in March, and a special 25 per cent. in 1933 Victory bonds, paid in March.

Kerr Lake Mining Co., Ltd.—The financial statement of the company for the year ended August 31, 1919, shows that the profits amounted to $956,258. The cost of production and development for the year was $257,626, while administration and general expenses amounted to $41,510. Proceeds from ore sales totalled $1,637,143. During the year $653,000 was paid in dividends. The report states that 2,382 ft. of development was done by drifting, crosscutting, raising and sinking, all of which failed to encounter new veins of importance, although commercial values were exposed in extensions of ore shoots, portions of which were previously located in known veins.

Northern Alberta Gas Co.—Another bid for Edmonton's support in a joint application to the Public Utilities Commission for a tentative increase in the gas franchise rates in the city, has been made to the council. The plan is to have the domestic rate increased to 35 cents and the power rate to 25 cents for three years. There would also be a clause providing for a minimum charge of 50 cents per meter per month. At the end of the three-year period, both the city and the company would go before the commission to enable that body to ascertain if any adjustment in rate was then necessary. If a company is unable to finance it within a period of six months, it would be prepared to have the rate revert to the franchise price of 25 cents.

British Columbia Electric Railway Co.—Owing to the fact that the company has a Dominion charter for its Lulu Island branch, it has been decided that the fixing of its rates is a matter for the Dominion Board of Railway Commissioners. This at least is the view taken by John Retallack, the provincial Public Utilities Commissioner, who has been investigating its claims for a six-cent fare. The investigation followed upon demands made by the employees for more wages and conciliation proceedings. At the last meeting of the Conciliation Board important evidence as to the financial condition of the company was given by W. G. Murrin.

Mr. Murrin made three statements to show why the company was not now in a position to accept the demands now made by the employees. The first he pointed out was that the company could not afford to pay. The return on the investment last year was 2.73 per cent. Second, the net income of $394,824 was only sufficient to pay 1½ per cent. on preferred stock and in the last five years no interest had been paid on ordinary stock. In the third place, he showed that the operations of the railway department in Vancouver, New Westminster and Victoria during the last year had resulted in a loss to the company of $271,265. He also pointed out that the company had signed the last agreement with the employees in order to save the six-cent fare, and that it was forced to work under conditions for which there was no precedent on the continent.

"The wage that the men are now demanding could not be covered by the six-cent fare," said Mr. Murrin. "An increase in the fare of two cents would be necessary to meet their demands. But there is a limit to what the public will agree to pay for transportation."

THE FARMER AND HIS BORROWINGS

Good Reasons Why to Borrow from the Bank is Better Than to Depend on Credit from Everyone from Whom He Purchases

"THE more you talk with farmers the more you are surprised how afraid they seem of the bank manager," says the September number of the "Teller," issued by the Sterling Bank. "One would almost believe there was a sort of conspiracy on the part of farmers to let the bank manager know as little as they possibly can about their business affairs. In fact, if a farmer finds it necessary to borrow a hundred dollars or so for a short time, he will in most cases, sooner borrow from some friend or some one who has a little money to loan rather than go to the bank for it.

"One of the most unfortunate things about farming is that so many of the purchases made are made on credit. A man will go to a sale in the spring and fall and buy a mower, or a cow, or team of horses, giving his note for six or eight months with interest. If he finds it necessary to do much buying and attends many sales, it isn't long before his notes get scattered all over the country, unless he is in the fortunate position of being able to pay cash. The farm implement dealer does most of his business, or a goodly share of it, on the credit basis, and no farmer need think that he can buy on time as cheaply as he can buy for cash. The whole farm implement business is based on credit sales, and it would be the greatest possible folly on the part of the manufacturer if he did not base his price on the manner in which the payments were to be made. John Smith goes to an implement dealer and buys a new binder, giving his note for the amount, half of it being payable perhaps after the crop has been sold in the fall, and the other half the following year. In the course of three or four years this thing becomes a regular habit, with the result that there is a constant worry on the part of those not in well-to-do circumstances about the notes that are scattered over the country.

An Example of Farmer's Credit

"The other day we met a young man who started farming for himself several years ago, and who has always done a cash business so far as the outside world is concerned, ever since he started. He believes that getting time on a thing is just like borrowing so much money from the man you buy the goods of, and he made up his mind early in the game that he would not be borrowing from everybody in the country. His method is very simple. When he first started farming he got acquainted with his banker and told him just what his financial circumstances were. He told him that he would probably find it necessary to do some borrowing from time to time, but that he wanted to do his borrowing all in one place, and that place was the bank. Ever since then he has pursued that same policy, never giving a sale note nor a note to an implement dealer. His banker knows him well and is kept posted from time to time on his financial circumstances. The farmer himself does not hesitate at any time to tell the banker just what his financial condition is, or what his prospects are. He believes that the banker is responsible for the use of the money in his care, and especially since it belongs to the depositors in the bank he must not loan it out unless he is absolutely certain that it will be repaid.

"Moreover, this farmer looks upon his banker, in a sense, as his financial adviser, although he may not trouble him for advice very often. He pays everything by cheque, and always knows where he stands. He never need owe anybody money except the bank, and if for some reason or other it becomes necessary to overdraw his account he pays the cheque and calls up his banker by telephone asking him to honor it when presented. This means that he has overdrawn his account, and must settle up with the bank by taking out a temporary loan for thirty or sixty days the first time he comes into town. This man has little patience with men who are always giving notes for whatever they have to buy. He pays cash for everything, and his banker is the only man, apart from himself, who knows what his financial circumstances are. A great many men get angry with the banker if they ask for a loan and are requested to give some account of their financial condition. They think that is none of the banker's business, but will go out the next day and give a note for $100, and perhaps scurry around in the crowd at a sale to get some one who will back their note, if the clerk of the sale does not happen to know and feel confident of their ability to pay.

"The Sterling Bank organization is making a special drive on farmers' business. In order to win the confidence of our farmer friends, we must show them that the bank's service means much more than a safe depository for keeping money. We must convince them that it pays to take the bank into their confidence, that it saves them time, trouble, worry and money. The farmer on his part must realize that bankers of necessity have to do things on the dot.

"Interest charges keep piling up every day the note is allowed to run, and they, therefore, expect those who borrow money from them to turn up on the very day that the note is due. If a man's credit is known to be good, however, and if the banker is on to his job, there is no reason why a note cannot be renewed. The principal thing is to remember when the note comes due and get it renewed. It is poor policy to let it run over a few days and then make some sort of a lame apology to the bank manager when one happens to find it convenient to get into town. It must be remembered that a vast share of this country's wealth is owned by farmers and a tremendous amount of the nation's business is agricultural business. As a banking organization we have to recognize that farm business is worthwhile business to handle. We can get more and more of it, the more and more we co-operate with the farmers and the more and more we show them how to co-operate with us."

INSURANCE LICENSES ISSUED

The following companies have been licensed to transact insurance business in the province of British Columbia:—

General Accident Fire and Life Assurance Corp., Ltd., to transact automobile insurance (excluding insurance against loss by reason of bodily injury to the person), head office, Vancouver.

The Liverpool Manitoba Assurance Co., to transact explosion insurance (including riot and civil commotion), head office, Victoria.

The Northern Assurance Co., Ltd., to transact accident, sickness and automobile insurance, in addition to marine insurance.

Westchester Fire Insurance Co., to transact explosion insurance (including riot and civil commotion), head office, Victoria.

China Fire Insurance Co., Ltd., to transact fire insurance, head office, Vancouver.

The Globe and Rutgers Fire Insurance Co., to transact inland transportation insurance, automobile insurance (excluding insurance against loss by reason of bodily injury to the person), and explosion insurance (except upon steam boilers, pipes, fly-wheels, engines, and machinery connected therewith or operated thereby), head office, Vancouver.

The following companies have been licensed to transact insurance business in the province of Quebec:—

The London and Lancashire Guarantee and Accident Co. of Canada, Toronto, to transact the business of guarantee insurance, accident insurance, sickness insurance, plate glass insurance, and automobile insurance has been extended to include the business of automobile fire insurance.

The Northern Assurance Co., Ltd., London, England, to transact the business of fire insurance, accident insurance, sickness insurance and automobile insurance has, this day, been extended to include the business of guarantee insurance and plate glass insurance.

The Girard Fire and Marine Insurance Co., Philadelphia, Pa., to transact the business of fire insurance, tornado insurance and marine insurance.

OUTSTANDING CHEQUE OF AN INSOLVENT FIRM

Recent Decision Affirms that it Is No Special Claim, And Holder Can Collect Only Proportional Amount

By M. L. Hayward, B.C.L.

In the case of Thompson vs. the Merchants Bank, decided by the Supreme Court of Canada during the present year, it appeared that one, Biggar, acting as trustee for the Canadian Agency, Ltd., bought a parcel of land in Alberta from one Eby, the purchase money being payable by instalments in the usual way, and Eby assigned his interest in the agreement to the Merchants Bank. The Canadian Agency, Ltd., transferred 40 per cent. of its interest in the land to Cairns and 10 per cent. to one, Evans. Evans was the Alberta manager of the Canadian Agency, Ltd., and also president of the Western Canada Mortgage Co. Cairns and Evans undertook to pay the amount of Biggar's liability to Eby under the agreement of sale, or to recoup Canadian Agency, Ltd., for whatever it might have to pay, and the Western Canada Mortgage Co. agreed to make advances to meet Cairns' payments.

On the 7th of June, $8,554.90 fell due under the agreement of sale, and of this sum Canadian Agency, Ltd., was entitled to be recouped by Cairns and Evans for $3,421.96 and $855.49 respectively, making 50 per cent. of the instalment due. The Canadian Agency, however, were short of money and Evans' personal cheque for $855.49, to cover his share and a cheque on the Western Canada Mortgage Co. for $3,421.96, to cover Cairns' share, were handed to Canadian Agency on June 6th in order that it might send its own cheque to the Merchants Bank at Battleford to cover Cairns' and Evans' share of the instalment falling due on the next day. These two cheques were deposited to the credit of Canadian Agency's current account in the Bank of Montreal at Edmonton on the 8th of June, and on the 6th Evans, as manager of Canadian Agency, Ltd., drew a cheque on the current account of the Agency on the Bank of Montreal for $4,277.45, which he sent to the Merchants Bank at Battleford, but stated in a letter which accompanied the cheque that it was a payment on behalf of Canadian Agency itself to cover its 50 per cent. of the June 7th instalment, and that Cairns and Evans had not provided funds to meet their shares.

In the meantime, however, Canadian Agency, Ltd., being an English company, the English courts had appointed a receiver of the assets of the company, and when the cheque was presented by the Merchants Bank payment was refused by the Edmonton branch of the Bank of Montreal on the ground that a receiver had been appointed. Later on a winding-up order was made against Canadian Agency, Ltd., and Thompson was appointed liquidator and defended the action with the Bank of Montreal.

Was Cheque a Trust Item?

The question for the decision of the Court was whether the face of the cheque standing to the credit of Canadian Agency, Ltd., in the Bank of Montreal was trust money in the possession of Canadian Agency for the specific purpose of paying Cairns' and Evans' liability to the Merchants' Bank, and therefore the property of the Merchants Bank—in which case the Merchants Bank was entitled to the payment of the cheque in full—or whether it was the ordinary case of a dishonoured cheque where the Merchants Bank would simply be paid so much on the dollar as in the case of an ordinary insolvency.

The decision of the Supreme Court of Canada was against the Merchants Bank on the ground that the money was not "impressed with a trust" in favor of the Merchants Bank, and that Canadian Agency, as the agent of Cairns and Evans, assumed nothing more than a personal liability to the Merchants Bank whose only remedy would be against Canadian Agency for damages for breach of contract.

"Nor can I regard the giving to, or the receipt of, the cheque by the Merchants Bank, followed by a presentation upon which it should have been accepted and paid as equivalent in legal or equitable effect to a transfer or payment of the money itself to that bank," said the Court. "To do so would be, in my opinion, to give to the dishonoured cheque the effect and operation of an assignment of money in the drawee's hands belonging to the drawer, or at least of a charge upon it. It has neither. Its wrongful dishonour gives no right of action to the payee against the drawee either for the money itself or for damages for such wrongful dishonour. There can be no charge in equity without an intent to charge. The cheque is merely a bill of exchange payable at the bankers. The giving of it implies neither an intention to assign the drawer's money in the banker's hands nor an intention to charge it. Unless the cheque be treated as amounting to an assignment of, or constituting a charge upon, these moneys, I cannot understand on what footing it can be successfully urged that its receipt and presentation and dishonour would produce the same legal situation as would result from the receipt of the money itself by the payee or a declaration by the banker that such money would be held in trust for him."

LUMBER AND PULPWOOD OF BRITISH COLUMBIA

Shares in Lumber and Pulpwood of British Columbia, Ltd., to a total of $400,000 are being offered by the company direct to the public. The details are given elsewhere in this issue. There is just one class of stock, and the only prior claim to the assets is an issue of bonds to the amount of $60,000. Stock to the amount of $400,000 is already outstanding, which will make the total stock issue $800,000.

The company owns a valuable timber reserve in British Columbia. Canada is now one of the few countries of the world which has extensive timber resources, and a large part of these resources are in British Columbia. With the increasing scarcity of timber and the increasing demand for paper and other products, such assets are certain to increase rapidly in value.

PACKERS' ORDER POSTPONED

At a sitting of the Board of Commerce held in Toronto on October 11th, it was decided to postpone the time when the packers' order should come into operation, from October 15th to November 1st. The order limits prices to the levels of March 10th last. Representatives of the packers pointed out that the selling prices must be based upon the cost of the meats when they were purchased (which is about six months previous), and that the supplies now on hand had been purchased at higher prices than those which were being sold on March 10th.

The amendment reads as follows:—

"The representatives of various packing houses having been heard with regard to the order of the 27th day of September:—

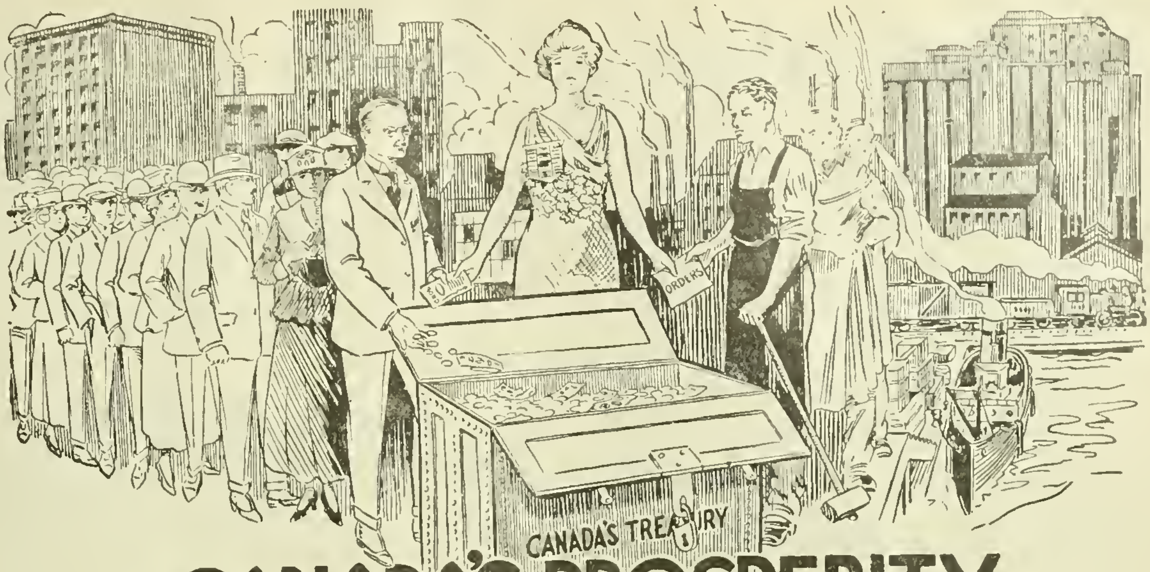
"The undersigned consider it expedient that the matter be fully considered by all the members of the board before the request for variations of the order be finally dealt with. Therefore for the present they simply order that the words 'fifteenth day of October' where they occur in said order be changed to the 'first day of November.'

"Meanwhile, as Mr. O'Connor joined in the original order, the representations will be conveyed to him in order that he may be given an opportunity to express himself regarding the application."

This order is signed by Messrs. Robson and Murdoch.

BRITISH COLUMBIA FIRE PREVENTION LEAGUE

While not much progress has been made by the British Columbia Fire Prevention League, organized about one year ago, it is expected that active work will start shortly. In conjunction with the provincial superintendent of insurance, letters were sent to municipal councils, schools, etc., urging the observance of Fire Prevention Day.



CANADA'S PROSPERITY RESTS WITH *YOU*

Continued Business Activity and Good Wages Depend on Canada's New Victory Loan

DURING the past four years Canada's prosperity has been due largely to orders from Great Britain and our Allies.

Canada was able to obtain these orders because she advanced credit to these countries.

Canada was able to give this credit only because you bought Victory Bonds.

Great Britain, with France, Belgium, and other Allies, are now prepared to place large orders with us for the products of our factories, farms, forests and fisheries—provided Canada again gives them credit.

Credit must be given if we are to have any guarantee of good times and good wages. But our workers on these orders must be paid their wages in cash; so, much of the money that you invest in Victory Bonds will go out in wages to Canadians.

You will be absolutely protected—you will get a good rate of interest and all of your money will be paid back at the time stated in the Bond.

Every cent will be spent in Canada and ultimately circulate to the benefit of all.

Canada can give this credit only if you again buy Victory Bonds.

If Canada is not able to give this credit, other countries will.

Therefore Canada's continued prosperity rests with you.

Victory Loan 1919

"Every dollar spent in Canada"

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

WHEN THE BROKER "FAILS UP"

How Excess or Insufficient Holdings Affect Claims of Customers to Amount of Their Securities

By M. L. Hayward, B.C.L.

"I BOUGHT 1,000 shares of 'steel' at 100 and sold 110," says the cheerful speculator.

"I reversed the process," admits another. "I bought at 110 and sold at 100."

"My luck was worse still," declares a third, "for I bought at 60 and when it was around 100 my broker who was carrying the stock went into bankruptcy."

The foregoing conversation may be duplicated any day in any financial experience exchange, and the last case presents a situation which is far too common.

Now, of course, it is common knowledge that if a business man enters into the populous and respectable state of bankruptcy his ordinary creditors are entitled to his assets in equal proportions, but where a bankrupt broker is carrying stock for a customer, steel, for instance, a different situation presents itself, and the customer will naturally ask himself the following questions:—

Did the broker have any steel stock in his possession at the time he went into bankruptcy?

If so, who is entitled to it, the receiver of the broker, or I?

Suppose, for instance, that the broker is carrying 100 shares of steel for a customer, and is not carrying any steel for any one else. When the broker goes into bankruptcy he has exactly 100 shares of steel in his possession.

In this case the customer would certainly be entitled to the stock, but things don't work out that way in real life. The broker is sure to have several customers interested in the same stock, and then the stock in his possession is sure to exceed or fall short of the number of shares he is carrying for his customers.

Where Holdings Exceed Requirements

Take the case where there is but one customer interested in a particular stock, but the stock in the broker's possession exceeds the number of shares he was carrying for the customer.

This point arose in a case where a broker was carrying 250 shares of a certain stock for a customer, and when the broker became bankrupt there were 350 shares of that particular stock in his possession. He was not carrying any of that stock for anybody else, and the question was whether the customer was entitled to claim his 250 shares out of the 350. The customer argued that if no other customer put in a claim, and there was more than enough to satisfy him, he would certainly be entitled to his 250 shares, while the receiver contended that there was not a sufficient identification or appropriation to the customer of his 250 shares.

The case went to the Supreme Court of the United States which held that the customer was entitled to his 250 shares of stock on the ground that, as the broker held the required quantity, the mere fact that he held more did not affect the matter, and that no more definite identification of the stock was essential.

"The certificates of stock were not the property itself," said the Supreme Court, "but merely evidence of it, and a certificate for the same number of shares represented precisely the same kind and value of property as another certificate for a like number of shares in the same corporation; and the return of a different certificate or the substitution of one certificate for another made no material change in the property right of the customer; and such shares are unlike distinct articles of personal property, differing in kind or value, as a horse, wagon, or harness, and stock has no earmark which distinguishes one share from another, but is like grain of a uniform quality in an elevator, one bushel being of the same kind and value as another.

"It is therefore unnecessary for a customer," the court went on to say, "where shares of stock of the same kind are in the hands of a broker, being held to satisfy his claims, to be able to put his finger upon the identical certificates of stock purchased for him. It is enough that the broker has shares of a certain kind which are legally subject to the demand of the customer. And in this respect the trustee in bankruptcy is in the same position as the broker. It is said, however, that shares in this particular case are not so identified as to come within the rule. But it does appear that at the time of bankruptcy certificates were found in the bankrupt's possession in an amount greater than those which should have been on hand for this customer, and the significant fact is shown than no other customer claimed any right in those shares of stock. It was, as we have seen, the duty of the broker, if he sold the shares specifically purchased for the customer, to buy others of like kind, and to keep on hand, subject to the order of the customer, certificates sufficient for the legitimate demands upon him. If he did this, the identification of particular certificates is unimportant. Furthermore, it was the right and duty of broker, if he sold the certificates, to use his own funds to keep the amount good, and this he could do without depleting his estate to the detriment of other creditors who had no property rights in the certificates held for particular customers. No creditor could justly demand that the estate be augmented by a wrongful conversion of the property of another in this manner, or the application to the general estate of property which never rightfully belonged to the bankrupt."

The above case, it will be noted, applies to the case of a bankrupt broker who had in his possession shares of stock in excess of the stock which he was carrying for the customer and where that customer was apparently the only one for whom he was carrying any of that particular stock.

Where Holdings are Insufficient

In another case, also decided by the Supreme Court of the United States, the circumstances were just the reverse and the decision is an important one.

In this case the broker purchased 100 shares of "copper" stock for A, 30 shares for B, 50 shares for C and 100 shares for D, but the broker had disposed of nearly all of this stock, and at the time of his bankruptcy he had in his possession a certificate for 100 shares of "copper" stock and no more.

It appeared by the evidence that this certificate for 100 shares was never marked or otherwise identified by the broker as the property of any particular person or customer, or placed in any envelope bearing any indication that it was held for the special account of any particular customer, and no memorandum appeared upon the books of the broker showing that the stock was purchased or held for any particular account or customer, and that the same was received not for the account of any particular customer but from the stock exchange clearing house in the usual course of business.

Then A and C claimed that they were entitled to the 100 shares of copper stock pro rata—100/280 to A. and 50/280 to C.

It was claimed that as the stock in the bankrupt broker's possession was not equal to the amount which he should have had on hand to protect his customers, and that the broker having sold the shares specifically purchased for these customers, had not bought others of like kind nor kept on hand sufficient certificates to cover the claims of the customers, the customers were not entitled to a pro rata share of the stock, but the Supreme Court of the United States held otherwise and allowed the customers their proportion of the stock.

"If," said the court, "a certificate for 280 shares of 'copper' instead of 100 had been on hand, the four customers for whom that number were purchased might successfully claim them. And merely because the one actually in the box represented insufficient shares fully to satisfy all is not enough to prevent application of the rule so far as the circumstances will permit."

The Bank of England has notified British banks that they will no longer be required to maintain foreign balances there. Existing balances will receive interest to September 19th.

PUBLICATIONS RECEIVED

Canadian Bankruptcy Act.—By Walter Edwin Lear, of Osgoode Hall, Barrister-at-Law. First edition, with index, price $1.50. Law Books, Limited, 152-154 Bay Street, Toronto. This is new law, and on a subject of vital interest to chartered accountants, liquidators and assignees as well as business men in general.

Who's Who and Why.—A new edition of this book has just been published, containing 1,524 pages, and is a valuable work of reference. The biographies are all Canadian, and are accompanied in many cases by photographs. It replaces a previous volume published in 1912, which had become out of date because of the changes which are continually taking place in the material given. International Press, Toronto, $9.75.

The Development of British Thought.—By M. M. Waddington, M.A., Ph.D. J. M. Dent & Sons, 194 pp. $1.50. The author traces the development of certain fundamental beliefs from 1810 to 1890, with special reference to German influences. "Where British thought has emphasized matter and the particular," he says in his conclusion, "German thought has shown the importance of form and the universal."

Employment Psychology.—By Henry C. Link, MacMillan & Co., 440 pp., with index, $2.75. Attention of industrial concerns has, during recent years, been directed towards reducing the continual expense of the labor turnover, which is much too great. It may be remedied in part by a more careful selection of employees, and Mr. Link's book, which records the results of studies made in actual industry, not merely in the psychological laboratory, will prove of much assistance. While the author aims at an elaborate system of tests and of training, yet many of his conclusions can be adapted to the small business.

Simple Principles of Investment.—By Thomas Gibson. Doubleday, Page & Co., New York, 191 pages with index, $1.50. This book is addressed primarily to the immense number of people on this continent who have had their first experience in investing, by purchasing war bonds. Mr. Gibson shows them how to choose wisely, now that they will soon have to look elsewhere for investments. The principal topics are discussed under the following heads:—(1) The Basic Principles of Investment; (2) What to Buy; (3) What Not to Buy; (4) When to Buy; (5) When to Sell; (6) Diversification of Investments; (7) General Influences; (8) Various Classes of Bonds; (9) Notes, Car Trusts, Acceptances, etc.; (10) Railroad Stocks; (11) Industrial Stocks; (12) Mining and Oil Stocks; (13) Discounts and Maturities; (14) The Employment of Securities as Collateral; (15) General Suggestions.

Census of Dyes and Coal-Tar Chemicals.—This report, issued as one among the publications of the United States Tariff Commission on industries affected by the tariff, is divided into three parts: First. A general summary of the development and present status of the manufacture of dyes and other chemicals derived from coal tar during the year 1918; statistical tables showing the production of coal-tar chemicals during 1918, as revealed by a special investigation made by the United States Tariff Commission; a discussion of the significance of the facts revealed by these tables; the interpretation of the 60 per cent. clause of the Act of September 8, 1916; expression of opinion by many consumers on the progress of the industry and tariff policy; employees, rates of pay and research work in the coal-tar chemical industry. Second. A historical review of the development of the dye industry in the United States since the outbreak of the European war, divided into five periods. Third. An appendix containing statistical tables showing imports and exports of coal-tar chemicals and imports of natural dyes; a list of manufacturers whose production during 1918 was reported to the Tariff Commission.

Polly Masson.—By William Henry Moore. J. M. Dent & Sons, 339 pages, $1.75. This is a political novel of the first rank. Mr. Moore courageously places his characters in the highest positions of state, and leads them into some of the most crucial questions of the day. His principal theme is the problem of race and language, his discussion of which in "The Clash," published earlier this year, aroused much interest. He goes beyond that in "Polly Masson," however. "The State," says one of his characters, "owns our forests, and has not protected the common wealth. The State owns our lakes, and has allowed them to be depleted of fish. Not even the poorest farmer has handled his acreage as badly as the United States and Canada have administered the reservoir of food in the Great Lakes. The State has handled, or rather mishandled, our vehicular highways. It has never made a success of its steam railways. The State has charged itself with education—and failed. But why go on? Everywhere the State has bungled, and still the people cry for more bungles." "The movement (free trade) is practically confined to the farmers and doctrinaires," says another, "and it is impossible to raise any substantial sum from them for politics. Each man's interest is small and each man's contribution corresponds to his interest. Like the income tax, the cost of collecting from the little fellows exceeds the amount collected. On the other hand, I can name a dozen men who, under free trade, would lose in one year more money than we shall require to defeat free trade."

EMPLOYMENT CONDITIONS IN CANADA

Reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labor show that, disregarding unemployment due to strikes, the volume of employment increased again during the week ended September 27th. Returns for the week show that 4,414 firms reported to the employment service, which firms had 640,900 persons on payroll as compared with 639,908 during the preceding week, an increase of 992 persons or .2 per cent. An increase of 1,667 persons or .3 per cent. was anticipated for the week ended October 4th. Of the firms reporting during the week ended September 27th, 2.143 were in Ontario, 968 in Quebec, 359 in the maritime provinces, 572 in the prairie provinces and 372 in British Columbia.

Returns for the week ended September 20th show that reports from 4,314 firms with 636,305 persons on payroll were tabulated. An increase of 3,754 persons of .6 per cent. was registered during that week, while a further increase of 2,102 persons or .3 per cent. was anticipated for the week ended September 27th. The actual increase for the week shows the anticipation not to have been fully realized.

The plus industries—those that registered net increases in the number of persons employed—with their respective percentage increases, were: Commercial and mercantile .3 per cent.; clay, glass and stone products .3 per cent.; chemicals 1.5 per cent.; metals .5 per cent.; textiles .2 per cent.; vehicles .6 per cent. and quarrying and mining 2.3 per cent. All of these firms registered increases during the preceding week as well, the gains in quarrying and mining, metals, chemicals and vehicles being the most noticeable for the two weeks. With the exception of vehicles, metals and commercial and mercantile all plus groups expected further gains during the week ending October 4th. Vehicles anticipated a big reduction for that week while metals and commercial and mercantile anticipated very little change.

The minus industries—those that registered net decreases in the number of persons employed—with their respective percentage decreases were: Building and construction .6 per cent.; lumbering .9 per cent.; food, drink and tobacco .3 per cent.; leather and leather goods .1 per cent.; pulp, paper and printing .5 per cent.; woodworking .2 per cent.; railway construction .5 per cent.; and miscellaneous .5 per cent. Railway operaton registered a nominal decrease only. With the exception of miscellaneous and pulp, paper and printing, all minus groups anticipated gains during the week ended October 4th. Lumbering with an anticipated gain of 1,239 persons or 4.2 per cent. expected the greatest increase.

INCREASE IN BUILDING PERMITS

Employment in the building trades, as indicated by the value of building permits issued in thirty-five cities, showed an increase during August last as compared with the preceding month, the total value of building permits rising from $8,174,869 in July to $9,622,887 in August, an increase of $1,448,018, or 17.7 per cent. All the provinces, except Alberta and British Columbia, reported increases in this comparison. As compared with the corresponding month in 1918, there was an increase of 91.8 per cent., the value for August, 1918, being $5,016,096. In this comparison, Nova Scotia and British Columbia were the only provinces to record declines, while substantial increases were reported in New Brunswick, Ontario and Saskatchewan. Of the larger cities, Montreal and Winnipeg showed increases both as compared with July, 1919, and with August, 1918. Toronto and Edmonton reported declines in comparison with the preceding month and increases as compared with the corresponding period of last year, while at Vancouver decreases are recorded in both comparisons. Of the smaller centres, Sydney, Moncton, Sherbrooke, Westmount, London, Port Arthur, Moose Jaw, Regina and Saskatoon all showed large gains both as compared with July and with August, 1918.

Life Insurance as Protection

The motive that prompted the inventors of Life Insurance was the desire to furnish protection. Savings and investment are invaluable accompaniments but the feature that sells Life Insurance is protection. That company confers the greatest benefit upon its members that gives "the greatest amount of genuine Life Insurance protection for the least possible outlay." This aim has ever been the guiding star of The Mutual Life Assurance Company. Following out the principle of co-operation as the Mutual has done means that the company allots the whole of its profit, from all sources whatsoever, to the policyholders thus reducing their expense for Insurance to actual cost—the only Canadian Company operating on this principle. The experience of the Mutual has fully justified the hopes of its founders who fifty years ago planned the institution on the basis of

Approved on behalf of the Board:
C. R. HOSMER,
H. S. HOLT,
Directors.

To the Shareholders:

We have audited the books of The Ogilvie Flour Mills Company, Limited, at Montreal, Fort William, Winnipeg and Medicine Hat for the year ending 31st August, 1919, and have obtained all the information and explanations we have required; and we certify that in our opinion, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs according to the best of our information and the explanations given to us and as shown by the books of the Company.

CREAK, CUSHING & HODGSON,
Chartered Accountants.

In his remarks to the Shareholders, Mr. W. A. Black, Vice-President and Managing Director, called attention to the fact that the profits for the year under review were less than those of the previous year by $322,898.26.

The Capital of the Shareholders invested in the business at the commencement of the year was $9,926,999.06, so that the profits of $1,632,516.58 represent 16.4% on the Capital, not including the Bonds. If the Bonds were included as Capital, the percentage earned would be 13.3%. It will be noted from the Balance Sheet that the Shareholders' Invested Capital at the close of the year amounted to $10,744,516.64.

Mr. Black also stated:

"As a result of the Armistice, there was a material reduction in the volume of business in all Departments. There was also a slight reduction in the percentage of profits on the turnover, which were a little under 2%, as against being a little over that figure last year. This must be admitted as being a very small margin and would not make a reasonable return but for the large volume of business.

"The outlook now is for an early return to the sharp competition for export business which existed prior to the war. Duties on flour imports, which were removed in some countries during the war, are being put on again, with the idea of encouraging and stimulating manufacture at home to provide work for their people, and securing the wheat offals, which are necessary for dairy and general livestock feeding. It is most essential, however, that our own farmers and dairymen be supplied with the necessary feed for their livestock, and the Government may yet find it necessary to take steps to assist the mills in retaining a large export trade in flour if the dairying and stock interest is to continue at least on its present basis."

EXPANSION IN THE FIELD OF INDUSTRY

International Shipbuilding Plans—Announcements of the Week

THAT Canada is still regarded as a likely field for shipbuilding, is indicated by the visit to Montreal last week of David Rodgers, works manager of the Skinner and Eddy Corporation, a large shipbuilding concern of Seattle, Wash. He met a number of English capitalists, and the negotiations may result in the establishment of yards in Montreal and other Canadian centres. No definite announcement has as yet been made, however.

The construction of a large pulp and paper mill is exexpected to begin next year at the north end of Lake Timiskaming. The M. J. O'Brien, Limited, a twenty-million-dollar corporation, which controls the O'Brien Mine at Cobalt, and the Miller Lake-O'Brien Mine at Gowganda, as well as other large interests, is involved in the enterprise through having owned control of a part of the great water power of the Quinze River, the whole of which would make it possible to generate upwards of 100,000 h.p., or as much as 250,000 h.p., according to some estimates. The waters tributary to the Quinze River and the Quinze Lakes flow through territory containing vast pulpwood resources, which, with care, appear to be practically unlimited for several generations.

At the next municipal election of Chatham, ratepayers will be called upon to vote on one or more industrial propositions. The Chamber of Commerce is now busy trying to secure for the municipality concerns which are considering establishing Canadian factories.

New Industries for Fredericton

The city council of Fredericton, N.B., has announced that two new industries have decided to locate in the city. The extension of an existing industry was also referred to at the last council meeting. The Plumbers' Exact Supplies, Ltd., have asked for a site on Argyle St., with free water and sewerage, and exemption from taxation, to erect a plant which would employ from fifteen to forty men. F. Grant, of Grand View, York County, N.B., has asked to build a saw mill at Government House Point on the site of the old Aberdeen mill.

The John Palmer Company, Limited, has asked the city council that they be granted free water and sewerage, exemption from taxation and free site for twenty-one years on the grounds that they are building an addition to their present plant at a cost of between $25,000 and $30,000. At present this company enjoys these privileges for a period of ten years expiring in 1921, and interest on $10,000 at 5 per cent. expiring in 1933. If their request is granted the company is willing to surrender those rights.

Lignite Plant for the West

Final decisions will be made in the immediate future for the location of a plant to manufacture briquettes from the lignite deposits in southeastern Saskatchewan and southwestern Manitoba, according to a statement by R. A. Ross, chairman of the Lignite Utilization Board, which held its first session last week at Winnipeg. The cost of the plant will be about $400,000, and it is expected that production will commence in August, 1920. It is estimated that the output will be 30,000 tons per annum, and the briquettes would be turned over to coal dealers at about $9.40 a ton.

Among the announcements from the west is that from Regina, Sask., that the city has agreed to sell the Ford Motor Company of Canada, Ltd., a site, upon which a $100,000 assembling plant will be built.

The Saskatchewan Grain Growers' Association is desirous of erecting a large warehouse in Regina, for the handling of merchandise which they sell to the farmers on a cooperative basis.

The contract has been awarded by the L'Air Liquide Society, for the construction of a building, at First Ave. E., and Second Ave., Calgary, Alta. The company is a well-known French firm which is opening up in this country, and will commence the manufacture of liquid air, oxygen and nitrogen.

GOVERNMENT AND MUNICIPAL BONDS

Saskatchewan Municipalities Sell Bonds—Other Money By-Laws

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Pelee Township, Ont.	$ 13,475	6	20-instal.	Oct. 18
Fitzroy Twp., Ont...	3,000	6	15-instal.	Oct. 25
Spirit River, Alta...	30,000	6	15-years	Oct. 25
Renfrew, Ont.	17,500	6	30-years	Nov. 24

Debenture Notes

Courtright, Ont.—Ratepayers have defeated a by-law to raise $12,000 for a waterworks system.

Dundas, Ont.—A by-law has been passed authorizing the issue of debentures to the amount of $3,500.

Saint-Jean, Que.—The municipal council has adopted a by-law authorizing the borrowing of $22,200.

Delta, B.C.—The sum of $12,000 will be borrowed for construction of drainage work. A by-law to this effect has been passed.

Lakefield, Ont.—Ratepayers have endorsed the raising of $26,000 for the installation of a hydro-electric system throughout the town.

Regina, Sask.—Four money by-laws authorizing the issue of debentures to the amount of $61,000 for various local improvements have been passed.

Campbellford, Ont.—A motion authorizing the issue of $69,000 6 per cent. debentures for building a new high school has been carried by the town council.

Winnipeg, Man.—Electors will, on November 28, be asked to vote on a by-law to raise $350,000 for a new bridge over the Assiniboine River at Maryland St.

Stratford, Ont.—The park board will ask the council to submit a by-law to the people at the next civic election, to raise $25,000 for enlarging the park system.

Hamilton, Ont.—The board of control has approved the issue of $385,000 10-year debentures to take care of the expenditure in connection with the Soldier Benefit Fund claims.

Penticton, B.C.—Next January the ratepayers will be called upon to vote upon a by-law for the raising of $35,000 for a new reservoir and other extensions to the waterworks system.

Edmonton, Alta.—Notice has been given that the city intends to exercise its option on the next interest due date, of taking up all outstanding debentures of the series advertised elsewhere in this issue.

Municipal Sales

Three Rivers, Que.—No offers for the city's issue of $80,000 bonds were found satisfactory, consequently, the issue was not sold.

Are Your Taxes Too High?

Many persons are paying a greater tax on their income than they need to, merely because they don't know what Income Tax exemptions and deductions they are entitled to.

We have prepared a booklet showing how every man, whose income or earnings are $1,000 a year, or more, should make up his Income Tax returns.

You don't have to read the whole book to find out. It's all classified according to the amount of income.

Get your copy to-day. It's worth reading.

Rural Telephones.—Wartime, $500; Wood, Gundy and Co., Saskatoon. Meadowvale, $9,000, Keddleston, $2,200, Glen Morris, $2,700; Harris-Read and Co., Regina. Avonlea, $4,000; W. L. McKinnon and Co., Regina. Simcoe, $1,100; Bond and Debenture Corporation, Winnipeg.

School Districts.—Simpson Village, $20,000, Markinch, $22,500, Federal, $3,000; Great-West Life Assurance, Winnipeg. Alfred Knowles, $3,500; Bond and Debenture Corporation, Winnipeg. Riverhurst, $6,000; Regina Sinking Fund Trustees.

City.—Moose Jaw, $161,000; Wood, Gundy and Co., Saskatoon.

Town.—Qu'Appelle, $8,000; sold locally.

NEW BRUNSWICK ISSUE COMING AFTER LOAN

An issue of $2,000,000 of New Brunswick bonds falls due on December 1st, 1919. The provincial comptroller-general, W. A. Loudoun, advises *The Monetary Times* that it is the intention to refund this loan by a new issue, particulars of which will be given shortly.

BOND DEALERS GET BAD CHEQUES

During the past two weeks four firms of Montreal bond dealers were defrauded out of Victory bonds to a total of $25,000. The culprit is reported as being the same in each case, his method being to pay by a cheque, which, upon presentation, was found to be of no value. Some months ago three firms in Toronto were defrauded in the same fashion, but for smaller amounts. The guilty party was finally arrested, however, and some of the money recovered. Both in Toronto and in Montreal the cheques which were presented were marked, the stamps having been stolen from banks, and initials being added as well.

NEWS OF MUNICIPAL FINANCE

Port Arthur Sinking Fund Needs Adjustment—Ottawa and Montreal Assessment

Hespeler, Ont.—The town's assessment this year amounts to about $1,500,000.

North Bay, Ont.—The town assessing for the year 1919 has been completed. The report is as follows: Land, $2,793,323; buildings, $3,549,320; total, $6,342,643; exempt, $822,035; business, $296,635; income, $313,588; total, $6,952,866; assessment increase, $140,000.

Hamilton, Ont.—The new assessment scheme as explained by Assessment Commissioner Macleod, shows that there will be an increase in assessment of 30 per cent., a reduction of six mills in the present rate, or a tax increase of $1.50 on $1,000. The new scheme will become effective when the next assessment is made.

Glace Bay, N.S.—Judgment has been handed down in the appeal of the Dominion Coal Co. against the town in the matter of assessment. The town assessor some months ago valued the property of the company at $2,935,979, and a counter-valuation of $1,907,947 was filed by the company. In the judgment handed down the property of the Dominion Coal Co. was valued at $2,070,661 for taxation.

Toronto, Ont.—Of the $26,019,258 revenue available for the city's expenditures for the year, a total of $19,788,249 was spent up to the end of September, according to a financial statement issued by Commissioner Bradshaw this week. This leaves a balance of $6,232,009 for the remainder of the year. The expenditure is slightly over the pro rata credit, the latter being $19,514,444. The three largest amounts spent are: Board of Education, $2,550,000; debt charges, $7,675,160; fire department, $1,297,035.

London, Ont.—City assessors are making an effort to level up the assessment roll. According to Stephen Grant, city assessment commissioner, a general review is being made, and the result will be that land which has increased in value during the past few months will be assessed at a much higher figure. In some localities where property has not increased in value no increase will be made. Mr. Grant is of the opinion that the city assessment is not high enough, and the review is expected to result in it being raised some hundreds of thousands of dollars.

Regina, Sask.—Taxes collected during the month of September totalled $117,318 as compared with $89,292 for the same month last year. This brings the total collections for the year to date to $965,424, within measurable distance of the million mark, and an excess over the collections for the first nine months of last year amounting to $213,542.

Taxes for the current year, collected in September, amounted to $60,188, the balance being arrears, $47,266, and sundries, $863. The arrears are distributed as follows: 1915 arrears, $65; 1916, arrears, $158; 1917 arrears, $756; 1918 arrears, $46,285.

The 1919 tax sale will be held by the city on November 15th next, in accordance with the city Act. The number of parcels advertised is 1,878 as compared with 1,670 last year. The total amount of arrears against the property for this year's sale is $172,008 as compared with $152,350 last year.

Ottawa, Ont.—The city taxes for 1920 will be levied on a total assessment of $120,878,899, an increase of $6,486,638 over the assessment on which this year's taxes were levied. The income assessment shows an increase of $3,739,027, of which the civil servants, now not exempt under the agreement between the city and the government, are responsible for $2,820,339. The assessment on land and buildings shows an increase of $1,960,032. Business assessments contribute $787,579 to the increase. The total increase last year, that is, for the 1919 taxes, was $3,070,026, of which $1,509,260 was on realty, $329,959 on business and $1,230,807 on income.

The assessment commissioner in his report said: "Income assessment requires all the care and attention that experience teaches, and the increase from this class of assessment is very satisfactory, considering that legislation last session amended the exemption clause by increasing exemption on personal earnings of householders from $1,500 to $1,700, and of non-householders from $600 to $700. They also exempted the income of any person derived from any investment, etc., if such income does not exceed $800 and the income of such person from all sources does not exceed $1,500. This in itself means a large deduction, which is hard to estimate. The increase in income assessment is $3,739,027, which includes $2,820,339 from civil servants and others drawing government salaries."

Montreal, Que.—According to rough estimates, the city's assessed property values for the current year will be over $5,000,000 higher than last year. The following table shows the advancement in property values since 1912:—

1912	$638,021,525
1913	791,820,595
1914	850,440,637
1915	836,193,549
1916	822,718,557
1917	824,630,229
1918	850,474,841
1919 (estimated)	855,000,000

The League of Proprietors, of Montreal, are preparing a number of amendments to city by-laws to submit to the Quebec legislature at its forthcoming session, and several of them have already been submitted to the administrative commission, which will probably incorporate them in the bill which the city attorney is preparing to bring civic administration up to date. The commission, it is known, will propose a change in its own body by having the city treasurer cease to be a member of the board, and to be in the same position as the city comptroller and city attorney, attached to the board in a consultative capacity.

The commission will also, it is understood, have some proposals to make regarding the assessors' department, and in this connection the League of Proprietors has submitted to them a suggestion that the date for the closing of the valuation rolls should be advanced so that all the data for the preparation of the budget shall be at the disposal of the commission by June 1st, and two months allowed for revision, thus having the whole of the valuation rolls completed by August 1st. The league further favors the establishment of a board of assessors, comprising some four or five members, who would have some of the present assessors as their assistants, and valuing the city as a whole, thus abolishing the system of one assessor for each ward, with a round-table conference among them, which may last for many weeks before values are agreed upon.

Port Arthur, Ont.—The total of the sinking fund and all reserve accounts in the city is $1,517,888, against which the actual improvements held at cost price amount to $1,102,276, leaving a shortage of reserves amounting to $415,612. In addition to this shortage there is a sum of $640,228 of the unexpended portions of debentures, which, according to law, must be placed in the sinking fund. This has not been done. The total shortage is, therefore, $1,055,840.

Against this shortage the city shows the following balances: Uncollected taxes, $683,000; deficits in public utilities department that should have been added to the taxes year by year, $178,000; spent on capital expenditures not covered by debentures, $405,000, a total of $1,266,000. This seems a large enough amount to cover the shortage in reserves, but a glance at the sources from which these revenues are to be derived shows the fallacy of the apparent credit balance. Of the uncollected taxes, there will be large amounts that can never be collected except at a tax sale; the deficit in the public utilities account must be met out of the taxes, and has already added three mills to next year's rate; the shortage in debentures could only be met by a debenture issue, and as the book value of the assets against which the bonds must be issued has decreased, the total amount could not be raised in that manner. Then there is a balance at the current account of $184,000 which must be deducted as well.

Promotion through Efficiency
Efficiency through Pelmanism

Bank Managers and other financial men of high position are among the thousands of Pelman students to-day. They realize the value of mind and memory training.

To the ambitious clerk, Pelmanism also points out the path to Success. It gives him a quick-action brain, personality and executive ability; it trains his memory; it gives him accuracy and dependability. There is so much to all-round mental efficiency that you should read "Mind and Memory" and see all that Pelmanism will do for you. "Mind and Memory" is a book that is now in its 44th edition—you can get a copy free by writing.

PELMAN INSTITUTE

INVESTMENTS AND THE MARKET

Toronto Paper Sold to Howard Smith Mills—Lake of the Woods Report Less Favorable Than Last Year

Montreal Tramways Co.—The Quebec Public Utilities Commission will sit in Montreal on October 30, and will decide on the petition of a number of citizens opposing the proposed increase in the street car fares.

Atlas Steel Products, Ltd.—Announcement has come from British Columbia that the Atlas Co. has been incorporated to take over the plant of the Hyatt Steel Products, Ltd., which assigned some months ago on account of inadequate working capital. Mr. J. W. Kindall, of Bellingham, Wash., has purchased the assets of the company at, it is stated, approximately $60,000. The new directors are Mr. Wendell B. Farris, Mr. A. Bull and Mr. J. A. Hyatt, representing the Kindall interests.

Acadia Sugar Refining Co.—The company has sent out a circular calling a special meeting of the shareholders, to consider the issuing of $3,000,000 of 7 per cent. debentures and also to increase the capital of the company by the creation of 22,500 new shares of the par value of £20 each, 16,000 of these to be ordinary shares, ranking with the existing ordinary shares in all respects, and 6,500 preference shares, also ranking with the present preference stock. It is proposed that all the shares of the company, at the option of the holder, be convertible at any time into shares of the par value of $100 and such shares of the par value of $100 shall be reconvertible into shares of the par value of £20 (on the basis of conversion of £1 being equal to $4.86⅔).

Lake Superior Corporation.—The annual meeting of shareholders of the company was held recently in Camden, N.J., and routine business transacted. The following directors were elected unanimously: W. H. Cunningham, H. Coppell, Sidney Mason, J. Frater Taylor, W. C. Franz, J. S. Dale, F. McOwen, Alex. Taylor, H. I. Underhill, H. C. Coleman, R. Home Smith, T. D. Wood, T. Gibson, James Hawson. At the meeting of the board following the shareholders' meeting officers were elected as follows: President, W. H. Cunningham; vice-presidents, W. C. Franz and H. Coppell; secretary, Alex. Taylor; treasurer and comptroller, A. A. Pinkney.

The financial statement was received and adopted. The income account showed that total income for the year ended June 30th last amounted to $1,393,758, made up of interest on purchase money bonds of the Algoma Steel Corporation, dividends on stocks of subsidiary companies, $1,054,000, and other income, $49,758. After all deductions, including general expenses of $75,572, the balance carried forward, which is subject to taxes, was $441,106.

St. Lawrence Flour Mills Co., Ltd.—Profits of the company for the year ended August 31 last, amounted to $245,594, compared with $268,737 in 1918, and $171,072 in 1917. After bond interest and preferred dividends were deducted, the amount available on the common stock was $191,109, against $214,998 a year ago, and $115,155 in the 1917 period. Disbursements on the common stock amounted to 10 per cent. in the year and involved $120,000, compared with $18,000 less than in 1918, reduced this balance to $71,109, against $112,998 in the preceding period, and, with writing-off and war tax allowances—separately provided for in the 1918 and 1919 exhibits—$87,040 in 1917.

Surplus at credit of profit and loss at the end of the year amounted to $322,263, compared with $251,154 in 1918 and $138,156 in 1917. Net profits equalled nearly 16 per cent. on the common stock outstanding against 18 per cent. the year before and 7.3 per cent. in 1917. Balance sheet shows current assets exceeding current liabilities by $517,888, compared with $455,903 last year and $431,791 in 1917.

Toronto Paper Co.—Announcement has been made of an offer made by the Howard Smith Paper Mills, Ltd., to the shareholders of the Toronto Paper Co. of 138 cash per share. Mr. R. S. Waldie, president of the Toronto Paper Co., stated that the directors of that company have decided to accept the

DEBENTURES FOR SALE

BARCELONA TRACTION, LIGHT & POWER COMPANY, LIMITED

(Incorporated under the Laws of Canada.)

5 Per Cent. (Now 5½ Per Cent.) First Mortgage Bonds. Exchange of Coupons and 5 Per Cent. Notes for 5½ Per Cent. Income Bonds

Notice is Hereby Given that in accordance with the terms of the reorganization approved at the Meeting of the holders of the 5 per Cent. First Mortgage Bonds of the Company held on the 19th December, 1918, the Company is now prepared to issue and deliver at its offices, 603 Dominion Bank Building, Toronto, Canada, the 5½ per Cent. Income Bonds in exchange for the following:—

(1) Interim Certificates representing 5 per Cent. 10-Year Notes which have already been issued in exchange for Coupons Nos. 6 to 13 inclusive of the 5 per Cent. First Mortgage Bonds representing the half-yearly instalments of Interest thereon from and including the 1st December, 1914, to 1st June, 1918.

(2) Coupons Nos. 6 to 13 inclusive attached to the above-mentioned Bonds which have not been so exchanged.

For the convenience of holders the above Interim Certificates and Coupons may be lodged at the Offices of the Canadian and General Finance Company, Limited, 603 Dominion Bank Building, Toronto, Canada, or 3 London Wall Buildings, London, E.C. 2, who will effect the exchange with the company on behalf of holders. The 5½ per Cent. Income Bonds deliverable in exchange for Interim Certificates and Coupons lodged in London with such Company will be collected from Canada on behalf of the holders, who will be notified as soon as the Bonds are received.

The Income Bonds before being assigned, transferred or in any manner negotiated in the United Kingdom must be stamped with the English Revenue Stamp of 2s. for every £10.

The Canadian and General Finance Company, Limited, are willing to undertake the stamping of such Bonds with the English Revenue Stamp, provided the holder at the time of lodging the Interim Certificates and Coupons for exchange in Canada notifies the Company that he desires this to be done and pays the cost of the stamp.

Forms for listing and declaration of ownership can be obtained at any of the above addresses.

Endorsement of 5 Per Cent. (Now 5½ Per Cent.) First Mortgage Bonds

Holders of the above Bonds, who have not already done so, should, in accordance with the terms of reorganization referred to, lodge their Bonds at any of the above addresses for the purpose of having endorsed thereon a memorandum thereof and of the Supplemental Trust Deed executed in accordance therewith.

Forms for lodging the Bonds can be obtained at any of the Offices named.

For Barcelona Traction, Light & Power Company, Limited,
R. H. MERRY,
Secretary.

Toronto, Canada, 15th October, 1919.

offer, and the shareholders had the same privilege. Thirty days have been granted to complete the transaction.

The company has a large paper mill at Cornwall, Ont., where it turns out, mainly, a medium grade of writing paper. The Howard Smith Co. specializes also in writing paper, though of a somewhat higher quality. It is expected that the plant and organization of the Toronto Paper Co. will be continued and carried on by the purchasers, even with the same personnel, with the exception of Mr. Waldie, who will retire.

The company had an authorized capital stock of $1,000,000, of which $750,000 was paid up. The bond issue was $500,000, of which $38,900 had been redeemed. The Howard Smith Paper Mills, Ltd., has plants at Beauharnois, Que., and Crabtree Mills, Que. It is a somewhat larger company, having paid-up capital stock of $1,062,500 common and $475,000 preferred, also a bond issue of $800,000.

The only statement given as to the reason of the sale was by President Waldie, who said: "There was no special reason for the sale, beyond the fact that I and the other directors connected with the Toronto Paper Co. have other heavy interests in different lines of business, and are not essentially paper men."

RECENT FIRES

Heavy Loss at St. Raphael de Bellechasse—More Bush Fires in British Columbia

Alvinston, Ont.—October 13—Bank barn and contents of M. McPhail, townline of Brooke and Metcalfe, were destroyed. Loss partly covered by insurance.

Cobalt, Ont.—October 8—Home of J. C. Starr, 191 Land St., was damaged. Estimated loss, $200.

Cobourg, Ont.—October 13—Barn, grain and other contents were destroyed. Little insurance carried.

Edmonton, Alta.—October 7—Building of Reid Bros., agents for Fiske tires, was destroyed. Estimated loss, $5,000. Insurance carried, $3,000.

Fernie, B.C.—October 15—Camp of A. J. Farquharson, cedar dealer, about seven miles west of the city, was damaged to the extent of $5,000. Between 1,200 and 1,500 manufactured cedar fence posts, besides other valuable equipment, were destroyed.

Gore Bay, Ont.—October 10—Barn, implements and season's crop of J. Gibson were destroyed. Cause, gasoline catching fire from lantern. Mr. Gibson lost his life in the fire.

Hochelaga, Que.—October 14—Plant of the Montreal Light, Heat and Power Co., was damaged. Estimated loss, $1,200.

Moose Jaw, Sask.—October 7—Barn at rear of Stadacona St. W., and hardware stock of A. Latham, were damaged.

New Westminster, B.C.—October 8—Home of D. G. MacQuarrie, 324 First St., was damaged. Estimated loss, $1,500, fully covered by insurance.

Peterborough, Ont.—October 9—Works of the Canadian General Electric Co., were damaged. Estimated loss, $5,000.

Port Arthur, Ont.—October 9—The old Burke block was destroyed. Estimated loss, $1,500.

Simcoe, Ont.—October 11—The St. James Methodist Church was destroyed. Estimated loss, $30,000, covered by insurance.

St. Raphael de Bellechasse, Que.—October 14—Twenty-five private dwellings, and four stores were destroyed. Cause, burning pile of rubbish setting fire to general store. Estimated loss, $150,000.

Strasbourg, Sask.—October 7—Barns and contents of Willard Lee, were destroyed. Estimated loss, $6,000, with no insurance.

Thornbury, Ont.—October 12—The Thornbury Grist Mill and electric lighting plant were damaged. Stored in the mill were 5,000 bushels of grains and a large quantity of flour. Estimated damage to mill, $20,000, with $13,000 insurance; to lighting plant, $10,000, with $8,000 insurance.

Welland, Ont.—October 10—Residence of Geo. Vasilowitez, 4th Street, was damaged. Estimated loss, $2,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Antigonish, N.S.—September 25—The St. Francis Xavier College was damaged. Estimated loss, $20,000. Insurance was carried as follows: British-American, $5,000; Northern, $10,000; Norwich Union, $7,400; Guardian Assurance, $5,000; Phœnix of Hartford, $10,000; Caledonian, $5,000; Commercial Union, $5,800; Phœnix of London, Eng., $5,000; Royal, $1,000; Canadian, $5,000; Scottish Union, $8,100; Sun, $5,000; Hartford, $3,000; total, $75,300.

Brantford, Ont.—Mr. E. P. Heaton, fire marshal for Ontario, informed *The Monetary Times* that his department has been taking action in co-operation with the local police in respect to the many incendiary fires which occurred in the city recently. He stated that evidence pointed strongly to the perpetrator being a discharged member of the Brantford fire brigade. Geo. Atkins and Robert Morrow were arrested in connection, but were discharged for want of direct or sufficient evidence.

Moncton, N.B.—October 4—Double dwelling of M. Steeves and Mr. Stiles was damaged. Mr. Steeves had $2,000 insurance and was allowed $800. Mr. Stiles had $800 insurance and was allowed $500.

October 10—Dwelling near C.N.R. shops was destroyed. Estimated loss, $1,500, with no insurance.

Quebec, Que.—Louis Talbot, city fire chief, advises *The Monetary Times* that the inquiry into the fire which took place on October 8th at the Le Mesurier tobacco factory is not yet completed, and the exact loss cannot yet be stated.

NORWICH UNION ACQUIRES WESTERN COMPANY

The Canada Security Assurance Company of Calgary has just been purchased by the Norwich Union Fire Insurance Society Limited, of Norwich, England, which is maintaining the company as a separate institution, to be operated by the various departments of the Norwich Union throughout Canada. The charter of the Canada Security permits it to do various kinds of insurance business, but until this year they had confined their operations to insurance against hail in the northwest. Their operations, however, in that very hazardous and uncertain class of business had been successful, and a good connection had been worked up, producing an annual income, varying according to the season, from $200,000 to $300,000. This year, notwithstanding the unfavorable experience of most companies writing hail insurance, this company was able to make a small profit. They also were writing fire insurance, and it is intended that they shall write fire, hail and automobile insurance throughout Canada.

The former managers of the Canada Security will be still connected with it, Mr. Redding at Calgary, and Mr. Whitley at Winnipeg, and will also manage the business of the Norwich Union at those points. Mr. John B. Laidlaw, manager for Canada of the Norwich Union Fire Insurance Society, Limited, has been elected president of the Canada Security; Sir James Lougheed of Calgary, vice-president; and Mr. Eugene Coste, also of Calgary, and well known throughout Canada in connection with oil and gas development, is also a director.

The Canada Security was a well managed company in the western field, and has achieved a good name. Its assets on the 1st January last were as follows: Canadian Victory bonds $100,000; Dominion of Canada notes $5,000; school debentures $5,000; province of Saskatchewan farm loan debentures $10,000; cash in bank $30,817; balances due from agents $727. Total $151,544.

Progress of 1919 Victory Loan Organization

Five- and Fifteen-Year Taxable Bonds, Yielding Five and One Half Per Cent.—Accrued Interest Included in Last Instalment — Banks Will Help Finance Purchases — Quebec Province Organization — Saskatchewan District Quotas

ALTHOUGH the official prospectus for the third Victory Loan will not be placed in the hands of the public until the campaign opens on October 27th, the terms were made known by the Finance Minister on October 21st. The prospectus will ask for a minimum amount of $300,000,000, with the right to accept all or any part of subscriptions in excess of that sum. As in previous years subscribers will be given a choice of maturity, five-year bonds due November 1, 1924, or 15-year bonds, due November 1, 1934. The securities will carry interest at the rate of 5½ per cent. per annum, payable May 1 and November 1, and the issue price will be 100 and accrued interest for both maturities, making the income return 5½ per cent. per annum.

Purchasers may pay in full on application or in five instalments, as follows: ten per cent. on application; 20 per cent. December 9, 1919; 20 per cent. January 9, 1920; 20 per cent. February 10, 1920; 31.21 per cent. March 9, 1920. The last payment of 31.21 per cent. covers 30 per cent. balance of principal, and 1.21 per cent., representing accrued interest at 5½ per cent. from November 1 to due dates of the respective instalments. As a full half-year's interest will be paid on May 1, 1920, the cost of the bonds will be 100 and interest. If payment is made at the time of application the price will be 100 flat. After the initial payment subscribers to have the privilege of paying in full on any due date thereafter, with accrued interest computed at the rate of 5½ per cent. per annum.

Arrangements have again been made with the banks for the purchase of bonds by small subscribers on the instalment card system, spreading the payments over ten months. Up to their capacity the banks will also accept bonds from small investors for safe-keeping, without charge, for a period of one year.

As in 1918, bearer bonds will be available through the banks for delivery at the time of application to subscribers making payment in full. Bonds registered as to principal only, or both as to principal and interest, in authorized denominations will be delivered to subscribers making payment in full as soon as the required registration can be made. Bonds with coupons will be issued in denominations of $50, $100, $500, and $1,000, and may be registered as to principal. Fully registered bonds, the interest on which is paid directly to the owner by government cheque, will not be issued in denominations lower than $500. The subscription lists will open on October 27, and close on or before November 15, 1919.

As previously intimated by the Minister of Finance, the bonds of the new issue will not carry the tax-exempt privilege which was attached to the issues made during the war. This means that in computing his Dominion income tax the holder of the new securities who is subject to the tax will be required to include the interest as part of his taxable income. In making the announcement Sir Henry Drayton said: "This is not my loan, it is not the government's loan; it is the loan of the people of Canada, backed by all the resources of Canada. It is to be spent to discharge our war commitments and provide national working capital. The security is undoubted, the interest return exceptionally attractive. I confidently appeal to the Canadian people for the same full measure of support that has been given to the previous flotations, which have heralded to the world Canada's capacity and standing."

The purposes of the loan, which are set out in detail in the official advertisements and literature of the campaign, are described in general terms in the prospectus as follows: "The proceeds of the loan will be used to pay indebtedness incurred, and to meet expenditures to be made in connection with demobilization (including the authorized war service gratuity to our soldiers, land settlement loans and other purposes connected with their re-establishment into civil life), for capital outlay upon shipbuilding and other national undertakings forming part of Canada's industrial reconstruction program, and for the establishment of any necessary credits for the purchase of grain, foodstuffs, timber and other products, and will be spent wholly in Canada."

Montreal and Quebec

Quebec province is, this year as last, divided into two independent divisions. The following general committees for Montreal have been appointed:—

Executive—Chairman, Percy P. Cowans; vice-chairmen, J. W. Ross and R. T. Leclerc; treasurer, A. D. Anderson; secretary, Rufus C. Holden. Finance—H. R. Drummond, chairman; J. W. Ross, vice-chairman; A. D. Anderson, treasurer; G. W. Scott, secretary. Employees—Lt.-Col. Irving P. Rexford, chairman; Frank W. Knox, vice-chairman. Speakers—G. H. Montgomery, K.C., chairman; F. B. Common, secretary. Publicity—J. N. McKim, chairman. Features—F. W. Stewart, chairman; A. W. Thwing, secretary. News Service—T. Kelly Dickinson, chairman, and T. Dansereau, for the French-Canadian section. Distribution—J. A. Laprès, chairman. Special Names—P. P. Cowans, chairman.

The chairmen and vice-chairmen for the different sections of Montreal are as follows:—

Division "A," Southwest Section—R. W. Steele, chairman; Fred Abraham, vice-chairman. Division "B," Northwest Section—Brig.-General G. Eric McCuaig, C.M.G., D.S.O., chairman; N. B. Stark, vice-chairman. Division "C," Northeast Section—A. J. Nesbitt, chairman. Division "D," Southeast Section—L. G. Beaubien, chairman; H. R. Swenerton, vice-chairman. Mr. D. A. Budge will act as general secretary for this work.

The following is the general committee for the province outside of Montreal: F. G. Donaldson and A. P. Frigon, joint chairmen; J. P. L. Stewart and Leon Trepanier, joint secretaries; A. Cross, treasurer.

The following is the committee for the whole province, each member operating in his own district, with French and English-speaking chairmen: Joseph Ainey, Donald Atkinson, Hon. C. P. Beaubien, K.C., Hon. F. L. Beique, K.C., H. Biermans, Hon. Dr. H. S. Beland, M.P., Geo. Chahoon, jr., Armand Chaput, P. P. Cowans, Emilien Daoust, Dr. E. M.

Desaulniers, M.L.A., Hon. G. C. Dessaulles, J. E. E. Dickson, E. M. Emery, J. H. Fortier, Hon. A. Galipault, M.L.A., Edwin Hanson, A. S. Johnson, F. C. Laberge, J. M. Mackie, Alex. Maclaren, J. M. McCarthy, Geo. H. Millen, J. S. Mitchell, T. L. Morrisey, Howard Murray, J. S. Norris, Hon. E. L. Patenaude, Hon. H. B. Rainville, M.P., J. A. Robb, M.P., Justice Robidoux, John W. Ross, H. O. Roy, M.P., Arthur Sauve, M.L.A., Edgar M. Smith, Alfred St. Cyr, J. C. Tache, C.E., Sir L. O. Taillon and E. W. Tobin, M.P.

Saskatchewan

The organization for the campaign in Saskatchewan is now completed. There are 133 sub-divisions, organized and in charge of committees. Hon. C. A. Dunning, provincial treasurer, again heads the organization as hon. chairman; D. M. Balfour as chairman; S. W. Harris, secretary and G. H. Sneath, treasurer. The officers of the other committees are: Finance and business committee—Chairman, H. W. Givins; secretary, E. G. Read. Special subscriptions—Chairman, E. S. Miller. Publicity—Chairman, A. F. Harwood. The executive committee consists of the outstanding business and professional men of the province as a whole.

The record of the great prairie province last year in the Victory Loan was remarkable, the total subscribed being no less than $25,905,100 from 77,460 subscribers. While Saskatchewan's allotment this year is less than that of a year ago (on account of a considerable portion of the province suffering from drought this year), the executive realize that their efforts must be redoubled to put Saskatchewan over the top. On the other hand, some portions of the province have experienced a bountiful harvest this year and these districts are expected to more than make up for the uphill fight in the drought areas. Keen rivalry is expected this year between Yorkton, Moose Jaw and Saskatoon Divisions. Regina City is expected to subscribe as much as she did last year namely, $2,000,000. A very strong organization has been set up with Colonel J. A. Cross as chairman. R. G. McCuish is again chairman of the Regina Division, which division carries the same load as last year.

Allotments for the various divisions of Saskatchewan have been set as follows:—

		Objective.	Subscribed.
Regina	$ 5,250,000	$ 6,500,000	$ 7,673,150
Moose Jaw	3,000,000	4,000,000	5,232,750
Saskatoon	2,500,000	4,500,000	4,911,950
Swift Current ..	250,000	1,000,000	1,319,200
Weyburn	1,000,000	2,000,000	2,391,650
Yorkton	1,500,000	1,500,000	1,965,350
Prince Albert ..	1,250,000	2,000,000	1,443,750
North Battleford	250,000	500,000	967,300
Total	$15,000,000	$22,000,000	$25,905,100

At an organization meeting in Regina on October 1st, the following executive for the Regina division was elected: Chairman, R. Geo. McCuish; vice-chairman, Col. J. A. Cross; secretary, C. C. Cross. Regina City—Col. Cross, Nate Andre, E. R. Demaray, J. W. Smith, S. G. Greenwood, L. A. Thornton, Lorne Johnson, H. M. Bing, J. E. Adams and L. T. McDonald, all of Regina. Regina Subdivision— Dr. Hall, Fort Qu'Appelle; B. F. Holden, Indian Head; H. C. Lawson, Pense; Dr. Thos. Waugh, Imperial; Dr. Colling, Francis; Arthur Bowyer, Montmartre; Harwood Duncan, Lumsden; A. Rawlinson, Qu'Appelle. Davidson—D. S. Hutcheonson, Davidson; A. C. Wilson, Craik; J. A. Sandilands, Kenaston. Strasbourg—J. Orville Clarke, Govan; A. J. Mason, Earl Grey. Wawota—John Sproat, Kipling; M. J. Dermody,

Ontario Organizers for 1919 Victory Loan

A convention of organizers for the Victory Loan, 1919, was held in Toronto, when representatives organizing the various counties of Ontario, met at headquarters. These organizers cover a territory stretching from Hudson Bay to the great lakes and from Manitoba to Quebec. This vast territory, consisting of sixteen divisions, subdivided into sixty units, comprising the various districts and counties of the province, is under the direct supervision of experienced financial men who have been practically commandeered in past loans by the department of finance. Before proceeding to their respective territories the organizers met in convention to get final instructions in the details of organization plans. The accompanying illustration shows the final meeting before departure.

Kennedy; C. M. Syme, Wawota; R. M. Crowe, Windthorst. Balcarres—G. W. Balfour, Balcarres; P. M. Rickard, Balcarres; W. H. Blyth, Esterhazy; J. W. Jolly, Lemberg. Wolseley—R. J. Campbell, Wolseley; A. Gowler, Grenfell; Jas. Ewart, Sintaluta. Moosomin—R. Robinson, Broadview; A. B. Gillis, Whitewood. Finance committee—R. Geo. McCuish, chairman, Regina; J. W. Smith, E. R. Demaray. Publicity committee—C. M. Blewett, publicity agent, Regina; (no committee). Speakers' committee—L. T. McDonald, chairman, Regina; other members to be appointed.

For the Swift Current District F. E. West was again elected chairman, and other officers as follows: S. R. Moore, vice-chairman; J. E. Hemenway, secretary; A. S. Bennett, field secretary. This was arranged at a meeting held on September 30th.

British Columbia

W. H. Malkin, who so successfully conducted last year's campaign at the coast, is again chairman for British Columbia. J. D. Kearns is organizer for the territory outside of Vancouver, Victoria, and the Island. The campaign in Vancouver will again be headed by Mayor R. H. Gale, with F. Parsons as vice-chairman.

The following officers for Vancouver Island, which is part of British Columbia for loan campaign purposes, have been appointed: Vancouver Island District, chairman, Brig.-Gen. R. P. Clark, C.M.G., D.S.O., M.C.; vice-chairman, R. F. Taylor; secretary, Major A. E. Christie, D.S.O.; recording secretary, Capt. W. A. Bawden. Greater Victoria District, chairman, Mr. J. Forman; vice-chairman, Mr. G. G. Bushby. Publicity committee, chairman, Mr. E. J. Down. Special sales committee, chairman, Mr. J. A. Sayward.

With an objective of $1,000,000, New Westminster was organized at a meeting on October 11th. The personnel is as follows: F. W. Kerr, chairman; Judge Howey, first vice-chairman; President L. Asquith of the Great War Veterans' Association second vice-chairman; J. W. Dexie, hon. secretary, and E. A. Riddell, treasurer. Advisory committee—D. Whiteside, M.L.A.; A. Lewis, W. H. Elson, J. H. McDonald, A. P. G. MacDonald, C. J. Culter, L. B. Lusby, H. Ryall, C. D. Brymner, D. S. Curtis and T. D. Tripp. Director of large subscription committee—L. A. Lewis. Publicity director—Nelson Abbott. Chairman of finance—W. W. Mascall. Representative of women's organization—Mrs. Paul Smith.

Manitoba

The Brandon organization is highly confident of success, says a wire received from the western representative of *The Monetary Times*. The local chairman is Mr. K. Campbell.

The committee for Portage la Prairie and the surrounding district has been organized as follows: General chairman, William Richardson; secretary, R. McKay. City—H. M. Dunham, E. A. McPherson, J. J. Garland, R. S. Thompson, Rev. D. T. Parker, D. R. Woods, H. G. Prior, and G. R. Porter, publicity commissioner. Rural—Reeve Muir, H. Bradshaw, J. L. Swales, C. E. Grobb, J. H. Metcalf, R. McDermott, W. V. Anderson and C. D. McPherson.

HIGH LAND PRICES AND GOOD DEMAND FOR LOANS

Thrashing Still in Progress—Good Weather Prevails—Mortgage Loan Situation

(Staff Correspondence.)

Regina, October 20, 1919.

THE city of Regina and district are prosperous and business is good. Thrashing, which was retarded in September by wet weather, is progressing favorably, and some good returns are being recorded. On the average this district will yield 12 bushels to the acre. Merchants report a good volume of business and wholesale houses are well satisfied with collections. In discussing farm land values and the loaning situation, H. W. Givins, superintendent of western branches of the Huron and Erie Mortgage Corporation, with office at Regina, said to *The Monetary Times*:—

"During the past few months, there has been much activity in the mortgage loaning business in Saskatchewan. The demand for money is perhaps as great or greater at the present time, than it has been at any similar period during the past five years. This is due to various causes, including sales of farm lands to incoming settlers, many of them American farmers; the purchase of additional lands by farmers whose sons are now, or soon will be branching out for themselves; the improvement of farm buildings and equipment and the bringing under cultivation of additional acreage. There is also a considerable demand for funds from those districts in Saskatchewan where crops during the past year or two have not been good. Mortgage companies generally, are readily lending in these districts; their experience there has extended over a period of years and their faith in these districts has not been shaken. The farmers, too, throughout these districts, are neither skeptical nor discouraged. They have prepared their land as usual for crops next year and are looking forward confidently to better conditions.

"It is to be regretted that there has appeared in certain publications, various articles based on a very superficial knowledge or perhaps no knowledge at all, suggesting that large tracts of western or south-western Saskatchewan where crops have failed during the past two years, are entirely unfit for cultivation. With those who have a knowledge of the districts affected in 1919 and to some extent also in 1918, such publications have little weight. Unfortunately, however, such items receive widespread publicity and much injury is likely to result.

"There have been numerous evidences during the past year that the successful American farmers of the western states are becoming more and more interested in Saskatchewan lands. Hundreds of American farmers from Illinois, Iowa and other western states have recently purchased lands in Saskatchewan, and there is every indication of a large influx of American settlers during next year. The price of farm lands in the best districts in Saskatchewan has greatly increased during 1919. Lands similar to those formerly sold at $30, $40 and $50 an acre have recently been sold at prices ranging from $60 to $80, and in some cases, $100 per acre, and it is not unlikely that prices will range much higher in the future than they have in the past.

"Values are comparative. Many of these successful American farmers own lands across the line which are readily saleable at from $250 to $350 per acre. They are in large numbers investigating many of the best districts of Saskatchewan, and readily appreciate the fact that lands here, although selling at less than one-third or one-quarter of the prices prevailing across the line, are fully equal or superior in quality and productiveness to the high-priced lands of the western states. The result of these investigations is not difficult to forecast.

"The mortgage companies, which have been lending largely in the west, have, of course, played a very important part in the development of our agricultural lands. The Land Mortgage Companies Association of Saskatchewan, an association of the various lending companies, has within the past five or six years taken an active part in improving conditions relating to the investment of moneys in Saskatchewan, and in so doing, have also improved the farmers' position by increasing his credit, thereby enabling him to further develop his holdings.

"This association has actively co-operated with the government in dealing with various problems arising from time to time. Recently, they have been conferring with the government regarding the steps to be taken to fully provide for the seed grain requirements of the farmers who lost their 1919 crops through unfavorable weather conditions. The mortgage companies, generally gave their assistance last year under similar conditions, advancing to many of their borrowers, the funds required for seed in 1918. There is every promise that a satisfactory solution of present problems will be found and the mortgage companies associations have assured the government of their active and sympathetic co-operation."

PERSONAL NOTES

Mr. J. S. Potter has been appointed treasurer of the Canadian Northern Railway System lines, east of Port Arthur, with office at Toronto.

Mr. A. E. Stainton has been appointed assistant manager of the Montreal office of the New York brokerage house of Shearson, Hammill and Company.

Mr. William Ferguson, of Hamiota, Man., has been appointed to manage a farm lands department which is being opened in connection with the Winnipeg real estate business of the Bell Agencies, Ltd.

Mr. F. P. Jones, of the Canada Cement Company, has resigned from the directorate of the Canadian National Railways. He gave the reason for his resignation as lack of time to devote to the work.

Mr. R. Hill Stewart, general manager of the Caledonian Insurance Company, of Scotland, is in Canada. He is visiting the important western centres in company with Mr. J. G. Borthwick, Canadian manager, while en route to the coast.

Mr. B. C. Alexander, manager in London, Eng., of the Prudential Trust Company of Canada, is visiting the Dominion, to acquaint himself with the country and the conditions here. It is his opinion that there is ample room for British capital to be profitably employed with mutual benefit to those on both sides of the Atlantic.

Mr. F. J. Carroll, who recently resigned his position with the Grand Trunk Hotel System, has accepted a position as secretary to L. E. Plummer, of the firm of Plummer and Company, manufacturers and brokers, who have recently opened up a branch office in the Somerset Block, Winnipeg, Man.

Mr. Alex. Hurry, newly appointed manager of the casualty department of the Northern Assurance Company of Canada, has arrived in Montreal to take up his new duties. He is now engaged at the company's head office for Canada, in the work necessary to enable the company to commence its operations in the casualty field at an early date throughout the Dominion.

Mr. T. Taggart Smyth, who has been appointed assistant general manager of the Montreal City and District Savings Bank, has been connected with the bank for a considerable time in the capacity of chief accountant. The Montreal City and District Savings Bank is an old-established institution, having been founded in 1846 under the authority of an "Act to Encourage Savings Banks." Since confederation it has been subject to the "Quebec Savings Bank Act," one section of which declares that it shall not be deemed a bank within the meaning of the "Bank Act." The bank has power to accept deposits and pay interest thereon, and certain restrictions as to investments are imposed. It may loan money in the usual way, but not on the security of real estate. It is also required to submit a monthly return to the Department of Finance, Ottawa.

Canadian Newspaper Service Photo

OBITUARIES

Mr. Wm. J. Douglas, general manager of the Toronto Mail and Empire, died at his home in that city this week, at the age of 73 years. He had been connected with that paper for forty-two years.

Mr. Thos. McCosh, clerk and treasurer of Paris, Ont., until last year, when he retired from public life, died there last week. He held the position of clerk and treasurer since 1901, and before that he was Provincial Auditor for many years.

Mr. Geo. V. LePan, vice-president of the Trust Company of Cuba, died at Havana, Cuba, on October 17th. Before going to Cuba two and a half years ago, he was associated with the Royal Bank of Canada, latterly as manager at Sault Ste. Marie, Ont., and Sherbrooke, Que.

Mr. James Henderson, directory publisher, of Vancouver, died in Los Angeles, Cal., on October 10th. He was president of the Henderson Directory Company, which previous to locating in Vancouver, conducted business at Winnipeg. Practically every city from Port Arthur to Vancouver is covered by Henderson directories.

MANITOBA TO HAVE FIRE PREVENTION LEAGUE

Plans are being made for the organization of a fire prevention league in Manitoba, and a convention for this purpose is to be held in November. J. Grove Smith, Dominion Fire Commissioner, and Dr. Brown, an expert on dust explosions from the United States Department of Agriculture, will be present at this meeting.

ROYAL BANK COMPLETES FIFTY YEARS

On October 18th the Royal Bank celebrated its golden jubilee, its doors having first been opened on October 18th, 1869. Several other Canadian banks are older than the Royal, but as regards total assets it is second only to the Bank of Montreal; the progress of the Royal Bank has, therefore, been rapid, and in the West Indies and South America it has established remarkably extensive connections.

When founded the Royal Bank was known as the Merchants Bank of Halifax. It took over the Merchants Bank (of Halifax), a private partnership bank. At the outset it had a capital of $300,000, and a reserve fund of $20,000. Total deposits amounted to $284,655; total loans, including call loans, $266,970, and total assets, $729,000. For a number of years its business was confined entirely to the maritime provinces. At the end of ten years, however, the number of its branches had grown from one to twelve, and in 1879 its capital had increased to $900,000, reserve fund to $180,000, total deposits to $1,097,025, total loans to $2,092,729, and total assets to $2,667,000.

In 1899 Mr. Pease was formally appointed joint general manager, and had under his direction the branches in Montreal, in British Columbia and in Cuba. D. H. Duncan, who had been general manager since 1882, continued the supervision of the business at the head office, in the maritime provinces and in Newfoundland. In this year also a further new departure was made in the opening of a branch in New York City. In 1916 Mr. Pease assumed the office of vice-president and managing director, and C. E. Neill became general manager.

Next year an industrial congress will probably be held by Alberta and British Columbia, similar to that held this year by the former province, under the auspices of the Alberta Industrial Development Association. Mayor Brown, of Lethbridge, who is president of this association, has been in British Columbia outlining a plan for the joint meeting. Money has already been subscribed sufficient to assure a larger congress than the one held last August.

MUNICIPAL REVENUE FROM THE RAILWAYS

THAT the acquisition of more railways by the Dominion government should result in loss to the municipalities which have hitherto derived large sums from the taxation of railway property, is scarcely fair to them. This has already happened through the nationalization of the Canadian Northern, and the purchase of the Grand Trunk will place still more property in the exemption list. In Montreal alone the assessed valuation of Grand Trunk property is $13,000,000, with an annual revenue to the city of $350,000. Exemptions in Montreal already total nearly $230,000,000, which is partly due to the large amount of church real estate there. If the national railway system is to be operated as a private road, competing with the C.P.R. and subject to the jurisdiction of the Board of Railway Commissioners, it should also be made to contribute to the support of municipalities and provinces in which it owns property.

The Montreal Administrative Commission has expressed this view in the following resolution:—

"Whereas the federal government has already acquired the Canadian Northern system and there is a project before the parliament of Canada at the actual time to purchase the Grand Trunk Company system;

"Whereas if this proposed law is adopted, the federal government will be the definite owners of the Intercolonial Railway, of the Canadian Northern, of the Grand Trunk Pacific and of the Grand Trunk Railway System;

"Whereas, in virtue of the Act of British North America the properties of the federal government are exempt from taxes;

"Whereas the Canadian Northern and the Grand Trunk Company contribute in realty and other taxes an amount of about $350,000 per annum to the city of Montreal, the same representing an increase in realty taxes of about six cents to the hundred dollars;

"Whereas the city of Montreal cannot, under the circumstances, afford this loss;

"Whereas all the municipalities in the Dominion where the said companies have properties will in the future lose considerable revenues for the same reasons;

"It is Resolved: That pressure be immediately brought to bear upon the federal parliament to include in the said project of law a clause to the effect that in case the federal government becomes owner of the property of the Grand Trunk Company, it will nevertheless continue to pay municipal and school taxes to the city of Montreal and to all other municipalities, as if these properties had remained privately owned properties, and that this clause be applied to other railway systems which have become or will later become properties of the federal government.

"That Mr. E. R. Decary, president of the Administrative Commission, and Mr. Charles Laurendeau, chief attorney of the city, be authorized to proceed to Ottawa immediately for the above reasons."

RECOGNIZED BENEFITS OF MARITIME UNION

SOME of the advantages which would result from a political union of the provinces of Nova Scotia, New Brunswick and Prince Edward Island have already been pointed out in these columns. A new province constituted from these three would be more similar in size to the other provinces. Their population, according to the census of 1911, totalled 937,955. This is greatly exceeded by both Ontario and Quebec, and the growing western provinces are rapidly approaching that figure.

The annual meeting of the Maritime Board of Trade, held in September, went on record in favor of such a union. Commenting on the project in a letter to *The Monetary Times*, H. J. Logan, K.C., the new president of the Board, says:—

"Maritime union, which, years ago, was so strongly advocated by such distinguished statesmen as the Hon. Joseph Howe and Sir Charles Tupper, is again becoming a practical subject. The war has established an unwritten law against waste of both money and energy. The interests of the three maritime provinces are identical. We are off in the Atlantic by ourselves. The rapidly growing power of the west accentuates the disunion of the east. In this small territory, with a population of only about one-third of the province of Ontario, we have three governments—often lacking even in common political sympathy—three sets of departmental offices—three Courts of Appeal, etc.

"Maritime union would mean one big Atlantic province, with a people of common aims and ambitions. It would mean uniformity in statute law, such as mercantile laws, lien laws, workmen's compensation acts, etc. It would mean a stronger educational policy and probably one big maritime technical college for the teaching of manual training, vocational education and domestic science. The possibilities of our fisheries are immense. In union we could afford to establish a strong department for the encouragement and development of this great industry, which should bring millions from the sea.

"All over these provinces we need population and the development of our great natural resources. The Immigration Department at Ottawa which has done so much for the west, does not know the east. In London we have small, ill-equipped provincial agencies, instead of one big maritime department to attract the people and the money of the British Isles to the charms and resources of a land only five days' journey away, and in climate and every other way more like their English, Scottish or Irish homes than the prairies of the west.

"One united Atlantic province would give higher credit in money markets and would mean much less expense in borrowing. In triplication of services we are throwing away at least a quarter of a million dollars yearly which should be used in developing our resources and increasing our production. Maritime union would give us a common road policy for our trunk roads. It would give us a better opportunity for collective advertising to secure tourist travel, but more than anything else, it would mean the getting together in one big province of people whose interests are practically identical and, who, by united effort, should make these provinces, situated at the eastern door of this continent, the New England of Canada."

INVESTMENT DEMAND IN THE WEST

THAT the west is a great potential market for Canadian securities, is the conclusion of Russel O. Johnson, a member of the firm of Greenshields and Company, Montreal, who has been visiting the four provinces of the west. He says: "The three prairie provinces were not affected to anything like the same extent as was the east following the signing of the armistice, owing largely to the fact that they had not been engaged in any comprehensive way in the manufacture of war munitions. They consequently found the transition period from war to peace-time conditions less difficult and irksome than we. The west is in excellent financial position at the present time; money is plentiful, and there seems a strong disposition on the part of investors to seek out more permanent and easily realizable investments than in the past.

"There is a splendid opportunity for eastern financial and brokerage houses in all the four provinces, the three prairie ones in particular, but I found while there that people knew very little of the attractions of our best industrial bonds and preferred stocks, more publicity being given in western papers to securities of United States origin. If some means could be devised to interest these potential investors in eastern bonds and the better grade of stocks, I believe that the influence would be far-reaching and would tend to materially help in the drawing together of the people of the two great parts of the Dominion."

ECONOMIC ASPECTS OF COALITION GOVERNMENT

IN accordance with historical precedent, the war-time government of Ontario has been overturned; the Conservative administration in Prince Edward Island had the same experience a few months ago, and it seems to be demonstrated that the disturbances which accompany the carrying on of a war breed discontent which is fatal to the party in power. The Ontario election has, however, resulted not only in a government defeat, but also has introduced into the legislature powerful new groups which hitherto have had very little direct representation. One of these new groups, the United Farmers of Ontario, claims the largest number of members in the new legislature, although it has not an absolute majority. Second in strength is the Liberal party, third the Conservatives, and forth the Labor party. It is evident that a government can be formed only by a combination of two of these parties; the tendency towards the breaking up of the old political parties by the formation of new ones more directly representing the economic groups in Canada has already been pointed out in these columns. A government formed in this way will be an innovation in Canada, at least so far as the memory of the present generation is concerned.

The fact that no one of these groups can carry on a government by itself is sufficient assurance against grossly inequitable legislation. There are also in Ontario large numbers of voters who are not closely allied with any group, and whose influence is in the direction of sound legislation. The fact that the economic questions which are at present occupying the public mind are under the jurisdiction of the federal government also lessens the immediate significance of the Ontario results. Nevertheless they must result in the development of a new administrative frame of mind, based upon greater certainty as to the wishes of the electorate, and at the same time make more difficult the formation of a public policy, because of the wider representation in the House.

THE WAR TAX ON CHECKS

WHOLESALE houses of Canada lose thousands of dollars annually because of the fact that customers in paying their bills forget to affix stamps as required by Dominion law. This point was discussed at the annual meeting of the Canadian Credit Men's Association held a few weeks ago, and it was decided to take the matter up with the Bankers' Association with a view to having the stamp printed as part of the check; the check books could then be sold to customers for the cost of the stamps. This has been the custom in England for some time past.

The proposal is one which deserves the careful consideration of the Canadian Bankers' Association, for even if it does not affect the banks to any great extent, the change suggested should be a benefit to facilitate commercial transactions. If the stamp tax is to be a permanent form of federal revenue, the most economical means of collection should be adopted. As all checks must bear this stamp, and it was intended to fall upon the drawer, the suggestion would seem to be a good one. By impressing upon the drawer the fact that to issue a check costs money, their use for small payments might be curtailed, with a saving of labor to the banks. As it is at present, creditors are usually glad to have the opportunity to stamp their customers' checks, with the result that parsimonious debtors make it a point to forget this little detail.

AMERICAN BRANCHES AND CANADIAN TRADE

BRANCH plants in Canada of United States manufacturing concerns are in many cases for Canadian trade only, and export business goes to the United States plants. This point was emphasized by Canadian trade commissioners in addressing a meeting of the Border Cities Chamber of Commerce in Windsor, Ont., on October 16th, Mr. Beddoe, Canadian trade commissioner in New Zealand, said:—

"American firms establishing in Canada secure the advantages of free sites, taxation exemption, cheap power and good laws. Many such branches are established over here and in other parts of the Dominion for the purpose of doing export trade within the British empire. However, in many cases the selling organization is in the United States, and there is no authority in Canada to do an export trade within the empire." The speaker particularly referred to the automobile business when giving an example, and showed that the Ford Motor Company was the only American auto constructing company in Canada that sold direct from its Canadian houses to Britain and her overseas dominions.

BANK OF MONTREAL

BANK BRANCH NOTES

Extensive Building in the West—New Fort William Branch for Bank of Montreal

The following is a list of branches of Canadian banks recently opened:—

Marlbank, Ont.	Sterling Bank of Canada
Saskatoon, Sask. (22nd St. & 2nd Ave.	Imperial Bank of Canada
*Peterborough, Ont. (Simcoe St.)	Merchants Bank of Canada
St. Marc, Shawinigan Falls, Que.	Royal Bank of Canada
Ferryland, Nfld.	Bank of Montreal
Paspebiac, Que.	Bank of Montreal

---

*Temporary branch.

Many New Branches for Winnipeg

Notwithstanding the large number of branches that the chartered banks of Canada have opened in the west this year, there is still an extensive building program to be yet completed. In the city of Winnipeg alone, new branches representing an expenditure of nearly $300,000, are in the course of construction. The banks building are: Canadian Bank of Commerce, eight branches, $134,000; Merchants Bank of Canada, three branches, $30,000; Bank of Hamilton, three branches, $57,000; Union Bank of Canada, four branches, $66,000.

The Bank of Montreal has purchased for the sum of $65,000 the Ross Block on the corner of Victoria Ave., and Simpson St., Fort William, Ont. The bank's principal branch in the city will be erected there.

Other Banking Notes

Mr. H. A. Gray has been appointed manager of the new branch of the Bank of Hamilton at Portage and Carleton, Winnipeg, Man.

The Union Bank of Canada has appointed Major W. G. Thompson, manager of the new branch at Blenheim, Ont.

A branch of the Bank of Nova Scotia will be opened at Salisbury, N.B., in the near future.

At the meeting of the city council of Levis, Que., on October 28, the sale of the property now occupied by the Bank of Montreal, will probably be considered.

A branch of the Bank of Montreal will be opened at the corner of Yonge and Bloor Streets, Toronto, on or about October 30. The Springside, Sask., office of the bank, now sub-agency to Yorkton, will shortly be established as a branch.

MOLSONS BANK STRENGTHENS RESERVE

The statement of the Molsons Bank for the year ended September 30th, 1919, which will be submitted to the shareholders at their annual meeting on November 3rd, shows profits of $818,802, compared with $712,485 for the preceding year. Provision for government taxes to the amount of $200,000 is set aside, compared with $100,000 last year. As the dividend rate was increased from 11 per cent. to 12 per cent. last February, payments on this account increased from $440,000 in 1918 to $470,000 in 1919. The usual pension fund and patriotic allowances are made and $200,000 carried to reserve. The latter account now stands at $5,000,000, exceeding the capital stock by $1,000,000.

Total resources are shown in the statement at $94,513,102, an increase of almost $17,000,000 over those of a year ago, which, in turn, were close to $12,000,000 more than those of the 1916-17 total. Public deposits, totalling $63,519,905, are in excess of $12,000,000 higher than those of last year, and some $15,000,000 more than in the preceding twelve-monthly report of the institution. The year's figures in both cases, as previously stated, stand as new high levels in the bank's long record of progress. To the increase of approximately $17,000,000 in the bank's resources, liquid and semi-liquid assets contributed in excess of $9,000,000. Cash on hand and in the Central Gold Reserve, on the other hand, showed a contraction of nearly $2,000,000, lowering the proportion of these cash assets to public liabilities to rather under 10 per cent., as compared with 14.8 per cent. last year and 14.3 per cent. in 1917. The position in this respect, however, was largely influenced by the sharp gain in deposits and by an increase of approximately $4,600,000 in the balance due to the Dominion government, which is shown in the statement at $12,423,185, as against $7,857,097 in the previous exhibit. Total liquid and semi-liquid assets represent almost 56 per cent of the public liabilities of the institution. Last year this percentage was 56.6 per cent;. in 1917 it stood at 50.3 per cent., and 47.3 per cent. three years ago.

INVESTMENT BANKERS' ASSOCIATION CONVENTION

The annual meeting of the Investment Bankers' Association of America was held in St. Louis, October 20th to 22nd. Last year several Canadians attended, representing Canadian firms which are members of the association, but there were none present this year, owing to the imminence of the Victory Loan campaign.

ACTUARIAL SOCIETY OF AMERICA

The semi-annual meeting of the Actuarial Society of America was held in New York, October 23rd and 24th. Several Canadians attended, among them being J. B. McKechnie, general manager of the Manufacturers' Life Insurance Co., who took part in the discussion. A. B. Wood, actuary of the Sun Life, and D. E. Kilgour, actuary of the North American Life, were also on the program, but were unable to be present.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended October 23rd, 1919, compared with the corresponding week last year:—

	Week ended Oct. 23, '19	Week ended Oct. 24, '18	Changes	
Montreal	$162,521,726	$ 89,936,470	+	$ 72,585,256

GRAND TRUNK ACQUISITION CERTAIN

Sir Thomas White May be Connected With Board—Dominion Railway Commission Must Now Settle B.C. Electric Fares

(Special to *The Monetary Times.*)

WITHIN the next week the bill for the acquisition of the Grand Trunk will become law. There is no doubt as to the passage of the measure. Hon. T. A. Crerar, ex-minister of agriculture and leader of the cross-benches, has endorsed the government's proposals. With their support and an almost solid backing the ministry will have a large majority. In the senate the government majority may be slim. The government whips have eight senators, whom they have placed on their lists as doubtful. If they should all vote against the bill the government would not have more than four majority.

With the bill passed, the next stage will be the appointment of the board of arbitration and of a committee of management to operate the line in co-operation with the National Railway system until the award is made. The Grand Trunk and Grand Trunk Pacific will then become an integral part of the system. The question will then arise as to a reorganization of the present management. This is contemplated. There is talk in political and official circles of Sir Thomas White becoming actively associated with the system. One proposal is that the C.P.R. system which was followed so successfully in the days of Lord Shaughnessy and Sir William Van Horne, should be adopted. The former was president of the system and the latter chairman of the board. The suggestion is made that Sir Thomas White should become chairman of the board and should take charge of the financing of the system, which will naturally be exceedingly important. Either D. B. Hanna would remain as president or he would be succeeded by another operating railway man, who would oversee the actual operation, leaving the financial end to Sir Thomas. There are rumors that Mr. Hanna will step out. Many politicians think it would be wiser from a political standpoint. They have nothing against Mr. Hanna. They say that he has given his best to the new system, but they feel that as long as he is at the head of the system there will always be the old suspicion in the public mind of Mackenzie and Mann influence.

The possibilities of international entanglements offered by the ownership and operation of a government undertaking on foreign soil is something which is being pretty strongly emphasized by those opposed to the taking over of the Grand Trunk. This feature of the situation was emphasized by General Maclean, member for Royal, who quoted A. W. Smith, President of the New York Central as saying that the government of Canada would have a great deal of trouble in operating a line in the United States subject, as it would be, to federal and state regulations. General Maclean was the first supporter of the government in the House of Commons to break away on the question; but in the senate it will be different. Senators White, Ross, Fowler, and other men of influence in the Upper House are known to be preparing to take a strong stand against it. Senator Ross will emphasize, among other difficulties, the trouble Canada might get into in case of strikes when the road's police officials, servants of a foreign power, would probably be maintaining a state of armed force against the subjects of the United States. Under such circumstances it would be almost certain that there would be international complications.

British Columbia Electric Rates

Within the next few days a decision will be made by the Railway Commission of importance to every province with extensive electric railway connections. The British Columbia Electric Railway, which has rural lines through the Fraser River Valley, has filed with the board a schedule of increased rates and has asked that the company be taken under the wing of the board and the rates endorsed. The British Columbia Electric has discovered a clause in the Railway Act passed by parliament last year, which they claim brings them under the Dominion Commission. The British Columbia Electric has under lease two short branches in the Fraser River Valley which has federal charters and it is claimed that a strict interpretation of the act would place the whole line under Dominion authority. Legal authorities at Ottawa are inclined to back up their contention, although no decision has yet been made by Hon. Frank B. Carvell, chairman of the board. The reason for the anxiety of the British Columbia line to come under Dominion authority is self-evident. The line has been harassed in British Columbia. It wants increased fares to meet growing cost of operation. Application was made to the British Columbia government. The Public Utilities Commissioner has been investigating the road and apparently increased fares were a long way off. Then some one discovered that if federal lines are leased by a provincial road the whole system came under Dominion authority. Application was then made at once to Ottawa during the life of parliament, to consider the reports of the railway. They would take up with the board of directors their policy, study the road, its business and development and report to the House.

FINDS IMPROVEMENT IN WEST

E. M. Saunders, treasurer of the Canada Life Assurance Co. and president of the Dominion Mortgage and Investment Association, has just returned from an extensive trip through the west, and reports general prosperity and optimism. "Municipalities in the west," he said in an interview, "are improving their financial standing. Great care is being exercised in practising economy, and no needless expenditures are being made. As to business conditions generally, merchants are buying a little more freely than they have done in the past, which is an evidence of returning confidence. Another satisfactory feature is that in all four provinces Victory Loan workers are meeting with much encouragement, and they even expect to go beyond the allotment made by the Dominion Executive as to what they should raise." In the cities visited Mr. Saunders found improved business conditions, which was especially evident in the shortage of houses. Crop conditions, which had caused anxiety, owing to drought, had shown improvement in a number of districts, but, best of all, late rains had solved the problem of feed, which was of vast importance to the whole country.

TORONTO INSURANCE INSTITUTE OPENS SEASON

Plans a Vigorous Winter's Work—President at First Meeting Lays Emphasis on Educational Features

FIVE addresses have been arranged by the Insurance Institute of Toronto for the 1919-20 season, in addition to the president's inaugural address. The latter, and an address by Hon. H. J. Cody, Minister of Education in Ontario, were delivered at the first meeting of the year, held on October 23rd. The others are arranged as follows: November 20th, "Burglary Insurance," by Samuel B. Brewster, assistant secretary, American Surety Co., New York; January 15th, "Some Occupational Hazards," by J. M. Laing, A.I.A., F.A.S., assistant actuary, Mutual Life Assurance Co. of Canada, Waterloo, Ont.; February 19th, "The Significance of Blood Pressure," by Dr. H. B. Anderson, medical referee of the Imperial Life, Toronto; March 18th, "Conflagrations," by John B. Laidlaw, manager, Norwich Union Fire, Toronto. The annual meeting will be held in May, 1920. The subjects of the addresses, it will be observed, cover as many branches of insurance as the number will permit.

In his inaugural address at the opening meeting on October 23rd, H. W. Crossin, manager of the Employers Liability Assurance Corporation, who is president for 1919-20, said:—

"This session we attain our majority. For twenty years the institute has held its meetings and its members have listened to papers on various subjects relating to the insurance business, read by men who have been leaders in their respective fields of activity, and examinations have been held for those who wish to take them. During the past four or five years it has been exceptionally difficult to maintain the interest and attendance at our meetings on account of the conditions occasioned by the war, so many of our men being away and those remaining being so overburdened with work.

No Break in Institute's Work

"It is very gratifying, however, to think that the Toronto Insurance Institute is one of the few institutes which have been able to keep up their work and activity through the whole period of the war. I understand that most of the institutes in the old country, which have been leaders in the work in the past, have found it necessary to suspend operations for the time being. Now, however, most of our men have returned, offices are resuming their normal appearance as to personnel, and we are ready to make a fresh start.

"I am sure that no one has attended our meetings and listened to the interesting and instructive addresses which have been given, without gaining some new light on the problems which he is called upon to face, or a new inspiration for his work. Even if only a few have realized the necessity of acquiring more knowledge and of improving methods, and if the younger members have realized that the insurance business is, in reality, a profession requiring deep technical knowledge, combined with a broad outlook and a high degree of general proficiency which requires years of study and effort to attain, our meetings have not been in vain.

"It has been rather disappointing that the past few years have seen only a limited number of candidates present themselves for the examinations, such candidates being practically exclusively from the life offices. The reason for this is rather hard to explain. I am afraid that some poor souls have been dissatisfied because, having successfully passed some or all of the examinations, they were not immediately given high advancement. To anyone who, having passed the examinations and failed to secure advancement, I would say that the fault is probably entirely with himself. The mere fact that a man succeeds in passing the examinations does not mean that he is entirely qualified for advancement; it would to me be an indication that he has faults in other directions which may require a close study to remove. What I would like to see spread throughout our ranks is a realization of the value of the studies outlined in our syllabus and the real advantages which will accrue to those who apply themselves to the course of studies and take the examinations irrespective of whether or not promotion immediately follows. I am sure that those who have taken the course in a proper spirit have reaped the reward of their labors, and those who take them up now will find themselves better fitted to grasp such opportunities as present themselves.

"So many complaints are made these days of the lack of efficiency in the offices, that your council is convinced that more attention must be given to the educational features of our program in order that the way may be opened up for those who are inefficient to become proficient. The course of study laid down in our syllabus is a comprehensive one, which, if taken up, is bound to have an exceedingly beneficial effect upon the student. In order that every facility may be extended to our members to take up the studies, we have arranged that Mr. John Jefferies, principal of Jarvis Street collegiate institute, address you to-night, outlining in a brief way, just where and how the subjects covered by the examinations, and covered by the classes now running at the technical and high schools in the city may be taken up. If there are any desirous of proceeding with their second and third examinations in any branch, arrangements will be made to, as far as possible, provide the necessary lectures on the purely insurance subjects. It is hoped that every young man who intends to make insurance his profession and desires to be a success will enroll himself as a candidate at once.

"It is necessary that the standard of the business as a whole should be placed as high as possible, and it should be borne in mind that the standard which we set up in our profession is the standard by which we will be measured by those outside. It is, therefore, the duty of each one of us to acquire the utmost proficiency we are capable of, and hitching our wagon to a star not only endeavor to reach the goal ourselves but assist others to attain the same end. The work of the institute makes a considerable demand upon the time and services of the executives in the various offices and I appeal to such to-night to give such time and services as will enable this institute to be the success which it should be, and which it is quite capable of. The man who makes the greatest success himself is the man who is willing by a subservience of self to help his fellow-men, and he is the man who is best regarded by his fellows. The higher the qualifications in the individuals the higher the standing of the institution represented by such individuals. The sacrifice of the institution for the sake of self results inevitably in the destruction of the institution, and the result of the destruction of the institution is the failure of self.

"Recent years have witnessed a great broadening of underwriting operations by many insurance companies, largely through the addition of the so-called 'side lines' to their business. This has been particularly noticeable in the extension by fire companies to the casualty field and vice versa. Of the newer lines added, probably the automobile in all its phases is the largest, but recently many companies have added marine and riot and civil commotion lines, which have been brought into prominence through the war. Underwriting problems are becoming more complex every day. In all branches of insurance we find ourselves face to face with propositions which would never have been entertained for a moment by underwriters of a generation ago. As an example, take the writing of use and occupancy insurance, under some of the modern forms, by fire companies, or the writing of impaired lives and group insurance by the life companies. These problems, however, are being successfully handled by men who are able, through their knowledge and foresight, to grasp their possibilities and handle the business in a proper way. The addition of new fields of activity has opened up many positions for capable men, in fact, in many cases it is possible that the positions have developed before there were properly qualified men to fill them. All of which indicates the necessities of the present. As to the future, he would be a very venturesome man who would hazard a guess as to what the opportunities would be, but undoubtedly they will be many, as the extensions already referred to will surely continue and still new lines will also as surely develop. For instance it will not be long before aeroplanes which will embrace both the fire and casualty lines will have to receive the attention of companies."

British Columbia Municipalities' Convention

Draft of Municipal Act Discussed—Local Governments Want More Sources of Revenue—Present and Future Industrial Development in the Province

THE 1919 convention of the Union of British Columbia Municipalities was held in North Vancouver, B.C., October 7th to 9th. One of the features of the opening session was an address by the Duke of Devonshire, who was present. W. H. Malkin, chairman of the provincial Victory loan campaign, asked for the support of the representatives.

Addressing the convention on "Government of a Municipality by a Commissioner," F. J. Gillespie, of South Vancouver, said in part: "The commission form of government has advantages and it may have objectionable features. But, leaving any objections to government by a commissioner for others to point out, I propose to indicate what seem to me to be some of the advantages of municipal administration by a government commissioner. The commissioner should thoroughly understand his business, of course, and he should also have the courage of his convictions. Given such a commissioner, he is in a much better position to administer the affairs of a municipality on strictly business lines, without fear or favor, than an elected council. Because, once satisfied that a certain course of action is right, the commissioner is at liberty to go ahead and to carry out his policy without being influenced by diversity of opinion, such as characterizes the deliberations of an elected body and which often prevents the carrying out of necessary modifications."

The commissioner referred to the taxation of improvements in South Vancouver. This action caused a good deal of controversy. "There are indications, however," he continued, "that many ratepayers who at first opposed the improvements tax have since come to realize that it is here to stay, not only in South Vancouver, but that before many years have elapsed, it will be universally adopted throughout the province.

"Reverting to the advantages of a government appointed commissioner over an elected council, one distinct advantage, though all may not agree, is the fact that the commissioner has power to pass money by-laws without a vote of the ratepayers, provided he satisfies the government that the proposed expenditure is justified." He showed that there had been a gain of 1,348 water services in South Vancouver in 21 months, bringing the total number to 7,307; that school attendance had increased from 4,367 in 1917 to 5,694 in 1919, a gain of 1,327 in two years; and that collections had increased from $673,676 in 1917 to $1,164,071 for the first nine months of the current year.

The subject of tax exemptions was discussed at length. The exemption of returned soldiers' property for a period of years was brought up, but it was considered that this would be unfair to the municipalities from which enlistments had been greatest. This has already been done in unincorporated districts, under the War Relief Act, and heavy arrears have accumulated. The following resolution was introduced: "That the provincial government be asked to take into consideration the question of arrears of taxes which have accumulated under the War Relief Act, and that if it is decided that any relief should be granted to the taxpayers in respect of such taxes, that this should be a charge on the provincial revenue, and further that a committee be appointed by the executive to confer with the government and the soldier-organization on this subject."

Sources of Municipal Revenue

Considerable discussion took place when the following resolution was brought in by Victoria: "That it is necessary that municipalities be granted additional sources of revenue in order to meet the obligations already imposed on them." Mayor A. W. Gray, New Westminster, said that the municipalities were entitled to the taxation created within the municipal bounds and now being collected by the provincial government. F. A. McDiarmid, solicitor for the union, said that at the present time the rural municipalities could support themselves on the land tax alone. Mr. McDiarmid said that this was the only province in the Dominion, and the only community on the continent, where money for the maintenance of police department, fire department and schools was not being raised from business or personal property tax.

A resolution from the Chilliwack representatives that a standard system of accounting should be made compulsory for all municipalities did not meet with favor, and it was filed. The following resolution, introduced by Penticton, was carried: "It is recommended that no powers exercised or given the Public Utilities Commission should conflict with or duplicate the powers conferred on the municipal inspector." Another resolution also dealing with the Public Utilities Commission, was passed as follows: "It is recommended that it shall be the duty of the Public Utilities Commissioner on reporting upon any proposed work within a municipality to issue a statement setting forth the reasons for and against such work and his judgment thereon and a copy of his report be sent to the municipality concerned."

Mayor Gray, secretary of the union, presented a report covering the consideration of the new draft of the Municipal Act by the executive. The executive turned down the proposal to elect a mayor or reeve for two years, but recommended a two-year term for the councillors or aldermen. The convention endorsed this proposal. The convention also endorsed the proposal that provision should be made in the Municipal Act for the creation of volunteer fire departments.

Following a discussion of the tax sale provisions of the proposed Act, the following resolution was passed: "That in the opinion of this convention the tax sale provisions in the Municipal Act, 1919, passed at the last session of the legislature, should not be materially changed at the next session of the legislature." The consensus of opinion was that the amendment passed last session making tax sales compulsory should be given an opportunity to be proved in practice before it was further changed.

Increase in Manufactures

A comprehensive address on industrial development in the province was given by D. B. Martyn, industrial commissioner. Dividing the scope of his department's work into two divisions, one dealing with the encouragement of the manufacture of raw materials produced within the province, and the other dealing with the manufacture of raw materials from abroad that come to Vancouver as the logical port of entrance for the Dominion, Major Martyn sketched the things that have been dealt with by the department and the things that will be dealt with in the near future. In the first division he placed the manufacture of the raw materials from our forests, mines, fisheries and farms. In addition to the staple industry of lumbering there were many important developments taking place in the utilization of products from the forests. Among these developments was the conversion of mill waste, of which from five to fifteen thousand tons were estimated to be burned every day in British Columbia. Already one industry had started converting this mill waste into toys to fill a market formerly occupied by Germany, and the industry was rewarded with orders far ahead of its production.

Capital is coming to the province, the commissioner stated, for the production of wood alcohol from this mill waste. Canada should consume five million gallons of this alcohol a year, all of which could be produced from material at present wasted in British Columbia. A British syndicate, he said, was considering establishing a factory for the production of tanning extract from bark here. Douglas fir, the commissioner said, has been found to be a valuable source of tannin, which would produce a leather equal in quality to

that tanned by oak bark tannin. This discovery and the produced utilization of it here, he said, would lead to the establishment of an industry that would have important bearing on the future of the leather industry in Canada and the importance of British Columbia as a stock-raising province.

Coming to the production of minerals, the commissioner said that the government was fully alive to the high importance of the iron industry and the key position that would be secured by the production of pig iron on a profitable basis from the ores in which the province abounded. He briefly referred to the recent discovery of valuable potash and alum deposits at Port Renfrew, which opened up the possibility of an immense export trade in fertilizer and chemicals from this province. He also stated with regard to fertilizer that a plant was now in course of erection at Lake Buntzen for the production of nitrogen from the atmosphere, similar to the immense plants which had proved a great factor in the agricultural development of Norway. An English company also had experts at work on Vancouver Island looking into the possibility of working their process of producing a radio-active fertilizer by the utilization of coal dust.

With regard to the industries which converted the products of the farms of the country, Major Martyn said that these were now in a well-established and flourishing condition. One company had sent products from its preserving and pickling factories to Australia and South Africa, and in connection with this industry, steps were under way for the creation of a glass manufacturing industry here in order to provide the containers needed by the pickling and preserving factories and capture a business that at present all went to eastern Canada. The erection of packing and preserving plants in connection with the co-operative settlements being formed by returned soldiers, said the commissioner, is being considered and his department on investigation would possibly find itself justified in coming to the assistance of such projects, which would provide an outlet for the fruit and vegetables produced by the soldier settlers and also provide a stable industry in connection with the settlement. Of the fisheries industry, Major Martyn said that at this juncture it was apparent that there existed a necessity for conserving our fisheries, particularly the salmon and cod fisheries. There was an opening for large development, however, in the packing of herring and pilchard and two additional companies were starting on this work this year.

Dealing with the conversion of raw materials imported into Canada through Vancouver, the commissioner said that the sugar refinery was the example of a successful local industry being established for this purpose, while the oil refineries which were multiplying themselves were other examples. He spoke of the cordage factory which will convert the fibre which comes to Vancouver from Manila and other eastern parts and which, he hoped, would supersede with its product the immense importation from eastern Canada to British Columbia. The growth of fibre in this province, he said, had been adjudged to be possible and experiments would be made whether locally grown fibre could not compete with the imported variety in supplying the demands of local factories.

Another raw material which came through Vancouver in large quantities was the Oriental silk, which was loaded on trains and expressed to the east, although climatic conditions here, according to experts, were suitable for manufacture. An attempt is being made to start the manufacture of rubber tires from the rubber which reaches this coast on its way to the eastern factories.

The commissioner also referred to the establishment of plants for making "cut-to-fit" houses. There was an enormous market for them in England, Australia and Mesopotamia, to all of which markets the province has access.

Major Martyn repeated the opinion of an English expert to the effect that British Columbia had a suitable climate and was advantageously placed geographically for capturing the woollen manufacturing industry of the continent. It was nearer the great source of the world's supply, which was Australia, and was the logical place for this industry. Sheep-raising was increasing in popularity among the farmers of the province, where conditions were extremely suitable for the purpose and the wool produced as well as the imported wool should be converted into cloth right here on the Pacific coast.

The great growth in the interest that the world is taking in the Pacific coast was emphasized by the commissioner, who said that the centre of the world's interest had changed from the North Sea to the North Pacific, and the people of British Columbia should be alive to this fact. Not only would the industries which were established prove potential sources of wealth and prosperity to the province, but they would provide the answer to the problem of settling the returned soldier where he could secure for himself a good living under healthy and pleasant conditions.

At the October 9th session the proposals for the appointment of a local government board were discussed and strong opposition developed. It was pointed out that such a board would be expensive, and that its functions could be equally well carried on by municipal councils. It was suggested, however, that additional powers might be given to the inspector of municipalities. Alderman Sargent of Victoria, proposed that an experienced man with bookkeeping knowledge should be appointed to periodically examine municipal accounts. Finally a motion was adopted to the effect that these features of the draft Act should be entirely omitted.

Officials of municipalities in the province will also form a union, which will meet annually just before the municipalities convention.

Additional support for hospitals was urged by Dr. M. T. McEachern, superintendent of the Vancouver General Hospital.

Officers for 1919-20

At the last session it was decided to hold next year's convention at Nelson. The following officers were elected: President, Councillor J. Loutit, North Vancouver; vice-president, Mayor H. McKenzie, Nanaimo; secretary-treasurer, Mayor Gray, New Westminster; executive, Alderman T. H. Kirk, Vancouver; Alderman W. J. Sargent, Victoria; Reeve A. D. Paterson, Delta; Reeve Simpson, Summerland; Alderman Ball, Vernon; Reeve C. J. Jones, Saanich, and Noble Binns, Trail.

Advisory committee: Clerk J. S. Cowper, Saanich; Mayor R. J. Porter, Victoria; Mayor G. W. Vance, North Vancouver; Councillor A. D. Macfarlane, Oak Bay; Reeve E. H. Bridgman, North Vancouver; Mayor R. H. Gale, Vancouver, and Aderman Colley, Kamloops.

Soldiers' relief committee to investigate proposed exemption of taxes of returned men: City Comptroller J. L. Raymur, Victoria; Councillor Sweetman, Kent, and Alderman T. H. Kirk, Vancouver.

The appointment of a solicitor was left in the hands of the executive. F. A. McDiarmid, who has been solicitor for seven years, presented his resignation; the convention asked that he reconsider this, and serve for another year.

WANT PACKING ORDER MODIFIED

Representatives of the packing industry in Canada are to appear before the Board of Commerce in Ottawa again next week to urge further modifications in the packing order. This order was to go into force on October 15th, but its operation has already been postponed until November 1st.

As already mentioned in these columns, an organization, called the Industrial and Development Council of the Canadian Meat Packers has been formed. The officers are: President, J. S. McLean, Harris Abattoir Co.; first vice-president, E. C. Cox, William Davies Co.; second vice-president, Gen. J. A. Gunn, Gunn's, Ltd.; secretary-treasurer, S. E. Todd. The members of the Executive Committee are: O. W. Waller, Swift Canadian Co.; H. C. Wilson, Ingersoll Packing Co.; H. Puddy, Puddy's, Ltd.

TEMPORARY FINANCING OF MUNICIPALITIES

Banks Willing to Meet Necessary Requirements, but Municipalities Usually Want Such Terms as Make Business Unprofitable

BANK loans to municipalities, which reached record levels in 1918, have fallen off this year. The total for November last showed a decrease of $5,400,000 compared with October, and December showed a further decrease of over $10,000,000. This was, of course, immediately after the armistice and the second Victory loan campaign, both of which strengthened the bond market and enabled municipalities to do permanent financing on better terms. During the first six months of this year there was, of course, the usual seasonal increase, but each month the total has been several millions less than the total for the corresponding month last year. The smallest decline, that of June, is approximately six millions, while for March the difference was almost nine millions.

In explanation of these changes, a prominent banker, who has had experience of this kind, both in east and west, said in an interview with *The Monetary Times*:—

Bank Loans to Municipalities

"The banks have been subjected to a certain amount of criticism lately, chiefly at the hands of the farming community, as to their supposed unwillingness to extend credit to the public, and there may be some persons who will ascribe the decrease referred to above to an alleged disinclination on the part of these institutions to advance money to finance municipalities. In view of possible criticism of this nature, it might be well to look into the general attitude of the banks towards municipal loans and by "municipal loans" is meant throughout this article loans for local improvements only, as opposed to advances for current expenditure.

"No one realizes more than the banks that loans to Canadian municipalities are gilt-edged and with this fact as obvious the average municipal council cannot understand why their bank should not jump at any request on their part for a loan, and are bitterly incensed should they meet with a refusal. To municipal authorities the idea of the excellent security offered overshadows all other considerations and in most instances it is impossible to convince them that any other conditions can enter into the question.

"There are, however, certain disadvantages in making advances to municipalities which we will take in the order of their importance.

Repayment is Delayed Too Long

"The first objection is that of time. No large loans made by banks are so liable to drag on and not be paid at the time agreed upon as those to municipalities. This is not due to any lack of effort or desire on the part of municipal authorities to keep their word. Unexpected difficulties, however, may and do occur in municipal engineering work, such as unforeseen bad ground, inclement weather, delay in securing material, etc., all of which mean that the loans therefor have to be extended. Then again, occasional mistakes are made in preparing the by-laws and until these are rectified the bonds cannot be sold and the bank is called upon to wait for its money. Consequently, municipal loans quite frequently run for over a year. Compare this with large commercial credits which are never made for longer than twelve months and are, with very few exceptions, paid up on time and frequently previous to the date of expiry, and the advantage of the latter form of loan is obvious. Now, all Canadians know their country to be rich in resources but short of capital. Business is largely run on money borrowed from the banks and it is therefore necessary to the nation's progress as a whole that the money of the banks should not be tied up for long periods in the hands of, relatively speaking, a few borrowers. The main objection to municipal loans, however, as viewed by bankers, is the uncertainty of the time of payment and, in this connection, it must be remembered that money to a bank is the same as his stock to a retailer. The latter is hampered in his business if the wholesaler cannot be relied upon to deliver goods at the time agreed upon, and loans not paid up when due and expected, affect a bank in the same way.

Want Lower Rate

"The second objection is that of the rate of interest. All municipalities expect to borrow at a rate at least one-half per cent. lower than that ruling for commercial loans, the reason given being always the same—viz., 'better security.' This, however, in point of fact is not true because, for all practical purposes, large commercial loans are just as safe from a banking standpoint by reason of the security taken in such cases, as, for example, advances made under section 88 of the Bank Act. Under this section, there is hypothecated to the bank the raw material as well as goods manufactured and in process of manufacture, and the advance is usually further secured by the personal guarantee of responsible men, in some shape or form. It is frequently forgotten that after all a bank is a business venture and not a philanthropic institution and, as such, has certain duties to its shareholders as well as to the general public.

"The third objection—one which is in a way part of the first referred to above—is the fact that it has occasionally happened and therefore may happen again that a municipal council not having received what it considers sufficiently good offers for its bonds have refused all tenders and have either called for new ones or declined to place such bonds on the market until conditions improve. Meanwhile, the bank is called upon to wait for its money, and if the latter course is decided upon, the time of repayment may be quite indefinite.

Bank Benefits by Improvements

"These objections taken together might lead one to suppose that banks frequently refuse to advance money to municipalities. Such, however, is far from being the case, applications for loans of this nature being granted with extremely few exceptions on account of the greater indirect advantages to be derived therefrom. Every local improvement makes the municipality which has undertaken it a more desirable place to locate in and there is a greater inducement for newcomers and factories to settle there on account of the greater advantages offered, from which the bank which has made the loan reaps its full share of increased business as time goes on.

"In passing, one occasion may be recalled when the banks generally shut down on loans to municipalities, this being in the year 1914, at the outbreak of the war, now happily ended, and had they not done so it is doubtful if Canadian municipal bonds would have maintained their present high prices in the markets of the world. Previous to 1914, 50 per cent. of our municipal offerings were taken by English and European investors who ceased to buy after the outbreak of the great conflict, so cutting the bond market in half. The action of the banks in curtailing loans to municipalities led to the latter, for the first two years of the war at any rate, undertaking very few improvements. For some time past, however, the banks have treated applications for municipal loans as in pre-war days, so that the drop in their advances to municipalities during this year is not due to any action on the part of Canadian financial institutions.

"It is rather difficult to come to a definite conclusion on the subject, but it is quite likely to have been caused by the increased cost of living which has made municipal councils, who are almost always elected on a platform of economy, hesitate to increase the taxes of a people with the problems of reconstruction before them and the cost of the great war on their shoulders."

The partnership of Edwards and Balfe, insurance adjusters, Toronto, has been dissolved. D. C. Edwards and W. J. Balfe will now conduct their business separately.

Branches of the Bankers' Trust Company of Montreal are to be opened in Winnipeg, Calgary, and Vancouver. This company was organized a short time ago by the Merchants Bank of Canada.

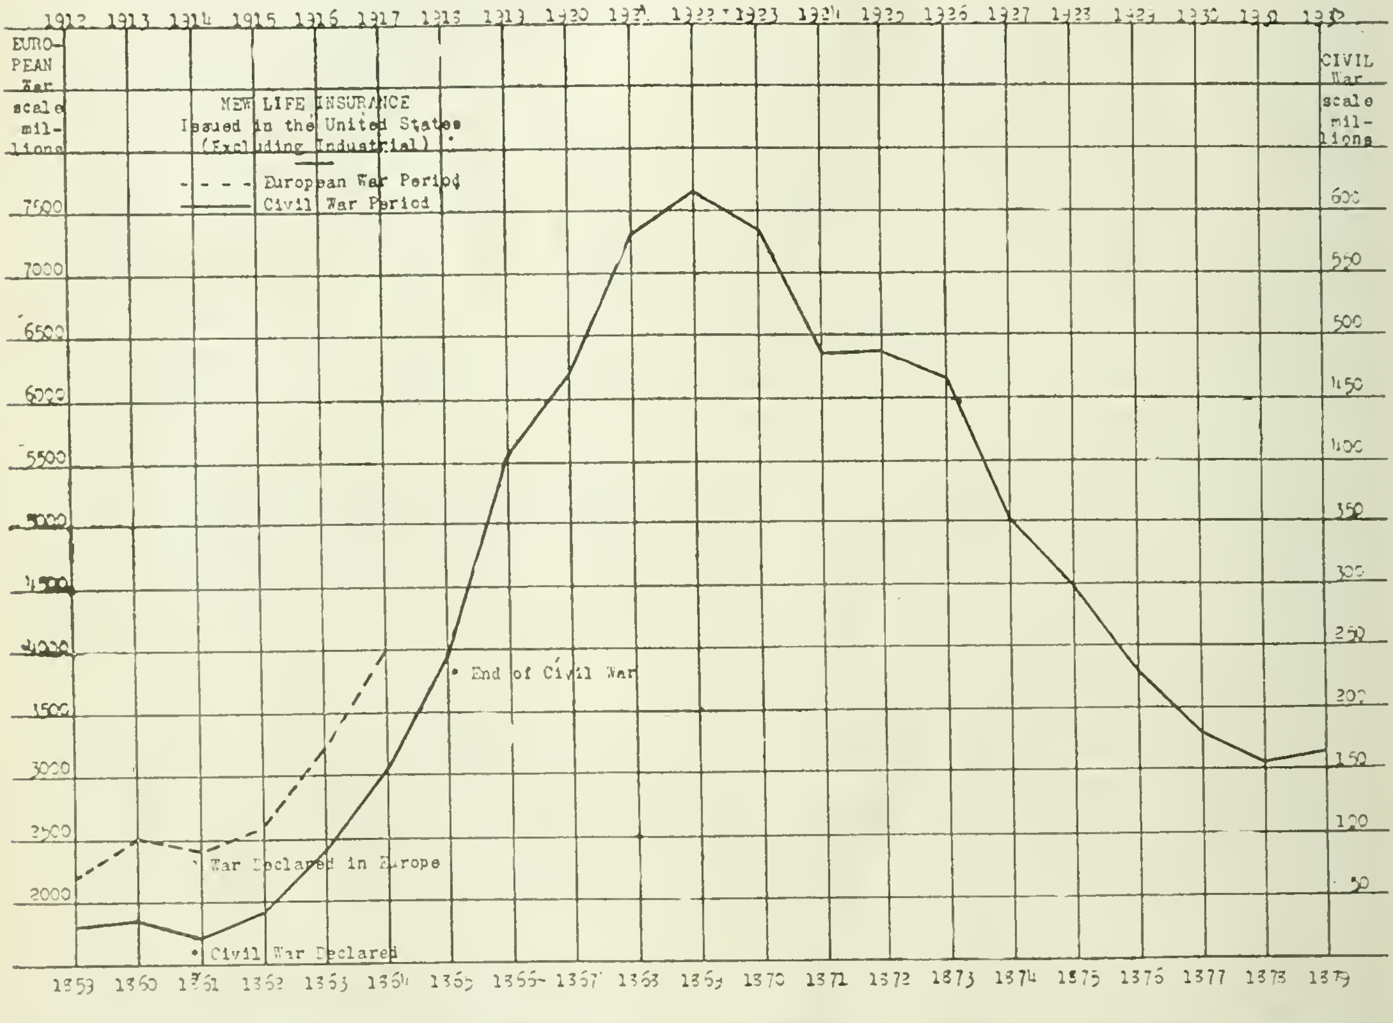
LIFE INSURANCE BUSINESS AND LIVING COSTS

Definite Relation Between These Two Phenomena—Illustration From American Civil War Supports Recent Experience

THAT the trend in the cost of living will be one of the great factors which will determine the amount of new life insurance during the next few years, was one of the points emphasized by M. P. Langstaff in an article entitled "Efficiency in the Selling of Life Insurance," in *The Monetary Times* of August 15th. Figures were also given showing the parallel experience in the case of the Civil War in the United States. The similar increase in the amount of business is illustrated by the accompanying chart, which was compiled recently by the Continental Life Insurance Co., of Wilmington, Del. The relation to the cost of living has been pointed out by Philip Burnet, president of that company, in a letter to *The Monetary Times*. Mr. Burnet compares the course of life insurance business with the trend of commodity prices in the United States on a gold basis from 1860 to 1880, as illustrated by Professor Taussig's "Principles of Economics," (Vol. II., p. 319.) Commenting on the relation, Mr. Burnet says:

"Taussig's chart is based on prices not in paper but in gold, and is the medium for the years stated. With the exception of the years 1864-5 the price curve corresponds very closely with the life insurance curve. Taussig himself says that the extraordinary rise for 1864-5 has never been satisfactorily explained. The abrupt fall from 1865 to 1866 may be attributed in some measure to the fact that immediately after the close of the Civil War in 1865, a large amount of paper money was withdrawn from circulation with the result that the premium on gold dropped almost abruptly from 185 to only about 50.

"In the same connection it is also interesting to note that the curve of new life insurance during the European War period continues to parallel the curve for the Civil War period."



UNION OF QUEBEC MUNICIPALITIES

In November or December a convention is to be held in Montreal to organize a Union of Quebec Municipalities. Preliminary steps to this end were taken at a meeting held some weeks ago in Montreal, and plans have, in fact, been under way since the province inaugurated a Department of Municipal Affairs, over a year ago. Among the features of the proposed constitution is a special consultation bureau for legal, engineering and accounting matters pertaining to municipalities. The intention is that fees will be levied on the basis of assessment rather than of population.

SALES EXPERT LECTURES LIFE UNDERWRITERS

By joint arrangement of the Life Underwriters' Association of London, Ont., and the London Advertising Club, a series of three lectures will be delivered in that city by Arthur F. Sheldon, founder of the Sheldon School of Salesmanship, on October 29th, 30th and 31st. The titles of the lectures are:—"Salesmanship, the World's Greatest Need—Constructive Salesmanship a Universal Principle"; "The Human Being and How He Can Win in the Game of Life, or the Science of Commanding Success"; "Industrial Unrest, Its Cause and Cure."

BANK SHOULD KNOW COMPANY POWERS

Before Relying on Guarantee by One Company, of Debt Due by Another

By M. L. Hayward, B.C.L.

If A owes B, and C enters into a contract guaranteeing that A will pay the debt, some important legal questions arise, especially where one or more of the parties is a joint stock company.

In the case of Union Bank vs. McKillop, Limited, it appeared that McKillop, Limited, was a joint stock company under the Ontario Companies Act, 1897, with the powers conferred by that act, but with no express authority to give guarantees of the debts of other parties. The West Lorne Wagon Company was a customer of McKillop, Limited, and the latter company guaranteed payment of advances by the Union Bank to the Wagon Company to the extent of $20,000, and after the Wagon Company became insolvent and the Union Bank sued McKillop, Limited, on the guarantee, McKillop, Limited, set up the defense that it had no power to enter into such a guarantee, which was, therefore, void and unenforceable.

The decision of the Supreme Court of Canada was in favor of McKillop, Limited, on the ground that the Ontario Companies Act conferred upon the company no express or implied power to guarantee customers' accounts.

"The powers of an incorporated company must be measured by the expressed powers given by the act of incorporation, and such necessarily implied powers as the general purview of the act demonstrates were intended to be covered by the expressions used in the act," said the court.

Hamilton Stove Co. Case

A case along the same line recently decided by Judge Latchford, of the Ontario Supreme Court, and just reported in the official reports, which arose out of a rather similar state of facts, should be carefully compared with the Union Bank case. This was the Bank of Ottawa vs. Hamilton Stove Company. The Hamilton Stove Company held a Dominion charter empowering it, among other things, "to guarantee the contracts of or otherwise assist" any company or persons having dealings with the Hamilton Company.

The Tilden-Gurney Company, incorporated under the laws of the province of Manitoba, had the same directors and officers and practically the same shareholders as the Hamilton Company, and carried on at Winnipeg the same line of business which the Hamilton Company was authorized to carry on, selling the goods manufactured by the Hamilton Company and, in fact, the Tilden-Gurney Company was a sort of western branch of the Hamilton Company. The Tilden-Gurney Company became indebted to the Bank of Ottawa and the Hamilton Company guaranteed the bank to the extent of $100,000.

Was Practically a Branch

In the suit brought by the bank against the Hamilton Company on the guarantee the latter set up the same defence as in Union Bank case, namely that the guarantee was beyond the powers of the Hamilton Company, but in this case Judge Latchford decided in favor of the bank on the ground that in the Union Bank case the company guaranteed was a mere customer of the guaranteeing company, while in this case the guaranteed company was really a branch of the guaranteeing company and carrying on business for its benefit.

"But the company guaranteed in the Union Bank case had nothing like the same relation to the guarantors as that of the Tilden-Gurney Company to the Hamilton Company in this case," said the Judge. "Here the Tilden-Gurney Company carried on business which the Hamilton Company was authorized to carry on, and that business was conducted so as to directly benefit the Hamilton Company. In fact, it was the Hamilton Company's business which the Tilden-Gurney Company carried on."

WHEN IS A POLICY DELIVERED?

Fact that Policy Had Not Been Signed or Sealed Prevents Liability of Company

By M. L. Hayward, B.C.L.

When an applicant applies for life insurance, pays the premium, and the medical report is satisfactory, the company is only too anxious to issue the policy; but where the applicant dies before the policy actually reaches him some legal questions as to the liability of the company are sure to arise.

The case of Robinson vs. the London Life Insurance Company, decided by the Appellate Division of the Ontario Supreme Court, is an interesting one in this connection, and the facts of the case may be briefly summarized as follows:—

On February 3rd, 1917, Robinson called on the agent of the London Life at Preston, Ontario, signed an application for a policy calling for a quarterly premium of $8.62, was examined by the doctor, paid $5 for which he received a receipt, and gave a note for $3.62, the balance of the first quarterly premium.

On the following day, February 4th, the agent mailed the application, the $5 and the note, but not the medical examination, to the head office of the company in London, Ontario, and the papers reached there on February 5th.

On February 6th, the company returned the application and note to the agent at Preston, calling his attention to the fact that Robinson's occupation as given in the application was hazardous and called for a higher premium, and asking the agent to kindly have the necessary changes made and initialed by Robinson.

On February 8th, the agent wrote Robinson explaining the explanation and asking him to initial the alterations which the agent had made in the application and note, and on February 10th, the medical examination reached the head office of the company at London.

On February 24th, Robinson sent his wife to the Preston agent with the application and note properly initialed. She, however, paid the amount of the note $4.77, and received a receipt for the same, being assured by the agent that a policy would be issued and that a receipt was as good as the policy. On the same day the agent sent the amended application with the $4.37 to the head office at London, and returned the note to Robinson.

Policy Not Signed

On February 26th, the amended application arrived at the head office; the medical report was approved by the medical referee on February 27th, and a policy was written and put on the list for mailing on the following day, which would be February 28th, but the policy was not signed or sealed.

So far, everything was o.k., and, under ordinary circumstances, the company would have been very glad to have mailed out the policy but, by one of those remarkable coincidences which sometimes occur in real life, Robinson had died on February 25th; the widow notified the Preston agent on February 27th; the agent wrote the head office and his letter actually arrived on February 28th, in time to prevent the policy being mailed out.

The company then refused to issue the policy or to entertain a claim for the insurance, offering to return the $9.37 premium to the widow which she refused to accept, and brought suit against the company for the face of the policy.

Company Not Liable

The decision of the Appellate Court was that under the above circumstances the company was not liable on the ground that the contract of insurance had never been completed by a tender of the policy on the part of the company and its acceptance by Robinson.

"On receipt of the application, the agent informed Robinson that his occupation being of a hazardous nature, might call for an increase of premium," said the Court; "but when the application reached the company's office, it was dis-

covered that the amount of premium mentioned in the application was not in accordance with the company's tariff, and the application was returned to the agent who made the necessary changes in the application and note and sent them to Robinson. The latter, agreeing to the increased rate, initialed the changes and returned the altered application and note by his wife to the agent. The first application was a proposal for insurance at a certain rate. This the company refused to accept, so what subsequently happened may be regarded as a counter-proposal, and the amended application as a new application or proposal, and was not accepted by the company before Robinson's death. According to the company's by-laws, the manager, assistant manager, and acting manager are the only officers empowered to bind the company by an insurance contract, and they can do so only after the application has been approved by the medical referee. In this case it was not approved by that officer until February 27th. Until then no one had power to bind the company by an insurance contract; and, Robinson having died two days previous to such approval, it was impossible for a contract to have existed."

DOMINION CROP CONDITIONS

Wheat Yield Will be Almost 200,000,000 Bushels—Yield of Most Grains Will be Heavier Than Last Year

THE Dominion Bureau of Statistics issued a bulletin on October 16th, on the yield and condition of field crops as reported by crop correspondents at the end of September. The total yields are subject to revision after final ascertainment of the areas sown according to returns from individual farmers throughout Canada which are now in process of compilation.

Yield of Principal Cereal Crops

The total yield of wheat in Canada is now placed at 193,688,800 bushels, including 174,687,000 bushels of spring wheat, and 19,001,800 bushels of fall wheat. Upon the acreage sown the average yield per acre is 10½ bushels for spring wheat, 23¾ bushels for fall wheat, and 11¼ bushels for all wheat. In 1918 the total yield of wheat was 189,075,350 bushels, or 11 bushels per acre. For oats the average yield per acre for Canada is 27 bushels, representing a total of 399,368,000 bushels as compared with last year's average of 28¾ bushels, and total of 426,312,500 bushels. Barley, with an average of 22 bushels, yields 66,443,500 bushels, as against last year's average of 24½ bushels, and total of 77,287,240 bushels. Rye with an average yield per acre of 14½ bushels yields the total of 8,234,100 bushels as against 15¼ bushels and 8,504,400 bushels in 1918. The yields in 1919 for the three prairie provinces are estimated at 161,419,000 bushels of wheat, 246,856,000 bushels of oats, 46,412,000 bushels of barley, and 5,954,000 bushels of rye.

Cereal, Root and Fodder Crops

The quality at harvest time of the principal grain crops for Canada expressed in percentages of the previous ten years is as follows:—Fall wheat 96 (89), spring wheat 91 (99), all wheat 92 (98), oats 90 (94), barley 89 (97), rye 92 (92), peas 91 (95), beans 95 (82), buckwheat 96 (86), mixed grains 94 (98), flax 93 (92), and corn for husking 94 (89). The figures within brackets represent the quality of the crops in 1918.

The average condition of root and fodder crops in Canada at the end of September expressed in percentages of the decennial average was as follows, with last year's figures for comparison placed within parentheses: potatoes 95 (93), turnips, mangolds, etc., 91 (96), sugar beets 85 (97), fodder corn 95 (92), alfalfa 91 (89). By provinces potatoes appear to be best in Quebec, 103, the other provinces ranging as follows: Saskatchewan 97, New Brunswick and Alberta 96, Nova Scotia 94, Prince Edward Island 93, British Columbia 90, Manitoba 89, and Ontario 81. In Saskatchewan, Alberta and British Columbia the condition of the root crops shows a decided improvement at the end of September as compared with the end of August.

ASSOCIATION OF LIFE PRESIDENTS' CONVENTION

Ways and means by which the institution of life insurance may contribute further to meeting the country's readjustment problems will be considered at the thirteenth annual convention of the Association of Life Insurance Presidents, to be held in New York, December 4th and 5th. The general needs of the country and of its urban and rural communities will be presented by speakers who have been studying the subject from various points of view. These speakers will include governmental executives, corporation executives and economists of national reputation. In addition, life insurance executives will furnish collective information showing the extent and character of the contribution of the business of life insurance toward meeting the problems of the country thus far, and indicating how its functions and resources might be further employed in aiding national development at a time when many new and perplexing questions are confronting the people. The convention will be opened with an address by Dr. Nicholas Murray Butler, president of Columbia University. His subject will be along the line of "Mental vs. Material Reconstruction."

The National Convention of Insurance Commissioners will meet in New York the same week as the life presidents, the dates of the commissioners' sessions being December 2nd, 3rd and 4th. The Association of Life Insurance Counsel will also meet that week in New York, its dates being December 2nd and 3rd. Invitations to attend the life presidents' meetings are now being sent to all the members of these other organizations, as well as to life insurance executives generally throughout the United States and Canada and to the insurance journalists.

STATEMENT OF INLAND REVENUE

The following is a statement of Inland Revenue in Canada for the month of August, 1919:—

SOURCE OF REVENUE	Amounts.	Total.
EXCISE.	$ cts.	$ cts.
Spirts	420,363 03

Malt	198,029 08	
Tobacco	2,769,324 84	
Cigars	140,488 83	
Manufactures in Bond	15,627 40	
Acetic Acid	672 17	
Seizures	16,871 00	
Other Receipts	3,157 00	
Total Excise Revenue		3,567,074 00
Methylated Spirits		40,152 39
Ferry		
Inspection of Weights and Measures		
Gas Inspection		
Electric Light Inspection		
Law Stamps		441 10
Other Revenues		5 58
War Tax		1,632,745 24
Grand Total Revenue		5,240,418 31

SEPTEMBER EXPORTS DOWN—IMPORTS UP

Preliminary figures of the trade of Canada for September, just issued by the Department of Trade and Commerce, show the following results:—

	Sept., 1919.	Sept., 1918.	Aug., 1919.
Exports	$104,994,406	$138,738,700	$116,564,792
Imports	85,515,012	71,469,480	81,357,485
	$ 19,479,394	$ 67,269,220	$ 35,207,307

The principal decreases in exports are in fibres, textiles and textile products, and in the miscellaneous class.

A Swiss delegation is visiting Canada under the auspices of the Canadian Trade Commission. It was in Montreal on October 14th and 15th.

INDUSTRIAL EVENTS OF THE WEEK

Riordon Pulp Co. Will Extend Products—Large Toronto Plant Purchased by Grafonola Company

IT is now generally accepted that no substantial change can be made in the Canadian tariff for some time, in spite of agitation in the Canadian west and the intimation in the finance minister's budget speech last June to the effect that the tariff was due for an early investigation. At any rate, United States capital is flowing into new branch plants in considerable volume, and Canadian concerns themselves are making numerous extensions. Ontario is securing a large share of the new industries. One of the cities which has been making the most rapid strides is Hamilton, many important industries deciding to locate there. Among them are: The Hamilton Lamp Co., capitalized at $300,000; the Canadian Carbonate Co., Ltd., of Montreal; the Firestone Tire and Rubber Co., Akron, Ohio; the Norton Co., of Worcester, Mass., the largest manufacturers of grinding wheels and grinding machinery in the world, with a capitalization of nine million dollars.

A large new gramophone industry is locating in Toronto. A ten-acre plant, comprising ten large buildings and covering more than 235,000 feet of factory space, is to be devoted to the manufacture of Columbia Grafonolas and records. The Columbia Graphophone Co. has bought from the Imperial Munitions Board the plant of Canadian Aeroplanes, Ltd., on Dufferin Street. With one exception, this is the largest plant under one roof in Toronto. This extensive purchase was made, according to officials of the Columbia Graphophone Co., to take care of the rapidly and consistently expanding demand in Canada for their product. Both Grafonolas and records are to be made under the same roof, and the company will take advantage of the drying kilns installed for the manufacture of aeroplanes to make their own cabinets for the Grafonolas. The company officials state that the support of the trade in Canada has justified this big development and made it possible.

A Canadian branch of the Nashua Gummed and Coated Paper Co., will locate at Peterborough. The company is strong financially, and has two factories in the United States, and one in England. The old Cordage Works will be remodelled and equipped for the purpose of meeting the demands for the line of goods which will be manufactured.

Owen Sound is to have an extensive cement industry. The Federal Cement Co. is going to take over the plants of the Grey and Bruce and the Sun Cement Co. on the west side, and will put in equipment that will be capable of manufacturing 2,000 barrels of best quality Portland cement per day. The company will probably make a bond issue in the near future.

A company to be known as the Canadian Phonograph Motor Co., Ltd., formed to take over the Canadian business of the Phonograph Mfg. Co., Brooklyn, N.Y., has located at Stratford.

The British Chemical Co.'s plant at Trenton, has been taken over by Chemical Products Co. of Canada, Ltd., of Toronto. When the plant is equipped about 500 hands will be employed.

Purchase of 600 acres by the General Motors Corporation has been announced by officials of the company. The land, which is near the $6,000,000 plant the corporation is building on the Walker road, Walkerville, will be used as the site of a model town for employees. In the meantime temporary quarters will be erected by the corporation. More than $1,000,000 will be spent in building workmen's houses, the officials said.

At a meeting of the Belleville Board of Trade last week it was decided to engage in an active publicity campaign to draw the attention of new industries.

An announcement from Montreal to the effect that the Hawkesbury plant of the Riordon Pulp and Paper Co. has commenced the manufacture of bleached sulphite pulp in large volume has caused much interest in the pulp and paper field. The plant is turning out 25 tons of this product daily, this representing 80 per cent. of its output. Heretofore this mill was engaged in the manufacture of unbleached pulp, the profit on which is very much less than that upon the bleached product. Bleached sulphite pulp is said to sell for about $25 per ton more than the unbleached. Not all of this is extra profit, inasmuch as the cost of producing bleached pulp is considerably greater than the cost of producing unbleached. A large addition to profits is, however, indicated in the above announcement.

The announcement was made last week of the appointment of F. J. Buller to the Canadian Steel Tire and Wheel Co. This company promises to take an active place among Canada's more prominent industries. It is stated that the new company is associated with interests with a strong position in the railway equipment field, and is constructing a large plant at Montreal to make steel tires for locomotive and passenger equipment. This will be a new industry for Canada, as up to now these steel tires have been imported.

Scotia Coal Prospects Brighter

The output from the mines of the Nova Scotia Steel and Coal Co. at Sydney Mines, N.S., will show a substantial increase this year over that of 1918. The entire production for 1918 was 502,018 tons, while the output for the present year is expected to reach 550,000, and over. Asked regarding the winter's prospects at the company's collieries, Mr. T. J. Brown said they were very bright, indeed, and there was every indication that the mines, the Jubilee included, would work every day if weather conditions permitted.

The utilization of all waste or exhaust steam for the purpose of driving dynamos generating electrical energy and providing further power for the entire electrification of all its new mines and future ones is the present plan of the Dominion Coal Co. at Glace Bay, N.S. The necessary power is to be obtained by the erection of steam turbines at the various collieries now being operated by steam power and additional turbines at the company's central power station at Noed colliery.

Foreign Trade Association Suggested

A foreign trade conference is to be held in San Francisco next May, when all the industrial, financial and shipping concerns of the United States will be represented. Commenting on this recently in Vancouver, B.C., Captain Dollar, one of the originators of the association, said: "Canada should have a foreign trade association, and, in fact, the more I study the adverse trade balance and the 4 per cent. against exchange, the more it is borne in on me that Canada's only salvation is in developing foreign markets. In this expansion British Columbia should play a large part, as this province lies on the greatest trade waterway in the world and has every advantage of being close to the Oriental markets."

A statement has been made by Mr. J. J. Warren, of the Consolidated Mining and Smelting Co., Trail, B.C., on the development of Canada's zinc output. Mr. Warren, who is negotiating the sale of the company's zinc output in London, England, says the market possibilities for the company's product in Europe, South Africa and India are unlimited as regards the disposal of zinc. Canada can supply 10 per cent. of the world's demands, equal to 780,000 tons of zinc, and is only producing 25,000 tons. The impression he has gained is that the condition of the market warrants expansion to supply these 780,000 tons.

The Britannia Wire Rope Co., Ltd., with which is associated the firm of Gibson's, Ltd., Vancouver, has been registered with an authorized capital of $100,000. A site has been secured on Granville Island for the erection of a factory.

A Vancouver pulp and paper company, situated at Port Alice on the west coast of Vancouver Island, is nearing completion, and will shortly be ready to manufacture 70 tons of pulp daily. It is expected that over 800 men will be required for the various operations, including logging and saw-milling.

Life Insurance as Protection

The motive that prompted the inventors of Life Insurance was the desire to furnish protection. Savings and investment are invaluable accompaniments but the feature that sells Life Insurance is protection. That company confers the greatest benefit upon its members that gives "the greatest amount of genuine Life Insurance protection for the least possible outlay." This aim has ever been the guiding star of The Mutual Life Assurance Company. Following out the principle of co-operation as the Mutual has done means that the company allots the whole of its profit, from all sources whatsoever, to the policyholders thus reducing their expense for Insurance to actual cost—the only Canadian Company operating on this principle. The experience of the Mutual has fully justified the hopes of its founders who fifty years ago planned the institution on the basis of

HOW MANY MEN

prepare for a time of need?

Sickness or disabling accidents might come to some of us—but death certainly comes to all of us sooner or later. Common sense should teach us to prepare during the days when our earning powers are greatest for the future protection of our loved ones.

Think of your wife and children. Deprived of your protection and support they will be left alone in the world to shift for themselves, and you know what that means. A Life Insurance Policy is the safest way of providing for future protection.

The Great-West Life issues Policies to suit all classes. Information will be gladly given on request. Write, stating age, to

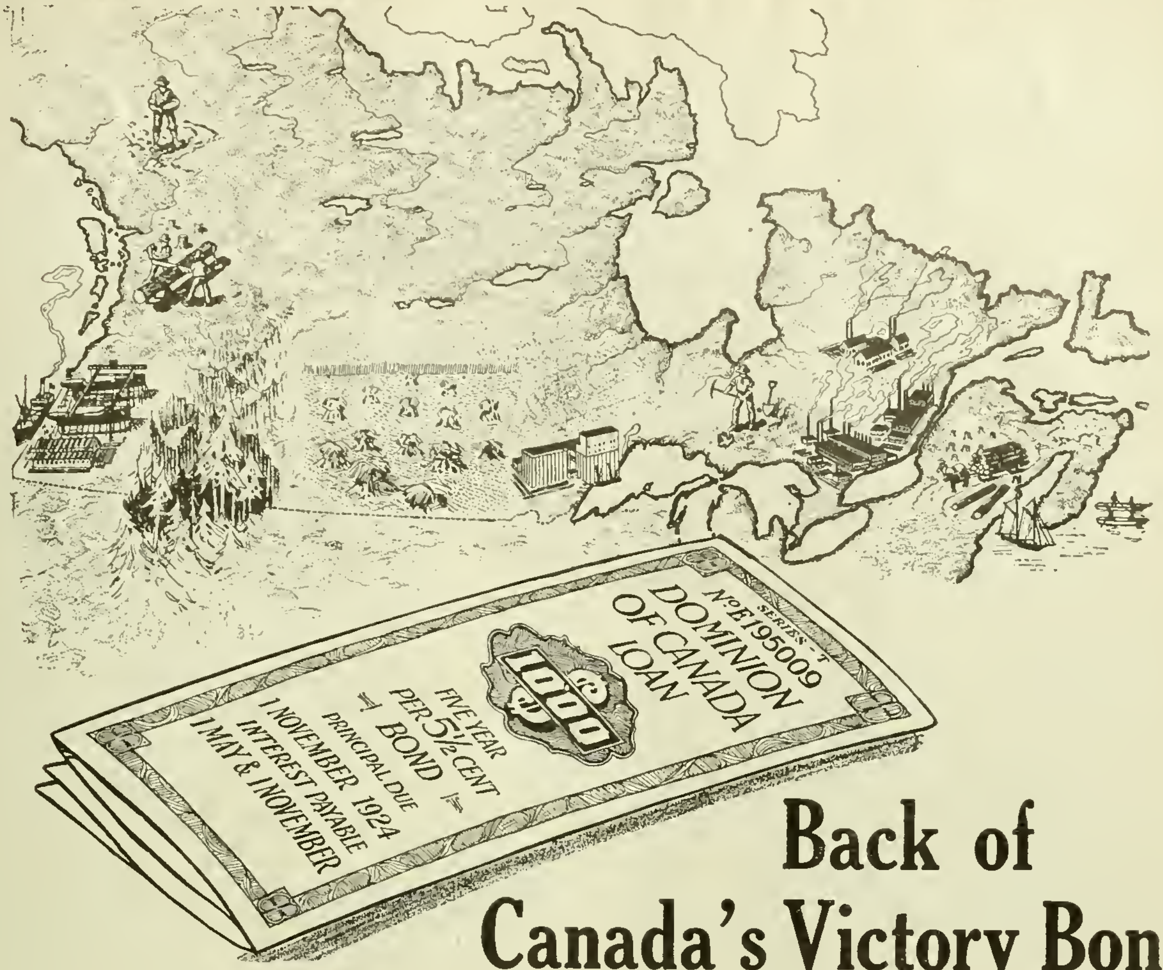
Merchants Cold Storage Co., $380,000; G. M. Demers, L. Davis, J. Klein. X., Ltd., $49,900; J. A. Papineau, A. Martin, J. Hesysman.

A stock issue of the New Charlottetown Hotel Company is stated to have been all subscribed in the maritime provinces and the new company will shortly take over the Victoria Hotel.



SERIES T
No E195009
DOMINION OF CANADA LOAN
$ 1000 $
FIVE YEAR PER 5½ CENT BOND
PRINCIPAL DUE 1 NOVEMBER 1924
INTEREST PAYABLE 1 MAY & 1 NOVEMBER

Back of Canada's Victory Bonds

WHEN you loan money you make sure the borrower is able to repay the loan and that he will pay you the interest regularly as it falls due.

When you loan money to Canada you know your money is absolutely safe.

Back of Canada's Victory Bonds is the entire wealth that Canada possesses—all her industries and all her resources in minerals, fisheries, forests and lands.

Canada has one-third of the area of the whole British Empire; she is larger than thirty United Kingdoms; twice the size of India; eighteen times as large as France. She is practically as large as all of the European countries put together.

Canada is larger than the United States including Alaska (Canada, 3,729,665 square miles; United States and Alaska, 3,617,673 square miles).

Canada has over 440,000,000 acres of farm lands—and only one-eighth of it is yet under cultivation.

Canada has the most extensive and best stocked fisheries in the world—232,000 square miles of fishing waters.

Canada has over 225,000,000 acres of commercial timber—she is the great forest resource of the Empire.

Canada's mineral deposits have scarcely been scratched—yet her mines yielded $210,204,970 last year.

Canada's field crops have doubled in five years—from $552,771,500 to $1,367,909,970.

Canada's people have increased their cash balances in Banks and Post Offices nearly seventy per cent. in five years—from $1,086,013,704 to $1,740,462,509.

Canada's trade has more than doubled in five years—from $1,085,175,572 to $2,564,462,215. Canada emerges from the war one of the world's greatest and strongest nations—her natural wealth equals $2,000 for each man, woman and child of her population.

Canada's Victory Bonds are the finest possible investment where safety is the chief consideration.

Moreover, when you loan your money to Canada you know that the interest will be paid every six months—all you have to do is to go to the nearest Bank and get it.

Canadians will soon be given another opportunity to buy Victory Bonds.

This will probably be the last time you will be able to purchase Canada's bonds on such favorable terms.

Prepare to buy—All Canada is Your Security.

Victory Loan 1919

"Every dollar spent in Canada"

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

THE OUTLOOK FOR STOCK PRICES

"Holders of stock bought on margin cannot afford to disregard the warning contained in the further rise in the call loan item of the Canadian bank statement," says Greenshields' Monthly Review for September-October, 1919. "The July figures show a slight recession from the high record level reached in June. The preliminary returns for August, however, give a total of $97,899,836, a new maximum, although August was a comparatively quiet month on the stock exchanges. The revival of heavy buying by the public in September foreshadows a material increase in the call loan figures for that month. If our readers will turn back to the chart* published in the Review for July they will find some interesting data on the relationship between stock market prices and call loans. The bull markets of 1915-1916 started with call loans at about $66,000,000 and culminated with the figures at $91,000,000. The rise in market prices that set in during 1918 started with call loans at about $71,000,000. The high prices of 1916 coincided with the peak of the rise in call loans. Conversely, stock prices and call loans were at their lowest at approximately the same periods in 1915 and 1917, when liquidation in the market had been completed and a new advance was getting under way.

"Precise deductions as to how far prices may advance or decline are not possible from a study of the fluctuations of call loans. Before the present movement culminates prices may go considerably higher and several millions may be added to the call loans. It is reasonably plain, however, that a point is being reached where purchases of stocks for speculative profit involve dangers of loss disproportionate to the possibilities of gain. It is probable that we are now in a distributing stage in the market. This may continue for some time, and will be marked by spectacular advances in specialties that ordinarily attract little attention. That accepted feature of a period of distribution is, indeed, easily discernible in the markets of the past few weeks.

"Uncertainty as to how long the inevitable liquidation and a bear market may be deferred lies largely in this: Inflation is evident on all sides. The rise in prices of speculative industrial stocks while prices of high-grade investments are low is a reflex of conditions summed up in the 'high cost of living.' Further, although the speculative position is over-extended in the sense that the public are carrying a lot of stock bought on margin, the public are probably better able to protect their commitments than ever before. The War Bonds enter into calculations here. The public are speculating with large cash resources, backed by a reserve of War Bonds.

"We do not consider the prices of many stocks high from the standpoint of earnings and equities, but the technical position of the market has become weakened. For that reason we strongly advise the taking of profits on speculative holdings of industrials and their reinvestment in good securities of fixed return. The latter will benefit before long from the removal of inflationary influences responsible for the present high prices of industrial common stocks."

CITY TAXATION IN SASKATCHEWAN

The first meeting of the special committee of the Union of Saskatchewan Municipalities, appointed to investigate the problem of taxation in urban centres, met in Regina on October 16th, but on account of the magnitude of the question the committee was unable to come to any definite conclusion. After some discussion it was decided that another meeting would be held in the near future, when it will be decided whether the members of the committee will be able to devote suffiicent time to prepare a report which would deal with the question in a comprehensive manner and would bring results. In the meantime the members will gather data on certain phases of the subject and prepare individual reports, which will form the basis for discussion at the next session.

GOVERNMENT AND MUNICIPAL BONDS

Two Provincial Issues Coming After Victory Loan Campaign—Sale of Winnipeg Securities Direct to Public Suggested

MUNICIPAL and provincial financing is now practically at a standstill until the Victory Loan is cleared away. A number of issues are to be floated soon after the campaign, however. As mentioned in these columns last week, New Brunswick will require about $2,000,000 on December 1st. Alberta will borrow a similar amount. Hon. C. R. Mitchell, the provincial treasurer, was recently in the east discussing plans in this connection, and also to find out what terms might be obtained for issues of Alberta irrigation district bonds. In the meantime temporary accommodation is being arranged.

An issue of $250,000,000 5½ per cent. bonds of the United Kingdom is being made in New York. The three-year bonds, due November 1st, 1922, are being offered at 98 and interest, to yield 6¼ per cent., and the ten-years bonds, due August 1st, 1929, are being offered at 96¼ and interest, to yield 6 per cent. Both maturities are convertible at the option of the holder, par for par, on the basis of $4.30 per pound sterling into British Government Internal War Loan 5's, to be retired February 1st, 1929, at 105. The loan combines the advantage of being payable in America in dollars with the opportunity for profit if sterling exchange advances. As a result of this offering of a British loan on a favorable basis, the prices of the other United Kingdom issues have fallen off. The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97⅛	97¼
United Kingdom 5½% (Nov. 1, 1919) ..	99⅞	100
United Kingdom 5½% (Nov. 1, 1921)..	96⅛	96⅜
United Kingdom 5½% (Feb. 1, 1937)..	91¾	92¼
Canadian Pacific 6% (Mar. 2, 1924)	99⅝	99⅞
Dominion of Canada 5½% (Aug. 1, 1921)	99½	99⅞
Dominion of Canada 5½% (Aug. 1, 1929)	97½	97¾
City of Paris 6% (Oct. 15, 1921).......	97	97¼
Russian Govt. Ext. (5½% (Dec. 1, 1921)	42	45
Russian Govt. Ext. 6½% (July 10, 1919)	45	47
Swedish Govt. 6% (June 15, 1939).....	97½	98

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Fitzroy Twp., Ont...	$ 3,000	6	15-instal.	Oct. 25
Spirit River, Alta...	30,000	6	15-years	Oct. 25
Renfrew, Ont.	17,500	6	30-years	Nov. 24
Rivers, Man.	9,000	6	20-instal.	Oct. 25
Trafalgar Twp., Ont.	82,014	6	20-years	Oct. 27
Lindsay, Ont.	95,000	5½	......	......

Rivers, Man.—Tenders will be received until October 25th for the purchase of $9,000 6 per cent. 20-instalment debentures for electric light purposes.

Debenture Notes

Wingham, Ont.—A by-law providing for the raising of $40,000 for hydro purposes has been passed.

Ingersoll, Ont.—A by-law has been passed to provide for the raising of $120,000 for school purposes.

Renfrew, Ont.—A by-law has been passed to raise $25,000 for a new fire hall and central heating plant.

Yarmouth Township, Ont.—A by-law has been passed to provide for the issuance of $22,000 of debentures for school and other improvement purposes.

Winnipeg, Man.—A by-law will be submitted to the electorate on November 28th for the authorization of the

creation of a debt of $350,000 for the Maryland Street bridge.

Brandon, Man.—"City finances are satisfactory according to Mayor McDermid, and Brandon will not issue any securities in the near future," says a wire just received from the western representative of *The Monetary Times*.

Windsor, Ont.—A by-law authorizing the issuance of $15,000 school debentures has been passed and registered.

Toronto, Ont.—It has been announced that the Toronto Hydro-Electric System would soon ask for an extension of capital to the amount of $700,000 to take care of its increased domestic business. This will necessitate the issuance of more bonds.

Esquimalt, B.C.—Two money by-laws have been adopted by the council for submission to the ratepayers. One is for the issuance of $25,000 20-year bonds for a new fire hall, and the other is for the issuance of $20,000 bonds for fire-protection equipment.

Fort William, Ont.—Soon after the Victory Loan campaign is finished the city will offer for sale at par $10,000 of school debentures in $100 denominations. The debentures will be for 30 years, and the interest rate will be 5 per cent. A short time ago the city disposed of school debentures to the amount of $80,000, and since that time $87,000 more have been issued. In addition to this, the sum of $230,000 of public school debentures will be offered for sale in denominations of $1,000.

Winnipeg, Man.—The suggestion has been made by Alderman MacLean that the city sell its bonds direct to the public. The present method of placing the city's securities is to have the Bank of Montreal, the city's fiscal agent, handle them, and they are sold to New York or Toronto concerns. In putting his suggestion before the council Mr. MacLean said: "I would suggest that an issue of bonds be floated here. There is sufficient money in the city to take care of all the debenture stock, and we could very easily throw two millions of bonds on the open market and sell them with advantage to the public."

The bonds, according to his scheme, should be in five, ten and fifteen-year terms, in $50 and $100 amounts, with 5 per cent interest. "They should be made as attractive as Victory bonds," he said, "and with these terms, the purchase of a bond would be very easy, and if the buyer desired to dispose of it, the sinking fund trustees could accept the bond. We have ten million dollars lying dormant here in banks earning 3 per cent., and what we should do is convert that into bonds to be placed on the market where the public will earn 5 per cent. and benefit by it."

Montreal, Que.—A. E. Brunet has been ordered to return to the Catholic School Commissioners of Montreal 150 debentures of $1,000 each, or their equivalent value in cash of $150,000, by Mr. Justice Allard in the Superior Court in a judgment registered against Brunet. The debentures, bearing interest at the rate of 5½ per cent. per annum, were issued by the old school board of Cote de la Visitation under the authority of a legislative enactment passed in 1913. The defendant, Brunet, tendered for the debentures, which are redeemable in 1953, and they were awarded to him. The Central Catholic School Commission annexed the school municipality of Cote de la Visitation in 1916 and took over all the old board's assets and liabilities. In the present action it was alleged that the defendant had not paid for the debentures. He submitted to the court that the claim was premature, and if he were obliged to accede to the demand before the rescinding of a resolution of the board, dated January 28th, 1913, authorizing the loan for other purposes than mentioned in the project, he said he would be liable to pay the liability a second time. Mr. Justice Allard said defendant had failed to prove his plea, and, as plaintiffs had established their claim, judgment was given, condemning defendant to return the debentures with interest coupons within fifteen days of the present judgment, or, in default, pay to the school commissioners $150,000, with interest.

C.M.A. DIVISIONAL ORGANIZATIONS

Officers for Ontario and Quebec—Profit-Sharing Discussed in Montreal—Why Tariff is Needed

FOLLOWING upon the decision reached at the last annual meeting of the Canadian Manufacturers' Association, to organize divisions for British Columbia, the prairie provinces, Ontario, Quebec, and the maritime provinces, a meeting was held in Toronto on October 6th, and the Ontario section formed. This meeting was addressed by J. S. McKinnon, 1st vice-president, on "The Present Conditions and Prospects of Canadian Industries," by C. H. Carlisle and by S. R. Parsons, and by Sir Henry L. Drayton, who appealed for support for the Victory Loan. The following officers were elected for the Ontario division: Chairman, Geo. H. Douglas, Hamilton; vice-chairman, J. R. Shaw, Woodstock; secretary, H. MacDonald (in addition to his present office of legal secretary of the association). Executive committee—Geo. Brigden, Toronto; C. H. Carlisle, Toronto; G. C. Cockshutt, Brantford; W. Cowan, Galt; T. J. Dillon, Welland; H. W. Fleury, Aurora; E. J. Freysang, Toronto; Robert Gray, Chatham; Sam Harris, Toronto; Fred Hatch, Whitby; Wm. Inglis, Toronto; G. M. McGregor, Ford; John Millar, Toronto; T. F. Monypenny, Toronto; J. F. Paige, Port Arthur; Thos. Roden, Toronto; H. J. Waldie, Hamilton; S. J. Williams, Kitchener; A. W. White, London; Frank Whitton, Hamilton.

Montreal Division

A similar meeting was held the same day in Montreal, and the officers elected for the Quebec division were as follows: Chairman, G. H. Duggan; vice-chairman, C. H. Smith. Executive committee—R. J. Coghlin, Raoul Grothe, R. H. McMaster, Walter B. Ramsay, J. A. Richard, F. W. Stewart, Paul F. Sise, Walter Smardon, all of Montreal; J. H. Fortier, O. A. Gignac, Joseph Picard, J. E. Warrington, all of Quebec; C. A. MacKinnon, Andrew Sangster, of Sherbrooke; C. J. Laframboise, St. Hyacinthe; R. J. Fraser, St. Johns; J. E. Allain, and A. A. Paradis, Victoriaville; W. F. Bodden, Hull; W. H. Miner, Granby; H. W. Mathewson, Shawinigan, and Robert Ryan, Three Rivers.

"Needed Tariff Changes" was the subject of an address by J. R. K. Bristol, head of the customs department of the association, followed by a general discussion. Referring to the statement in the budget speech last spring, to the effect that the time had come for tariff changes, Mr. Bristol pointed out that economic conditions in other countries would not permit this at present. He suggested that the government be urged to promote preferential tariffs applicable within the United Kingdom and possessions, and the appointment of a Tariff Commission. He thought that it might be possible to work out a system of interchangeable tariffs to promote trade within the British Empire. He pointed out that all other countries are uniformly for a high tariff and thought that it would be rank folly to even talk of lowering the tariff at this time. The question of German competition was also raised and it was urged that steps be taken to protect those manufacturers who, during the war, started making commodities hitherto supplied by German manufacturers.

J. H. Sherrard, of the Alaska Bedding Co., Ltd., outlined a plan which has been in operation in his company for nine months for obtaining greater production and a general improvement of conditions through profit-sharing with employees. Mr. Sherrard stated that early last year his company came to the realization that the dollar was no longer an incentive to greater production by its workers and therefore carefully studied plans for increasing production along different lines. Under the scheme which was decided upon each employee of the company receives a yearly dividend upon his yearly earnings on the same basis as the common stockholders of the company. An arbitration board has been established to pass upon the cases of any employees discharged. It was promised that no employee would be discharged without cause and any one discharged could go before this board for a hearing as to the justice of his dismissal. Mr. Sherrard stated that the plan was successful up to date in increasing production, decreasing waste and promoting efficiency generally.

NEWS OF MUNICIPAL FINANCE

No Increase in Montreal Realty Tax—Winnipeg and Moose Jaw Collections—Edmonton Assessment Adjustment

Burnaby, B.C.—The recent tax sale by the municipality netted about $37,000.

Calgary, Alta.—Tax collections to date this year total $7,506,112 as compared with $6,751,289 for 1918.

Smith's Falls, Ont.—The town council has given the first reading to a by-law providing for the borrowing of $60,000 from the provincial government under the Housing Act.

Westmount, Que.—There will be an increase of one mill in the tax rate. The new rate of twelve mills will go into effect on November 13th next, and will be levied on an assessment of $44,873,000.

Monaghan Township, Ont.—The total assessment of the township for 1919 is $922,194. It is, therefore, necessary to levy a rate of 5 8/10 mills for county purposes and 3½ mills for township purposes.

Hamilton, Ont.—Deeming it good business because various sinking funds yield a revenue of but 4 per cent. while Victory bonds yield 5½ per cent., the city will subscribe $350,000 to the coming loan.

Waterloo, Ont.—The income assessment this year totals $308,782, an increase of $70,666 over the previous year. The land and building assessment amounts to $3,264,665, compared with $3,258,350 in 1918, an increase of $6,315.

Glace Bay, N.S.—In a statement made last week, Town Clerk McNeil said that unless a new system of obtaining revenue is started, the town will be in a difficult condition within a few years. The assessment rate is now almost as high as it can possibly be made.

Winnipeg, Man.—The report of the Winnipeg Public School Board for the year 1918 shows revenue to the amount of $1,579,231, and expenditures, $1,554,393. The sinking fund account shows assets of $771,582, and liabilities—reserves as required by the several bond by-laws, etc.—$756,230, leaving a surplus of $15,352.

Saskatoon, Sask.—The city council has decided to raise the street car fares from five cents to six cents cash. Tickets will be sold in stores at five for 25 cents, while those purchased on the cars will be six for 35 cents. The object is to encourage the sale of tickets, and so eliminate delays on various routes.

Saskatoon, Sask.—A resolution drawn up by City Commissioner Yorath, asking for a housing loan in accord with the sum set aside by the Dominion, has been approved. In effect, the resolution asks that $200,000 be advanced through the provincial government, and that it shall not be considered part of the city's debt; and that the Premiers of Canada and of Saskatchewan be urged to take immediate and decisive action to prevent suffering and hardship.

Goderich, Ont.—The tax rate for the year has been struck at 44 mills, made up of 3 mills for collegiate institute, 7 mills, public and separate schools, and 34 mills, general. This year's assessment for schools only, $2,361,781; exemptions, $491,000, leaving for general rate assessment $1,870,781. Four mills goes to pay the interest on the Ontario West Shore Electric Railroad guaranteed bonds, $7,500; bonds guaranteed, $150,000.

Moose Jaw, Sask.—In the first nine months of last year the city received a total of $87,311 in arrears of taxes, while this year to September 30th, $98,291 was paid in in arrears, an increase of $10,979. Last year in the same period a total of $309,640 was paid in in current taxes, and this year in the same period $385,367 was paid in in current taxes, an increase of $75,726. The total taxes paid in during the first nine months of 1918 was $396,952, and this year $483,658, or an increase of $86,706.

Winnipeg, Man.—According to the report of the Assessment Commissioner to the Finance Committee, the city's total taxes for the year will amount to $7,534,516. Tax collections start on November 1st, and the following amounts will be collected: Taxes on the general assessment total $5,428,540; water district tax, $619,895; exemptions liable for school tax, etc., $6,810; local improvements and special taxes, $1,103,833. This means a grand total general tax of $7,159,080; business tax roll, $375,436.

At the last meeting of the city council the municipal commissioner's levy of $47,000 at 5½ per cent., interest, was ordered paid on the recommendation of the finance committee.

Montreal, Que.—The civic budget is now being prepared by the administrative commission, and the statement is made that there will be no increase in the realty tax for city property owners. The statement adds that if the demands of each department had been approved, there would undoubtedly have had to be an increase in taxation, but the commission had carefully gone through every request made, and had eliminated large sums which it was not considered were absolutely essential for the coming year, with the result that they had kept the totals asked for down to approximately the same amounts that were voted last year.

This means that the city will have to raise approximately $19,000,000 in order to carry things along. Of this, nearly seven millions has to go to pay the interest on the debt of the city, which last year amounted to $118,892,000, while nearly four millions has to be handed over to the school commissioners as the fruits of the school tax. Then salaries and wages amounting to about $4,200,000 has to be provided for, and about $85,000 for pensions and annuities. The amount allowed last year for the administration of the city, apart from these items, was $3,043,572, and it is anticipated that this year the total will be a few thousand dollars in excess of this sum, which will, however, be provided for by the increase in the assessable value of the city. It is not likely that the bachelors' tax will again be imposed, for the city has not yet been heard in the case testing the legality of the tax for the current year, which is now before the courts, and the amount received from it is so comparatively small, although it amounts to $10 per bachelor, that no one at the city hall believes it worth the trouble and annoyance of collecting.

Edmonton, Alta.—In dealing with the problem of readjusting assessment on the outlying lands of the city, the following decisions were made by the council:—

No reduction of city limits, with some exceptions.
Division of city into inner and outer zones.
No utility extensions in outer area.
Outside lands assessment to not be higher than $200 per acre for five years.
Reduced mill rate in outer zones.
No reduction in back taxes.
Increment tax on suburban lands.

It was stated that there were $1,000,000 of tax arrears on properties in the outer parts of the city, and while it was felt that every effort should be made to ease the method of paying, there was no disposition to reduce the amounts due.

Controllable expenditure of the city for the half-year was $392,727, and the estimate for the whole year is $900,000, which is being levied for. Last year the reserve against uncollectable taxes amounted to $250,000. This year another $100,000 is being levied. A favorable comment was made on this matter by the auditors, who said: "It is satisfactory to note that, if the expenditures are kept within the estimates, the tax rate of 35.3 mills is likely to permit of a substantial increase to be made in the reserve for non-collection of taxes."

The auditors report that the balance of $106,000, owing to the sinking fund board at the end of last year, has been paid by the city. During the six months ending June 30th the amount of tax arrears collected and deposited with the board for redemption of the short-term bonds was $322,613. With these collections, 1914, 1915, 1916 and 1917 short-term bonds, totalling $332,000, were redeemed. No new investments were made by the city, and $2,725 of matured debentures were paid.

INVESTMENTS AND THE MARKET

Russell Motor Statement—Winnipeg to Appeal Increased Fares—Montreal Street Railway Fares Set

National Steel Car Co.—Shareholders of the company have received a notice cancelling the general meeting called for October 25. The notice says: "Important negotiations having in view a reorganization of the company have taken place since this notice was sent out, and it is thought that an agreement may be arrived at within the next two or three weeks, in which case a special meeting will be called for the purpose of submitting same to the shareholders for their approval."

Natural Gas Co.—Representatives of the company and of the city of Edmonton submitted their joint application to the Alberta Public Utility Board last week for increased rates. Statements of the high cost of material and other evidence in support of their application were put in by the company's representatives, and will be verified by the board. It was stated that even on the increased rate a deficit of $50,000 in the first two years of operating may be expected, while the third year is put down for a profit of $36,000.

Toronto Paper Co.—A circular has been sent to shareholders in regard to the sale of the majority of shares of the company to the Howard Smith Paper Mills, Ltd., Montreal, at $138 per share. It asks all shareholders who wish to accept the offer to deliver their stock certificates to the Royal Trust Co., Toronto, as soon as possible. The trust company will give temporary receipts for the certificates, and will issue cheques for the stock at the agreed price. *The Monetary Times* is advised that the shares are being purchased by Howard Smith personally, and the shareholders have not yet decided whether they wish them to be acquired by the company.

Moose Jaw Street Railway.—An agreement between the city and the company for amendments to the franchise, which gives the company higher fares and other concessions, and without which the company says it can no longer operate, has been ratified. The agreement gives the company 6-cent fares, cancels $35,000 back taxes, and gives immunity from further taxes during the remaining eleven years of the franchise. It also insures the stockholders 6 per cent. on their investment, and gives to the city 80 per cent. of profits after operating expenses, sinking fund and renewal payments, and dividends are met. Another by-law, which gives the company the right to operate one-man safety cars, has been passed.

Montreal Tramways Co.—At a sitting of the Quebec Public Utilities Commission in Montreal last week, judgment was delivered, settling the fares of the company for the fiscal year ending June 30, 1920. The city of Montreal's application had been to lower the rates fixed by the Montreal Tramways Commission. In one instance the rates are lower, but this is more than made up by the fact that workmen's tickets are altogether abolished. The company had also appealed, claiming that the fares allowed by the Tramways Commission were not sufficient, and the contention of the company is upheld to the extent that workmen's tickets are abolished. The new fares which become effective probably some time next week are:—

Cash fares, 7 cents; by ticket, 5 tickets for 30 cents, good from 5 a.m. to midnight, which may be bought at the company's offices or on the cars; 44 tickets for $2.50, purchasable at the offices of the company or at such places as the Tramways Commission may fix and alter from time to time, and not purchasable on the cars; children's fares and after-midnight fares remain the same. The Tramways Commission had set a rate of 4 tickets for 25 cents, and retained the workmen's tickets. Free transfers are also to be given.

Canadian Wm. A. Rogers, Ltd.—Cheques for dividends for the nine months ended March 31 last at the rate of 7 per cent. per annum on preference stock have been received by the shareholders. An accompanying statement says: "Our auditors report that no net profit was earned by the company during the guarantee year ending with March 31, 1919. We, therefore, have claimed upon William A. Rogers, Ltd., for the full amount of that year's dividend, and payment has been received. No further action with respect to dividends can be taken until after the close of the current fiscal year."

A financial statement for the year ended June 30 shows profits of $42,885, which reduces the debit against the company to $81,569, to which is added $19,217 transferred to realty and plant reserve account, and written off moulds, dies, etc., leaving a debit of $100,786. Improved conditions in the silverware industry are reported, and the statement is made that, notwithstanding the higher selling prices made necessary by cost of production, the volume of orders received has been greater than capacity, and the company is now realizing profits that promise a fair return upon the capital employed. Total assets of the company are now $1,504,322.

Russell Motor Car Co.—The annual financial statement of the company for the year ended July 31, 1919, issued last week, shows a net profit of $457,878, as compared with $628,581 for the corresponding period last year. The balance brought forward on July 31, 1918, of $536,162, compared with $47,580 a year previously placed the company in a strong position, and the report shows a balance of $854,040 carried forward now, after paying dividends on common and preferred stock of 7 per cent., each. Cash on hand has dropped to $183, compared with $175,461 a year ago. On the other hand, investments in Dominion of Canada war bonds have increased from $321,947 to $556,079. Investments in other companies show an increase of about $500,000, and stock on hand has advanced from $144,966 to $208,879. Total assets have risen from $4,971,143 to $5,311,554. The principal change in liabilities is a substantial reduction in bankers' advances from $325,000 to $184,229.
